

Submission Point Number	Submitter First Name	Submitter Last Name	Submitter Org	PlanSection	Support/ Oppose	Submission Summary
5.10 Introduction						
106.8	Kane	Koko	Taraia Marae	5.10 Introduction	Not Stated	Disagree that Maori Values have been given effect. Submission point: In reading the Proposed Plan Change 9, while there are references to Maori values, and legislation that has requirements for tangata whenua – when it comes down to it, cost to remediate and protection of status quo has been given precedence. Relief Sought: Te Mana o Te Wai is in effect
111.2	Lisa	Tuhi	Ngati Hinemanu, Ngai Te Upokoiri	5.10 Introduction	Not Stated	Declaration of guiding principles from a hapuu world view to monitor, check and report on the quality and usage of the awa ngaruroro and its tributaries and tribal estate
120.3	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10 Introduction	Amend	No specific relief sought but states that tangata whenua indicators add value and provide a strong foundation and framework for sound holistic assessment of overall environmental well-being, long term sustainability and sound management.
120.4	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10 Introduction	Amend	No specific relief requested but states that coexistence of parallel world views can exist in this context and that existing outcomes demonstrate that priority focus and measures for Te Ao Pakeha values and commerce are not comprehensive enough to uphold Councils responsibilities
120.66	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10 Introduction	Amend	Amend PC9 to explicitly provide for the re-establishment, restoration and protection of the relationship of Ngati Kahungunu with water and waterways within the TANK catchments including a new objective/s (which reference Ngati Kahungunu values in a new schedule within PC9), policy/policies and rules/methods including attributes and provision for the resourcing, development and implementation of indicators and monitoring using matauranga Maori.
120.70	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10 Introduction	Amend	Reduce the number of objectives and policies in the plan
120.79	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10 Introduction	Amend	If retained in PC9, a set of refined, clear and concise Issue statements could be developed which would assist in guiding the objectives to improve the use and implementation of the Plan. Suggested list of issues provided.
120.80	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10 Introduction	Amend	Redraft or delete the background discussion
120.81	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10 Introduction	Amend	Tangata whenua values must be clearly identified within the plan provisions, including directive policies and rules, alongside other freshwater values
123.19	Jenny	Nelson-Smith	Department of Conservation	5.10 Introduction	Oppose	Background and overview - Delete the background statement and water management overview from PC9.
123.20	Jenny	Nelson-Smith	Department of Conservation	5.10 Introduction	Oppose	TANK issues - Clearly articulate or delete the TANK issues from PC9.
123.21	Jenny	Nelson-Smith	Department of Conservation	5.10 Introduction	Oppose	5.10 Introduction - Delete the introduction to 5.10 and provide a schedule of the identified values and where they apply in respect of each FMU within the body of PC9 as Schedule X. Include objectives and/or policies which consider and recognise Te Mana o te Wai with particular reference to Te Hauora o te Taiao, Te Hauora o te Wai and Te Hauora o te Tangata. Provide consequential track changes to Table 2A of the RRMP to reflect the values of PC9 and where they apply.
126.1	James	Lyver	Maungaharuru-Tangitū Trust	5.10 Introduction	Amend	Background - paragraph 2. Retain approach and amend wording in paragraph 2 to read, The Plan Change also introduces a range of new methods aimed at achieving the stated <u>freshwater</u> objectives for aquatic ecosystems that have been developed through the TANK plan change process. These new methods and management approaches reflect the collaborative nature of the process and build on the a more integrated and <u>community</u> approach to managing freshwater that was <u>requested by iwi partners and the community</u> .
126.2	James	Lyver	Maungaharuru-Tangitū Trust	5.10 Introduction	Amend	Background - Water Management Overview - Amend paragraph 1 under the heading “Water Management Overview” to read: This approach, also reflected in <u>implements the NPSFM2014, and</u> requires that the community identify the values for <u>each</u> FMU, identify attributes and assign attribute states, formulate freshwater objectives and the limits or targets that are required to achieve freshwater objectives. which the water is to be managed, adopt objectives in relation to those values and establish methods, including limits to ensure those objectives will be met.
126.3	James	Lyver	Maungaharuru-Tangitū Trust	5.10 Introduction	Oppose	Issue 1 - Paragraph 4 - Amend paragraph 4 to read: Some e Existing land and water use practices can affect <u>have diminished</u> the mauri of water and or adversely affected ecosystem health. Some of the effects also arise from activities and events that occurred decades in the past, including through vegetation clearance, floods and flood protection, river diversions, wetland drainage and earthquakes. Changes to landscape, its waterbodies and vegetation have had enduring adverse effects on tangata whenua cultural practices and their kaitiakitanga role. The Plan recognises the legacy of historical activities and events that have occurred in the past whether managed or unmanaged, including <u>vegetation clearance, floods and flood protection, river diversions, wetland drainage, discharges from municipal centres and earthquakes</u>

126.4	James	Lyver	Maungaharuru-Tangitū Trust	5.10 Introduction	Oppose	Issue 2 - Paragraphs 2, 3 and 6 Amend paragraphs 2, 3 and 6 of Issue 2 to read: Water quality is affected by direct discharges of contaminants, including in urban stormwater, and also as a result of non- point source discharge of diffuse contaminants arising from land use activities and cumulatively affecting water quality. <u>The impact of contaminant inputs into TANK estuarine systems is a significant issue. The Waitangi and Ahuriri estuaries both show declining trends for ecosystem health¹ with consequential adverse effects on the values held for those aquatic ecosystems. New management frameworks are required to reverse declining trends in estuarine ecosystems. Adverse effects from point source discharges are being reduced through resource consenting processes</u> The impact of contaminant inputs into estuary ecosystems is also a significant issue as the Waitangi and Ahuriri estuaries both show declining trends for ecosystem health with consequential adverse effects on the values held for those aquatic ecosystems." <u>1 – Refer State of the Hawke's Bay Coastal Marine Environment: 2013 to 2018 (April 2020)</u>
126.5	James	Lyver	Maungaharuru-Tangitū Trust	5.10 Introduction	Support	Background - 5.10 - Introduction - Retain Figure 1 - community values and attributes for water management and Figure 2 - Wariu (value) groups and aspects for management in PC9 and insert new paragraph to read: <u>Figure 1 and Figure 2 are reflective of the process to determine freshwater objectives for PC9 and must not be used in any resource consenting process. That is, by an applicant to support an application, by a submitter to oppose/support an application that is publicly notified, and by a planning officer to make a decision on an application.</u>
132.2	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10 Introduction	Amend	Delete the "TANK VALUES Attributes for water quality"
132.3	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10 Introduction	Amend	Delete or amend the interpretation part of Figure 2 to express the broader aspects of each wariu in the main diagram
132.7	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10 Introduction	Amend	Amend issue statements to be brief, clear and concise, followed by one or two objectives, then policies. Restructured issue statement order provided. OR Delete issue statements and draft clear objectives, policies and rules
132.33	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10 Introduction	Amend	Delete introductory comments on TANK plan change processes that are superfluous and do not contribute anything meaningful or constructive
132.80	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10 Introduction	Amend	Rearrange the Issue Statements' content by specific topic or theme and condense the content in the Issue Statements.
132.81	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10 Introduction	Not Stated	Separate Mauri and other tikanga Maori values and issues and combine them into two distinct issue statements. Include acknowledgment of the principles of the Treaty of Waitangi contained in Schedule 1.
132.82	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10 Introduction	Amend	Move the issue statements so where they relate to a specific objective, each of the statements immediately precede the relevant objective and associated policies.
132.190	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10 Introduction	Amend	Provide for an "Implementation Plan" for PC9, that includes a summary of specific actions and their timing to meet certain dates and commitments in the plan, and full implementation of different parts of the plan. Include monitoring of Mauri and budget provision through reference to long-term plans, and achievement of targets and elements of the NPS-FM 2020.
142.3	Bill	Glazebrook	Big Hill Station Limited	5.10 Introduction	Support	Support the acknowledgement that there are water bodies whose actual state is the desired state.
183.4	Huia Libya	Huata Huata	Mangaroa Marae	5.10 Introduction	Oppose	No specific relief requested but implies Change 9 should enable the sharing of power and decision-making for the governance, management, consenting and monitoring or water quality and quantity
195.8	Peter	Matich	Federated Farmers of New Zealand	5.10 Introduction	Amend	That Issue 1 be retained as notified.
195.9	Peter	Matich	Federated Farmers of New Zealand	5.10 Introduction	Amend	That Issue 2 be amended as follows: ... Adverse effects from point source discharges are being reduced <u>where they are reduceable</u> through resource consenting processes. ... <u>Land use changes Intensification of discharges from land use change can also result in an increase in the amount of contaminants entering water. New management systems are required to ensure water quality can be maintained or improved over time when these sorts of land use change occur in situations where there is a demonstrable risk of degradation of the freshwater resource from land use intensification.</u> ...
195.10	Peter	Matich	Federated Farmers of New Zealand	5.10 Introduction	Not Stated	That Issue 3 be amended as follows: ... There is a need to establish <u>workable</u> flow management regimes and allocation limits to guide the abstraction of water... For some water bodies, flooding and drainage management activities as well as abstractive uses of water <u>have resulted in may contribute to</u> significant adverse effects on aquatic ecosystems... And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.

195.11	Peter	Match	Federated Farmers of New Zealand	5.10 Introduction	Not Stated	That Issue 4 be amended as follows: ... In some areas where over-allocation has occurred, the resulting management regime will have variable impacts on some landowners and water users, particularly where the introduction of limits mean that new water use is restricted and opportunities for land use change intensification are also reduced need to be carefully managed . And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.12	Peter	Match	Federated Farmers of New Zealand	5.10 Introduction	Support	That Issue 5 be retained as notified.
195.13	Peter	Match	Federated Farmers of New Zealand	5.10 Introduction	Amend	That Issue 6 be amended as follows: ... In some places in the TANK catchments, a significant investment into mitigation measures may be required to meet those objectives. A staged approach to change <u>is practical, and will the provides sufficient enable time to make changes and enables</u> for people and communities to undertake adaptive management to continue to provide for their social, economic and cultural and tikanga Maori wellbeing/ hauora <u>in the short term in ways that are within their range of capabilities</u> . And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.14	Peter	Match	Federated Farmers of New Zealand	5.10 Introduction	Amend	That Issue 7 be amended as follows: There are information gaps <u>about water use</u> throughout these TANK catchments, with some arising because of the values-based approach to water management and the wider, more holistic approach that has been taken in relation to environmental management. It is partly due to reliance on piecemeal analysis of individual impacts on the water resource that occurs in applying for resource consents at the level of individual properties on a case-by-case basis. This contributes to 'patchy' information of varying quality being generated at different times throughout the catchment. Some of this results from d <u>Developing understanding about the complex inter-relationships within freshwater and land systems, both at a local sub-catchment scale and in relation to the wider freshwater - coastal water interface is increasingly important in understanding how to manage freshwater resources at the catchment scale.</u> In future, technology land and water practices and information availability are likely to change, both increasing understanding of 'state' and impacts, and also improving management and mitigation responses. The scale of information collection is also likely to change as more focussed approaches to water management are used at a sub-catchment or marae scale, <u>which is more useful for catchment-scale analysis.</u> And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.15	Peter	Match	Federated Farmers of New Zealand	5.10 Introduction	Amend	That Issue 8 be amended as follows: Climate is changing, which also has an impact on natural climate variability. The challenge which lies ahead is not knowing the timing and extent to which <u>adapting to climate change and becoming more resilient. This includes taking account of climate variability will change further and how this may impact on water flows, levels and quality, or the precise timeframes within which these anticipated changes will occur.</u> HBRC is required to have particular regard to the effects of climate change when managing the use, development, and protection of natural and physical resources. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.16	Peter	Match	Federated Farmers of New Zealand	5.10 Introduction	Support	That 5.10 Introduction be retained as notified.
201.1	Liz	Munroe	Heretaunga Tamatea Settlement Trust	5.10 Introduction	Amend	Paragraphs 5, 6 & 7 of the background - comments about the input and participation level of Mana Whenua are subjective from the author's viewpoint and open to challenge from Mana Whenua are subjective from the author's viewpoint and open to challenge from Mana Whenua. Paragraph 5 - delete 'and the significant influence of Mana Whenua'.
201.2	Liz	Munroe	Heretaunga Tamatea Settlement Trust	5.10 Introduction	Amend	Paragraph 6 - paragraph would be more accurate if it was factual only. Reword to make clear that Council and Mana Whenua are at the beginning of a journey to better understand, define and set up frameworks for, providing for Treaty of Waitangi obligations.
201.3	Liz	Munroe	Heretaunga Tamatea Settlement Trust	5.10 Introduction	Amend	Paragraph 7 - include a separate section iwithin the background that speaks specifically to Mana Whenua matters and how these are reflected within the plan and process. Mana Whenua should be offered to write this section, with comment from Council staff.
201.4	Liz	Munroe	Heretaunga Tamatea Settlement Trust	5.10 Introduction	Amend	Paragraph 8 - reword - cost to people and region ought not to be put as reason to excuse addressing the complexity of managing freshwater, nor should there be any relevance to the absence of a quick fix.

201.5	Liz	Munroe	Heretaunga Tamatea Settlement Trust	5.10 Introduction	Not Stated	Background section can be more direct in stating the impact on freshwater that has occurred because of competing priorities and the higher weighting that has been given to economic development over the years.
201.6	Liz	Munroe	Heretaunga Tamatea Settlement Trust	5.10 Introduction	Not Stated	Water Management Overview section - wishful to assert that Maori values have been incorporated to the required legal standard when Mana Whenua have continued to challenge these provisions along the way in the drafting process.
201.7	Liz	Munroe	Heretaunga Tamatea Settlement Trust	5.10 Introduction	Not Stated	Water Management Overview section- reference to NPS FM and Outstanding Water Bodies is bold and to some extent damning as the NPS FM 2020 came out in Aug and PC9 anticipates that no major changes will be made to the OWB plan change.
201.8	Liz	Munroe	Heretaunga Tamatea Settlement Trust	5.10 Introduction	Oppose	Issues Statements - stage each issue specifically, if each statement is concise and refers to one or 2 issues the linkage to relevant objectives, policies and rules is clearer. Focus issue for clarity of intent and desired outcomes.
201.9	Liz	Munroe	Heretaunga Tamatea Settlement Trust	5.10 Introduction	Oppose	Issue statements - using Maori concepts within the same context as other concepts is problematic. Equates the other as the definition of the concepts or infers that the concepts are interchangeable which is wrong. Maori and ecosystem health are not comparable concepts.
201.10	Liz	Munroe	Heretaunga Tamatea Settlement Trust	5.10 Introduction	Not Stated	Mana Whenua values and perspectives - any recognition of iwi values is at a surface level and short of any recognition and provision as required in sections 6(e), 7(a) and 8 of the RMA. Frequent use of te reo Maori implies Mana Whenua values have been recognised and provided for in policies and rules when they have not been operationally.
201.11	Liz	Munroe	Heretaunga Tamatea Settlement Trust	5.10 Introduction	Not Stated	Mana Whenua values and perspectives - specific objectives and policies are required, enabling the relationship of Maori with water, together with an accompanying policy and new schedule that provides for Mana Whenua to undertake monitoring throughout the life of the plan to enable the application of a diversity of systems of values and knowledge, such as matauranga Maori to the management of freshwater within the TANK catchments.
233.2	Dr Nicholas	Jones	Hawke's Bay District Health Board (HBDHB)	5.10 Introduction	Amend	Include new issue: Protection of Drinking Water Sources
233.3	Dr Nicholas	Jones	Hawke's Bay District Health Board (HBDHB)	5.10 Introduction	Amend	Modification to human health attributes in Figure 1 - include cyanobacteria, the quantity of water and the presence of pathogens and other chemical contaminants, and waiora.

5.10.1 TANK Objectives

50.2	Alastair & Jo	Lawrence	Olrig Limited	5.10.1 TANK Objectives	Support	In general we support the general trust of the objectives as set out.
50.8	Alastair & Jo	Lawrence	Olrig Limited	5.10.1 TANK Objectives	Amend	The objectives of TANK PC9 should be reviewed with a view to including specific objectives and policies as to role the plan can play in facilitating sustainable economic growth in Hawkes Bay.
67.3	Helen	Liddle	Focus Maraekakaho	5.10.1 TANK Objectives	Support	No specific decision sought but states support for 5.10.1 TANK objectives
90.5	Sarah	Millington		5.10.1 TANK Objectives	Not Stated	The TANK Plan needs to specify objectives, policies and targets that set up an effective and directive regulatory system with firm bottom lines to monitor and enforce the requirements of the NPS FW. With regards to effects of land use and water takes.
97.8	Lesley	Wilson	DN & LR Wilson Ltd	5.10.1 TANK Objectives	Amend	Clarify whether the lists under the Objectives and Priorities etc are in order of importance or not. It appears that some are, while others are unclear.
120.12	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.1 TANK Objectives	Amend	Amend Change 9 to include new objective and policy relating to restoring and revitalising the mauri and te mana o te wai of the TANK catchments and Heretaunga muriwaihou; recognising and providing for Ngati Kahungunu's relationships, tikanga and beliefs with their ancestral waters and taonga; and repatriate and protect tangata whenua values, customs, culture and relationships with these waters. Specific wording provided.
120.13	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.1 TANK Objectives	Amend	Amend Change 9 to include clear objectives and policies to maintain or improve water quality, safeguard life-supporting capacity, ecosystem health and human health, protect the significant values of outstanding freshwater bodies and wetlands and provide for other instream freshwater values (including tangata whenua values).
120.64	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.1 TANK Objectives	Amend	Re-order the objectives so that the key priorities are first, then objectives relating to the values for each water body, then the methods based (actions) and consideration (decision making) objectives. Further specification provided.
120.78	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.1 TANK Objectives	Amend	Objectives must be clearly articulated and ambitious but reasonable
132.23	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10.1 TANK Objectives	Amend	Move Objectives 1, 2, 17 and 18 and associated schedules to a nonregulatory section of the proposed plan
132.24	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10.1 TANK Objectives	Amend	Merge objectives where they seek to address the same or similar issues across the four TANK catchments.
132.83	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10.1 TANK Objectives	Amend	Redraft the existing objectives so they are clearly stated outcomes which address the resource management issues.
145.3	Peter	Raikes	Awanui Station	5.10.1 TANK Objectives	Amend	A separate objection should be introduced that reflects the implications of the RMA Part 2 to demonstrate and underscore HBRC's commitment to recognise and provide for land owners and leaseholders rights to operate their properties for profitable use, for the economic wellbeing of themselves and the regional economy without undue or unwarranted obstruction or interference.
193.15	Bruce	Mackay	Heinz Wattie's Limited	5.10.1 TANK Objectives	Not Stated	The objectives in the Plan Change are commendable but fall short when considering the foreseeable water needs of future generations.
194.31	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	5.10.1 TANK Objectives	Support	OBJ TANK 2, 4, 5 and 8 - Retain as drafted.
197.1	Lilly	Lawson	Beef + Lamb New Zealand Ltd	5.10.1 TANK Objectives	Support	Retain as proposed.
202.8	Donna	Awatere Huata	Māori Climate Commission	5.10.1 TANK Objectives	Amend	Supports a specific objective providing for Tangata Whenua to undertake monitoring throughout the life of the plan to enable the application of a diversity of systems of values and knowledge, such as matauranga maori to the management of freshwater within the TANK catchments

206.6	Waiariki	Davis	Waipatu Marae	5.10.1 TANK Objectives	Oppose	Recognise Mana o Te Wai
210.2	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	5.10.1 TANK Objectives	Not Stated	No specific relief requested but raises concerns with the way objectives are drafted. More discussion and recommended approaches provided.
210.3	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	5.10.1 TANK Objectives	Amend	Remove all 18 objectives from the plan and replace with new objectives. Specific wording for 6 new objectives provided.
210.15	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	5.10.1 TANK Objectives	Amend	Clarify the "freshwater objectives" in respect of all FMUs. Consider a table similar to that used by Waikato Regional Council in their decisions on PC1.
210.24	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	5.10.1 TANK Objectives	Oppose	Remove from the plan and replace with the objectives suggested earlier in our submission.
General Objectives						
17.2	Richard	Riddell	Olrig Limited	General Objectives	Support	Objectives 1 and 2 - support provisions which recognise that successful environment outcomes for freshwater ecological health require landowner and community support and leadership. Ask for these to be retained as proposed and for policies to be amended or included to enable catchment collective approaches to management.
21.2	Robert & Helen	Patullo	Newstead Farm Ltd	General Objectives	Support	Objectives 1 and 2 - support provisions which recognise that successful environment outcomes for freshwater ecological health require landowner and community support and leadership. Ask for these to be retained as proposed and for policies to be amended or included to enable catchment collective approaches to management.
40.2	Jeremy	White	J and S White Contracting Ltd	General Objectives	Support	Objectives 1 and 2 - support provisions which recognise that successful environment outcomes for freshwater ecological health require landowner and community support and leadership. Ask for these to be retained as proposed and for policies to be amended or included to enable catchment collective approaches to management.
45.4	Sydney	Parks	Westbrook Farm Ltd	General Objectives	Support	Objectives 1 and 2 - support provisions which recognise that successful environment outcomes for freshwater ecological health require landowner and community support and leadership. Ask for these to be retained as proposed and for policies to be amended or included to enable catchment collective approaches to management.
50.9	Alastair & Jo	Lawrence	Olrig Limited	General Objectives	Support	Support the proposed self-governing framework of catchment collectives. Devolving responsibility to stakeholder groups to operate within defined guidelines is an excellent initiative. Each catchment will have it's own characteristics and can tailor a plan to meet those characteristics (rather than one size fitting all). We are confident that self-governance, including peer pressure, will produce superior outcomes in a more cost effective manner for each farmer.
64.2	Owen	Tiopira	Hinemanu, Ngai Tuho	General Objectives	Amend	Amend Change 9 so to get our awa back to its rightful owners of that hapu
65.2	Nadia	Staples	Mahuika, Ngati Here, Hinemanu	General Objectives	Amend	Amend Change 9 to enable us united whanau to co-govern, co-ordinate, co-operate, co-municate on behalf of the awa
90.7	Sarah	Millington		General Objectives	Not Stated	Include an over-arching objective in the TANK Plan that tangata whenua are equal partners in a co-management model of the catchment areas that gives effect to te Mana o te Wai, as well as an explicit framework for how this will be implemented.
109.2	Stuart	Macintyre	Turamoe Farm	General Objectives	Support	Support OBJ TANK 1 and 2 - which recognise that successful environment outcomes for freshwater ecological health require landowner and community support and leadership.
112.2	Ainsley	Harte		General Objectives	Support	Objectives 1 and 2 - support provisions which recognise that successful environment outcomes for freshwater ecological health require landowner and community support and leadership. Ask for these to be retained as proposed and for policies to be amended or included to enable catchment collective approaches to management.
113.4	Teree	Brown	Te Tumu Paeroa	General Objectives	Support	Supports the integrated management approach to freshwater and the effects of land use to ensure the achievement of Te Mana o te Wai and in alignment with Matauranga Maori which is based on the interconnectedness of all ecosystems
113.5	Teree	Brown	Te Tumu Paeroa	General Objectives	Not Stated	The wording of this section as a whole is not clear in how the objectives contribute to Te Mana o te Wai. We support these changes as they do improve the mauri of the wai and consequently the freshwater quality. However, by demonstrating the specific link to Te Mana o te Wai it provides an appropriate connection to Te Mana o te Wai.
113.6	Teree	Brown	Te Tumu Paeroa	General Objectives	Not Stated	There is a deficiency in the explanation and definition of Mauri in the overall section, and the Maori Trustee believes it is appropriate to include further discussion and specific objectives that focus on the improvement of Mauri.
120.5	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	General Objectives	Amend	Amend Change 9 to address the wider range of allocative models available, to ensure sustainable management and give effect to Te Mana o Te Wai and Treaty principles.
120.10	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	General Objectives	Amend	Amend Change 9 to include directive provisions that introduce a mixed allocative model that enables recognition of competing interests, giving appropriate priority to Te Mana o Te Wai and Ngati Kahungunu's cultural and Treaty interests. Further details on proposed allocation model provided.
120.83	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	General Objectives	Amend	Amend Change 9 to include explicit provisions to recognise and provide for section 6(e) of matters of national importance

123.22	Jenny	Nelson-Smith	Department of Conservation	General Objectives	Oppose	General objectives - all. Delete and restate all the objectives except objective 9 as outcomes which give effect to the NPSFM 2014 and RPS. Reduce the overall number of objectives and increase their clarity of purpose using concise and consistent RMA and NPSFM 2014 language and terms. Delete all sub-headings associated with the objectives or alternatively reorder and reword the sub-headings to reflect their purpose (e.g., overarching vs system specific objectives like surface water and groundwater) ... continued in submission
123.23	Jenny	Nelson-Smith	Department of Conservation	General Objectives	Oppose	Amend in a way that: - the mauri of waterbodies is protected and restored to provide for Te Hauora o te Taiao, Te Hauora o te Wai and Te Hauora o te Tangata and to provide for the values in Schedule X -safeguards life-supporting capacity and aquatic ecosystem processes -the connectivity between land, surface water, groundwater, freshwater and the coast - Ki uta, ki tai is recognised - provides for the relationship of Maori and their culture and traditions with their ancestral lands, water, sites, waahi tapu, and other taonga.
127.4	Tania	Eden	Te Taiwhenua o Te Whanganui a Orotu	General Objectives	Not Stated	PC9 raises the issue of allocation of water within degraded and over-allocated TANK catchments. It does not use the allocative tools that are available to give effect to Te Mana o Te Wai, and address key cultural parameters under sections 5, 6(e), 7(a) and Treaty principles.
127.5	Tania	Eden	Te Taiwhenua o Te Whanganui a Orotu	General Objectives	Not Stated	Plan Change should be amended to address effects, provisions, general and specific relief, and consequential relief identified by submissions made by tangata whenua, mana whenua and Iwi. We are calling for Plan Change 9 to be withdrawn as it fails to address the relevant statutory and planning framework, including rangatiratanga, kaitiakitanga, Part 2 RMA and the National Policy Statement on Freshwater 2020 (NPSFM) and (to the extent relevant) the NPSFM 2017
132.8	Marei	Apatu	Te Taiwhenua o Heretaunga	General Objectives	Amend	Move Objective 1 and others of a similar nature to a non-regulatory part of Change 9.
132.85	Marei	Apatu	Te Taiwhenua o Heretaunga	General Objectives	Amend	Add new objectives 2A, 3A, 6A, and 6B relating to maintaining water quantity and quality, and abstraction in the four TANK catchments . Specific wording provided.
132.86	Marei	Apatu	Te Taiwhenua o Heretaunga	General Objectives	Amend	Amend proposed PC9 policies, rules, and schedules to promote the achievement of the new proposed objectives.
133.1	Wi	Huata		General Objectives	Support	Support the aspects of PC9 that are in line with Te Mana O Te Wai that moves Councils closer towards acknowledgement that Maori own the water.
157.3	Furness Keriana	Armstrong	Managroa Marae	General Objectives	Oppose	Without proper input from tangatawhenua, the Proposed Plan only benefits the other Treaty partner and not us
191.7	Rangiwhiua	Robin	Mangaroa Marae	General Objectives	Oppose	Restore and protect - to provide guardianship and work as one to look after and improve the Bridge Pa streams and the taiao (environment) within 3 to 5 years
197.2	Lilly	Lawson	Beef + Lamb New Zealand Ltd	General Objectives	Amend	Amend existing and include as required new objectives to give effect to the following intent: •Provide for a range and flexibility in land use... •Restrict the reach of objectives to the values of the NPS-FW... • Reference to the management of water quality pertains to the achievement of the objectives... • Otherwise water quality is maintained where the objectives are met. • Attribute state should be set to achieve the values....
209.5	Waiariki	Davis		General Objectives	Not Stated	Recognise Mana o te Wai.
210.20	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	General Objectives	Amend	We hope to see [integration of tangata whenua thoughts and concern] remedied through the hearing process.
223.2	Jenny	Winipere Mauger	Ngā Kaitiaki o te Awa a Ngaruroro	General Objectives	Not Stated	No specific relief sought but states that Mana Whakahono a Rohe provision in the RMA seems to have been wilfully neglected by HBRC. Similarly, Te Mana o Te Wai (the authority of water itself) has been all but disregarded in the proposed PC9.
223.3	Jenny	Winipere Mauger	Ngā Kaitiaki o te Awa a Ngaruroro	General Objectives	Not Stated	No specific relief stated but states that If Matauranga Maori (knowledge informed by Maori worldviews) had been woven into the decision making of our water values and management, our respective water bodies would be in relatively good shape for all to interact within and around.
223.4	Jenny	Winipere Mauger	Ngā Kaitiaki o te Awa a Ngaruroro	General Objectives	Not Stated	No specific relief sought but states that Tikanga (Maori customs and lore) has largely been omitted
229.2	Angie	Denby	Ahuriri Estuary Protection Society INC	General Objectives	Amend	We support the recognition of Te Mana O te Wai. It needs to be at the forefront of all discussions and decisions about fresh water. On that basis, we wish to see ecosystem health taking priority over all activities in the Ahuriri Estuary.
229.3	Angie	Denby	Ahuriri Estuary Protection Society INC	General Objectives	Amend	Iwi views are important also, and we need their values and concepts captured from a local perspective.
229.9	Angie	Denby	Ahuriri Estuary Protection Society INC	General Objectives	Amend	We urge council to think of environments holistically, put Te Mana o Te Wai at the centre of everything they do, focus on ecosystem health, work genuinely to restore the environment in our region, and protect biodiversity for future generations.
233.4	Dr Nicholas	Jones	Hawke's Bay District Health Board (HBDHB)	General Objectives	Support	The HBDHB supports these objectives but recommends the Plan makes it clearer as to how policies and rules give effect to them. It would be useful to include a list of policies and rules that specifically give effect to these objectives.

OBJ TANK 1						
2.1	Angus	Wall		OBJ TANK 1	Support	Support
23.3	Kerry	Sixtus	Pattullo's Nurseries Limited	OBJ TANK 1	Support	No specific decision requested but states support for requiring all growers to operate at good management practice.
32.3	Kent	Griffiths		OBJ TANK 1	Support	No specific decision requested but states support for requiring all growers to operate at good management practice.
35.3	Colin	Campbell		OBJ TANK 1	Support	No specific decision requested but states support for requiring all growers to operate at good management practice.
37.3	Greg	Evans	Dartmoor Estate Ltd	OBJ TANK 1	Support	No specific decision requested but states support for requiring all growers to operate at good management practice.
38.3	Roger	Brownlie		OBJ TANK 1	Support	No specific decision requested but states support for requiring all growers to operate at good management practice.
42.3	Glenn	Riddell	Glenmore Orchard	OBJ TANK 1	Support	No specific decision requested but states support for requiring all growers to operate at good management practice.

79.3	Richard	Penreath		OBJ TANK 1	Support	No specific decision requested but states support for requiring all growers to operate at good management practice.
86.3	Peter	Scott		OBJ TANK 1	Support	No specific decision requested but states support for requiring all growers to operate at good management practice.
91.2	Johnny	Milmine	Berry Farms NZ	OBJ TANK 1	Support	No specific decision requested but states support for requiring all growers to operate at good management practice.
95.3	Johnny	Milmine	Prime Limes	OBJ TANK 1	Support	No specific decision requested but states support for requiring all growers to operate at good management practice.
96.3	Mike	Davis	Davis Orchards Ltd	OBJ TANK 1	Support	No specific decision requested but states support for requiring all growers to operate at good management practice.
97.3	Lesley	Wilson	DN & LR Wilson Ltd	OBJ TANK 1	Support	No specific decision requested but states support for requiring all growers to operate at good management practice.
104.3	John	Loughlin	Rockit Global Limited	OBJ TANK 1	Support	No specific decision requested but states support for requiring all growers to operate at good management practice.
105.3	Scott	Lawson		OBJ TANK 1	Support	No specific decision requested but states support for requiring all growers to operate at good management practice.
106.3	Kane	Koko	Taraia Marae	OBJ TANK 1	Not Stated	Te Mana o T e Wai - The link between Te Mana o Te Wai and the proposed Plan Change 9, is that there is no real balance, whereby social and cultural values held by the community continue to be eroded to prioritise economic activities and the over allocation water resources to farmers, orchardists, vineyards etc. it has a detrimental effect to the health and wellbeing of our <u>waterways, our people, and the environment.</u>
110.3	Edward	Whyte	Whyte & Co	OBJ TANK 1	Support	No specific decision requested but states support for requiring all growers to operate at good management practice.
111.8	Lisa	Tuhi	Ngati Hinemanu, Ngai Te Upokoiri	OBJ TANK 1	Not Stated	To preserve and protect the integrity of matauranga maori and intricate tribal korero belonging to that of our said hapuu from <u>being used to our detriment</u>
113.7	Teree	Brown	Te Tumu Paeroa	OBJ TANK 1	Amend	Recommends the inclusion of the following; Recognising the unique characteristics of Maori land and ensuring that, as a result of the legal framework which the land is operated under, there is equal access to sustainable economic development options, including the allocation and use of water <u>in the development of Maori Land.</u>

120.85	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	OBJ TANK 1	Amend	Amend Change 9 to include specific provisions to recognise and give effect to Te Mana o te Wai, protect mauri, and provide for Te Hauora o te Taiao, Te Hauora o te Wai and Te Hauora o te Tangata, consistent with the framework described in the NPS FM (2020) and (to the extent relevant) the NPS FM (2017). Specific detail on giving effect to Te Mana o Te Wai provided.
122.3	Richard	Penreath	Ngai Tukairangi Trust	OBJ TANK 1	Support	No specific decision requested but states support for requiring all growers to operate at good management practice.
132.84	Marei	Apatu	Te Taiwhenua o Heretaunga	OBJ TANK 1	Amend	Add two new objectives so they apply across the four TANK catchments, and amend PC9 policies, methods and schedules where they are in conflict with these objectives. Suggested wording provided.
135.3	Anna	Wilkes	Ravensdown Limited	OBJ TANK 1	Amend	Amend Tank OBJ 1 "support good decision making by resource users including rural and urban communities through marae and hapu initiatives, community or other catchment management programmes and monitoring initiatives, urban stormwater programmes, landowner collectives, farm management environment plans and industry good practice programmes."
185.3	Allen	Kittow	Tremaine Farms Ltd	OBJ TANK 1	Support	No specific decision requested but states support for requiring all growers to operate at good management practice.
186.3	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	OBJ TANK 1	Support	No specific decision requested but states support for requiring all growers to operate at good management practice.
194.18	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	OBJ TANK 1	Amend	OBJ TANK 1 should be revised so that it is an outcome statement that responds to an identified resource management issue (but otherwise retained).
195.17	Peter	Matich	Federated Farmers of New Zealand	OBJ TANK 1	Amend	Delete OBJ TANK 1 sub clauses a-c OR restate sub clauses a-c as policies. Tracked changes provided. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
196.3	Julian	Odering	Oderings Nurseries	OBJ TANK 1	Support	No specific decision requested but states support for requiring all growers to operate at good management practice.
201.16	Liz	Munroe	Heretaunga Tamatea Settlement Trust	OBJ TANK 1	Amend	The Council, Mana Whenua and the urban and rural community work together in a way that recognises and provides for the kaitiaki and guardianship roles they each play in freshwater management and; a) recognise the importance of monitoring, resource investigations and the use of matauranga Maori to inform decisions making and limit setting or sustainable management' b) ensure good land and water management practices are followed; c) support good decision making and compliance by resource users
203.2	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	OBJ TANK 1	Support	Retain as notified.
211.3	Brian	McLay		OBJ TANK 1	Support	No specific decision requested but states support for requiring all growers to operate at good management practice.
214.3	Scott	Lawson	Hawkes Bay Vegetable Growers Association	OBJ TANK 1	Support	No specific decision requested but states support for requiring all growers to operate at good management practice.
215.3	Peter	Dooney	Dooney Partnership	OBJ TANK 1	Support	No specific decision requested but states support for requiring all growers to operate at good management practice.
218.3	Adrian	Mannering	Irrigation Services	OBJ TANK 1	Support	No specific decision requested but states support for requiring all growers to operate at good management practice.
219.3	Michael & Julie	Russell		OBJ TANK 1	Support	No specific decision requested but states support for requiring all growers to operate at good management practice.
220.3	Steve	Gillum	Gillum Springfield Trust	OBJ TANK 1	Support	No specific decision requested but states support for requiring all growers to operate at good management practice.
221.3	WT	Scott		OBJ TANK 1	Support	No specific decision requested but states support for requiring all growers to operate at good management practice.
PlanSection: OBJ TANK 2						
2.4	Angus	Wall		OBJ TANK 2	Support	Support
12.1	Alec	Duncan	Ministry of Education	OBJ TANK 2	Support	Support OBJ TANK 2 - Retain as proposed.
29.5	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	OBJ TANK 2	Amend	Amend OBJ TANK 2.a to recognise the overriding requirement for partnership in setting objectives, limits and targets. Alternatively, replace "upheld" in OBJ TANK 2.a with "consider and recognise".
58.4	Peter	Wilson	Hawkes Bay Fish and Game Council	OBJ TANK 2	Amend	Amend Clause b to insert "the habitat of trout and salmon" after "indigenous biodiversity"
97.85	Lesley	Wilson	DN & LR Wilson Ltd	OBJ TANK 2	Not Stated	No specific relief requested but states that there is no mention for the necessity of food and fibre production to be taken into account when setting objectives, limits and targets. This is a major omission. Food security should be a priority. Part b) Mentions a continuous improvement approach which is above the NPS recommendation of maintain or improve.
113.8	Teree	Brown	Te Tumu Paeroa	OBJ TANK 2	Amend	Recommends the inclusion of the following; Recognising the unique characteristics of Maori land and ensuring that, as a result of the legal framework which this land is operated under, there is equal access to sustainable economic development options, including the allocation and use of water in the use and development of Maori Land. Recognising the overarching imperative of Te Mana o te Wai in the application of all policies in this plan
120.87	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	OBJ TANK 2	Amend	The proposed TANK plan should recognise and provide for the values of Outstanding Water Bodies [PC7], and should not compromise or influence the values of Outstanding Water Bodies.

120.88	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	OBJ TANK 2	Amend	Heretaunga Aquifer Muriwaihou should be recognised as Taonga and an Outstanding Water Body.
123.9	Jenny	Nelson-Smith	Department of Conservation	OBJ TANK 2	Not Stated	Include schedules of FMUs and freshwater values and clearly define where they apply.
126.6	James	Lyver	Maungaharuru-Tangitū Trust	OBJ TANK 2	Oppose	Delete Objective 2 and replace with the following wording to read: <u>“Land and freshwater in the Tutaekuri, Ahuriri, Ngaruroro and Karamu catchments are sustainably managed as integrated natural resources in a way that:</u> a) provides for Te Hauora o te Taiao, Te Hauora o te Wai and Te Hauora o te Tangata; b) safeguards life-supporting capacity and aquatic ecosystem processes; c) recognises the connection between surface water and groundwater and between freshwater, land and the coast (ki uta ki tai); d) provides for the significant values of wetlands and outstanding freshwater bodies e) recognises the reasonably foreseeable impact of climate change; f) enables communities to provide for their economic wellbeing within limits; so that the freshwater objectives in Schedule 26
132.71	Marei	Apatu	Te Taiwhenua o Heretaunga	OBJ TANK 2	Amend	Include table of Outstanding Waterbodies and their values in Change 9
132.72	Marei	Apatu	Te Taiwhenua o Heretaunga	OBJ TANK 2	Amend	Provide for the protection of Outstanding Waterbodies water quality and their inherent significant values, in particular, the water quality in the Heretaunga Plains Aquifer System and its recharge zones, and recharge quantities
135.4	Anna	Wilkes	Ravensdown Limited	OBJ TANK 2	Amend	Amend OBJ TANK 2 as follows: <i>When setting objectives, limits and targets;</i> ... <i>b) A continuous improvement approach to the use and development of natural resources and t</i> The protection of indigenous biodiversity is adapted and the collective sustainable management of freshwater is enabled:
145.4	Peter	Raikes	Awanui Station	OBJ TANK 2	Amend	The word 'upheld' should be changed to - 'considered in decision making process'. There is no mandate that Council can take from law that Maori or other interests are overriding considerations in any decision-making process. Objectives and Policies in the plan should guard against inbuilt rulings and prejudice against landowners and those seeking to make progress.
195.18	Peter	Matich	Federated Farmers of New Zealand	OBJ TANK 2	Amend	That OBJ TANK 2 be amended as follows: When setting objectives, limits and targets; ... c) The kaitiakitanga role of tangata whenua and their whakapapa and cultural connection with water are recognised and provided for shall be had particular regard to; • <u>The effects of climate change shall be had particular regard to.</u> And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
201.17	Liz	Munroe	Heretaunga Tamatea Settlement Trust	OBJ TANK 2	Amend	When setting objectives, limits and targets Council will uphold; a) Te mana o te Wai and integrated mountains to the sea, ki uta ki tai principles are upheld
240.5	Te Kaha	Hawaikirangi	Ngāti Pārau Hapū Trust	OBJ TANK 2	Not Stated	Consent application, new, amendments, or renewals require identification and information on how Te Ao Maori is provided for, and in a manner that is consistent with Te mana o te wai.
Climate change						
193.16	Bruce	Mackay	Heinz Wattie's Limited	Climate change	Not Stated	Policies consider possible population changes and demand that may have on water supply, but fail to recognise climate change a possibly impacting future water demand.
210.22	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Climate change	Amend	Integrate the consideration of potential causes of and impacts from climate change clearly throughout the objectives and policies to provide council scope to consider these in making resource management decisions.
210.23	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Climate change	Amend	Consider PC9 in light of the recent MFE climate risks report, the Adapting to Climate Change in NZ report, the Coastal Hazards and Climate Change Guidance for Local Councils, and any other relevant work undertaken regionally, and ensure PC9 is consistent with recommendations in those reports.
224.3	Peter	Holley	Mission Estate Winery	Climate change	Oppose	It seems realistic to cap water use based on the driest season which is now noted as 2019/20. With the advent of climate change and the possibility of longer and more intense droughts this benchmark requires a provision to be periodically reviewed.
229.4	Angie	Denby	Ahuriri Estuary Protection Society INC	Climate change	Amend	Climate change needs more acknowledgement and prominence throughout the plan. We feel the plan lacks clarity in respect of potential impacts, how they will be avoided, remedied, or mitigated.
OBJ TANK 3						
13.2	Alec	Duncan	Fire and Emergency New Zealand	OBJ TANK 3	Support	Support OBJ TANK 3 - retain as proposed.
58.5	Peter	Wilson	Hawkes Bay Fish and Game Council	OBJ TANK 3	Amend	Amend Clause (b) to insert “the habitat of trout and salmon” after “indigenous biodiversity”

123.24	Jenny	Nelson-Smith	Department of Conservation	OBJ TANK 3	Not Stated	Amend in a way that: - the mauri of waterbodies is protected and restored to provide for Te Hauora o te Taiao, Te Hauora o te Wai and Te Hauora o te Tangata and to provide for the values in Schedule X -safeguards life-supporting capacity and aquatic ecosystem processes -the connectivity between land, surface water, groundwater, freshwater and the coast - Ki uta, ki tai is recognised - provides for the relationship of Maori and their culture and traditions with their ancestral lands, water, sites, waahi tapu, and other taonga
126.7	James	Lyver	Maungaharuru-Tangitū Trust	OBJ TANK 3	Amend	Retain the intent of Objective 3 and consider re-numbering for readability.
194.19	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	OBJ TANK 3	Support	Retain as drafted. Review other concepts in PC9 such as 'actual and reasonable use' to ensure they are also cognisant of the effects of climate change over time.
195.19	Peter	Matich	Federated Farmers of New Zealand	OBJ TANK 3	Amend	That OBJ TANK 3 be amended as follows: ... <u>d) Reliance on the freshwater resource for the social, economic, and cultural wellbeing of communities</u> e) Opportunities to improve community resilience for changes occurring as a result of (a)(i) to (iv). And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
201.18	Liz	Munroe	Heretaunga Tamatea Settlement Trust	OBJ TANK 3	Amend	The Council will have particular regard to the effects of climate change in respect of each of the following in making decisions about land and water management within the TANK catchments; a) The effects on aquatic ecosystems, including indigenous biodiversity, freshwater bodies, water supply and human health, primary production and infrastructure from the predicted: (i) increases in intensity and frequency of rainfall; (ii) effects of rainfall on erosion and sediment loss; (iii) increases in sea level, and declining aquifer levels and the potential effects of salt water intrusion; (iv) increasing frequency of water shortages; (v) increasing variability in river flows; b) The amount of information available and the scale and probability of adverse effects, particularly irreversible effects, as a consequence of acting or not acting; c) The timeframes relevant to the activity; d) Investigate opportunities to improve community resilience for changes occurring as a result of (a)(i) to (iv)
233.5	Dr Nicholas	Jones	Hawke's Bay District Health Board (HBDHB)	OBJ TANK 3	Amend	Add bullet point a) (vi) changes in habitat for human and animal disease vectors
Water Quality General						
16.1	Bernadette	Hamlin		Water Quality General	Oppose	No specific decision requested but states that there are too many contaminants entering water, resulting in lack of quality
16.2	Bernadette	Hamlin		Water Quality General	Oppose	No specific decision sought but states that economic profits should not be a high priority before the quality of water
16.3	Bernadette	Hamlin		Water Quality General	Oppose	No specific decision requested but states that without quality and people and flora and fauna, there will be no future
16.5	Bernadette	Hamlin		Water Quality General	Oppose	Amend Change 9 to limit the amount of nutrients that discharge into rivers affecting the habitat and aquatic life in all rivers.
16.11	Bernadette	Hamlin		Water Quality General	Oppose	Amend Change 9 so that resource consent criteria are created to ensure quality protection.
24.2	Jim	Watt	Saint Columba's Havelock North Environment Group (SCHNEG)	Water Quality General	Support	Define VALUES for water QUALITY that include Te Ao Maori and therein the care for water as a life-giving partner, intrinsically beautiful in itself. This conversation makes it more likely that we will achieve a balance between 'wealth creation' dependant on water use and 'care for water' as a cherished resource.
46.5	Tom	Belford	Peter Beaven & Tom Belford	Water Quality General	Support	States the accomplishments of PC9: An entire new suite of water quality standards – covering nitrates, phosphorous, E. coli, dissolved oxygen, MCI levels etc – will be introduced for the first time. And wetlands are protected.
90.2	Sarah	Millington		Water Quality General	Not Stated	The TANK Plan needs to include clear objectives, policies and rules to maintain or improve water quality to at least the bottom lines set out in the NPS FW.
106.14	Kane	Koko	Taraia Marae	Water Quality General	Not Stated	While we agree with habitat enhancement and other mitigation measures being put in place, 10 years is too slow. Relief Sought: These schemes should be operating as soon as possible.
111.4	Lisa	Tuhi	Ngati Hinemanu, Ngai Te Upokoiri	Water Quality General	Not Stated	The adverse effects of the health and wellbeing on the 'te wai mauri' awa ngaruroro and its tributaries and tribal estate
111.9	Lisa	Tuhi	Ngati Hinemanu, Ngai Te Upokoiri	Water Quality General	Not Stated	To maintain excellence in the quality of drinkable, washable, swimmable water
115.10	Patricia D	Nuku		Water Quality General	Not Stated	Water quality issues - algae, far too many nutrients and/or contaminants, insufficient dissolved oxygen in the water, sedimentation, suspended solids/ clarity issues, the abstraction of too much water resulting in water quality decline. The consent to discharge into or pollute the water then detracts for people being able to enjoy the rivers/streams, there is often insufficient water left in the river or stream so as to provide flow variation, varieties of habitat and oxygenated the water.
120.14	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Water Quality General	Amend	Amend Change 9 to give effect to the RPS objectives for no degradation of the quality of the Heretaunga Aquifer.

123.8	Jenny	Nelson-Smith	Department of Conservation	Water Quality General	Not Stated	Include clear objectives and policies to maintain or improve water quality, safeguard lifesupporting capacity, ecosystem health and human health, protect the significant values of outstanding freshwater bodies and wetlands and provide for other instream freshwater values.
123.26	Jenny	Nelson-Smith	Department of Conservation	Water Quality General	Oppose	Objectives 4 and 6 - Delete Objectives 4 and 6 and replace with new objectives A and B (see points 123.27 and 123.28).
123.27	Jenny	Nelson-Smith	Department of Conservation	Water Quality General	Amend	Objective A - include as new objective - <u>"Surface water quality is maintained or improved where the current state exceeds the objectives in Schedule 26 and improved where it is degraded or over-allocated by 2040 where objectives in Schedule 26 are not met, to provide for the values in Schedule X, including ecosystem health"</u> or words to similar effect.
123.28	Jenny	Nelson-Smith	Department of Conservation	Water Quality General	Amend	Objective B - include as new objective. <u>"Water quality is improved so it is suitable for primary contact, Uu and immersion more often and regional targets are met"</u> or words to similar effect.
127.11	Tania	Eden	Te Taiwhenua o Te Whanganui a Orotu	Water Quality General	Not Stated	Include clear objectives and policies to maintain or improve water quality, safeguard life-supporting capacity, ecosystem health and human health, protect the significant values of outstanding freshwater bodies and wetlands and provide for other instream freshwater values (including tangata whenua values). In addition, PC9 must give effect to the RPS objectives for no degradation of the quality of the Heretaunga Aquifer.
127.18	Tania	Eden	Te Taiwhenua o Te Whanganui a Orotu	Water Quality General	Not Stated	Control the use of production land all other catchments to maintain water quality.
136.2	Te Hira	Henderson		Water Quality General	Not Stated	There is no water quality. The distinctive characteristic condition of quality water does not pertain to the river and the rivers I belong to, as it once did.
142.29	Bill	Glazebrook	Big Hill Station Limited	Water Quality General	Support	We support the prioritising of areas to be identified for remediation where water quality outcomes do not meet agreed standards.
147.7	Serene	Morrell	Mihiroa Marae	Water Quality General	Amend	For water quality -that the water quality in our awa is improved so that we can carry out our cultural practices in a safe manner, and the kai we harvest from the wai is safe to eat.
147.8	Serene	Morrell	Mihiroa Marae	Water Quality General	Amend	For water quality - that the water quality is improved so that when we baptise our tamariki and mokopuna, the wai in our puna is clean and healthy
198.9	Cordelia	Woodhouse	Environmental Defence Society Inc	Water Quality General	Amend	Include clear objectives and policies to maintain or improve water quality, safeguard life-supporting capacity, ecosystem health and human health, protect the significant values of outstanding freshwater bodies and wetlands and provide for other instream freshwater values
198.10	Cordelia	Woodhouse	Environmental Defence Society Inc	Water Quality General	Amend	Include schedules for FMUs (and the freshwater values that apply) and outstanding freshwater bodies and wetlands
198.11	Cordelia	Woodhouse	Environmental Defence Society Inc	Water Quality General	Amend	Include all water quality objectives in Schedule 26 and identify targets to be achieved by 2040 where objectives are not currently met
198.13	Cordelia	Woodhouse	Environmental Defence Society Inc	Water Quality General	Amend	Control the use of production land for farming in all catchments to maintain water quality.
202.9	Donna	Awatere Huata	Māori Climate Commission	Water Quality General	Oppose	Deeply concerned that polluters are being given a free pass to continue to pollute at rates that Council scientists know is unsustainable.
207.68	Mark	Clews	Hastings District Council	Water Quality General	Not Stated	While water quantity needs to be managed to phase out over-allocation, the resultant planning framework provides sufficient opportunity to enable new industries to establish and existing industries to expand and for new industrial zones to be serviced in a manner that is appropriate in terms of Plan outcomes.
240.16	Te Kaha	Hawaikirangi	Ngāti Pārau Hapū Trust	Water Quality General	Not Stated	Include ANZECC guideline substances and concentrations as limits.
240.17	Te Kaha	Hawaikirangi	Ngāti Pārau Hapū Trust	Water Quality General	Not Stated	Exception for Nitrates, but an acknowledgement of nitrates as a contaminant and as a hazardous substance when above concentrations of 5.6 mg/l.
240.20	Te Kaha	Hawaikirangi	Ngāti Pārau Hapū Trust	Water Quality General	Not Stated	The lack of protection for indigenous vegetation (outside the 10m proximity to rivers).
OBJ TANK 4						
58.6	Peter	Wilson	Hawkes Bay Fish and Game Council	OBJ TANK 4	Amend	Clarify how the the determination of past, current, or future state instream applies.
126.8	James	Lyver	Maungaharuru-Tangitū Trust	OBJ TANK 4	Oppose	Delete Objective 4 and replace with the following wording to read: There is no reduction in the overall quality of TANK waterbodies and TANK estuaries as at 1 May 2020, by: <u>a) at least maintaining the current state of the water quality where TANK waterbodies and TANK estuarine systems are achieving freshwater objectives in Schedule 26; or</u> <u>b) improving the current state of water quality in TANK waterbodies and TANK estuarine systems that have been degraded by human activities below freshwater objectives in Schedule 26, so that the short-term numerical attribute states in Schedule 26AA are met no later than 10 years after PC9 becomes operative."</u>
131.11	Dominic	Adams	Ballance Agri-Nutrients Limited	OBJ TANK 4	Amend	Supports aspirational goals for water quality and recommends that the evidence for the chosen attribute values is clearly identified
131.12	Dominic	Adams	Ballance Agri-Nutrients Limited	OBJ TANK 4	Amend	Should the achievability of any of these water quality values be in question, the plan change should include allowance for confirming progress toward the attribute 'goals' in 2030 to allow re-setting of attributes or policies in order to meet practical goals.

135.5	Anna	Wilkes	Ravensdown Limited	OBJ TANK 4	Amend	Amend OBJ TANK 4 as follows: <i>Land and water use, contaminant discharge and nutrient loss activities are carried out so that the quality of the TANK freshwater bodies is maintained where <u>the freshwater quality objectives in Schedule 26</u> are currently being met, or is improved in degraded waterbodies so that they <u>meet the fresh water quality attribute states</u> targets in Schedule 26 by 2040, provided that:</i> • a) For any specific water body where the fresh <u>water quality attribute state</u> is found to be higher than <u>the freshwater quality objective</u> that given in Schedule 26, the <u>existing higher state</u> is to be maintained; and b) Maintenance of a state is at the measured state
142.4	Bill	Glazebrook	Big Hill Station Limited	OBJ TANK 4	Support	Supports OBJ4
180.14	Charlotte	Drury	Horticulture New Zealand	OBJ TANK 4	Amend	It is unclear where the target attribute states are to be achieved – if this includes all current monitoring locations, or at a subset of monitoring sites at a smaller sub-catchment scale. Amend the maps in Schedule 26 to show the location of monitoring sites. It is unclear whether or not modelled state data will be used where actual monitoring data is not available, and if ‘modelled’ state data is used does ‘maintenance’ mean that it can’t decline within the relevant NOF band? This needs to be clarified.
195.20	Peter	Matich	Federated Farmers of New Zealand	OBJ TANK 4	Amend	That OBJ TANK 4 be amended as follows: ... b) Maintenance of a state is at the measured state ² assessed as the median of the last 5 years measured data taking into account natural variability and sampling error. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
198.12	Cordelia	Woodhouse	Environmental Defence Society Inc	OBJ TANK 4	Amend	Regulate and manage all point source and stormwater discharges and require them to meet water quality objectives and targets in Schedule 26 by 2040
201.19	Liz	Munroe	Heretaunga Tamatea Settlement Trust	OBJ TANK 4	Amend	The quality of the TANK freshwater bodies is maintained or improved where objectives are currently being met, or is improved in degraded waterbodies so that they meet water quality attribute states in Schedule 26 reviewed by 2030 provided that: 1. For any specific water body where the attribute state is found to be higher than that given in Schedule 26, the higher state is to be maintained or improved; and maintenance or improvement of a state is at the measured state
203.3	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	OBJ TANK 4	Support	Retain as notified.
233.6	Dr Nicholas	Jones	Hawke's Bay District Health Board (HBDHB)	OBJ TANK 4	Amend	Add bullet point c): “Where measured states require improvement to meet the attribute stated in Schedule 26, improvement must be measurable within 5 years of this Plan becoming operative. For measured states that have not improved within 5 years, a review of Plan effectiveness should be completed with policy and rules review to be commenced.”
OBJ TANK 5						
29.4	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	OBJ TANK 5	Oppose	The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.
48.22	Paul	Ham	Alpha Domus	OBJ TANK 5	Oppose	Allow reasonable land use change, which includes usage that requires more water that is presently consented for current land use. This would need to be organised in a way that does not deplete the water resource but makes provision for the long- term success of the area. This could be through high flow storage or some other method.
123.25	Jenny	Nelson-Smith	Department of Conservation	OBJ TANK 5	Oppose	Amend in a way that: - the mauri of waterbodies is protected and restored to provide for Te Hauora o te Taiao, Te Hauora o te Wai and Te Hauora o te Tangata and to provide for the values in Schedule X -safeguards life-supporting capacity and aquatic ecosystem processes -the connectivity between land, surface water, groundwater, freshwater and the coast - Ki uta, ki tai is recognised - provides for the relationship of Maori and their culture and traditions with their ancestral lands, water, sites, waahi tapu, and other taonga
126.9	James	Lyver	Maungaharuru-Tangitū Trust	OBJ TANK 5	Oppose	Delete Objective 5 and replace with the following wording to read: <u>Existing over-allocation of TANK waterbodies and TANK estuarine systems is phased out in accordance with freshwater objectives in Schedule 26 and allocation limits in Schedule 31, and future overallocation of TANK waterbodies and TANK estuarine systems is avoided.</u>
195.21	Peter	Matich	Federated Farmers of New Zealand	OBJ TANK 5	Support	That OBJ TANK 5 be retained as notified
201.2	Liz	Munroe	Heretaunga Tamatea Settlement Trust	OBJ TANK 5	Oppose	Delete objective 5
OBJ TANK 6						
29.41	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	OBJ TANK 6	Amend	Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address the effects of model and/or version changes to modelled outputs.
109.15	Stuart	Macintyre	Turamoe Farm	OBJ TANK 6	Support	Support OBJ 6 and Schedule 27 - seek that future plan changes are proposed and executed with this set of proposed PC8 changes.
126.10	James	Lyver	Maungaharuru-Tangitū Trust	OBJ TANK 6	Oppose	Delete Objective 6
135.6	Anna	Wilkes	Ravensdown Limited	OBJ TANK 6	Amend	Delete OBJ TANK 6 in entirety. The quality of the TANK freshwater bodies set out in Schedule 27 will be achieved through future plan changes.

194.20	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	OBJ TANK 6	Amend	OBJ TANK 6 should be revised so that it is an outcome statement that responds to an identified resource management issue. For example: 'the long term water quality objectives in Schedule 27 are achieved over time'.
195.22	Peter	Matich	Federated Farmers of New Zealand	OBJ TANK 6	Amend	That OBJ TANK 6 and Schedule 27 be deleted
233.7	Dr Nicholas	Jones	Hawke's Bay District Health Board (HBDHB)	OBJ TANK 6	Amend	Reword as follows: Activities in source protection zones (<u>and extents</u>) for Registered Drinking Water Supplies are managed to ensure that they do not cause water in these zones to become unsuitable for human consumption <u>with existing treatment levels</u> , and that risks to the secure supply of safe drinking water are appropriately managed.
OBJ TANK 7						
14.2	Ryan	Fraser		OBJ TANK 7	Amend	Amend OBJ TANK 7 to reflect that some land use types including viticulture on low-slope land already have negligible contaminant losses (& especially soil losses) and would be unable to achieve any reductions in contaminant loss including soil loss.
15.4	Andrea and Phil	Cranswick	Meridien Trust	OBJ TANK 7	Amend	Amend OBJ TANK 7 to reflect that some land use types including viticulture on low-slope land already have negligible contaminant losses (& especially soil losses) and would be unable to achieve any reductions in contaminant loss including soil loss.
18.5	Mark	Cairns	MD Cairns & AR Wright Partnership	OBJ TANK 7	Amend	Amend OBJ TANK 7 to read "...reduces reduceable contaminant loss..."; or similar wording to achieve the outcome sought in this submission.
20.4	Bruce	Nimon		OBJ TANK 7	Amend	Amend OBJ TANK 7 to reflect that some land use types including viticulture on low-slope land already have negligible contaminant losses (& especially soil losses) and would be unable to achieve any reductions in contaminant loss including soil loss.
25.5	Xan	Harding		OBJ TANK 7	Amend	Amend OBJ TANK 7 to read "...reduces reduceable contaminant loss..."; or similar wording to achieve the outcome sought in this submission.
26.5	Robin	Back	Dunvegan Estate	OBJ TANK 7	Amend	Amend OBJ TANK 7 to read "...reduces reduceable contaminant loss..."; or similar wording to achieve the outcome sought in this submission.
28.5	Hamish	Clark	Saint Clair Family Estate Ltd	OBJ TANK 7	Amend	Amend OBJ TANK 7 to read "...reduces reduceable contaminant loss..."; or similar wording to achieve the outcome sought in this submission.
29.6	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	OBJ TANK 7	Amend	Amend OBJ TANK 7 to read '...reduces <u>reduceable</u> contaminant loss...' or similar wording to achieve the outcome sought in this submission.
34.5	Jonathan	Hamlet	Craggy Range Vineyards Limited	OBJ TANK 7	Amend	Amend OBJ TANK 7 to read "...reduces reduceable contaminant loss..."; or similar wording to achieve the outcome sought in this submission.
39.5	Bridget	Wilton	MbandSons	OBJ TANK 7	Amend	Amend OBJ TANK 7 to read "...reduces reduceable contaminant loss..."; or similar wording to achieve the outcome sought in this submission.
41.5	Jonathan	Milmine	Milmine Holdings Limited	OBJ TANK 7	Amend	Amend OBJ TANK 7 - Amend OBJ TANK 7 to read "...reduces reduceable contaminant loss..."; or similar wording to achieve the outcome sought in this submission.
48.5	Paul	Ham	Alpha Domus	OBJ TANK 7	Amend	Amend OBJ TANK 7 - Amend OBJ TANK 7 to read "...reduces reduceable contaminant loss..."; or similar wording to achieve the outcome sought in this submission.
53.5	Chris	Howell	CD & CM Howell Partnership	OBJ TANK 7	Amend	Amend OBJ TANK 7 to read '...reduces <u>reduceable</u> contaminant loss...' or similar wording to achieve the outcome sought in this submission.
68.5	Geoffrey	Smith	Vine Nursery New Zealand and Waikahu Vineyard	OBJ TANK 7	Amend	Amend OBJ TANK 7 - Amend OBJ TANK 7 to read "...reduces reduceable contaminant loss..."; or similar wording to achieve the outcome sought in this submission.
75.5	Andria	Monin	Stonecroft Wines Limited	OBJ TANK 7	Amend	Amend OBJ TANK 7 - Amend OBJ TANK 7 to read "...reduces reduceable contaminant loss..."; or similar wording to achieve the outcome sought in this submission.
76.5	Larry	Morgan	Te Mata Estate Winery Ltd	OBJ TANK 7	Amend	Amend OBJ TANK 7 - Amend OBJ TANK 7 to read "...reduces reduceable contaminant loss..."; or similar wording to achieve the outcome sought in this submission.
81.5	Tony	Smith	Babich Wines	OBJ TANK 7	Amend	Amend OBJ TANK 7 - Amend OBJ TANK 7 to read "...reduces reduceable contaminant loss..."; or similar wording to achieve the outcome sought in this submission.
84.5	Grant	Edmonds	Redmetal Vineyards Ltd	OBJ TANK 7	Amend	Amend OBJ TANK 7 - Amend OBJ TANK 7 to read "...reduces reduceable contaminant loss..."; or similar wording to achieve the outcome sought in this submission.
87.5	Peter	Scott	Kereru Road Vineyard	OBJ TANK 7	Amend	Amend OBJ TANK 7 - Amend OBJ TANK 7 to read "...reduces reduceable contaminant loss..."; or similar wording to achieve the outcome sought in this submission.
88.5	Jacqui	Cormack	Constellation Brands NZ Limited (CBNZ)	OBJ TANK 7	Amend	Amend OBJ TANK 7 - Amend OBJ TANK 7 to read "...reduces reduceable contaminant loss..."; or similar wording to achieve the outcome sought in this submission.
94.5	Deane	Caughey	Indevin Group Ltd	OBJ TANK 7	Amend	Amend OBJ TANK 7 - Amend OBJ TANK 7 to read "...reduces reduceable contaminant loss..."; or similar wording to achieve the outcome sought in this submission.
99.3	Jerf	van Beek	Twyford Water	OBJ TANK 7	Not Stated	Important that growers that are already operating at or exceeding good management practice are acknowledged, while simultaneously recognizing that there are some practices that could and should be improved to reduce contaminant loss. It is also important that the ongoing evolution of good and best management practices is acknowledged and enabled by regulatory frameworks.
99.102	Jerf	van Beek	Twyford Water	OBJ TANK 7	Amend	Amend OBJ TANK 7 to say "Land use is carried out in a manner reduces contaminant loss in accordance with good, or where <u>necessar best management practice, including soil loss ...</u> "
102.5	Ritchie	Garnham	Booster Wine Group	OBJ TANK 7	Amend	Amend OBJ TANK 7 - Amend OBJ TANK 7 to read "...reduces reduceable contaminant loss..."; or similar wording to achieve the outcome sought in this submission.

103.4	Ian	Quinn	Two Terraces Vineyard	OBJ TANK 7	Amend	Amend OBJ TANK 7 to read "...reduces reduceable contaminant loss..."; or similar wording to achieve the outcome sought in this submission.
107.5	Christopher	Harrison	Beach House Wines Ltd	OBJ TANK 7	Amend	Amend OBJ TANK 7 - Amend OBJ TANK 7 to read "...reduces reduceable contaminant loss..."; or similar wording to achieve the outcome sought in this submission.
120.71	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	OBJ TANK 7	Amend	Increase the level of regulation with regard to nutrient and sediment loss from land use and farm plans by setting clear environmental standards for these activities in the plan, in line with the identified water quality issues across TANK in a way that the actual effects are able to be managed and measured now and into the future.
123.29	Jenny	Nelson-Smith	Department of Conservation	OBJ TANK 7	Oppose	"Freshwater bodies, estuaries and the coastal environment are healthy and free from sedimentation and land use is sustainably managed in an integrated way ki uta ki tai to achieve this" or words to similar effect.
126.11	James	Lyver	Maungaharuru-Tangitū Trust	OBJ TANK 7	Oppose	Delete Objective 7
132.22	Marei	Apatu	Te Taiwhenua o Heretaunga	OBJ TANK 7	Amend	Set and apply a limit for land uses involving the use, application or discharge of fertilisers, soil conditioners, composted materials and animal effluent within sensitive catchments so that total nitrogen applications do not exceed 80 kgs/ha/year total.
135.7	Anna	Wilkes	Ravensdown Limited	OBJ TANK 7	Amend	Ravensdown is supportive of the intent of this objective but recommends an amendment to the wording to ensure that the intent of this objective is clear.
142.5	Bill	Glazebrook	Big Hill Station Limited	OBJ TANK 7	Amend	Amend OBJ 7 to align with or be incorporated with OBJ 4 with reference to Schedule 26
143.5	Peter	Hyslop	Strathallan Trust	OBJ TANK 7	Amend	Amend OBJ TANK 7 to read "...reduces reduceable contaminant loss..."; or similar wording to achieve the outcome sought in this submission.
165.5	Caleb	Dennis	Aotearoa New Zealand Fine Wine Estates LP	OBJ TANK 7	Amend	Amend OBJ TANK 7 to read "...reduces reduceable contaminant loss..."; or similar wording to achieve the outcome sought in this submission.
179.5	Wim	Barendsen	Otawhao Farms Ltd	OBJ TANK 7	Amend	Amend OBJ TANK 7 to read "...reduces reduceable contaminant loss..."; or similar wording to achieve the outcome sought in this submission.
180.15	Charlotte	Drury	Horticulture New Zealand	OBJ TANK 7	Amend	Amend to say "Land use is carried out in a manner reduces contaminant loss in accordance with good, or where necessary best management practice, including soil loss..."
194.21	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	OBJ TANK 7	Oppose	OBJ TANK 7 should be amended to reflect that not all contaminant loss is reducible (or practically reducible beyond a certain point), particularly where there is an existing negligible contaminant loss.
195.23	Peter	Matich	Federated Farmers of New Zealand	OBJ TANK 7	Amend	Amend OBJ TANK 7 to read: Land use is carried out in a manner that reduces <u>reduceable</u> contaminant loss <u>where practicable</u> including soil loss and consequential sedimentation in freshwater bodies, estuaries and coastal environment. <u>And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.</u>
199.5	Peter	Robertson	Brookfields Vineyards/Ohiti Estate	OBJ TANK 7	Amend	Amend OBJ TANK 7 to read "...reduces reduceable contaminant loss..."; or similar wording to achieve the outcome sought in this submission.
201.21	Liz	Munroe	Heretaunga Tamatea Settlement Trust	OBJ TANK 7	Not Stated	Reduction in contaminant loss including soil loss and consequential sedimentation in freshwater bodies, estuaries and coastal environment.
204.5	Juliet	Gray	Peter Lyons Trust (Lyons Vineyard)	OBJ TANK 7	Amend	Amend OBJ TANK 7 to read "...reduces reduceable contaminant loss..."; or similar wording to achieve the outcome sought in this submission.
208.5	Emma	Taylor	Villa Maria Estate Limited	OBJ TANK 7	Amend	Amend OBJ TANK 7 to read "...reduces reduceable contaminant loss..."; or similar wording to achieve the outcome sought in this submission.
213.5	Peter	Scott	The Wine Portfolio	OBJ TANK 7	Amend	Amend OBJ TANK 7 to read "...reduces reduceable contaminant loss..."; or similar wording to achieve the outcome sought in this submission.
238.5	Emma	Taylor	Gimblett Gravels Winegrowers Association	OBJ TANK 7	Amend	Amend OBJ TANK 7 to read "...reduces reduceable contaminant loss..."; or similar wording to achieve the outcome sought in this submission.
OBJ TANK 8						
58.7	Peter	Wilson	Hawkes Bay Fish and Game Council	OBJ TANK 8	Amend	Insert "the habitat of trout and salmon" as an additional clause
67.4	Helen	Liddle	Focus Maraekakaho	OBJ TANK 8	Support	Amend change 9 to improve riparian management i.e. no extensive tree felling creating flood risk
67.5	Helen	Liddle	Focus Maraekakaho	OBJ TANK 8	Amend	Amend Change 9 to allow for riparian planting with informative signage to foster public awareness
67.7	Helen	Liddle	Focus Maraekakaho	OBJ TANK 8	Amend	Riparian management - Amend change 9 to allow for: i. no permanent buildings ii. no equipment, machinery or vehicle servicing onsite iii. no machinery wash/cleaning areas iv. <u>no fuel, oil or chemical storage</u>
85.10	Matthew	Truebridge		OBJ TANK 8	Support	Wet land enhancement and investment to land owners. We have benefitted from Local and central government funding for land retirement and riparian planning for environmental protection which has allowed us to fast track stock exclusion from waterways.
97.86	Lesley	Wilson	DN & LR Wilson Ltd	OBJ TANK 8	Amend	We support the intent of OBJ TANK 8, We would also like the addition of "maintain water quality and quantity for food and fibre production" somewhere near the top of the list
99.4	Jerf	van Beek	Twyford Water	OBJ TANK 8	Not Stated	Should be addressed/managed through a catchment collective group or landowner collectives. This will involve even those landowners who have no stream, tributaries or wetlands running through or bordering their properties. The regional council also has an important role to play in the achievement of this objective as providers of expert knowledge about riparian planting.

123.30	Jenny	Nelson-Smith	Department of Conservation	OBJ TANK 8	Oppose	“Riparian margins are healthy and contribute to achieving the objectives in Schedule 26 and providing for the freshwater values in Schedule X, including ecosystem health, human health and mauri” or words to similar effect.
126.12	James	Lyver	Maungaharuru-Tangitū Trust	OBJ TANK 8	Oppose	Delete Objective 8
142.6	Bill	Glazebrook	Big Hill Station Limited	OBJ TANK 8	Support	Amend the objective so that it is clear that improvement or regulation is not required where freshwater quality objectives in Schedule 26 are currently being met as described by OBJ 4
180.16	Charlotte	Drury	Horticulture New Zealand	OBJ TANK 8	Amend	Supports the intent of OBJ TANK 8, however question what ‘appropriate management’ entails. Amend to say ‘is improved by appropriate management of riparian margins that to: a) reduces effects of contaminant loss from land use activities etc.....’
195.24	Peter	Matich	Federated Farmers of New Zealand	OBJ TANK 8	Amend	Amend OBJ TANK 8 so that water quality is improved where there is degradation of water quality or where water quality attributes are within the NOF ‘D’ Band, and maintained elsewhere. Specific wording provided.
201.22	Liz	Munroe	Heretaunga Tamatea Settlement Trust	OBJ TANK 8	Amend	Aquatic ecosystem health and mauri of water bodies in the TANK catchments is improved by appropriate management through: a) riparian marginal vegetation b) reducing effects of contaminant loss from land use activities; c) improve aquatic habitat, protection and enhancement of indigenous species including fish spawning habitat; d) reduce stream and stop bank erosion; e) enhance natural character and amenity values including cultural opportunities for economics; f) improve indigenous biodiversity; g) reduce water temperature especially in the lowland tributaries of the Karamu; h) reduced nuisance macrophyte growth through shading
OBJ TANK 9						
46.7	Tom	Belford	Peter Beaven & Tom Belford	OBJ TANK 9	Support	States the accomplishments of PC9: A new “source protection scheme” will better protect both Hastings and Napier drinking water from contamination.
119.4	Liz	Lambert	Hawke's Bay Drinking Water Governance Joint Committee	OBJ TANK 9	Support	Support , noting that the risk of contamination arises from a number of activities, including: (a) on-site sewage disposal (particularly septictanks) (b) the use, transport and storage of hazardous substances, including hydrocarbon fuels and agrichemicals (c) industrial discharges (d) intensive horticultural and agricultural land uses (e) stormwater discharges (f) landfills and offal holes, and (g) mining and quarrying
123.31	Jenny	Nelson-Smith	Department of Conservation	OBJ TANK 9	Support	Retain as notified.
135.8	Anna	Wilkes	Ravensdown Limited	OBJ TANK 9	Support	Retain OBJ TANK 9 as notified.
194.22	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	OBJ TANK 9	Amend	OBJ TANK 9 should be revised so that it is expressed as an outcome statement that responds to an identified resource management issue.
195.25	Peter	Matich	Federated Farmers of New Zealand	OBJ TANK 9	Support	That OBJ TANK 9 be retained as notified
203.4	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	OBJ TANK 9	Amend	Amend to clarify that the objective is to protect source water <i>Activities in source protection areas for Registered Drinking Water Supplies are managed to ensure that they do not cause source water in these zones to become unsuitable for human consumption, and that risks to the supply of safe drinking water are appropriately managed.</i>
207.38	Mark	Clews	Hastings District Council	OBJ TANK 9	Support	Supports OBJ 9
Catchment Objectives						
46.3	Tom	Belford	Peter Beaven & Tom Belford	Catchment Objectives	Support	States the accomplishments of PC9: No dams will be allowed on the Tutaekuri or Ngaruroro Rivers or their four key tributaries.
46.11	Tom	Belford	Peter Beaven & Tom Belford	Catchment Objectives	Support	States accomplishments of PC9: All farmers and growers will need to either participate in local “catchment collectives” to manage their nutrient loss and soil erosion issues according to HBRC-approved plans, or submit individual Farm Environment Plans for review, approval and monitoring.
120.36	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Catchment Objectives	Amend	Place a limit on each river and stream both for total instantaneous rate of take and weekly volume which are supported by policies and rules
120.47	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Catchment Objectives	Amend	Set allocation limits for the Karamu and Ahuriri catchments .
120.132	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Catchment Objectives	Amend	Amend Change 9 to enable a specific management plan in partnership with tangata whenua and Maori landowners for Lake Poukawa
123.13	Jenny	Nelson-Smith	Department of Conservation	Catchment Objectives	Not Stated	Control the use of production land for farming in all other catchments to maintain water quality.
123.15	Jenny	Nelson-Smith	Department of Conservation	Catchment Objectives	Not Stated	Require farm plans for all farms >10ha in the TANK catchments.
123.32	Jenny	Nelson-Smith	Department of Conservation	Catchment Objectives	Oppose	Objectives 10, 11, 12 & 13 - Delete and include (reworded) as a policy for the associated catchment. Include all catchment specific values in a Schedule in PC9. Alternatively, redraft a catchment-specific objective which concisely and clearly captures the management intent and goals for the catchment.
127.6	Tania	Eden	Te Taiwhenua o Te Whanganui a Orotu	Catchment Objectives	Not Stated	Reduce overallocation of water in the TANK catchments by introducing (over the 10 year life of the Plan) a capped allocation maximum of 70 million cubic litres per annum
127.7	Tania	Eden	Te Taiwhenua o Te Whanganui a Orotu	Catchment Objectives	Not Stated	Introduce (over the 10 year life of the Plan) a new system of allocation of water in the TANK catchments that does not rely exclusively on 'first in, first served' basis.

132.17	Marei	Apatu	Te Taiwhenua o Heretaunga	Catchment Objectives	Amend	Remove "actual and reasonable" from assessment criteria for resource consents to abstract water, and from consent renewal or extension processes.
132.25	Marei	Apatu	Te Taiwhenua o Heretaunga	Catchment Objectives	Amend	Redraft provisions in the objectives, policies and methods where they imply a management function for the Ahuriri Estuary or the Waitangi Estuary
132.26	Marei	Apatu	Te Taiwhenua o Heretaunga	Catchment Objectives	Amend	Accountability between effects generated from land use and water related activities within catchments regulated through the RRMP, and effects from these that occur in the coastal environment.
132.30	Marei	Apatu	Te Taiwhenua o Heretaunga	Catchment Objectives	Amend	Prescribe the Heretaunga Plains Aquifer System in PC9 to prevent confusion and inconsistencies between the Heretaunga Plains Groundwater Management Unit and the Heretaunga Plains Aquifer System
132.188	Marei	Apatu	Te Taiwhenua o Heretaunga	Catchment Objectives	Amend	Provide for the prohibition on the placement of dams along mainstems of the Tutaekuri, Ngaruroro and Karamu Rivers. Where dams are enabled along tributaries, provide for fish passage structures and residual flows sufficient to support ecosystem health, Mauri and life-supporting capacity from the dam downstream to the main river channel.
147.4	Serene	Morrell	Mihiroa Marae	Catchment Objectives	Amend	For water allocation provisions in the plan - less water is taken out of our awa, the Kahumoko/Karewarewa, the Turamoe and the Awanui so there is enough left to support our taonga species and provide for their habitat.
147.9	Serene	Morrell	Mihiroa Marae	Catchment Objectives	Amend	For decision-making around water allocation, that our whanau are able to have a say in processes that allocate water from our awa or from the aquifers within our whenua.
165.20	Caleb	Dennis	Aotearoa New Zealand Fine Wine Estates LP	Catchment Objectives	Amend	Actual and reasonable use must reflect actual and reasonable use lawfully occurring on a property at the time of this Plan Change.
180.4	Charlotte	Drury	Horticulture New Zealand	Catchment Objectives	Not Stated	All references to 'catchment collectives' should be amended to refer more broadly to 'collectives' and any other necessary changes be made to ensure that collective groups are enabled and recognised at any and every scale they form at.
194.3	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Catchment Objectives	Not Stated	Takes an unnecessarily restrictive approach to the determination of "actual and reasonable" allocation volumes. In particular, the reliance on water usage in the previous ten year period raises concerns in terms of the likelihood of more frequent and/or severe droughts in the future due to climate change, and also in relation to the accuracy of water meters.
194.4	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Catchment Objectives	Not Stated	Creates a significant degree of uncertainty surrounding the implementation of the flow maintenance scheme and the stream depletion calculator.
194.5	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Catchment Objectives	Not Stated	Relies on IRRICALC tool in the determination of "actual and reasonable" allocations, without sufficient explanation or transparency as to the assumptions/parameters of the IRRICALC tool provided, including how and to what extent the model accounts for Hawke's Bay climate, crop types, soil types, and irrigation demand.
194.6	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Catchment Objectives	Not Stated	Is unclear with regard to the application of minimum flows and/or cease take restrictions, including to groundwater. In this regard Pernod Ricard seeks consideration of: i. an allowance for limited takes for the purpose of 'root stock protection' (compare Policy TT9(1)(f) for the Tukituki Catchment, or Policy 5.10.7.51 in relation to water shortage directions); and ii. provisions addressing the extent to which minimum flow restrictions are applied to groundwater, for example to the degree of hydraulic connection/stream depleting effect with the surface water body (as per Policy TT11 for the Tukituki Catchment
195.26	Peter	Matich	Federated Farmers of New Zealand	Catchment Objectives	Support	Retain objectives 10, 11, 12, 13, and 14 as notified
197.3	Lilly	Lawson	Beef + Lamb New Zealand Ltd	Catchment Objectives	Amend	Catchment objectives - amend existing and include as required new objectives to give effect to the following intent: •Replace words 'improve' & 'enhanced' in the context of water quality and quantity with 'managed or where degraded enhanced' or words to that effect. •So as to achieve a shift in intent of objectives to be driven by the achievement of the end state values associated with freshwater. •Replace objectives which seek to 'enable'with objectives which seek to 'provide for'.
198.3	Cordelia	Woodhouse	Environmental Defence Society Inc	Catchment Objectives	Amend	Set allocation limits, minimum flow and high flow limits for all catchments
203.5	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	Catchment Objectives	Support	Retain Objectives 10 -to 15 as notified.
216.6	Phillipa	McVeagh	New Zealand Apples & Pears	Catchment Objectives	Not Stated	Water bans designed around a single minimum flow point is a very crude water management tool, a better approach could be staged reductions to maintain flow regimes and provide some water to maintain crops and rootstock in dry years.
216.7	Phillipa	McVeagh	New Zealand Apples & Pears	Catchment Objectives	Not Stated	Allocation based on the 'lesser amount of actual and reasonable' will directly impact land use change, land value, and growth, effectively locking the plains into historic patterns of water and land use. PC9 needs to provide opportunities for change that will enable improvements in freshwater management to be achieved and without adverse effects of the industry's potential for growth.
219.77	Michael & Julie	Russell		Catchment Objectives	Amend	"Actual and reasonable" allocations do not consider the least of option for the 10 years preceding 2017, because those records do not exist, and our operations have changed frequently over that period.
222.2	Owen Jerry	Hāpuku		Catchment Objectives	Oppose	PC9 would then need to have a provision in it that requires both a reduction in over-all quantity of water abstracted from the Heretaunga Plains Aquifer System (reductions in current use) PLUS a method to ensure expiring consents are dealt with in such a manner that these reductions are applied as resource consents come up for renewal.
222.6	Owen Jerry	Hāpuku		Catchment Objectives	Oppose	I want the ceasing of stream diversion and abstraction from Poukawa, and the restoration and future protection of Poukawa.
224.4	Peter	Holley	Mission Estate Winery	Catchment Objectives	Oppose	The assumption used in the irrigation NZ Irricalc water allocation tool will need to be carefully considered.

231.1	Peter	Kay		Catchment Objectives	Support	Support the catchment management approach and seek it to be retained as proposed.
236.5	Kenneth	Mark		Catchment Objectives	Oppose	I oppose the requirements for limiting the transfer of takes in water permits to "actual and reasonable" take. If you manage to save water... you should be able to share that with other irrigators who need the water
OBJ TANK 10						
12.2	Alec	Duncan	Ministry of Education	OBJ TANK 10	Amend	Amend OBJ TANK 10 - ... c) healthy and diverse indigenous aquatic plant, fish and bird populations; d) people and communities to safely meet their domestic water needs and provide for the social infrastructure necessary to support these people and communities; e) primary production water for community social and economic well-being and provide for:
13.3	Alec	Duncan	Fire and Emergency New Zealand	OBJ TANK 10	Support	Support OBJ TANK 10 - retain as proposed.
58.8	Peter	Wilson	Hawkes Bay Fish and Game Council	OBJ TANK 10	Amend	Amend (c) to insert "the habitat of trout and salmon" as additional wording
126.13	James	Lyver	Maungaharuru-Tangitū Trust	OBJ TANK 10	Amend	Delete Objective 10 and replace with the following wording to read: <u>The health and wellbeing of Te Whanganui-a-Orotu is enhanced and protected by 2040 consistent with its status as a taonga of significant cultural value, high recreation value, significant conservation area and nationally significant wildlife reserve.</u>
135.9	Anna	Wilkes	Ravensdown Limited	OBJ TANK 10	Amend	Amend OBJ TANK 10 as follows: "Primary production access to water for community social and economic well-being;"
180.12	Charlotte	Drury	Horticulture New Zealand	OBJ TANK 10	Not Stated	The provisions proposed in the plan may not be sufficient to address the issues challenging the ecosystem health of the Ahuriri Estuary. Sediment inflow to the estuary, at least in recent times, have largely been the consequence of recent, large scale subdivisions on the hills of the catchment. It is unclear how the rules of this plan change will tackle such activities.
194.23	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	OBJ TANK 10	Amend	OBJ TANK 10(e) should be amended along the lines of 'primary production water needs and water required for associated processing and other urban activities to provide for community social and economic well-being', consistent with the equivalent objectives for other water bodies in OBJs TANK 11-14.
201.23	Liz	Munroe	Heretaunga Tamatea Settlement Trust	OBJ TANK 10	Amend	In conjunction with meeting the water quality states specified in Schedule 26, the mauri, water quality and water quantity are maintained and enhanced where necessary to enable: a) The life supporting capacity of water b) Ahuriri estuary sediments to be healthy and not accumulate excessively; c) healthy ecosystems that contribute to the health of the estuary; d) healthy and diverse indigenous aquatic plant, fish and bird populations; e) people and communities to safely meet their domestic water needs; f) primary production water for community social and economic wellbeing are provided for; g) contribution to the healthy functioning of the Ahuriri estuary ecosystem and enable people to safely carry out a wide range of social, cultural and recreational activities including swimming and the collection of mahinga kai in the estuary.
229.8	Angie	Denby	Ahuriri Estuary Protection Society INC	OBJ TANK 10	Amend	We need reassurance that councils are proceeding with clarity and intend to put into action the long-awaited genuine collaborative effort to enhance the ecology of the Ahuriri Estuary.
240.12	Te Kaha	Hawaikirangi	Ngāti Pārau Hapū Trust	OBJ TANK 10	Not Stated	Tributaries that flow into the Ahuriri (Te Whanganui a Orotu) within the Napier City area are excluded as a tributary and not subject to limits. E.g Purimu, Old Tutaekuri, Taipo, Tamihinu.
OBJ TANK 11						
3.13	Gavin	Yort	Limestone Properties Limited	OBJ TANK 11	Oppose	Mend clause (g): "primary production water needs and water required for associated processing and other urban and rural residential (including farm parks) activities to provide for community social and economic well-being"
6.6	Daniel	Soltau		OBJ TANK 11	Amend	Amend Clause (c) Remove jet boating
8.1	Rengasamy	Balasubramaniam	Delegat Limited	OBJ TANK 11	Support	Support Objective 11(g)
12.3	Alec	Duncan	Ministry of Education	OBJ TANK 11	Amend	Amend OBJ TANK 11 - ... e) collection of mahinga kai to provide for social and cultural well-being; f) people and communities to safely meet their domestic water needs and provide for the social infrastructure necessary to support these people and communities; g) primary production water needs and water required for associated processing and other urban activities to provide for community social and economic well-being; and provide for:
13.4	Alec	Duncan	Fire and Emergency New Zealand	OBJ TANK 11	Support	Support OBJ TANK 11 - retain as proposed.
29.42	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	OBJ TANK 11	Amend	Amend to Rule TANK 11a) (ii) ii read: "takes of water associated with and dependant on release of water from a water storage impoundment <u>or from a managed aquifer recharge scheme.</u> " or similar wording to achieve the outcome sought in this submission.
29.52	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	OBJ TANK 11	Amend	Amend OBJ 11 to read: "...and the taking, using, damming...".
108.1	Brian	Eccles	Jet Boating New Zealand	OBJ TANK 11	Support	OBJ TANK 11, c - support the inclusion of Jet-Boating
115.2	Patricia D	Nuku		OBJ TANK 11	Not Stated	Amend PC9 to include sustainable allocation Volumes and sustainable abstraction Rates from the Ngaruroro River
115.5	Patricia D	Nuku		OBJ TANK 11	Not Stated	Raise the minimum flow in the Ngaruroro River to provide 90% habitat provision for range of fish species that prefer fast flowing River reaches.

120.35	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	OBJ TANK 11	Amend	Water takes from the Ngaruroro River tributaries should form a percentage of total takes allowed for the Ngaruroro catchment as a whole, and the volume and rates of take that aggregate/add up must be an overall sustainable total for the 6-month irrigation season.
123.5	Jenny	Nelson-Smith	Department of Conservation	OBJ TANK 11	Not Stated	Significantly increase the minimum flow in the Ngaruroro River to provide more habitat for indigenous fish at low flows (e.g., 80 - 90% of habitat at MALF).
132.117	Marei	Apatu	Te Taiwhenua o Heretaunga	OBJ TANK 11	Amend	For the Ngaruroro River, impose the following restrictions for high flow allocations: a) Restrict high flow abstraction to flows above 24,000 litres per second, as measured at the Fernhill Bridge. b) Provide a total instantaneous rate of take limit for high flow takes. c) Limit the total amount of high flow take to 5 Million m3 per year, and to the periods 15 May to 15 October in any year. d) Provide for additional flow for the river on a 1:1 ratio for high flow takes as identified in the MWH report, May 2010. e) Do not allow high flow takes that are outside of allocation limits for any purpose.
135.10	Anna	Wilkes	Ravensdown Limited	OBJ TANK 11	Amend	Amend OBJ TANK 11 as follows: ... g) primary production, <i>industrial and commercial</i> water needs and water required for associated processing and other urban activities to provide for community social and economic well-being;
139.3	Charmaine	Pene		OBJ TANK 11	Oppose	I highly recommend that the resource consent application for the man-made lake in Maraekakaho and the one between Matapiro and Whanawhana be reviewed.
142.7	Bill	Glazebrook	Big Hill Station Limited	OBJ TANK 11	Support	Remove "a healthy trout fishery" from the OBJ 11 b). Agree with balance of out comes a)-g) and as a consequence contributions to h) and i)
194.24	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	OBJ TANK 11	Support	Retain as drafted
198.7	Cordelia	Woodhouse	Environmental Defence Society Inc	OBJ TANK 11	Amend	Significantly increase the minimum flow in the Ngaruroro River to provide more habitat for indigenous fish at low flows
201.24	Liz	Munroe	Heretaunga Tamatea Settlement Trust	OBJ TANK 11	Amend	Amend and reorder bullet points starting with a) the life supporting capacity of water and ecosystems; The rest of the bullet points outlined in the submission.
212.2	Lyn	Pohe	Omahu School	OBJ TANK 11	Not Stated	Seek to ensure the impact of dredging on the Ngaruroro River is inclusive in the plan. The dredging frequency and access and effects on the river.
212.3	Lyn	Pohe	Omahu School	OBJ TANK 11	Not Stated	The review of Ngaruroro River Flood protection and drainage scheme in relation to the TANK objectives.
232.3	Levi	Walford	Matahiwi Marae	OBJ TANK 11	Oppose	Amend Plan Change 9 to include sustainable allocation volumes and abstraction rates from the Ngaruroro river.
OBJ TANK 12						
12.4	Alec	Duncan	Ministry of Education	OBJ TANK 12	Amend	Amend OBJ TANK 12 - ... e) collection of mahinga kai to provide for social and cultural well-being; f) people and communities to safely meet their domestic water needs and provide for the social infrastructure necessary to support these people and communities; g) primary production water needs and water required for associated processing and other urban activities to provide for community social and economic well-being; and provide for; ...
13.5	Alec	Duncan	Fire and Emergency New Zealand	OBJ TANK 12	Support	Support OBJ TANK 12 - retain as proposed.
29.53	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	OBJ TANK 12	Amend	Amend OBJ 12.b to read "...especially whitebait...". (deleting unnecessary comma)
135.11	Anna	Wilkes	Ravensdown Limited	OBJ TANK 12	Amend	Amend OBJ TANK 12 as follows: g) primary production, <i>industrial and commercial</i> water needs and water required for associated processing and other urban activities to provide for community social and economic well-being;
194.25	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	OBJ TANK 12	Support	Retain as drafted.
201.25	Liz	Munroe	Heretaunga Tamatea Settlement Trust	OBJ TANK 12	Amend	Amend and reorder bullet points starting with a) the life supporting capacity of water and ecosystems; The rest of the bullet points outlined in the submission.
OBJ TANK 13						

12.5	Alec	Duncan	Ministry of Education	OBJ TANK 13	Amend	Amend OBJ TANK 13 - ... e) people and communities to safely meet their domestic water needs <u>and provide for the social infrastructure necessary to support these people and communities;</u> f) primary production water needs and water required for associated processing and other urban activities to provide for community social and economic well-being; and provide for; ...
13.6	Alec	Duncan	Fire and Emergency New Zealand	OBJ TANK 13	Support	Support OBJ TANK 13 - retain as proposed.
115.3	Patricia D	Nuku		OBJ TANK 13	Not Stated	Limit the amounts of nutrients that discharge or Leach into the Karamu River to prevent adverse effects on the habitat an aquatic life in the River.
117.5	Alison	Johnston	Silver Fern Farms Limited	OBJ TANK 13	Amend	Considers that retention of the operative limit under Band B would be appropriate as it is suitable in the Karamu Catchment.
124.1	Bridget	Margerison	Brownrigg Agriculture Group Ltd	OBJ TANK 13	Support	OBJ TANK 13 (f) - Support.
132.187	Marei	Apatu	Te Taiwhenua o Heretaunga	OBJ TANK 13	Amend	Make petroleum/oil exploration activities and petroleum/oil extraction activities within the Heretaunga Plains Aquifer System area, and within a 200 metre buffer zone around it, a prohibited activity. Provide a map to show the prohibited area.
135.12	Anna	Wilkes	Ravensdown Limited	OBJ TANK 13	Amend	Amend OBJ TANK 13 as follows: • f) <i>primary production, <u>industrial and commercial</u> water needs and water required for associated processing and other urban activities to provide for community social and economic well-being;</i>
138.2	Marei	Apatu		OBJ TANK 13	Not Stated	PC9 to reduce the amount of mud/sediment and other contaminants coming into the Karamu, and to increase the amount of water left in the awa during the summer so that it gets a good flush out from better floors. Increase of minimum flows for the Karamu of 10%.
138.3	Marei	Apatu		OBJ TANK 13	Not Stated	Less fertilisers are used on the land and less nutrients come into the awa. Limit put on how much fertiliser gets used in the Karamu catchment so that the weeds and algae are reduced and the Karamu becomes healthier. At the moment it has declining mauri. Also leave more water in the Karamu for increased fish habitat so my whanau can collect healthy kai from there again.
142.8	Bill	Glazebrook	Big Hill Station Limited	OBJ TANK 13	Amend	Remove "a healthy trout fishery" from the OBJ 11 b). Agree with balance of out comes a)-g) and as a consequence contributions to h)
142.9	Bill	Glazebrook	Big Hill Station Limited	OBJ TANK 13	Support	Support OBJ13
194.26	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	OBJ TANK 13	Support	Retain as drafted.
201.26	Liz	Munroe	Heretaunga Tamatea Settlement Trust	OBJ TANK 13	Amend	Amend and reorder bullet points starting with a) the life supporting capacity of water and ecosystems; The rest of the bullet points outlined in the submission.
232.4	Levi	Walford	Matahiwi Marae	OBJ TANK 13	Oppose	Harmful nutrients that are discharged into the Karamu causing adverse, affects, on the habitat and aquatic life are 'LIMITED'
C						
3.1	Gavin	Yort	Limestone Properties Limited	OBJ TANK 14	Support	Retain the provision - OBJ TANK - 14(a)
8.2	Rengasamy	Balasubramaniam	Delegat Limited	OBJ TANK 14	Support	Support OBJ TANK 14(b)
12.6	Alec	Duncan	Ministry of Education	OBJ TANK 14	Amend	Amend OBJ TANK 14 - ... a) people and communities to safely meet their domestic water needs and to enable the provision of safe and secure supplies of water for municipal use <u>including provision for the social infrastructure necessary to support these people and communities;</u> b) primary production water needs and water required for associated processing and other urban activities to provide for community social and economic well-being; and provide for; ...
13.7	Alec	Duncan	Fire and Emergency New Zealand	OBJ TANK 14	Support	Support OBJ TANK 14 - retain as proposed.
115.4	Patricia D	Nuku		OBJ TANK 14	Not Stated	Impose limits of abstractions from the Heretaunga plains aquifer system so that Springs that feed into the Karamu are not restricted.
119.5	Liz	Lambert	Hawke's Bay Drinking Water Governance Joint Committee	OBJ TANK 14	Support	Support , noting OBJ 21 in the RRMP refers to no degradation of existing groundwater quality.
120.41	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	OBJ TANK 14	Amend	Limit groundwater allocation to 70 million m3 per year from the Heretaunga Plains Aquifer
123.33	Jenny	Nelson-Smith	Department of Conservation	OBJ TANK 14	Oppose	Delete objective 14 and replace with new objectives C and D (see points 123.34 and 123.35).
123.34	Jenny	Nelson-Smith	Department of Conservation	OBJ TANK 14	Amend	Objective C - include as new objective. <u>"The mauri and quality of groundwater is maintained, enhanced or restored, to protect the health of groundwater dependent ecosystems, improve surface water quality, and make groundwater suitable for human drinking consumption"</u> or words to similar effect

123.35	Jenny	Nelson-Smith	Department of Conservation	OBJ TANK 14	Amend	Objective D - include as new objective. "Groundwater levels are maintained, enhanced or restored to protect the health of groundwater dependent ecosystems, future overallocation is avoided, and existing overallocation is phased out by 2040" or words to similar effect. Alternatively, overallocation could be addressed as one objective across surface water and groundwater (see new objective 'J' below). This would be more concise drafting but may not have the desired level of detail to direct the policies and rules.
124.2	Bridget	Margerison	Brownrigg Agriculture Group Ltd	OBJ TANK 14	Support	OBJ TANK 14(b) - Support.
124.23	Bridget	Margerison	Brownrigg Agriculture Group Ltd	OBJ TANK 14	Oppose	Add after clause (f): and in doing so will: <u>(g) continue to enable existing primary production land use activities adjacent to wetlands</u>
132.10	Marei	Apatu	Te Taiwhenua o Heretaunga	OBJ TANK 14	Amend	OBJ 14 - Ensure water quality in the HPAS System is protected from degradation through PC9 policies and methods.
132.11	Marei	Apatu	Te Taiwhenua o Heretaunga	OBJ TANK 14	Amend	OBJ 14 - Remove any water quality limits and protocols that enable water quality to decline.
135.13	Anna	Wilkes	Ravensdown Limited	OBJ TANK 14	Amend	Amend OBJ TANK 14 as follows: • <i>b) primary production, industrial and commercial water needs and water required for associated processing and other urban activities to provide for community social and economic well-being;</i>
142.10	Bill	Glazebrook	Big Hill Station Limited	OBJ TANK 14	Support	Supports OBJ14
194.27	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	OBJ TANK 14	Support	Retain as drafted.
201.27	Liz	Munroe	Heretaunga Tamatea Settlement Trust	OBJ TANK 14	Amend	Amend and reorder bullet points starting with a) the healthy functioning of life supporting capacity of water and ecosystems; The rest of the bullet points outlined in the submission.
216.15	Phillipa	McVeagh	New Zealand Apples & Pears	OBJ TANK 14	Not Stated	As newer / lower consented allocation information numbers become available they should be used to update the different HBRC assessment models (e.g. over allocation, stream depletion impact assessment).
216.16	Phillipa	McVeagh	New Zealand Apples & Pears	OBJ TANK 14	Not Stated	Stream or river depletion assessments - inclusion of provision for the ongoing ability for individuals to manage their own effects.
OBJ TANK 15						
29.54	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	OBJ TANK 15	Not Stated	OBJ 15.g: Consider relocating detailed wetland targets into a policy for drafting consistency.
58.9	Peter	Wilson	Hawkes Bay Fish and Game Council	OBJ TANK 15	Amend	Insert "recreational" into the list of values
123.36	Jenny	Nelson-Smith	Department of Conservation	OBJ TANK 15	Oppose	Delete and redraft as an outcome " <u>Wetlands and lakes are maintained or restored and their extent in the TANK catchments is increased to support the freshwater values in Schedule X including healthy ecosystems, indigenous species and their habitats, mahinga kai (etc)</u> " or words to similar effect. Redraft policies on the management of activities (land use, damming, diversion and the taking of water) and on increasing wetland extent to support this objective. <i>Clarify use of Waahi Taonga</i>
124.21	Bridget	Margerison	Brownrigg Agriculture Group Ltd	OBJ TANK 15	Oppose	Add as clause (g): primary production water needs and water required for associated processing and other urban activities to provide for <u>community social and economic well-being</u>
135.14	Anna	Wilkes	Ravensdown Limited	OBJ TANK 15	Support	Ravensdown is supportive of the intent of this objective to manage activities in the TANK catchment, where connected to the 'Wetland and lake waahi taonga', to ensure that mauri, water quality, flows and levels in these freshwater bodies are maintained and improved.
142.11	Bill	Glazebrook	Big Hill Station Limited	OBJ TANK 15	Support	Supports OBJ15
145.5	Peter	Raikes	Awanui Station	OBJ TANK 15	Not Stated	If HBRC wish to construct wetlands, this should be subject to notified consent with public input. A proviso to protect landowners from such issues needs to be included in PC9.
180.17	Charlotte	Drury	Horticulture New Zealand	OBJ TANK 15	Oppose	Delete specific areas specified in (g) to be restored and created, unless evidence can be provided that shows where these areas are, and that no adverse off-site effects will result from the work.
195.27	Peter	Matich	Federated Farmers of New Zealand	OBJ TANK 15	Amend	That OBJ TANK 15 be amended by adding the following Note: <u>Wet, damp, or boggy ground, and drains swales and stock drinking water dams within pastoral farmland, are not intended to be captured within the meaning of 'Wetland and lake waahi taonga' in this objective.</u> <u>And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.</u>
197.4	Lilly	Lawson	Beef + Lamb New Zealand Ltd	OBJ TANK 15	Amend	Amend existing and include as required new objectives to give effect to the following intent: • Strengthen the requirements to provide for the economic wellbeing of people and communities; and • In formulating freshwater objectives and limits, the economic wellbeing, including productive economic opportunities are <u>provided for in the context of environmental objectives, values and limits.</u>
201.28	Liz	Munroe	Heretaunga Tamatea Settlement Trust	OBJ TANK 15	Amend	Amend and reorder bullet points starting with a) the healthy functioning of the life supporting capacity of water and ecosystems; The rest of the bullet points outlined in the submission.
232.5	Levi	Walford	Matahiwi Marae	OBJ TANK 15	Oppose	That an imposition be put in place for abstractions from all Aquifer Systems - especially the Heretaunga Plains, so that the springs that feed into the rivers are not restricted
Water quantity						
11.1	Matt	Edwards		Water quantity	Support	Moving to annual allocations.

11.2	Matt	Edwards		Water quantity	Support	Reducing the daily allowance without a consent to 5000litres from 20,000Litres for any new application after May 2020.
11.4	Matt	Edwards		Water quantity	Oppose	Reporting by telemetry for all consents taking above 5l/sec - certainly for the very large takes. But what's wrong with reporting direct into the council database via the internet for the smaller takes? I would agree that dishonest or persistent tardy reporting could lead to it being mandatory for such consent holders. But why impose this additional cost on the smaller takes?
11.5	Matt	Edwards		Water quantity	Oppose	Ninety-five percent reliability of water availability. Would you be happy to see your income drastically reduced once in 20 years? No reason appears to be given for this criteria. You say the ground water resource is over allocated but you can guarantee water 19 years out of 20? Really?
11.7	Matt	Edwards		Water quantity	Oppose	With respect to the urban areas, further reduction of available water for irrigation into the future. How the available 90 million cubic metres of water is divided between the sectors is pertinent but I could not get information on this from Council despite asking. The Tank Plan is to further exacerbate this situation because there is provision to increase the amount available for the urban areas to provide for population growth. This will have the effect of further restrictions being applied to the amount of water available for irrigation further inhibiting crop production and therefore income into H. Bay
11.8	Matt	Edwards		Water quantity	Oppose	Reduction of existing Resource Consent water allocation for cropping. The plan is to reduce the allocated amount to an 'actual and reasonable' annual amount – generally as verified by 10 years of water meter records prior to 2017.
11.9	Matt	Edwards		Water quantity	Amend	What efficiency gains are you asking the urban areas to make? Nothing really tangible in the plan other than a plea to try and reduce leakage. How about urban properties having a decent sized water tank to collect some of the roof runoff? Not the little 200litre ones being promoted for use in the event of a civil emergency situation which will only last a few days at best. This stored water would reduce flow in the storm water systems and could be used for garden irrigation, car washing etc and for domestic supply in an emergency.
15.20	Andrea and Phil	Cranswick	Meridien Trust	Water quantity	Not Stated	We were a mixed pip and stone fruit orchard and in 2000/2001 following several difficult years we took up an opportunity to remove the trees and grow grapes. These have now run their course and we wish to return to orcharding. We are concerned that we will not be able to do this if our water supply is limited to our recent previous volume.
16.13	Bernadette	Hamlin		Water quantity	Oppose	Amend Change 9 so that when rivers are depleted there are strategies implemented to restore to original state.
17.4	Richard	Riddell	Olrig Limited	Water quantity	Oppose	OBJ 16, 17 and 18 and associated policies 5.10.7 and rules - The continuous provision of water is critical to animal welfare and should be a priority take above other non-essential takes. Oppose provisions which relate to water takes and management which fail to provide for stock water as a priority take.
18.4	Mark	Cairns	MD Cairns & AR Wright Partnership	Water quantity	Not Stated	I am concerned that PC9's approach to allocation of water and control of farming emissions unfairly penalises viticultural landowners as very low water users and very low emitters compared to other major primary production systems.
19.2	John	Palmer		Water quantity	Amend	Believes a mechanism based on pro rata reduction across all stream depleting takes would be fairer to all users. My understanding is the maximum take rate is required to drop from 1581 L/s to 1300 L/s. This is just under a 18% drop in flow which could be uniformly applied to all takes. My contention is that a much fairer and more flexible approach both for individuals and for the area as a whole is the pro rata reduction mechanism I have previously outlined.
21.4	Robert & Helen	Patullo	Newstead Farm Ltd	Water quantity	Oppose	OBJ 16, 17 and 18 and associated policies 5.10.7 and rules - The continuous provision of water is critical to animal welfare and should be a priority take above other non-essential takes. Oppose provisions which relate to water takes and management which fail to provide for stock water as a priority take.
22.1	Peter	Clayton	PB & BG Clayton	Water quantity	Amend	Water allocation reductions - I recommend the irracalc model is used for water allocation purposes and the 90% allocation level be raised, preferably to 100%
22.2	Peter	Clayton	PB & BG Clayton	Water quantity	Amend	High flow allocation and water harvesting - Greater direction be given to minimising residual flows in high flow periods whilst water harvesting.
23.2	Kerry	Sixtus	Pattullo's Nurseries Limited	Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
24.9	Jim	Watt	Saint Columba's Havelock North Environment Group (SCHNEG)	Water quantity	Not Stated	Although The TANK Plan addresses pressing water quality and quantity issues in the waterways of the Heretaunga Plains, an equal issue is that of water conservation and water storage. While the day for large storage facilities might have passed, the opportunity remains for smaller and many initiatives on all properties, both rural AND urban.
25.4	Xan	Harding		Water quantity	Not Stated	I am concerned that PC9's approach to allocation of water and control of farming emissions unfairly penalises viticultural landowners as very low water users and very low emitters compared to other major primary production systems.
26.4	Robin	Back	Dunvegan Estate	Water quantity	Not Stated	I am concerned that PC9's approach to allocation of water and control of farming emissions unfairly penalises viticultural landowners as very low water users and very low emitters compared to other major primary production systems.
28.4	Hamish	Clark	Saint Clair Family Estate Ltd	Water quantity	Not Stated	I am concerned that PC9's approach to allocation of water and control of farming emissions unfairly penalises viticultural landowners as very low water users and very low emitters compared to other major primary production systems.

29.4	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Water quantity	Oppose	HBWG has consistently opposed the proposed approach to allocation of water and diffuse discharges and continues to do so.
32.2	Kent	Griffiths		Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
33.2	Bruce	McGregor		Water quantity	Oppose	Oppose OBJ TANK 16, 17 and 18 and associated policies and rules - Stock drinking water should be top priority.
34.4	Jonathan	Hamlet	Craggy Range Vineyards Limited	Water quantity	Not Stated	I am concerned that PC9's approach to allocation of water and control of farming emissions unfairly penalises viticultural landowners as very low water users and very low emitters compared to other major primary production systems.
35.2	Colin	Campbell		Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of agriculture and horticulture to the future sustainability of the TANK Catchments.
35.76	Colin	Campbell		Water quantity	Oppose	Opposes provisions which relate to water takes and management and which fail to provide for stock drinking water as a priority take.
36.1	Karen	Morrish	Mr Apple New Zealand Ltd	Water quantity	Not Stated	Reduction in allocation may affect the commercial viability of the business and may affect future expansion opportunities which will be beneficial to the community as a whole. Wish to ensure there is a level playing field.
37.2	Greg	Evans	Dartmoor Estate Ltd	Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
38.2	Roger	Brownlie		Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
39.4	Bridget	Wilton	MbandSons	Water quantity	Not Stated	I am concerned that PC9's approach to allocation of water and control of farming emissions unfairly penalises viticultural landowners as very low water users and very low emitters compared to other major primary production systems.
40.4	Jeremy	White	J and S White Contracting Ltd	Water quantity	Oppose	OBJ 16, 17 and 18 and associated policies 5.10.7 and rules - The continuous provision of water is critical to animal welfare and should be a priority take above other non-essential takes. Oppose provisions which relate to water takes and management which fail to provide for stock water as a priority take.
41.4	Jonathan	Milmine	Milmine Holdings Limited	Water quantity	Not Stated	I am concerned that PC9's approach to allocation of water and control of farming emissions unfairly penalises viticultural landowners as very low water users and very low emitters compared to other major primary production systems.
42.2	Glenn	Riddell	Glenmore Orchard	Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
43.2	CA & GW	Wilson	Meiros Orchard Ltd	Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
43.74	CA & GW	Wilson	Meiros Orchard Ltd	Water quantity	Not Stated	No specific decision requested but states that they do not want to lose the ability to put water on when it is needed to irrigate crops
43.75	CA & GW	Wilson	Meiros Orchard Ltd	Water quantity	Not Stated	No specific decision requested but states that they fear Change 9 is not going to give them enough water to carry on growing apples for export.
44.2	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
44.76	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Water quantity	Not Stated	No specific decision requested but implies that reduced water allocations could have negative economic effects.
45.6	Sydney	Parks	Westbrook Farm Ltd	Water quantity	Oppose	OBJ 16, 17 and 18 and associated policies 5.10.7 and rules - The continuous provision of water is critical to animal welfare and should be a priority take above other non-essential takes. Oppose provisions which relate to water takes and management which fail to provide for stock water as a priority take.
46.4	Tom	Belford	Peter Beaven & Tom Belford	Water quantity	Support	States the accomplishments of PC9: Water harvesting and on-land storage schemes will be permitted, but these will need to proceed through normal RMA review processes to establish their environmental suitability. And, if meeting that test, they will need to be user paid.
46.10	Tom	Belford	Peter Beaven & Tom Belford	Water quantity	Support	States accomplishments of PC9: Higher requirements for efficient water use by irrigators will be in place.
46.12	Tom	Belford	Peter Beaven & Tom Belford	Water quantity	Amend	Believe the Plan could have done more to require water conservation/efficiency measures by all water users, including residents and the territorial authorities who serve them. Everyone needs to treat water as a finite resource and think seriously about how they can use it more efficiently
46.13	Tom	Belford	Peter Beaven & Tom Belford	Water quantity	Not Stated	Water storage is not just a matter of interest to irrigators. The need is to store water in every conceivable way and venue. For example every new residence and commercial building should be required to provide for water storage.
46.14	Tom	Belford	Peter Beaven & Tom Belford	Water quantity	Not Stated	As the plan is implemented, hope that community-wide water conservation and water storage goals might be set, and that land uses be evaluated to ensure that water is used for its optimal environmental and economic value.
48.4	Paul	Ham	Alpha Domus	Water quantity	Not Stated	I am concerned that PC9's approach to allocation of water and control of farming emissions unfairly penalises viticultural landowners as very low water users and very low emitters compared to other major primary production systems.

49.2	John	Parsons		Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
49.74	John	Parsons		Water quantity	Not Stated	Amend Change 9 so that the annually done GAP compliance which includes irrigation is recognised.
49.75	John	Parsons		Water quantity	Not Stated	Amend Change 9 so that water allocation is equitable and all land are is treated equally over the plains where consents already exist.
49.76	John	Parsons		Water quantity	Not Stated	No specific decision requested but suggests that using IRRICALC will allow for variations that occur in actual water use as a result of the age of trees.
50.4	Alastair & Jo	Lawrence	Olig Limited	Water quantity	Not Stated	Do not believe sufficient recognition has been given to potential upside impact of water on the growth of the farming economy, the wider Hawkes Bay economy (e.g. investment, job creation) and thereby its critical importance to the recovery of <u>New Zealand's economy</u> .
50.6	Alastair & Jo	Lawrence	Olig Limited	Water quantity	Amend	See more focus on how to expand the water allocation available to the farming community as a means of growing the Hawkes Bay economy, thereby improving the fortunes of all residents in the region.
50.7	Alastair & Jo	Lawrence	Olig Limited	Water quantity	Not Stated	Consider objectives and policies should be better balance and more enabling of sustainable economic development, and sustainable land change use. Many land use changes can be positive for the environment particularly in reduction of nitrate usage and reduction of carbon emissions and positive for the regional economy (e.g. employment opportunities).
53.4	Chris	Howell	CD & CM Howell Partnership	Water quantity	Not Stated	I am concerned that PC9's approach to allocation of water and control of farming emissions unfairly penalises viticultural landowners as very low water users and very low emitters compared to other major primary production systems.
53.20	Chris	Howell	CD & CM Howell Partnership	Water quantity	Amend	Amend OBJs TANK 16 & 17 to reflect the need for urban water use to reflect the values of the plan change by way of metering at the consumer level as occurs in other territorial authorities.
54.2	Mark	Apatu	Apatu Farms Ltd	Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
61.2	Greg	Simpson		Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
61.76	Greg	Simpson		Water quantity	Not Stated	No specific decision requested but implies that reducing water allocations would have negative effects for the economy, individual growers and the sustainability of the industry.
62.2	Jonty	Moffett		Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
62.76	Jonty	Moffett		Water quantity	Not Stated	No specific decision requested but implies that reduced water allocations may have negative impacts for the economy and <u>New Zealand's food security</u> .
68.4	Geoffrey	Smith	Vine Nursery New Zealand and Waikahu Vineyard	Water quantity	Not Stated	I am concerned that PC9's approach to allocation of water and control of farming emissions unfairly penalises viticultural landowners as very low water users and very low emitters compared to other major primary production systems.
68.20	Geoffrey	Smith	Vine Nursery New Zealand and Waikahu Vineyard	Water quantity	Oppose	To allocate a fair volume of water for the current land use and a resource consent water permit that has weekly take volumes representative of Irricalc.
69.2	Jos	Dames	Dames Limited	Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
71.2	Carl	Knapp	Bellingham Orchard Ltd.	Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
71.74	Carl	Knapp	Bellingham Orchard Ltd.	Water quantity	Not Stated	No specific decision sought but implies a preference for basing water allocation on reasonable use (based on IRRICALC) than historic actual use.
72.2	Justin	Addis	Armada Orchard Ltd	Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
72.74	Justin	Addis	Armada Orchard Ltd	Water quantity	Not Stated	No specific decision requested but suggests that if horticulturalists do not have enough water to irrigate their crops the economy and local food supply will be negatively affected.
72.75	Justin	Addis	Armada Orchard Ltd	Water quantity	Not Stated	No specific decision requested but suggests that horticulturalists need the ability to change land use and adapt water to suit <u>evolving crops</u> .
72.80	Justin	Addis	Armada Orchard Ltd	Water quantity	Not Stated	No specific decision requested but states that we need to be 100% sure of the data we use to model stream flow levels and aquifer volumes so that any solutions are based accordingly and appropriately recognizing all aspects involved.
73.2	Bevan	Davidson		Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
73.74	Bevan	Davidson		Water quantity	Not Stated	No specific decision requested but suggests that if horticulturalists do not have enough water to irrigate their crops the economy and local food supply will be negatively affected.

73.75	Bevan	Davidson		Water quantity	Not Stated	No specific decision requested but suggests that horticulturalists need the ability to change land use and adapt water to suit evolving crops.
73.8	Bevan	Davidson		Water quantity	Not Stated	No specific decision requested but states that we need to be 100% sure of the data we use to model stream flow levels and aquifer volumes so that any solutions are based accordingly and appropriately recognizing all aspects involved.
75.4	Andria	Monin	Stonecroft Wines Limited	Water quantity	Not Stated	I am concerned that PC9's approach to allocation of water and control of farming emissions unfairly penalises viticultural landowners as very low water users and very low emitters compared to other major primary production systems.
76.4	Larry	Morgan	Te Mata Estate Winery Ltd	Water quantity	Not Stated	I am concerned that PC9's approach to allocation of water and control of farming emissions unfairly penalises viticultural landowners as very low water users and very low emitters compared to other major primary production systems.
77.2	David & Sheryl	Mackie		Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
79.2	Richard	Penreath		Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
79.74	Richard	Penreath		Water quantity	Not Stated	No specific decision requested but implies that relying on historical water use to determine allocation would severely impact the sustainability of horticulture on the Heretaunga Plains.
79.75	Richard	Penreath		Water quantity	Not Stated	No specific decision sought but states that high quality soils should be used to produce high value crops, not limited by historic water uses.
81.4	Tony	Smith	Babich Wines	Water quantity	Not Stated	I am concerned that PC9's approach to allocation of water and control of farming emissions unfairly penalises viticultural landowners as very low water users and very low emitters compared to other major primary production systems.
84.4	Grant	Edmonds	Redmetal Vineyards Ltd	Water quantity	Not Stated	I am concerned that PC9's approach to allocation of water and control of farming emissions unfairly penalises viticultural landowners as very low water users and very low emitters compared to other major primary production systems.
86.2	Peter	Scott		Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
86.74	Peter	Scott		Water quantity	Not Stated	No specific decision requested but implies opposition to any reduction from current water allocations.
87.4	Peter	Scott	Kereru Road Vineyard	Water quantity	Not Stated	I am concerned that PC9's approach to allocation of water and control of farming emissions unfairly penalises viticultural landowners as very low water users and very low emitters compared to other major primary production systems.
88.4	Jacqui	Cormack	Constellation Brands NZ Limited (CBNZ)	Water quantity	Not Stated	I am concerned that PC9's approach to allocation of water and control of farming emissions unfairly penalises viticultural landowners as very low water users and very low emitters compared to other major primary production systems.
90.1	Sarah	Millington		Water quantity	Not Stated	From now on, allocation should be based on what is available after ecosystem health needs and essential human needs (including cultural needs) are met rather than in response to demands for ag/hort utilisation.
90.4	Sarah	Millington		Water quantity	Not Stated	That Council takes a very precautionary approach to augmentation, and seeks instead to use sustainable strategies to address the issue.
90.6	Sarah	Millington		Water quantity	Not Stated	Include a policy that prohibits extraction of groundwater for the purposes of water bottling in the TANK catchments, including a clear plan for phasing out the existing permits and extractions.
91.1	Johnny	Milmine	Berry Farms NZ	Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
94.4	Deane	Caughey	Indevin Group Ltd	Water quantity	Not Stated	I am concerned that PC9's approach to allocation of water and control of farming emissions unfairly penalises viticultural landowners as very low water users and very low emitters compared to other major primary production systems.
94.20	Deane	Caughey	Indevin Group Ltd	Water quantity	Oppose	The ability to change into alternative horticulture without penalty.
95.2	Johnny	Milmine	Prime Limes	Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
96.2	Mike	Davis	Davis Orchards Ltd	Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
96.76	Mike	Davis	Davis Orchards Ltd	Water quantity	Not Stated	No specific decision requested but implies reduction in water allocations could have negative economic impacts.

97.2	Lesley	Wilson	DN & LR Wilson Ltd	Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
97.83	Lesley	Wilson	DN & LR Wilson Ltd	Water quantity	Amend	Include a directive to Councils that all new houses being built in Hawke 's Bay be equipped with water meters.
98.1	David	France	Caitbridge Trust	Water quantity	Not Stated	No specific relief stated but raises issues about land use options remaining flexible to account for future changes in market conditions, climate change and or improving technologies. The ability for land owners to optimise their land use within sustainable parameters using the water consent entitlements they have invested in and developed over the years.
99.1	Jerf	van Beek	Twyford Water	Water quantity	Amend	It is critical that the harvesting of water at high flows, and storage for later utilization, is provided for by the TANK plan change. Further work needs to be done to identify whether or not additional water can be taken for this purpose, as it understands that a significant amount of the allocation set out in the proposed plan has already been allocated or applied for, which means that the 'solution' for accessing new water that this plan change hinges on, potentially will provide that additional water for a very limited number of people.
102.4	Ritchie	Garnham	Booster Wine Group	Water quantity	Not Stated	I am concerned that PC9's approach to allocation of water and control of farming emissions unfairly penalises viticultural landowners as very low water users and very low emitters compared to other major primary production systems.
104.2	John	Loughlin	Rockit Global Limited	Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
104.76	John	Loughlin	Rockit Global Limited	Water quantity	Not Stated	No specific decision requested but implies changes to water takes and allocation could have negative economic effects.
105.2	Scott	Lawson		Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
105.76	Scott	Lawson		Water quantity	Not Stated	No specific decision requested but implies that security of water supply is important for maintaining economic impacts.
106.12	Kane	Koko	Taraia Marae	Water quantity	Oppose	While this plan has been undertaken, landowners have had plenty of time to get their whare in order. They will maintain their status quo for as long as they can and it could be a long time before they give up their allocation. Urgency needs to be made on the highest and over allocated streams such as the Paritua and Karewarewa.
106.13	Kane	Koko	Taraia Marae	Water quantity	Oppose	While it may have provided 'good results' in other areas, taking from groundwater does not start at the source of the problem which is that too much water has been allocated. Urgency and priority given to streams that have been allocated over 60%, starting from the highest allocated, to get that allocation reduced to encourage flow.
106.16	Kane	Koko	Taraia Marae	Water quantity	Not Stated	No water bottling.
107.4	Christopher	Harrison	Beach House Wines Ltd	Water quantity	Not Stated	I am concerned that PC9's approach to allocation of water and control of farming emissions unfairly penalises viticultural landowners as very low water users and very low emitters compared to other major primary production systems.
109.11	Stuart	Macintyre	Turamoe Farm	Water quantity	Oppose	OBJ 16, 17 and 18 and associated polices and rules - Oppose provisions which relate to water takes and management and which fail to provide for stock drinking water as a priority take. The continuous provision of water is critical to animal welfare and should be a priority take above other non-essential takes
110.2	Edward	Whyte	Whyte & Co	Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
110.76	Edward	Whyte	Whyte & Co	Water quantity	Not Stated	No specific decision requested but implies stream depletion models may be overly restrictive on those in tidally influenced areas.
110.77	Edward	Whyte	Whyte & Co	Water quantity	Not Stated	No specific decision requested but implies reductions to water allocations may have negative economic effects.
111.3	Lisa	Tuhi	Ngati Hinemanu, Ngai Te Upokoiri	Water quantity	Not Stated	Full moratorium on water consents being granted for water bottling companies taking/drawing from the Heretaunga Acquifer and awa Ngaruroro and its tributaries
111.11	Lisa	Tuhi	Ngati Hinemanu, Ngai Te Upokoiri	Water quantity	Not Stated	Maintain adequate/excellence in the quantity flow to avoid stagnation, pollution and bacterial widespread
111.17	Lisa	Tuhi	Ngati Hinemanu, Ngai Te Upokoiri	Water quantity	Not Stated	Protect the Heretaunga Acquifer, all other awa, awa ngaruroro and its tributaries from being completely depleted
112.4	Ainsley	Harte		Water quantity	Oppose	OBJ 16, 17 and 18 and associated policies 5.10.7 and rules - The continuous provision of water is critical to animal welfare and should be a priority take above other non-essential takes. Oppose provisions which relate to water takes and management which fail to provide for stock water as a priority take.
114.1	James	Lyons		Water quantity	Oppose	OBJ 16, 17 and 18 and associated policies 5.10.7 and rules - The continuous provision of water is critical to animal welfare and should be a priority take above other non-essential takes. Oppose provisions which relate to water takes and management which fail to provide for stock water as a priority take.
115.1	Patricia D	Nuku		Water quantity	Not Stated	Reduction in allocations overall in PC9, from groundwater and surface water that contribute to low flows in or no water being available in the Karewarewa and Paritua streams.

115.7	Patricia D	Nuku		Water quantity	Not Stated	Effects on streams and springs around the edges of the Heretaunga plains aquifer system, decline in steam flows, no water in streams for a major part of the year, reduced ability to use streams for recreation, fishing, mahina kai, cultural practices for teaching tamariki / rangatahi about their streams & rivers (Waimaori). Unsustainable use of the aquifer system, more water coming out than what's going in, declining water levels wells drying up more frequently, council looking to reduce the amount allocated for personal use.
115.8	Patricia D	Nuku		Water quantity	Not Stated	I ask for a reduction in all allocations overall in PC9 would need to have a provision in it that requires both a reduction in overall quantity of water abstracted from the Heretaunga plains aquifer system, and a method to ensure expiring consents are dealt with in such a manner that these reductions are applied as resource consents come up for renewal.
119.3	Liz	Lambert	Hawke's Bay Drinking Water Governance Joint Committee	Water quantity	Support	Supports Plan provisions that acknowledge the impact of water quantity on safe drinking water. Excessive pumping of groundwater over time can diminish water quality through an increase in the concentration of naturally occurring compounds or as saltwater intrusion as examples.
120.6	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Water quantity	Amend	Amend Change 9 to include directive provisions that reduce over abstraction and allocation of the Heretaunga Aquifer by introducing a capped total groundwater allocation limit of a maximum of 70 million m3 per annum.
120.7	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Water quantity	Amend	Amend Change 9 to include directive provisions that cease mining groundwater and phase out overdrafting within the Heretaunga Plains Aquifer System, including mining of springs and spring fed streams.
120.8	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Water quantity	Amend	Amend Change 9 to include directive provisions that reduce over abstraction and allocation of TANK surface waters (see Attachment 2 for numerical values).
120.9	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Water quantity	Amend	Amend Change 9 to include directive provisions that introduce (over the 10 year life of the Plan) a new system of allocation of water in the TANK catchments that does not rely exclusively on "first in, first served" and "grandparenting"; and that enables allocation of water in a way that provides for tikanga, whakapapa, recognition of rangatiratanga and Ngati Kahungunu's native title and proprietary interests in the TANK catchments and wider sustainable management.
120.32	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Water quantity	Amend	Amend Change 9 and reflect in the rules framework that proportional claw backs across all existing consents ensure that Te Mana o Te Wai is given full and proper effect and that the Mauri and other cultural values of the waterbodies within the TANK catchments are restored and protected.
120.33	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Water quantity	Amend	Amend Change 9 so that the first in, first served allocative model is reformed in the lifespan of Change 9 and renewal of water take permits needs to be on a case by case, discretionary basis rather than implicitly provided for by PC9.
120.34	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Water quantity	Amend	There are a number of interrelated concerns as to how water is allocated which need to be accounted for and remedied and ensure alignment between PC9 and the RRMP.
120.39	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Water quantity	Amend	Consider all groundwater (including shallow groundwater) within the allocation limits and stream depletion provisions.
120.45	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Water quantity	Amend	Ensure all water takes are within low flow, cultural allocation to Ngati Kahungunu and high flow allocation limits.
120.46	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Water quantity	Amend	Ensure all allocation limits are less than 30% naturalised MALF.
120.55	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Water quantity	Amend	Protect and enhance lowland springs such that there should be no negative effects on spring flows from water allocation.
120.57	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Water quantity	Amend	Restore depleted surface water flows and extent of streams, wetlands and springs through sustainable and precautionary allocation limits.
120.58	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Water quantity	Amend	Phase out, during the life of PC9, the grand-parenting and first in, first served regime in favour of an improved allocative model that enables recognition of the cultural and biodiversity values identified in this submission.
120.61	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Water quantity	Amend	Ensure commercial water takes (particularly groundwater) do not compromise existing private drinking water bores (existing infrastructure) and human health is the priority consideration.
120.67	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Water quantity	Amend	Remove the presumption that all existing consent holders will be able to renew their water take permits regardless of use or volume.
120.68	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Water quantity	Amend	Require all takes of water to be within sustainable (high and low) allocation limits and that all takes will cease at minimum flow except provision for explicitly prioritised essential uses including community supplies.
120.69	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Water quantity	Amend	Implement a framework by which existing takes will be phased out (along with over-allocation and over abstraction) and consequently enable a (low flow) tangata whenua allocation to be provided for.
120.76	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Water quantity	Amend	Any cultural allocation to Ngati Kahungunu shall not have a stipulation as to its use and the policy should not be used as a tokenistic method of addressing the cultural needs and aspirations of Maori.
122.2	Richard	Penreath	Ngai Tukairangi Trust	Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
122.76	Richard	Penreath	Ngai Tukairangi Trust	Water quantity	Not Stated	No specific decision requested but states that regulations should allow farmer and growers the flexibility to make changes to not only meet financial needs but also changing environmental needs.
123.2	Jenny	Nelson-Smith	Department of Conservation	Water quantity	Not Stated	Ensure all water takes are required to cease at minimum flows except essential water takes for human drinking water supplies (which should be required to reduce during water shortage and at minimum flows). Abstractions which deplete streams should cease when minimum flows are reached in all cases.
123.3	Jenny	Nelson-Smith	Department of Conservation	Water quantity	Not Stated	Ensure all water takes (including those for water storage and stream flow maintenance schemes) are within low flow and high flow allocation limits.

123.4	Jenny	Nelson-Smith	Department of Conservation	Water quantity	Not Stated	Ensure all allocation limits are less than 30% MALF.
123.6	Jenny	Nelson-Smith	Department of Conservation	Water quantity	Not Stated	Set high flow allocations for all rivers that ensure hydrological alteration of the flow regime is minimised and maintained close to natural flow regimes.
123.7	Jenny	Nelson-Smith	Department of Conservation	Water quantity	Not Stated	Do not allow transfer of water permits into over-allocated ground and surface water management units.
123.37	Jenny	Nelson-Smith	Department of Conservation	Water quantity	Oppose	Objectives 16, 17 and 18. Delete from objectives and move in PC9 to include as a policy and apply also to groundwater. Add new objectives E and F (see points 123.38 and 123.39).
123.38	Jenny	Nelson-Smith	Department of Conservation	Water quantity	Amend	Objective E - include as a new objective. "Flows and levels in surface waterbodies are maintained or enhanced to safeguard lifesupporting capacity and ecosystem health, recognise Te Mana o te Wai and to provide for the values in Schedule X and water is allocated efficiently within the limits in Schedules 31 and 32 and all water is used efficiently" or words to similar effect
123.39	Jenny	Nelson-Smith	Department of Conservation	Water quantity	Amend	Objective F - include as a new objective. "Future overallocation of surface water will be avoided and any existing overallocation will be phased out by 2040" or words to similar effect Alternatively, this objective could be combined with the suggested objective relating to overallocation of groundwater
127.8	Tania	Eden	Te Taiwhenua o Te Whanganui a Orotu	Water quantity	Not Stated	Allocate a cultural allocation (cultural share) to mana whenua and Iwi to recognise and provide for rangatiratanga and kaitiakitanga within a capped allocation maximum of 70 million cubic litres per annum;
127.9	Tania	Eden	Te Taiwhenua o Te Whanganui a Orotu	Water quantity	Not Stated	Allocate a cultural allocation (cultural share) to te Wai / water itself, on the premise that all of the awa that form the TANK catchment are spiritual and physical entities to which and mana whenua have rights
132.13	Marei	Apatu	Te Taiwhenua o Heretaunga	Water quantity	Amend	Delete all proposed provisions that enable or that are associated with flow enhancement (except existing consented flow enhancement activities, and enhancement of the Paritua Stream), stream augmentation, groundwater enhancement schemes, and prescribe construction of dams larger than 250,000 m3 as non-complying activities.
132.15	Marei	Apatu	Te Taiwhenua o Heretaunga	Water quantity	Amend	Te Taiwhenua o Heretaunga seek the avoidance of adverse effects where these are occurring such that limits are not being achieved, particularly when consents have expired or are due for renewal.
132.16	Marei	Apatu	Te Taiwhenua o Heretaunga	Water quantity	Amend	Provide for pro-rata reductions in both volumes and rates of abstraction for surface water and groundwater, to bring total a/locations and rates within more sustainable limits.
132.31	Marei	Apatu	Te Taiwhenua o Heretaunga	Water quantity	Amend	No specific decisions requested but raise issues relating to water allocation.
132.43	Marei	Apatu	Te Taiwhenua o Heretaunga	Water quantity	Amend	Prescribe and introduce an 'irrigation season' from 01 November to 30 April each year for surface water and surface water depleting groundwater abstractions
132.45	Marei	Apatu	Te Taiwhenua o Heretaunga	Water quantity	Amend	Reduce number of irrigation ban limits in catchments and include all limits used in water management and resource consent processes in PC9.
132.46	Marei	Apatu	Te Taiwhenua o Heretaunga	Water quantity	Amend	Provide for 2 million m3 annual groundwater allocation total, for use in the coastal environment water a/locations.
132.48	Marei	Apatu	Te Taiwhenua o Heretaunga	Water quantity	Amend	Take into account total permitted, controlled and restricted discretionary volumes above 60 m3 per week in a/location limits/quantum
132.91	Marei	Apatu	Te Taiwhenua o Heretaunga	Water quantity	Amend	Ensure restrictions on water abstraction in the operative RRMP, continue to apply through PC9 when flows in rivers/streams are at or fall below their minimum flow. Allow for abstraction to continue for domestic household use and firefighting, but restrict stock water use.
132.118	Marei	Apatu	Te Taiwhenua o Heretaunga	Water quantity	Amend	Require surface water depletion effects of 0.5 L per sec or greater, to be accounted for in water quantity allocations and consent limits for ground water abstractions, and subject to minimum flow restrictions and volume limits within FMUs and surface water management zones. Count surface water depletion rates in surface water abstraction rate limits, and depletion effects of more than 60 m3 per week in total abstraction volume limits for surface water bodies.
132.134	Marei	Apatu	Te Taiwhenua o Heretaunga	Water quantity	Amend	Prohibit any additional consents to take water from the HPAS for bottling and exporting purposes.
132.171	Marei	Apatu	Te Taiwhenua o Heretaunga	Water quantity	Amend	Use an updated Q95 that includes flow data up to 2019 and flows specific to the irrigation season to help derive a security of supply that is linked to surface water availability, and surface water abstraction limits and rates of abstraction.
132.185	Marei	Apatu	Te Taiwhenua o Heretaunga	Water quantity	Amend	Impose a management charge of 5 cents per cubic metre on surface water allocated for irrigation purposes, to be used for water management and monitoring purposes, including cultural monitoring.
132.191	Marei	Apatu	Te Taiwhenua o Heretaunga	Water quantity	Amend	For global consent applications and processes, have a separate policy that includes significantly more detail and criteria than is provided in proposed PC9. Assessment criteria provided.
133.3	Wi	Huata		Water quantity	Not Stated	PC9 does not right the wrong where some individuals and businesses have enormous water consents and others have none. Existing water rights holders need to apply along with first time applicants for water rights.
134.6	Willem	Kupa	Patoka Trust	Water quantity	Not Stated	PC9 should allow for releasing more environmental flows into streams and rivers from water storage and be an integral part of PC9 to allow growers including the kupu family to farm in the mdoern age as we have for hundreds of years.
134.7	Willem	Kupa	Patoka Trust	Water quantity	Not Stated	PC9 needs to be reframed to give an opportunity to draw water once Ngaruroro river has fallen below 2,400 l/sec.

136.3	Te Hira	Henderson		Water quantity	Not Stated	Seek relief by stopping all proposal plans, and only immediately to stop the flow out, extremely excessive to what flows in.
136.4	Te Hira	Henderson		Water quantity	Not Stated	Equal equity must be given to Te Tiriti in all decisions regarding water. Water is taonga tapu, not a commodity for plunder.
138.5	Marei	Apatu		Water quantity	Not Stated	Too many consents are being rolled over. PC9 to enable resource consents to take groundwater are called in to reduce their allocations on a pro rata basis (evenly).
138.6	Marei	Apatu		Water quantity	Not Stated	Want protection to a very special spring and bore on my property from land use and over-abstraction.
138.8	Marei	Apatu		Water quantity	Not Stated	The plan needs to reduce over-allocations and over-abstractions from groundwater and surface water that contribute to low flows the Karamu is 800% over allocated in terms of the operative plan.
140.4	Andrew and Tania	Kerr		Water quantity	Support	Maintain current 20m ³ allowance for new water takes
143.4	Peter	Hyslop	Strathallan Trust	Water quantity	Not Stated	I am concerned that PC9's approach to allocation of water and control of farming emissions unfairly penalises viticultural landowners as very low water users and very low emitters compared to other major primary production systems.
145.11	Peter	Raikes	Awanui Station	Water quantity	Not Stated	Water storage by way of a series of smaller dams sited beside the Ngaruroro River upstream is a simple and practical solution.
147.5	Serene	Morrell	Mihiroa Marae	Water quantity	Amend	Less water is taken from the aquifers, so more water is left to support our springs that feed into and replenish our awa.
147.6	Serene	Morrell	Mihiroa Marae	Water quantity	Amend	That irrigation is restricted to certain times of the year only.
165.4	Caleb	Dennis	Aotearoa New Zealand Fine Wine Estates LP	Water quantity	Not Stated	I am concerned that PC9's approach to allocation of water and control of farming emissions unfairly penalises viticultural landowners as very low water users and very low emitters compared to other major primary production systems.
179.4	Wim	Barendsen	Otawahao Farms Ltd	Water quantity	Not Stated	I am concerned that PC9's approach to allocation of water and control of farming emissions unfairly penalises viticultural landowners as very low water users and very low emitters compared to other major primary production systems.
180.1	Charlotte	Drury	Horticulture New Zealand	Water quantity	Not Stated	Critically important Plan Change 9 maintains sufficient flexibility in water use moving forward to allow other technological advancements to be facilitated.
180.2	Charlotte	Drury	Horticulture New Zealand	Water quantity	Not Stated	It is critical that the harvesting of water at high flows, and storage for later utilisation, is provided for by the TANK plan change. The total allocation of high flow water identified in the plan must be able to be harvested, and further work also needs to be done to identify whether or not additional water can be taken for this purpose.
180.8	Charlotte	Drury	Horticulture New Zealand	Water quantity	Not Stated	PC9 also effectively locks everyone into historic patterns of water and land use, which arguably is a pattern of water and land use that has resulted in some adverse effects on the environment. This plan change needs to provide opportunities for change that will enable improvements in freshwater management to be achieved. If the changes set out in this submission are incorporated into the plan change, then that could potentially be addressed.
183.5	Huia Libya	Huata Huata	Mangaroa Marae	Water quantity	Oppose	No specific relief requested but implies that Change 9 should be amended to remove the ten year "roll over" for existing water resource consents.
185.2	Allen	Kittow	Tremaine Farms Ltd	Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
186.2	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
186.76	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Water quantity	Not Stated	No specific decision requested but implies that changes to water allocations can have economic effects.
190.1	Randle	Cooke	Mangaroa Marae	Water quantity	Amend	Re-visit the water flow in Karewarewa Stream to provide for cultural, recreational values, and ecosystem health
191.3	Rangiwhiua	Robin	Mangaroa Marae	Water quantity	Oppose	No specific decision requested but raises concerns relating to water quantity.
191.4	Rangiwhiua	Robin	Mangaroa Marae	Water quantity	Oppose	No specific decision requested but raises concerns with dams, flooding and safety
191.5	Rangiwhiua	Robin	Mangaroa Marae	Water quantity	Oppose	No specific decision requested but raises concerns with insufficient water to provide for mahinga kai
193.18	Bruce	Mackay	Heinz Wattie's Limited	Water quantity	Not Stated	Policies concerning consent renewal reliant on good water allocation records should not be enacted unless those records exist
193.20	Bruce	Mackay	Heinz Wattie's Limited	Water quantity	Not Stated	This plan offers little opportunity to effect change, especially around new water use, even from storage
193.21	Bruce	Mackay	Heinz Wattie's Limited	Water quantity	Not Stated	The policies that support water storage are laudable, but the policies around harvesting, reticulating and utilising that stored water are inconsistent with the objectives.
193.23	Bruce	Mackay	Heinz Wattie's Limited	Water quantity	Not Stated	If a significantly greater proportion of irrigation was provided from storage, that would lessen the perceived impact on surface water bodies. Augmentation of these waterways may not be necessary.
193.24	Bruce	Mackay	Heinz Wattie's Limited	Water quantity	Not Stated	The consequence of policies as worded regarding reallocation of consents on the basis of "Actual and Reasonable" will not allow the use of previously allocated but not utilised water to be used to augment surface water flows (as is currently practiced by the Twyford Water Users group) because there will no longer be un-utilised water. The Global consents model that has been lauded a success by the HBRC will no longer be effective, unless as a collective they seek to augment with water from elsewhere (Storage).

197.5	Lilly	Lawson	Beef + Lamb New Zealand Ltd	Water quantity	Amend	OBJ 16, 17 and 18 and associated policies and rules - Amend existing and include as required new objectives, policies and rules to give effect to the following intent: <ul style="list-style-type: none"> • Provide for stock drinking water as a priority (permitted activity) take; • Establish take volumes (eg 70L per animal per day) which provide for animal health and wellbeing... • Enable these volumes to be taken as permitted activity; • Enable priority takes below minimum flows; or • Amend minimum flows to 1st limit takes for non priority uses; and • Enable priority takes to down to limits required to safeguard ecological health.
197.6	Lilly	Lawson	Beef + Lamb New Zealand Ltd	Water quantity	Oppose	Include new or amend existing objectives for Water quantity and allocation - Water quantity is managed to enable people, industry and agriculture to take and use water to meet their reasonable needs while ensuring that: a) For surface water: i. minimum flows and allocation regimes are set for the purpose of maintaining or enhancing (where degraded) the existing life supporting capacity of rivers and their beds, and providing for communities' values for freshwater. These values include community wellbeing, cultural values, economic values, and existing use and investment; ii. in times of water shortage where limits are being approached or are breached, takes are restricted to those that are essential to the health or safety of people and communities, and drinking water for animals, and other takes are progressively reduced; iii. the amount of water taken from waterbody does not compromise its existing life-supporting capacity or physical form and function;
198.4	Cordelia	Woodhouse	Environmental Defence Society Inc	Water quantity	Amend	Include clear objectives and policies to phase out over-allocation of surface and groundwater and to avoid future overallocation, safeguard life-supporting capacity and ecosystem health, protect the significant values of outstanding freshwater bodies and wetlands
198.5	Cordelia	Woodhouse	Environmental Defence Society Inc	Water quantity	Amend	Ensure that water takes are required to cease at minimum flows (except essential water takes for human water drinking supplies) and that all water takes are within low flow and high flow allocation limits
198.6	Cordelia	Woodhouse	Environmental Defence Society Inc	Water quantity	Amend	Set high flow allocations for all rivers that ensure hydrological alteration of the flow regime is minimised and maintained close to natural flow regimes
198.8	Cordelia	Woodhouse	Environmental Defence Society Inc	Water quantity	Amend	Prevent the transfer of water-permits into over-allocated ground and surface water freshwater management units
199.4	Peter	Robertson	Brookfields Vineyards/Ohiti Estate	Water quantity	Not Stated	I am concerned that PC9's approach to allocation of water and control of farming emissions unfairly penalises viticultural landowners as very low water users and very low emitters compared to other major primary production systems.
201.15	Liz	Munroe	Heretaunga Tamatea Settlement Trust	Water quantity	Not Stated	Stream flow maintenance - does not support stream flow 'augmentation', 'enhancement' or 'maintenance' as a solution to low flow issues. Policies are problematic and no reference to Mana Whenua values on these policies. If augmentation/enhancement/maintenance flow is very large or maintained for long periods negative consequences will occur. These practices are experimental and lack long term data that looks at cumulative effects.
203.6	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	Water quantity	Support	Retain objectives 16 to 18 as notified.
204.4	Juliet	Gray	Peter Lyons Trust (Lyons Vineyard)	Water quantity	Not Stated	I am concerned that PC9's approach to allocation of water and control of farming emissions unfairly penalises viticultural landowners as very low water users and very low emitters compared to other major primary production systems.
204.21	Juliet	Gray	Peter Lyons Trust (Lyons Vineyard)	Water quantity	Amend	Farmers who have used water inefficiently should be penalised not efficient users.
207.70	Mark	Clews	Hastings District Council	Water quantity	Not Stated	The pathway or provision for new opportunities needs to be resolved so as to not prevent the economic and social wellbeing of the Hastings District. In specific circumstances the re-allocation of water to new takes may be appropriate and the status of supplementary takes from augmentation schemes needs to be clearer.
207.71	Mark	Clews	Hastings District Council	Water quantity	Not Stated	Broader matters beyond 'current use' need to be considered during replacement processes for non-irrigation takes. These assessments should provide for the consideration of growth planned at time of the original consent so as to not undermine previous decisions and efforts in relation to economic development and to avoid potential implications on the social wellbeing of the Hastings District.
207.72	Mark	Clews	Hastings District Council	Water quantity	Not Stated	Projects investigating flexible management initiatives and initiatives such as augmentation and global consents need to occur ahead of replacement processes so that solutions/options are in place at the time of reassessment to ultimately assist in reducing allocation.
207.73	Mark	Clews	Hastings District Council	Water quantity	Not Stated	Need to recognise that the nature of urban growth demands, including the statutory obligation to provide for it, are different to other sectors and that water takes for municipal and industrial purposes therefore require different management tools.
207.74	Mark	Clews	Hastings District Council	Water quantity	Not Stated	Need to recognise HPUDS as providing guidance around minimum demands when planning for municipal growth, but that changes are inevitable and more frequent than plan cycles and should be considered in a positive and proactive manner.
207.75	Mark	Clews	Hastings District Council	Water quantity	Not Stated	The long term sustainable equilibrium of the groundwater resource itself still needs to be considered alongside effects on surface water in reviewing the allocation limit
207.76	Mark	Clews	Hastings District Council	Water quantity	Not Stated	There needs to be greater flexibility for transfers of water as a means of enabling opportunity, including for and between municipal use and to enable flexible management initiatives.

209.2	Waiariki	Davis		Water quantity	Not Stated	Restore streams to improve water flows.
209.3	Waiariki	Davis		Water quantity	Not Stated	Restore groundwater levels.
209.4	Waiariki	Davis		Water quantity	Not Stated	Restore artesian pressure.
214.76	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Water quantity	Not Stated	No specific decision requested but implies changes to water takes and allocation could have negative economic effects.
215.2	Peter	Dooney	Dooney Partnership	Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
216.13	Phillipa	McVeagh	New Zealand Apples & Pears	Water quantity	Not Stated	Annual allocations rather than a flat line reduction (based on monthly allocations) will allow growers to irrigate to their actual use patterns. Industry can use the same amount of water (or less) over a time period if allocation is made appropriately to work with industry's pattern of use.
216.14	Phillipa	McVeagh	New Zealand Apples & Pears	Water quantity	Not Stated	That water allocation be based on 'reasonable' use rather than 'actual and reasonable', this should applying to both existing properties and for determining allocations for change in land use.
219.2	Michael & Julie	Russell		Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
219.76	Michael & Julie	Russell		Water quantity	Amend	The ability to change land use and crop rotations with the understanding that sufficient irrigation water allocation is available for us to continue to do as we are currently practicing.
220.2	Steve	Gillum	Gillum Springfield Trust	Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
220.76	Steve	Gillum	Gillum Springfield Trust	Water quantity	Not Stated	No specific decision requested but implies that changes to water allocation may have economic effects.
221.2	WT	Scott		Water quantity	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
221.76	WT	Scott		Water quantity	Not Stated	No specific decision requested but implies that changes to water allocations could have economic effects.
222.3	Owen Jerry	Hāpuku		Water quantity	Oppose	The total volume allowed to be taken from a river/stream (volume in cubic metres per week) should be directly related to a limit on the total rate of take in total litres per second.
230.2	Christine	Kidwell		Water quantity	Not Stated	Water allocation for irrigation developments must be reduced to keep all of our Tributaries full to capacity so they can keep feeding into our rivers.
232.2	Levi	Walford	Matahiwi Marae	Water quantity	Oppose	A substantial reduction of allocation and abstractions from ground water & surface water that contribute to low flows in - or no water being available to already diminishing streams.
235.4	Graeme	Wedd	Rotoma Station Trust	Water quantity	Not Stated	Need the right to apply to store water from Farm Springs in the future to irrigate pasture crops in dry seasons.
237.5	Kev	England	Whitewater NZ Incorporated	Water quantity	Amend	Include limits and rules to maintain or improve water quality.
237.6	Kev	England	Whitewater NZ Incorporated	Water quantity	Amend	Prohibit damming on the mainstem of the Ngaruroro and in all tributaries above Whanawhana.
237.7	Kev	England	Whitewater NZ Incorporated	Water quantity	Amend	Prohibit further abstraction of water (other than as provided for under section 14(3)) from the Ngaruroro River and tributaries above Whanawhana.
238.4	Emma	Taylor	Gimblett Gravels Winegrowers Association	Water quantity	Not Stated	I am concerned that PC9's approach to allocation of water and control of farming emissions unfairly penalises viticultural landowners as very low water users and very low emitters compared to other major primary production systems.
240.7	Te Kaha	Hawaikirangi	Ngāti Pārau Hapū Trust	Water quantity	Not Stated	That the interest of mana whenua hapu in the allocation of the available ground and surface water is not recognised or addressed in this plan.
240.8	Te Kaha	Hawaikirangi	Ngāti Pārau Hapū Trust	Water quantity	Not Stated	Low flow settings are raised to achieve hapu values, an increase from 2000L/s to 2800 L/s with a goal to reach further significant increases over an agreed period1. We also support 3300 L/s by 2030 as stated in the Te Taiwhenua o Heretaunga submission.
240.9	Te Kaha	Hawaikirangi	Ngāti Pārau Hapū Trust	Water quantity	Not Stated	Better protection of springs and surface water recharge. Springs that provide recharge to surface water, their contributions to surface water require protection. As written springs gradually diminish due to reduction in aquifer pressures due to groundwater abstraction. Then they go into reversal and draws water from streams/rivers down into the aquifer.
240.11	Te Kaha	Hawaikirangi	Ngāti Pārau Hapū Trust	Water quantity	Not Stated	Acknowledgement of overuse of groundwater and effects on the efficacy of springs, including the advent of spring reversal and surface water recharge due to groundwater abstraction.

240.25	Te Kaha	Hawaikirangi	Ngāti Pārau Hapū Trust	Water quantity	Not Stated	Consent application, amendments or renewals are subject to the most recent rules and regulations, existing or historic conditions associated with the consent are null and void. needs to; (a) consider the extent and nature of current effects (including cumulative effects), (b) avoidance or mitigation of effects that are more than minor (c) promotion of sustainable management as defined by the RMA. (d) allocation within clearly defined and sustainable limits (e) articulation of sub-catchment boundaries and limits (f) protection and upholding of key values (g) Restrict irrigation outside of irrigation season (h) sensitive catchments acknowledged TANK, nor restrictions on N, effluent applications, intensive farming activities (Upper Ngaruroro, Upper Tutaekuri, Unconfined aquifer (i) Water short areas and restrictions for water use in these, where they lie within the TANK catchments – Poukawa
241.15	Penny and John	Reynolds		Water quantity	Not Stated	Believe the general emphasis should be on mitigation rather than restriction. The best way to improve the current perceived over allocation is to encourage water storage rather than the theme of the plan which is all about limitations and restrictions.
PlanSection: OBJ TANK 16						
3.2	Gavin	Yort	Limestone Properties Limited	OBJ TANK 16	Support	Retain provisions - OBJ TANK 16(a) and (b)
8.3	Rengasamy	Balasubramaniam	Delegat Limited	OBJ TANK 16	Support	Support OBJ TANK 16(c) and (d)
12.7	Alec	Duncan	Ministry of Education	OBJ TANK 16	Amend	Amend OBJ TANK 16 - ... b) The allocation and reservation of water for domestic supply including for marae and papakainga and for municipal supply including provision for the social infrastructure necessary to support these people and communities so that existing and future demand as described in HPUDS (2017) can be met within the specified limits; c) Primary production on versatile soils; ...
13.8	Alec	Duncan	Fire and Emergency New Zealand	OBJ TANK 16	Amend	Amend OBJ TANK 16 - ... b)The allocation and reservation of water for domestic supply including for marae and papakainga, Fire and Emergency New Zealand activities and for municipal supply so that existing and future demand as described in HPUDS (2017) can be met within the specified limits; c) Primary production on versatile soils;
14.3	Ryan	Fraser		OBJ TANK 16	Amend	Amend OBJ TANK 16 - Amend to accord viticultural soils equal priority with versatile soils. Amend to include water bottling in the lowest priority use category.
15.5	Andrea and Phil	Cranswick	Meridien Trust	OBJ TANK 16	Amend	Amend OBJ Tank 16 - Amend to accord viticultural soils equal priority with versatile soils. Amend to include water bottling in the lowest priority use category.
18.6	Mark	Cairns	MD Cairns & AR Wright Partnership	OBJ TANK 16	Amend	Amend OBJ TANK 16.c to read “Primary production on versatile and viticultural soils”, or similar wording to achieve the outcome sought in this submission. Amend OBJ TANK 16.e to read “Water bottling and other non-commercial end uses”, or similar wording to achieve the outcome sought in this submission.
20.5	Bruce	Nimon		OBJ TANK 16	Amend	Amend OBJ Tank 16 - Amend to accord viticultural soils equal priority with versatile soils. Amend to include water bottling in the lowest priority use category.
25.6	Xan	Harding		OBJ TANK 16	Amend	Amend OBJ TANK 16.c to read “Primary production on versatile and viticultural soils”, or similar wording to achieve the outcome sought in this submission. Amend OBJ TANK 16.e to read “Water bottling and other non-commercial end uses”, or similar wording to achieve the outcome sought in this submission.

Amend OBJ TANK 16.e to read "Water bottling and other non-commercial end uses", or similar wording to achieve the outcome sought in this submission.
102.6	Ritchie	Garnham	Booster Wine Group	OBJ TANK 16	Amend	Amend OBJ TANK 16.c to read "Primary production on versatile and viticultural soils", or similar wording to achieve the outcome sought in this submission. Amend OBJ TANK 16.e to read "Water bottling and other non-commercial end uses", or similar wording to achieve the outcome sought in this submission.
103.5	Ian	Quinn	Two Terraces Vineyard	OBJ TANK 16	Amend	Amend OBJ TANK 16.c to read "Primary production on versatile and viticultural soils", or similar wording to achieve the outcome sought in this submission. Amend OBJ TANK 16.e to read "Water bottling and other non-commercial end uses", or similar wording to achieve the outcome sought in this submission.
107.6	Christopher	Harrison	Beach House Wines Ltd	OBJ TANK 16	Amend	Amend OBJ TANK 16.c to read "Primary production on versatile and viticultural soils", or similar wording to achieve the outcome sought in this submission. Amend OBJ TANK 16.e to read "Water bottling and other non-commercial end uses", or similar wording to achieve the outcome sought in this submission.
117.3	Alison	Johnston	Silver Fern Farms Limited	OBJ TANK 16	Not Stated	Generally supportive of OBJ Tank 16 but opposes the priority order of water allocation groups listed under (a) to (e) of this objective. Seeks the relief of bringing forward the priority order of primary production food processing from (d) to (b) in OBJ Tank 16.
119.6	Liz	Lambert	Hawke's Bay Drinking Water Governance Joint Committee	OBJ TANK 16	Support	Support, in recognition that the quality of source drinking water is directly impacted by water quantity and the allocation framework needs to be protected. Further research (SkyTem) is being undertaken to understand the effects and impacts of water quantity on water quality pertaining to the SPZs and request that the Panel recommend to HBRC the prioritising of the implementation of the research findings.
124.3	Bridget	Margerison	Brownrigg Agriculture Group Ltd	OBJ TANK 16	Support	OBJ TANK 16 (c) and (d) - Support
135.15	Anna	Wilkes	Ravensdown Limited	OBJ TANK 16	Amend	Amend OBJ TANK 16 as follows: <i>c) Primary production on versatile soils;</i>
142.12	Bill	Glazebrook	Big Hill Station Limited	OBJ TANK 16	Support	Partially agree. Priority c) and d) are combined become priority c), priority e) becomes priority d)
143.6	Peter	Hyslop	Strathallan Trust	OBJ TANK 16	Amend	Amend OBJ TANK 16.c to read "Primary production on versatile and viticultural soils", or similar wording to achieve the outcome sought in this submission. Amend OBJ TANK 16.e to read "Water bottling and other non-commercial end uses", or similar wording to achieve the outcome sought in this submission.
165.6	Caleb	Dennis	Aotearoa New Zealand Fine Wine Estates LP	OBJ TANK 16	Amend	Amend OBJ TANK 16.c to read "Primary production on versatile and viticultural soils", or similar wording to achieve the outcome sought in this submission. Amend OBJ TANK 16.e to read "Water bottling and other non-commercial end uses", or similar wording to achieve the outcome sought in this submission.
179.6	Wim	Barendsen	Otawhao Farms Ltd	OBJ TANK 16	Amend	Amend OBJ TANK 16.c to read "Primary production on versatile and viticultural soils", or similar wording to achieve the outcome sought in this submission. Amend OBJ TANK 16.e to read "Water bottling and other non-commercial end uses", or similar wording to achieve the outcome sought in this submission.
180.27	Charlotte	Drury	Horticulture New Zealand	OBJ TANK 16	Amend	Amend by adding a definition of 'flushing flow' to the plan
194.28	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	OBJ TANK 16	Amend	OBJ TANK 16 should be amended to recognise that not all primary production occurs on versatile soils, and/or to clearly include viticulture (even on 'non versatile soils') in the third listed priority (c). For example (if it was intended that this objective draw a distinction between versatile and other soils), clause (c) could be amended to read: "primary production on versatile soils, and viticulture on other soils".
195.28	Peter	Matich	Federated Farmers of New Zealand	OBJ TANK 16	Amend	Amend to prioritise domestic, livestock, and firefighting supply, and existing demand over future demand. Specific wording provided.
199.6	Peter	Robertson	Brookfields Vineyards/Ohiti Estate	OBJ TANK 16	Amend	Amend OBJ TANK 16.c to read "Primary production on versatile and viticultural soils", or similar wording to achieve the outcome sought in this submission. Amend OBJ TANK 16.e to read "Water bottling and other non-commercial end uses", or similar wording to achieve the outcome sought in this submission.
201.29	Liz	Munroe	Heretaunga Tamatea Settlement Trust	OBJ TANK 16	Amend	Amend and reorder bullet points starting with a) Environmental flows - Te man o te Wai; The rest of the bullet points outlined in the submission.
204.6	Juliet	Gray	Peter Lyons Trust (Lyons Vineyard)	OBJ TANK 16	Amend	Amend OBJ TANK 16.c to read "Primary production on versatile and viticultural soils", or similar wording to achieve the outcome sought in this submission. Amend OBJ TANK 16.e to read "Water bottling and other non-commercial end uses", or similar wording to achieve the outcome sought in this submission.
207.1	Mark	Clews	Hastings District Council	OBJ TANK 16	Support	No specific decision requested but states support for Objective 16, particularly the priority order.
207.2	Mark	Clews	Hastings District Council	OBJ TANK 16	Amend	Amend subclause (b) to read: (b) The allocation and reservation of water for domestic supply including for marae and papakainga, and for municipal supply so that existing and future demand as described in HPUDS (2017) and successive versions and/or any requirements prescribed under a NPS on Urban Development can be met within the specified limits:

208.6	Emma	Taylor	Villa Maria Estate Limited	OBJ TANK 16	Amend	Amend OBJ TANK 16.c to read "Primary production on versatile and viticultural soils", or similar wording to achieve the outcome sought in this submission. Amend OBJ TANK 16.e to read "Water bottling and other non-commercial end uses", or similar wording to achieve the outcome sought in this submission.
213.6	Peter	Scott	The Wine Portfolio	OBJ TANK 16	Amend	Amend OBJ TANK 16.c to read "Primary production on versatile and viticultural soils", or similar wording to achieve the outcome sought in this submission. Amend OBJ TANK 16.e to read "Water bottling and other non-commercial end uses", or similar wording to achieve the outcome sought in this submission.
233.8	Dr Nicholas	Jones	Hawke's Bay District Health Board (HBDHB)	OBJ TANK 16	Amend	Add additional bullet point a) the life supporting capacity of water bodies
238.6	Emma	Taylor	Gimblett Gravels Winegrowers Association	OBJ TANK 16	Amend	Amend OBJ TANK 16.c to read "Primary production on versatile and viticultural soils", or similar wording to achieve the outcome sought in this submission. Amend OBJ TANK 16.e to read "Water bottling and other non-commercial end uses", or similar wording to achieve the outcome sought in this submission.
PlanSection: OBJ TANK 17						
3.14	Gavin	Yort	Limestone Properties Limited	OBJ TANK 17	Oppose	Amend clause (a): 'the development of Maori the Hawke's Bay community's economic, cultural and social well-being is supported through regulating the use and allocation of the water available at high flows for taking, storage and use'
6.7	Daniel	Soltau		OBJ TANK 17	Amend	Amend Clause (d) include new consents into the flexible and efficient use
8.4	Rengasamy	Balasubramaniam	Delegat Limited	OBJ TANK 17	Support	Support OBJ TANK 17(b), (c) and (d).
8.3	Rengasamy	Balasubramaniam	Delegat Limited	OBJ TANK 17	Oppose	Oppose OBJ TANK 17 - Amend clause (a): the development of Maori the Hawke's Bay community's economic, cultural and social well-being is supported through regulating the use and allocation of the water available at high flows for taking, storage and use
12.8	Alec	Duncan	Ministry of Education	OBJ TANK 17	Support	Support OBJ TANK 17 - retain as proposed.
30.2	Anthea	Yule	Paranui Farming Trust	OBJ TANK 17	Support	Retain the objective
58.11	Peter	Wilson	Hawkes Bay Fish and Game Council	OBJ TANK 17	Amend	Amend objective to include Te Mana O Te Wai and/or mauri of waterway, or as recommended by tangata whenua.
124.22	Bridget	Margerison	Brownrigg Agriculture Group Ltd	OBJ TANK 17	Oppose	Amend clause (a): the development of Maori the Hawke's Bay community's economic, cultural and social well-being <u>is</u> supported through regulating the use and allocation of the water available at high flows for taking, storage and use
135.16	Anna	Wilkes	Ravensdown Limited	OBJ TANK 17	Support	Retain OBJ TANK 17 as notified.
142.13	Bill	Glazebrook	Big Hill Station Limited	OBJ TANK 17	Support	Partially agree. Amend OBJ TANK 17 a) to read 'in consideration of the development of Maori economic, cultural and social well-being...'
180.18	Charlotte	Drury	Horticulture New Zealand	OBJ TANK 17	Amend	Amend to clearly state that subsections a)-d) are <u>not</u> listed in any order of priority.
180.28	Charlotte	Drury	Horticulture New Zealand	OBJ TANK 17	Amend	Amend as follows: 'The Council will achieve or maintain the freshwater targets or freshwater objectives in Schedule 26 <u>by working with landowners, landowner collectives</u> , industry groups, and other stakeholders and will implement the following measures; a) establishing programmes and processes through Farm Environment Plans, Catchment-Landowner <u>Catchment-Landowner</u> Collectives and Industry Programmes to ensure land managers; (i) adopt industry <u>good management</u> practice; (ii) identify critical source areas of contaminants <u>at all relevant scales</u> ; (iii) adopt effective measures to mitigate or reduce contaminant loss <u>where this is necessary to achieve good management practice</u> ; (iv) prepare nutrient management plans in catchment not meeting targets for dissolved nitrogen;
192.3	Rebecca	Blunden	T&G Global Limited and ENZIL	OBJ TANK 17	Amend	Clause 17(a) is amended to refer to the economic, cultural and social well-being of the Hawke's Bay Community being supported through regulating the use and allocation of the water available at high flows for taking, storage and use.
194.29	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	OBJ TANK 17	Support	Consequential amendment is needed to the provisions of PC9 to ensure they align with OBJ TANK 17.
195.29	Peter	Matich	Federated Farmers of New Zealand	OBJ TANK 17	Amend	That OBJ TANK 17 be amended as follows: The allocation and use of water results in the sustainable management of freshwater quantity within limits, while enabling; • the development of Maori economic, cultural and social well-being that is supported through regulating the use and allocation of the water available at high flows for taking, storage and use; ... And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
201.30	Liz	Munroe	Heretaunga Tamatea Settlement Trust	OBJ TANK 17	Amend	Amend and reorder bullet points starting with a) the development of Maori economic, cultural and social well-being which is recognised and prioritised by Council through: I. regulating the use and allocation of the water available at high flows for taking, storage and use; II. reviewing water perm relating to ground and surface water takes; The rest of the bullet points outlined in the submission.
PlanSection: OBJ TANK 18						
12.9	Alec	Duncan	Ministry of Education	OBJ TANK 18	Support	Support OBJ TANK 18 - retain as proposed.

29.8	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	OBJ TANK 18	Amend	Amend OBJ TANK 18.e to read "water harvesting, storage and controlled release. " or similar wording to achieve the outcome sought in this submission.
30.3	Anthea	Yule	Paranui Farming Trust	OBJ TANK 18	Support	Retain the objective, specifically water harvesting and storage.
58.12	Peter	Wilson	Hawkes Bay Fish and Game Council	OBJ TANK 18	Amend	Amend to place the present and future mauri of the waterway ahead of the needs of future generations or as recommended by tangata whenua.
99.5	Jerf	van Beek	Twyford Water	OBJ TANK 18	Not Stated	Priorization introduced to this objective, and water harvesting and storage should be recognized as being the most important means of securing water for future generations. Reductions in water use, and thus steps towards achieving greater water security will be achieved through the matters identified in a), b) and c), however 'gains' are unlikely to be significant, as many horticultural growers are already achieving (or are beyond) good management practice with respect to their water use efficiency with the technology that is currently available
135.17	Anna	Wilkes	Ravensdown Limited	OBJ TANK 18	Support	Retain OBJ TANK 18 as notified.
142.14	Bill	Glazebrook	Big Hill Station Limited	OBJ TANK 18	Support	Supports OBJ18
145.6	Peter	Raikes	Awanui Station	OBJ TANK 18	Amend	Add to list of provisions - (f) Regular review of the moratorium on drilling new bores based on scientific and/or circumstantial evidence that may be presented to Council.
180.19	Charlotte	Drury	Horticulture New Zealand	OBJ TANK 18	Amend	Amend to state that sub-sections <u>are</u> in order of priority, and reorder to list as follows: a) Water harvesting and storage; b) Flexible water allocation and management regimes; c) Aquifer recharge and flow enhancement; d) Water conservation, water use efficiency, and innovations in technology and management; e) Water reticulation
194.3	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	OBJ TANK 18	Support	Consequential amendment is needed to the provisions of PC9 to ensure they align with OBJ TANK 18.
194.36	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	OBJ TANK 18	Amend	Seeks that 5.10.3.18(c) be amended to differentiate between high and low nitrogen loss land uses (i.e. in terms of what the new use would be). This could be amended through reference to Schedules 29.
195.3	Peter	Matich	Federated Farmers of New Zealand	OBJ TANK 18	Amend	That OBJ TANK 18 be amended as follows: ... e) Water harvesting and storage <u>and</u> use. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
201.31	Liz	Munroe	Heretaunga Tamatea Settlement Trust	OBJ TANK 18	Amend	Amend and reorder bullet points starting with a) water conservation, water use efficiency, and scientifically robust innovations in technology and management that sustainably enhances the environment; The rest of the bullet points outlined in the submission.
233.9	Dr Nicholas	Jones	Hawke's Bay District Health Board (HBDHB)	OBJ TANK 18	Amend	add new bullet point a) Sustainable water allocation
5.10.2 Policies: Surface Water and Groundwater Quality Management						
35.78	Colin	Campbell		5.10.2 Policies: Surface Water and Groundwater Quality Management	Support	Policies 5.10.2 - Support with amendments objectives to increase riparian planning and wetlands. I seek that these provisions are implemented through non regulatory methods and not regulation. I seek more information is provided as to how Council intends to facilitate meeting the targets specified i.e. funding assistance and support.
120.37	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.2 Policies: Surface Water and Groundwater Quality Management	Amend	Consents for groundwater abstraction near Maraekakaho should be aligned with total surface water depletion quantum and accounted for in the Ngaruroro management regime
120.38	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.2 Policies: Surface Water and Groundwater Quality Management	Amend	Surface water depletion effects of groundwater takes near Maraekakaho need to be regulated through Fernhill OR the monitoring site could be moved to the actual confluence.
120.59	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.2 Policies: Surface Water and Groundwater Quality Management	Amend	Increase minimum flow requirements for the TANK catchment to address the cultural and biodiversity issues identified in this submission
120.131	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.2 Policies: Surface Water and Groundwater Quality Management	Amend	Totally review land drainage and wetland management provisions to give effect to national policy direction and regulation and adequate protect groundwater
132.131	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10.2 Policies: Surface Water and Groundwater Quality Management	Amend	Delete all references in PC9 provisions that enable, allow for, or infer that, degradation of water quality in the Heretaunga Plains Aquifer System, or in other groundwater/aquifers in the TANK catchments can occur. Delete Note 8 in Schedule 26.
132.140	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10.2 Policies: Surface Water and Groundwater Quality Management	Amend	Include new provisions/criteria in rules for discharge permits in PC9, and in other operative rules for discharges that apply in TANK catchments. Specific wording provided.
193.19	Bruce	Mackay	Heinz Wattie's Limited	5.10.2 Policies: Surface Water and Groundwater Quality Management	Not Stated	Policies and rules around surface water flow management are inequitable, and do not address the fundamental causes of this issue
194.32	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	5.10.2 Policies: Surface Water and Groundwater Quality Management	Support	Policies 1, 3, 6, and 7-16 - retain as drafted.
197.7	Lilly	Lawson	Beef + Lamb New Zealand Ltd	5.10.2 Policies: Surface Water and Groundwater Quality Management	Amend	Amend existing and include as required new policies to give effect to the following intent: •More explicitly provide for the development and implementation of Farm Environment Plans, Catchment Collectives and Industry Programmes as the preferred approach to environmental management and recognise them as a priority to achieving freshwater targets and objectives.
203.7	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	5.10.2 Policies: Surface Water and Groundwater Quality Management	Support	Retain policies 1, 2 and 5 as notified.
240.22	Te Kaha	Hawaikirangi	Ngāti Pārau Hapū Trust	5.10.2 Policies: Surface Water and Groundwater Quality Management	Not Stated	Ensuring that hydraulic fracturing does not occur in the Tutaekuri, Ahuriri (Te Whanganui a Orotu) catchments, and neighbouring catchments that share underground aquifers.

Priority Management Approach

29.9	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Priority Management Approach	Amend	Amend Policy 34 to require Council to establish and maintain a community catchment governance body to oversee subcatchment activities within the TANK catchments. We suggest that this should comprise representatives from the Regional Planning Committee, together with representatives from each of the subcatchments and should meet at least bi-annually.
120.73	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Priority Management Approach	Amend	Provide for consideration of the appropriateness and efficiency of an activity within the TANK catchments in terms of its water use and contaminant loss aspects by removing the presumption that all existing water takes will automatically be renewed (as above) and that land uses will continue unchecked by regulation
120.91	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Priority Management Approach	Amend	Amend policies 1-5 to make it clear that improvement is needed in all TANK catchments wherever water quality objectives are not currently met, to achieve targets by 2040, and detail the means by which decision makers and plan users are guided to achieve this (e.g., through regulating activities).
142.15	Bill	Glazebrook	Big Hill Station Limited	Priority Management Approach	Amend	Amend Policies 1 and 4: a) No regulatory impositions on sediment control until accurate data sets are available for defined catchments. b) With reference to accurate data sets establish reasonable and separate sediment and phosphorus outcome criteria for land users to abide by
162.2	Letitia	Waerea	Mangaroa Marae	Priority Management Approach	Oppose	No specific relief requested but raises concerns relating to water quantity and allocation.
192.2	Rebecca	Blunden	T&G Global Limited and ENZIL	Priority Management Approach	Amend	Sufficient water must be made available to provide for horticulture. If water becomes available for reallocation, priority should be given to the use of water for horticulture.
194.34	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Priority Management Approach	Amend	Policies 2, 4 & 5 - Review and amend these provisions for consistency (or explain why any different approaches apply to the different water bodies
195.33	Peter	Matich	Federated Farmers of New Zealand	Priority Management Approach	Amend	Amend Policies 3, 4, and 5 to refer to reduceable sediment and improving water quality and ecosystem health where practicable. Specific wording provided.
PlanSection: POL TANK 1						
12.1	Alec	Duncan	Ministry of Education	POL TANK 1	Support	Support Policy 1 - retain as proposed.
14.4	Ryan	Fraser		POL TANK 1	Amend	Amend Policy 1 - Amend to require Council to establish and maintain a community catchment governance body to oversee subcatchment activities within the TANK catchments.
15.6	Andrea and Phil	Cranswick	Meridien Trust	POL TANK 1	Amend	Amend Policy 1 - Amend to require Council to establish and maintain a community catchment governance body to oversee subcatchment activities within the TANK catchments.
20.6	Bruce	Nimon		POL TANK 1	Amend	Amend Policy 1 - Amend to require Council to establish and maintain a community catchment governance body to oversee subcatchment activities within the TANK catchments.
58.13	Peter	Wilson	Hawkes Bay Fish and Game Council	POL TANK 1	Amend	Amend Policy to include nitrogen in Policy 1 and/or in all other policies that recursively reference Policy 1.
97.87	Lesley	Wilson	DN & LR Wilson Ltd	POL TANK 1	Amend	Amend to read: f) the protection of water quality for domestic, and municipal, and food and fibre production water supply.
99.6	Jerf	van Beek	Twyford Water	POL TANK 1	Amend	Agrees that the protection of water quality for domestic and municipal water supply is important, but also believe that its protection for irrigation purposes is important, and believes that 'irrigation purposes', should be added to f).
99.103	Jerf	van Beek	Twyford Water	POL TANK 1	Amend	Amend f) by adding 'and irrigation purposes'.
123.4	Jenny	Nelson-Smith	Department of Conservation	POL TANK 1	Oppose	The water quality of surface and groundwater bodies will be maintained where objectives of Schedule 26 are currently met and improved to meet targets in Schedule 26 where these are not met by 2040 by: a) Working with mana whenua, landowners, local authorities... etc b) Managing and regulating land use activities to improve water quality in catchments identified in Schedule 28 as a priority c) Where phosphorous and microbial pathogens are not meeting the objectives of Schedule 26, also regulate and manage land use activities which generate sediment (as a key contaminant pathway) d) Managing and regulating land use activities to reduce sedimentation and macrophyte growth in lowland rivers e) Managing and regulating land use to reduce nutrient loads to the Waitangi and Ahuriri estuaries f) Enable the maintenance of existing and creation of new sustainable riparian margins g) Manage and regulate stormwater networks to reduce contaminants to water h) Manage and regulate land use activities to protect the water quality of domestic and municipal water supplies. i) Manage and regulate point source discharges to reduce contaminants to water

126.14	James	Lyver	Maungaharuru-Tangitū Trust	POL TANK 1	Amend	Amend Policy 1 under the heading “Water Management Overview” to read: The Council with landowners, local authorities, industry and community groups, mana whenua and other stakeholders will regulate or Manage land use activities and surface and groundwater bodies in the Tutaekuri, Ahuriri, Ngaruroro and Karamu catchments so that water quality attributes are maintained at their current state or where required show an improving trend towards the water quality targets shown in Freshwater Objectives in Schedule 26 are met by focussing on: a) requiring a general improvement in farming practice to reduce the diffuse discharge of contaminants; b) requiring a greater level of scrutiny on the management of farming enterprises located within ‘High’ and ‘Medium’ priority catchments water quality improvement in subcatchments (as described in Schedule 28) where current state water quality is not meeting specified freshwater quality targets objectives in Schedule 26; c) focussing on the enhancement and management of riparian margins; d) requiring a greater level of scrutiny for the management of urban stormwater networks to and the reduction-reduce of contaminants in urban stormwater discharges into TANK waterbodies and TANK estuarine systems; e) requiring the protection of water quality for domestic and municipal water supply; f) recognising reductions in the discharge of contaminants will need to continue more than 10-years after PC9 is operative to achieve freshwater objectives in Schedule 26. b) sediment management as a key contaminant pathway to also address phosphorus and bacteria losses; e) the significant environmental stressors of excessive sedimentation and macrophyte growth in lowland rivers and nutrient loads entering the Ahuriri and Waitangi estuaries;
135.18	Anna	Wilkes	Ravensdown Limited	POL TANK 1	Amend	Amend Policy 1 as follows: The Council with landowners, local authorities, industry and community groups, mana whenua and other stakeholders will regulate or manage land use activities and surface and groundwater bodies so that water quality attributes objectives are maintained at their current state or where required show an improving trend towards the water quality targets shown in Schedule 26 by focussing on: • a) water quality improvement in sub priority catchments (as described in Schedule 28) where water quality is not meeting specified fresh water quality targets; • b) sediment management <u>to address</u> as a key contaminant pathways to also address phosphorus and bacteria losses; ... • e) the management of urban stormwater networks and the reduction of contaminants in urban stormwater <u>and other stormwater sources;</u> • f) the protection of water quality for domestic and municipal water supply <u>and other water users.</u>
180.2	Charlotte	Drury	Horticulture New Zealand	POL TANK 1	Amend	Amend f) by adding ‘and irrigation purposes’.
195.31	Peter	Matich	Federated Farmers of New Zealand	POL TANK 1	Amend	Amend Policy 1 to read: The Council with landowners, local authorities, industry and community groups, mana whenua and other stakeholders, will regulate or manage land use activities and surface and groundwater bodies so that water quality attributes are maintained at their current state, or where required, show an improving trend towards the water quality targets shown in Schedule 26, by focussing on: ...g) effects of climate change and related weather events on water quality; h) avoidance, remediation or mitigation of contaminant pathways; i) Management of surface water bodies to maintain minimum flows and levels to help maintain or improve water quality (e.g. water supply augmentation, river and stream bed maintenance).
201.32	Liz	Munroe	Heretaunga Tamatea Settlement Trust	POL TANK 1	Amend	The Council will regulate land use activities and activities affecting surface and ground water bodies so that water quality attributes are maintained at their current state or where required show an improving trend towards the water quality targets shown in Schedule 26 by focussing on:... Rest of policy 1 outlined in submission.
210.25	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 1	Oppose	Reword the policy to make it clear that water quality improvements are needed wherever objectives are not currently met, and targets should be achieved by 2040, then state the way decision makers will achieve this. Care should be taken to reflect national planning standards format and the NPS Freshwater Mgmt. Also remove the interdependency between this policy and Policy 6, and format the policies in a clear way so that decision makers are not required to move back and forward through the plan in making decisions.
233.10	Dr Nicholas	Jones	Hawke's Bay District Health Board (HBDHB)	POL TANK 1	Amend	Modify bullet policy 1(f) as follows: The protection of water quality for domestic, community and municipal water supply.
POL TANK 2						
10.1	David	Renouf		POL TANK 2	Amend	Amend Policy 2(c) - Add after land 'and road/street surfaces'
99.7	Jerf	van Beek	Twyford Water	POL TANK 2	Not Stated	Twyford Water would like to point out that the type of riparian plantings is important from a biodiversity point of view but it should not be forgotten that some native species pose a bio-security risk as in harboring horticultural pests. Catchment groups are once again the preferred driver for planting and maintenance of riparian borders.
99.104	Jerf	van Beek	Twyford Water	POL TANK 2	Amend	Amend by adding ‘landowner collectives’ to the start of the policy, and add to the end of a)j) and biosecurity requirements of adjacent land use’

123.41	Jenny	Nelson-Smith	Department of Conservation	POL TANK 2	Amend	Policy 2 - Rewording needed.
180.21	Charlotte	Drury	Horticulture New Zealand	POL TANK 2	Amend	Amend by adding 'landowner collectives' to the start of the policy, and add to the end of a)i) 'and biosecurity requirements of adjacent land use'
194.33	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 2	Support	Further clarification in terms of how flow management regimes are to be implemented in practice.
195.32	Peter	Matich	Federated Farmers of New Zealand	POL TANK 2	Amend	Amend Policy 2 to read: ... a)(i) the establishment of riparian vegetation, <u>where practicable</u> , to shade the water and reduce <u>reduceable</u> macrophyte growth while accounting for flooding and drainage objectives; ... b) adopt flow management regimes to <u>manage, remedy or mitigate</u> the effects of surface and ground water abstraction; c) reduce the <u>reduceable</u> amount of sediment and nutrients entering the freshwater from adjacent land; And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
201.33	Liz	Munroe	Heretaunga Tamatea Settlement Trust	POL TANK 2	Amend	Amend and reorder bullet points starting with a) reduce water temperature and increase the level of dissolved oxygen by: i. the establishment of riparian vegetation to shade the water and reduce macrophyte growth while accounting for flooding and drainage objectives; ii. reducing excessive macrophyte growth by managing nutrient limits and physical removal of weeds. The rest of the bullet points are outlined in the submission.
210.26	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 2	Oppose	Remove parts of the policy that would be better in a 'methods' section (e.g. "establishment of riparian vegetation to shade the water and reduce macrophyte growth while accounting for flooding and drainage objectives"). Reword to provide more direction on what the water quality objectives are, and how and when they will be achieved (without writing methods).
POL TANK 3						
33.1	Bruce	McGregor		POL TANK 3	Support	Policy 3 - retain as proposed.
58.14	Peter	Wilson	Hawkes Bay Fish and Game Council	POL TANK 3	Amend	Amend to refer to catchments where a lake or wetland is a receiving environment, including most sensitive receiving environment for catchments above the lake or wetland.
123.42	Jenny	Nelson-Smith	Department of Conservation	POL TANK 3	Amend	Policy 3 - The significant values and ecosystem health of wetlands and lakes will be protected and enhanced where necessary by: a) <u>Working with landowners in wetland and lake catchments</u> b) <u>Managing and regulating land use activities in wetland and lake catchments to reduce sediment and nutrient inputs, improve water quality and support indigenous macrophyte growth in shallow lakes</u> c) as currently worded d) <u>Meet water quality objectives and targets in Schedule 26 in downstream waterbodies affected by wetland or lake water quality</u> e) <u>Enable landowners to protect, increase and restore existing wetland and create new wetlands</u> Add attribute states for lakes to Schedule 26
124.4	Bridget	Margerison	Brownrigg Agriculture Group Ltd	POL TANK 3	Support	Policy 3(e) - Support
210.27	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 3	Amend	Remove parts of the policy that would be better in a 'methods' section. Reword the policy to focus on what is to be protected/restored (i.e. the outcome) rather than what council will do. E.g. "The values and ecosystem health of wetlands and lakes will be protected and enhanced by..."
POL TANK 4						
123.43	Jenny	Nelson-Smith	Department of Conservation	POL TANK 4	Amend	Manage and regulate land use in priority catchments in Schedule 28 to address priority water quality issues in Schedule 28 and to maintain objectives and achieve targets in Schedule 26 by 2040. Or words to similar effect
135.19	Anna	Wilkes	Ravensdown Limited	POL TANK 4	Support	Retain Policy 4 as notified.
180.22	Charlotte	Drury	Horticulture New Zealand	POL TANK 4	Amend	Amend by adding definition of 'lower Ngaruroro' and planning map outlining extent of area.
210.28	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 4	Amend	Remove parts of the policy that would be better in a 'methods' section Reword to provide more direction on what the water quality objectives are, and how and when they will be achieved (without writing methods).
POL TANK 5						
29.55	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	POL TANK 5	Amend	Amend Pol 5 to read "...by <u>reducing</u> the amount of sediment..."
123.44	Jenny	Nelson-Smith	Department of Conservation	POL TANK 5	Amend	Manage and regulate land use in priority catchments in Schedule 28 to address priority water quality issues in Schedule 28 and to maintain objectives and achieve targets in Schedule 26 by 2040. Or words to similar effect Insert point F) to work with Napier city to improve fish passage and restore spawning habitat

126.15	James	Lyver	Maungaharuru-Tangitū Trust	POL TANK 5	Amend	Amend Policy 5 to read: In the tributaries of the Ahuriri Estuary <u>Te Whanganui-a-Orotu (Ahuriri estuary)</u> , in addition to Policy 1 the Council will work with mana whenua, landowners and the Napier City Council to: a) improve water clarity and reduce deposited sediment from land use activities in the Ahuriri catchment, including by reduce the amount of remobilising of deposited sediment being lost from land and beds and banks of rivers; b) reduce risk of proliferation of algae by reducing nutrient the losses discharge of nitrogen and phosphorous from land use activities in the Ahuriri catchment; including through management of phosphorous loss associated with sediment; c) avoid the discharge of untreated wastewater; d) requiring a greater level of scrutiny on the management of untreated stormwater discharged into Te Whanganui-a- Orotu (Ahuriri estuary); e) manage improvements in the ecosystem health of urban waterways. e) improve stormwater and drainage water quality and the ecosystem health of urban waterways and reduce contamination of stormwater associated with poor site management practices, spills and accident in from urban areas; d) carry out further investigations to understand the estuary hydrology, functioning and environmental stressors.
135.2	Anna	Wilkes	Ravensdown Limited	POL TANK 5	Amend	Amend Policy 5 as follows: a) <i>improve water clarity and reduce deposited sediment by <u>reduc e ing</u> the amount of sediment being lost from land and river banks;</i>
210.29	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 5	Amend	Remove parts of the policy that would be better in a 'methods' section. Reword to provide more direction on what the water quality objectives are, and how and when they will be achieved (without writing methods).
231.5	Peter	Kay		POL TANK 5	Amend	Agree in part - it would be better to require not only a FEP, but also a Nutrient Plan with more regular monitoring. This policy is designed to encourage landowners to become part of a catchment group or collective so it requires a disincentive over catchment groups.
233.15	Dr Nicholas	Jones	Hawke's Bay District Health Board (HBDHB)	POL TANK 5	Amend	Amend policy 5(c) to: improve stormwater and drainage water quality and the ecosystem health of urban waterways and reduce contamination of stormwater associated with poor site management practices, spills and accident in urban areas, <u>and solid contaminants and debris;</u>
Protection of Source Water						
10.22	David	Renouf		Protection of Source Water	Amend	That the HBRC and that the Hastings District Council Amend TANK PC9 SPZ Map 1 and Hastings District Council SPZ - 3 Map areas and form up Source Protection Coniunctive Zones.
18.7	Mark	Cairns	MD Cairns & AR Wright Partnership	Protection of Source Water	Amend	Amend Policies 6, 7 and 8 - Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10. Address risks via Farm Environment Plans, Catchment Collectives and Industry Programmes.
25.7	Xan	Harding		Protection of Source Water	Amend	Amend Policies 6, 7 and 8 - Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10. Address risks via Farm Environment Plans, Catchment Collectives and Industry Programmes.
26.7	Robin	Back	Dunvegan Estate	Protection of Source Water	Amend	Amend Policies 6, 7 and 8 - Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10. Address risks via Farm Environment Plans, Catchment Collectives and Industry Programmes.
28.7	Hamish	Clark	Saint Clair Family Estate Ltd	Protection of Source Water	Amend	Amend Policies 6, 7 and 8 - Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10. Address risks via Farm Environment Plans, Catchment Collectives and Industry Programmes.
29.10	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Protection of Source Water	Amend	Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10. Address risks via Farm Environment Plans, Catchment Collectives and Industry Programmes.
29.39	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Protection of Source Water	Oppose	Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10.
34.7	Jonathan	Hamlet	Craggy Range Vineyards Limited	Protection of Source Water	Amend	Amend Policies 6, 7 and 8 - Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10. Address risks via Farm Environment Plans, Catchment Collectives and Industry Programmes.
39.7	Bridget	Wilton	MbandSons	Protection of Source Water	Amend	Amend Policies 6, 7 and 8 - Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10. Address risks via Farm Environment Plans, Catchment Collectives and Industry Programmes.
41.7	Jonathan	Milmine	Milmine Holdings Limited	Protection of Source Water	Amend	Amend Policies 6, 7 and 8 - Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10. Address risks via Farm Environment Plans, Catchment Collectives and Industry Programmes.

48.7	Paul	Ham	Alpha Domus	Protection of Source Water	Amend	Amend Policies 6, 7 and 8 - Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10. Address risks via Farm Environment Plans, Catchment Collectives and Industry Programmes.
53.7	Chris	Howell	CD & CM Howell Partnership	Protection of Source Water	Amend	Amend Policies 6, 7 and 8 - Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10. Address risks via Farm Environment Plans, Catchment Collectives and Industry Programmes.
68.7	Geoffrey	Smith	Vine Nursery New Zealand and Waikahu Vineyard	Protection of Source Water	Amend	Amend Policies 6, 7 and 8 - Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10. Address risks via Farm Environment Plans, Catchment Collectives and Industry Programmes.
75.7	Andria	Monin	Stonecroft Wines Limited	Protection of Source Water	Amend	Amend Policies 6, 7 and 8 - Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10. Address risks via Farm Environment Plans, Catchment Collectives and Industry Programmes.
76.7	Larry	Morgan	Te Mata Estate Winery Ltd	Protection of Source Water	Amend	Amend Policies 6, 7 and 8 - Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10. Address risks via Farm Environment Plans, Catchment Collectives and Industry Programmes.
81.7	Tony	Smith	Babich Wines	Protection of Source Water	Amend	Amend Policies 6, 7 and 8 - Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10. Address risks via Farm Environment Plans, Catchment Collectives and Industry Programmes.
84.7	Grant	Edmonds	Redmetal Vineyards Ltd	Protection of Source Water	Amend	Amend Policies 6, 7 and 8 - Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10. Address risks via Farm Environment Plans, Catchment Collectives and Industry Programmes.
87.7	Peter	Scott	Kereru Road Vineyard	Protection of Source Water	Amend	Amend Policies 6, 7 and 8 - Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10. Address risks via Farm Environment Plans, Catchment Collectives and Industry Programmes.
88.7	Jacqui	Cormack	Constellation Brands NZ Limited (CBNZ)	Protection of Source Water	Amend	Amend Policies 6, 7 and 8 - Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10. Address risks via Farm Environment Plans, Catchment Collectives and Industry Programmes.
94.7	Deane	Caughey	Indevin Group Ltd	Protection of Source Water	Amend	Amend Policies 6, 7 and 8 - Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10. Address risks via Farm Environment Plans, Catchment Collectives and Industry Programmes.
102.7	Ritchie	Garnham	Booster Wine Group	Protection of Source Water	Amend	Amend Policies 6, 7 and 8 - Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10. Address risks via Farm Environment Plans, Catchment Collectives and Industry Programmes.
107.7	Christopher	Harrison	Beach House Wines Ltd	Protection of Source Water	Amend	Amend Policies 6, 7 and 8 - Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10. Address risks via Farm Environment Plans, Catchment Collectives and Industry Programmes.
119.1	Liz	Lambert	Hawke's Bay Drinking Water Governance Joint Committee	Protection of Source Water	Support	Supports the drinking water source protection provisions.
120.140	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Protection of Source Water	Amend	Amend Change 9 to include the SPZ maps
120.141	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Protection of Source Water	Amend	That a precautionary approach is taken with regard to SPZs including use of the risk based modelling approach for the identification of any future SPZs and inclusion of accurate and comprehensive SPZ maps for the Napier and Hastings Urban Supplies.
132.133	Marei	Apatu	Te Taiwhenua o Heretaunga	Protection of Source Water	Amend	Expand the area of the Drinking Water Source Protection Zone (Zone 3) so it encompasses a larger area. Boundaries provided.
165.7	Caleb	Dennis	Aotearoa New Zealand Fine Wine Estates LP	Protection of Source Water	Amend	Amend Policies 6, 7 and 8 - Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10. Address risks via Farm Environment Plans, Catchment Collectives and Industry Programmes.
179.7	Wim	Barendsen	Otawhao Farms Ltd	Protection of Source Water	Amend	Amend Policies 6, 7 and 8 - Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10. Address risks via Farm Environment Plans, Catchment Collectives and Industry Programmes.
188.1	Donna	Robin	Mangaroa Marae	Protection of Source Water	Amend	Provide for purified drinking water in all households of Bridge Pa
191.2	Rangiwhiua	Robin	Mangaroa Marae	Protection of Source Water	Oppose	Drinking water to be free of pollution, chlorine, fluorine and is safe to drink that is restored in every household of Bridge Pa
194.16	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Protection of Source Water	Amend	PC9 may also need to be amended to reflect the Water Services Bill released 29 July 2020, which may alter the approach of PC9 in relation to Registered Drinking Water Supply and Source Protection Zones.
199.7	Peter	Robertson	Brookfields Vineyards/Ohiti Estate	Protection of Source Water	Amend	Amend Policies 6, 7 and 8 - Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10. Address risks via Farm Environment Plans, Catchment Collectives and Industry Programmes.
203.8	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	Protection of Source Water	Support	Retain as notified.
203.9	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	Protection of Source Water	Amend	Amend 7d)iii) as follows: d)iii) the level of consultation with land owners and occupiers in the Source Protection Zone.

203.10	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	Protection of Source Water	Amend	Amend b)vi) to specifically reference codes of practice and guidelines: <i>vi. the effectiveness of any mitigation measures to avoid or mitigate risk of contaminants entering the source water and the extent to which the effectiveness of the mitigation measure can be verified, <u>including with regard to relevant codes of practice and guidelines</u>:</i>
203.11	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	Protection of Source Water	Amend	Require consideration of source control at 9a and delete clause 9g which appears to effectively be a duplication of 9a. <i>a. implement a multi-barrier approach to the delivery of safe drinking water for Registered Drinking Water Supplies, through the consideration of <u>source control</u>, source protection measures, water treatment and supply distribution standards;</i> <i>g. implement a multi-barrier approach to the delivery of safe drinking water for Registered Drinking Water Supplies, through the consideration of source protection measures, and water treatment and supply standards.</i>
204.7	Juliet	Gray	Peter Lyons Trust (Lyons Vineyard)	Protection of Source Water	Amend	Amend Policies 6, 7 and 8 - Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10. Address risks via Farm Environment Plans, Catchment Collectives and Industry Programmes.
207.52	Mark	Clews	Hastings District Council	Protection of Source Water	Amend	Include SPZs Maps as part of the Regional Plan or provide confirmation as to the ability to implement the regulatory provisions of the TANK Plan change. Add all SPZs Maps as attached to this submission for the Hastings supplies as part of the Regional Plan. Specifically, •Hastings Urban (Eastbourne, Frimley, Wilson & Portsmouth Road); •Brookvale (noting that this is to be removed as a primary supply once upgrade works are complete, however HDC is currently reviewing whether or not it needs to be maintained for a backup supply); •Omahu •Whakatu •Waipatu •Haumoana (Palomino Road) •Clive (Tuckers Lane & Ferry Road)
207.67	Mark	Clews	Hastings District Council	Protection of Source Water	Amend	TANK Plan Change needs to ensure that it is not inconsistent with the legislative requirements and regulatory framework for source water protection. The specific wording and provisions may need to be amended as the Water Services Bill process progresses.
207.77	Mark	Clews	Hastings District Council	Protection of Source Water	Not Stated	The HDC supports the intent of Policy 7 and Schedule 35 relating to the spatial extent of the source protection areas for Registered Drinking Water Supplies but seeks to ensure that these are legally robust, provide certainty for water suppliers and plan users alike, and provides adequate protection of source water from the time the provisions become operative.
208.7	Emma	Taylor	Villa Maria Estate Limited	Protection of Source Water	Amend	Amend Policies 6, 7 and 8 - Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10. Address risks via Farm Environment Plans, Catchment Collectives and Industry Programmes.
213.7	Peter	Scott	The Wine Portfolio	Protection of Source Water	Amend	Amend Policies 6, 7 and 8 - Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10. Address risks via Farm Environment Plans, Catchment Collectives and Industry Programmes.
233.1	Dr Nicholas	Jones	Hawke's Bay District Health Board (HBDHB)	Protection of Source Water	Amend	The input of the JWG [Drinking Water] should be noted in the "Background" section of Change 9.
238.7	Emma	Taylor	Gimblett Gravels Winegrowers Association	Protection of Source Water	Amend	Amend Policies 6, 7 and 8 - Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10. Address risks via Farm Environment Plans, Catchment Collectives and Industry Programmes.
POL TANK 6						
12.11	Alec	Duncan	Ministry of Education	POL TANK 6	Support	Support Policy 6 - retain as proposed.
119.7	Liz	Lambert	Hawke's Bay Drinking Water Governance Joint Committee	POL TANK 6	Support	Support
123.45	Jenny	Nelson-Smith	Department of Conservation	POL TANK 6	Amend	Policy 6 - Source protection zones need to be clearly identified in Schedule 28.
135.21	Anna	Wilkes	Ravensdown Limited	POL TANK 6	Support	Retain Policy 6 as notified.
180.23	Charlotte	Drury	Horticulture New Zealand	POL TANK 6	Amend	Amend by adding as subsection (b) ' <u>requiring Registered Drinking Water Suppliers to quantify the vulnerability of the registered drinking water supply to contamination, and then undertake an assessment of options to relocate existing drinking water supplies to less vulnerable locations</u> '.
195.34	Peter	Matich	Federated Farmers of New Zealand	POL TANK 6	Amend	Amend Policy 6 to read: ... b) regulating activities within Source Protection Zones that may actually or potentially affect the quality of the source water or present a risk to the supply of safe drinking water <u>taking account of the proximity and intensity of other water abstraction activities and discharges to the Drinking Water Supply abstraction point</u> because of; c) <u>recognising existing lawfully established water supply sources and lawfully established land uses located within areas that are subject to applications for source protection for small scale drinking water supplies or Source Protection Zones</u> And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.

207.39	Mark	Clews	Hastings District Council	POL TANK 6	Amend	Amend Policy 6(b) to read: (i) Direct or indirect discharge of a contaminant to the source water including by overland flow <u>and/or</u> percolation to groundwater (iv) Shortening or quickening the connection between contaminants and the source water, including damage to a confirming layer <u>of the aquifer</u> "
210.3	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 6	Support	Retain. Consider mapping source protection zones in Schedule 28.
233.11	Dr Nicholas	Jones	Hawke's Bay District Health Board (HBDHB)	POL TANK 6	Amend	Extend the definition of Water Source Protection Zone to all registered water supplies serving 25 persons or more.
POL TANK 7						
12.12	Alec	Duncan	Ministry of Education	POL TANK 7	Support	Support Policy 7 - retain as proposed.
119.8	Liz	Lambert	Hawke's Bay Drinking Water Governance Joint Committee	POL TANK 7	Not Stated	Support , noting that the definition of Registered Drinking Water Supply will be a focus of the Taumata Arowai Establishment Unit and in particular for them to consider how the regulatory arrangements might apply to small suppliers (such as marae and rural/agricultural drinking water suppliers) and ensure these are proportionate to the scale, complexity, and risk profile of <u>supplies</u> .
180.24	Charlotte	Drury	Horticulture New Zealand	POL TANK 7	Amend	Amend by adding subsection e) as follows: <u>require applications to include an assessment of the vulnerability of the location to contaminants from existing activities, and sites that are vulnerable are avoided where possible.</u>
195.35	Peter	Matich	Federated Farmers of New Zealand	POL TANK 7	Amend	Amend Policy 7 to read: ... d) (iii) the level of consultation with land owners <u>and existing water permit holders and discharge consent holders</u> in the Source Protection Zone <u>(or proposed Source Protection Zone)</u> . d) (iv) the <u>proximity and intensity of other water abstraction activities and discharges</u> when determining the level of risk to the <u>Drinking Water Supply</u> And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
207.4	Mark	Clews	Hastings District Council	POL TANK 7	Amend	Include SPZs as part of the Regional Plan or provide confirmation as to the ability to implement the regulatory provisions of the TANK Plan change.
POL TANK 8						
12.13	Alec	Duncan	Ministry of Education	POL TANK 8	Support	Support Policy 8 - retain as proposed.
119.9	Liz	Lambert	Hawke's Bay Drinking Water Governance Joint Committee	POL TANK 8	Support	Support
180.25	Charlotte	Drury	Horticulture New Zealand	POL TANK 8	Amend	Amend by adding an additional subsection to b) <u>as follows: nature of existing land and water use within Source Protection Zone, existing investment in those activities, and the specific locational needs of those activities.</u>
195.36	Peter	Matich	Federated Farmers of New Zealand	POL TANK 8	Amend	Amend Policy 8 to read: The Council will, when considering <u>proposals to discharge contaminants or carry out land or water use activities in resource consent applications, or applicable Farm Environment Plans, Catchment Collective Plans or Industry Programmes to discharge contaminants or carry out land or water use activities</u> within: ... And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
207.41	Mark	Clews	Hastings District Council	POL TANK 8	Amend	Amend Policy 8 to read: (v) any risks to the proposed landuse, <u>water takes</u> or discharge activity has either on its own or in combination with other existing activities as a result of non-routine event. (vi) <u>any risks ensuring the water supplier is aware</u> of any abstraction of groundwater where abstraction has the potential to have more than a minor impact on flow direction and speed and/or hydrostatic pressure (viii) <u>outcomes of consultation with the Registered Drinking Water Supplier with respect to the risks to source water from the activity, including measures to minimise risk and protocols for notification to the Registered Drinking Water Supplier in the event of an event which would present a risk to source water."</u>
POL TANK 9						
12.14	Alec	Duncan	Ministry of Education	POL TANK 9	Support	Support Policy 9 - retain as proposed.
29.56	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	POL TANK 9	Amend	Delete clause POL 9.g as is a duplication with a)
119.10	Liz	Lambert	Hawke's Bay Drinking Water Governance Joint Committee	POL TANK 9	Support	Support in part - support intent of this policy while suggesting that the wording is amended by removing reference to all agencies by name, given the prospective changes to roles and responsibilities under the upcoming three waters reforms.
119.24	Liz	Lambert	Hawke's Bay Drinking Water Governance Joint Committee	POL TANK 9	Not Stated	We support: •The proposition of mapping source protection zones •The notification of the Hawke's Bay Regional Council model •The ability to update the zones during the Hearings process should additional information become available
129.1	Ceri	Edmonds	Hawke's Bay Regional Council	POL TANK 9	Amend	Delete clause (g)

207.42	Mark	Clews	Hastings District Council	POL TANK 9	Support	Support but delete clause (g).
Managing point source discharges						
120.106	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Managing point source discharges	Amend	Amend so that all point source discharges are subject to the objectives and targets in Schedule 2, timeframes to achieve those targets, and continuous improvement.
203.12	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	Managing point source discharges	Amend	Amend clause b. to refer to maintenance and upgrading. <i>b. the degree to which a discharge is of a temporary nature, or is associated with necessary maintenance, <u>replacement or upgrading work.</u></i>
POL TANK 10						
58.15	Peter	Wilson	Hawkes Bay Fish and Game Council	POL TANK 10	Amend	Amend to state a no greater than 20% change in QMCI downstream (after reasonable mixing) of the point source discharge site when compared with a reference site immediately upstream of the discharge site.
123.46	Jenny	Nelson-Smith	Department of Conservation	POL TANK 10	Amend	Amend to include reference to reducing contaminant from point source discharges where objectives in Schedule 26 are not being met currently in order to meet targets by 2040.
126.16	James	Lyver	Maungaharuru-Tangitū Trust	POL TANK 10	Amend	Amend Policy 10 to read: The Council will manage point source discharges (that are not stormwater discharges) so that after reasonable mixing, contaminants discharged either by themselves or in combination with other discharges do not cause the <u>freshwater objectives for water quality</u> in Schedule 26 to be exceeded, and when considering <u>new</u> applications to discharge contaminants will take into account have particular regard to: a) <u>any short-term numerical attribute targets in Schedule 26AA;</u> b) <u>freshwater objectives in Schedule 26;</u> c) a) measurement uncertainties associated with variables such as location, flows, seasonal variation and climatic events; d) b) <u>whether the degree to which a discharge is of a temporary in duration nature, or and is associated with necessary maintenance work;</u> e) <u>the proposed discharge representing the Best Practicable Option at the time resource consent is being considered, to prevent or minimise the adverse effects of the discharge on TANK waterbodies and TANK estuarine systems;</u> e) when it is an existing activity, identification of mitigation measures, where necessary, and timeframes for their adoption that contribute to the meeting of water quality objectives.
135.22	Anna	Wilkes	Ravensdown Limited	POL TANK 10	Amend	Amend Policy 10 as follows: <i>c) when it is an existing activity, identification of the mitigation measures, where necessary, and timeframes for their adoption that contribute to the meeting of fresh water quality objectives.</i>
146.1	Rebecca	Davies	New Zealand Defence Force	POL TANK 10	Support	Retain as notified
195.37	Peter	Matich	Federated Farmers of New Zealand	POL TANK 10	Support	That Policy 10 in 'Managing Point Source Discharges' be retained as notified
201.34	Liz	Munroe	Heretaunga Tamatea Settlement Trust	POL TANK 10	Amend	Amend and reorder bullet points starting with a) the extent to which the discharge will avoid contamination that will have an adverse effect on or contribute to adverse effects on, the life-supporting capacity of freshwater including on ecosystems associated with fresh water: <u>The rest of the bullet points are outlined in the submission.</u>
210.31	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 10	Amend	Amend to reference meeting Schedule 26 targets where objectives are not currently being met and include timeframe.
Riparian Land Management						
17.6	Richard	Riddell	Olrig Limited	Riparian Land Management	Amend	Support with amendments objectives to increase riparian planting and wetlands. Seek that these provisions are implemented through non regulatory methods and not regulation. We seek more information as to how Council intends to facilitate meeting <u>the targets specified i.e. funding assistance and support.</u>
21.6	Robert & Helen	Patullo	Newstead Farm Ltd	Riparian Land Management	Amend	Support with amendments objectives to increase riparian planting and wetlands. Seek that these provisions are implemented through non regulatory methods and not regulation. We seek more information as to how Council intends to facilitate meeting <u>the targets specified i.e. funding assistance and support.</u>
40.6	Jeremy	White	J and S White Contracting Ltd	Riparian Land Management	Amend	Support with amendments objectives to increase riparian planting and wetlands. Seek that these provisions are implemented through non regulatory methods and not regulation. We seek more information as to how Council intends to facilitate meeting <u>the targets specified i.e. funding assistance and support.</u>
45.8	Sydney	Parks	Westbrook Farm Ltd	Riparian Land Management	Amend	Support with amendments objectives to increase riparian planting and wetlands. Seek that these provisions are implemented through non regulatory methods and not regulation. We seek more information as to how Council intends to facilitate meeting <u>the targets specified i.e. funding assistance and support.</u>
106.10	Kane	Koko	Taraia Marae	Riparian Land Management	Not Stated	We think there should be a stronger requirement than what is written.
112.6	Ainsley	Harte		Riparian Land Management	Amend	Support with amendments objectives to increase riparian planting and wetlands. Seek that these provisions are implemented through non regulatory methods and not regulation. We seek more information as to how Council intends to facilitate meeting <u>the targets specified i.e. funding assistance and support.</u>
114.3	James	Lyons		Riparian Land Management	Amend	Support with amendments objectives to increase riparian planting and wetlands. Seek that these provisions are implemented through non regulatory methods and not regulation. We seek more information as to how Council intends to facilitate meeting <u>the targets specified i.e. funding assistance and support.</u>
120.56	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Riparian Land Management	Amend	Restore and revegetate immediate area surrounding lowland springs, and ensure access to these springs for cultural reasons is improved
120.128	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Riparian Land Management	Amend	Amend to link to stock exclusion, cultivation, and setbacks from water and address catchment-wide land use

120.129	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Riparian Land Management	Amend	Require riparian management, adequate setbacks and wider catchment management where there are specific water quality issues or targets. Suggestions for other sediment control mechanisms provided.
120.130	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Riparian Land Management	Amend	Specifically link riparian management to providing for freshwater values.
141.6	Danny	Angland	Kereru Station	Riparian Land Management	Support	To be accessed case by case. Maybe not fencing in difficult terrain but just planting trees.
145.7	Peter	Raikes	Awanui Station	Riparian Land Management	Not Stated	The planting of trees and shrubs by waterways should not affect or interfere with drain efficiency or waterflow. Riparian planting may well limit access by drain clearing machinery or may be an impediment to the widening or deepening of drains that could be required. This needs to be signalled in PC9.
216.10	Phillipa	McVeagh	New Zealand Apples & Pears	Riparian Land Management	Not Stated	PC9 needs a clear outline of expectations regarding riparian planting: land, cost, timeframe and resources.
216.11	Phillipa	McVeagh	New Zealand Apples & Pears	Riparian Land Management	Not Stated	HBRC should work together with NZAPI, HortNZ and other horticulture sectors and industry groups on appropriate species selection for ecosystems services and suitable plantings in a horticultural landscape.
240.19	Te Kaha	Hawaikirangi	Ngāti Pārau Hapū Trust	Riparian Land Management	Not Stated	The lack of promoting and/or requiring indigenous vegetation for restoration, riparian and erosion control.
POL TANK 11						
29.57	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	POL TANK 11	Amend	Amend POL 11.h to read "...assists in weed control."
123.47	Jenny	Nelson-Smith	Department of Conservation	POL TANK 11	Amend	Amend to include reference to reducing contaminant from point source discharges where objectives in Schedule 26 are not being met currently in order to meet targets by 2040. 11b - Amend to include shading of other catchment tributaries
195.38	Peter	Matich	Federated Farmers of New Zealand	POL TANK 11	Amend	Amend Policy 11 to read: Where practicable, the Council will promote and support the establishment of riparian vegetation, including in conjunction with stock exclusion, and setback regulations, that... <u>And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.</u>
210.32	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 11	Amend	Support in part. Amend as per our comments (move to methods)
POL TANK 12						
123.48	Jenny	Nelson-Smith	Department of Conservation	POL TANK 12	Support	Retain as notified.
124.7	Bridget	Margerison	Brownrigg Agriculture Group Ltd	POL TANK 12	Support	Policy 12 - Support
210.33	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 12	Support	Support in general but some matters could be addressed in a methods section.
POL TANK 13						
29.45	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	POL TANK 13	Amend	Supported, subject to amendments to POL 59 & 60 to address concerns about drafting details relating to the 20% Māori/environment reservation.
99.8	Jerf	van Beek	Twyford Water	POL TANK 13	Support	Supports and encourages the council to work alongside catchment collectives to improve riparian management.
123.49	Jenny	Nelson-Smith	Department of Conservation	POL TANK 13	Amend	Values are not listed in Policies 11 and 12. PC9 needs a schedule of identified freshwater values and where they apply (Schedule X) which can then be referenced by this policy.
124.5	Bridget	Margerison	Brownrigg Agriculture Group Ltd	POL TANK 13	Support	Policy 13 (c) and (d) - Support
180.26	Charlotte	Drury	Horticulture New Zealand	POL TANK 13	Support	HortNZ supports and encourages the council to work alongside growers to improve riparian management (where it is appropriate taking into account biosecurity matters), and as highlighted earlier, encourage the council to start providing this support as soon as they can, to enable landowners to start making improvements ahead of this plan change becoming operative. HortNZ also notes a need to potentially clear indigenous vegetation for biosecurity purposes, which is addressed in relation to the specific rules later in this submission
195.39	Peter	Matich	Federated Farmers of New Zealand	POL TANK 13	Amend	Amend Policy 13 to read: ... c) regulating cultivation, stock access and indigenous vegetation clearance activities that have a significant adverse effect on functioning of riparian margins in relation to water quality and aquatic ecosystem health in adjacent waterbodies <u>through rules for setbacks and stock exclusion;</u> <u>And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.</u>
201.35	Liz	Munroe	Heretaunga Tamatea Settlement Trust	POL TANK 13	Amend	Amend bullet points and add new bullet points starting with a) working with industry groups and land owner collectives to identify where riparian management needs to be improved; The rest of the bullet points are in the submission.
210.34	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 13	Amend	Move to a 'methods' section, or reword to better reflect best practice policy frameworks. Remove 'significant' from (c) – i.e. "regulating cultivation, stock access and indigenous vegetation clearance activities that have an significant adverse effect on functioning of riparian margins in relation to water quality and aquatic ecosystem" Create a schedule of freshwater values with a note on where they apply (Schedule X) which can then be referenced by this policy.
Wetland and Lake Management						
113.9	Teree	Brown	Te Tumu Paeroa	Wetland and Lake Management	Not Stated	Land utilisation and management practices could be more appropriately determined by an individual or site specific plan rather than a generic approach as signalled by the provisions of schedule 24 - wetland mapping area for Poukawa (2015). The determination of the setback area from the water edge (and incoming freshwater requirements) is unclear when viewed in conjunction with the lake (verge) and the outline of the wetland as shown in schedule 24 (Pc5).

113.1	Teree	Brown	Te Tumu Paeroa	Wetland and Lake Management	Not Stated	Recommends the following; That council engage directly with Te Tumu Paeroa and the Poukawa 13B Trust to develop and determine a site specific plan for Poukawa Waiu, including land utilisation and improvement of the water quality of the lake; Mitigation and alignment of the restoration plan to Te Mana o te Wai
123.5	Jenny	Nelson-Smith	Department of Conservation	Wetland and Lake Management	Amend	Policy 14 & 15 - Include description of wetland and lake values in Policy 3. Policy 14e - Amend to include enhancement of lake water quality and include attributes for lakes in Schedule 26.
195.4	Peter	Matich	Federated Farmers of New Zealand	Wetland and Lake Management	Support	That Policies 14 and 15 in 'Wetland and Lake Management' be retained as notified
POL TANK 14						
58.16	Peter	Wilson	Hawkes Bay Fish and Game Council	POL TANK 14	Amend	Amend (a) to state "as a habitat for indigenous and valued introduced" species. This may also require a subsequent change to the definitions.
142.17	Bill	Glazebrook	Big Hill Station Limited	POL TANK 14	Support	Partially agree. Amend f) to: indigenous fishery habitat
201.36	Liz	Munroe	Heretaunga Tamatea Settlement Trust	POL TANK 14	Amend	Amend bullet pints startign with a) drought resilience, soil moisture retention and groundwater recharge; The rest of the bullet points are outlined in the submission.
210.35	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 14	Support	Reword and merge with Policy 3 or split into method/policy components. Amend to include reference to wetlands' value in creating drought resilience, for soil moisture retention, and for groundwater recharge. Amend (f) to read "f) fish habitat and spawning"
POL TANK 15						
58.17	Peter	Wilson	Hawkes Bay Fish and Game Council	POL TANK 15	Amend	Amend to include Hawke's Bay Fish and Game Council on the list
124.6	Bridget	Margerison	Brownrigg Agriculture Group Ltd	POL TANK 15	Support	Policy 15(d) - Support
210.36	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 15	Amend	Reword and merge with Policy 3 or split into method/policy components.
Phormidium Management						
POL TANK 16						
29.58	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	POL TANK 16	Amend	Amend POL 16.e to read "...maintaining flushing flow;"
123.51	Jenny	Nelson-Smith	Department of Conservation	POL TANK 16	Amend	Amend as: To meet benthic cyanobacteria objectives and targets by 2040 and to support the values in Schedule X Delete all references to Phormidium and replace with potentially toxic benthic cyanobacteria as this is no longer the correct name for this genus.
195.41	Peter	Matich	Federated Farmers of New Zealand	POL TANK 16	Amend	Amend Policy 16 to read: d) reducing <u>reduceable</u> nutrient and sediment inputs in accordance with Policies 17 and 20; And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
210.37	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 16	Support	Consider what might be better placed in a 'methods' section. Amend to read: "The Council will address the risks to human health and dogs from <u>potentially toxic benthic cyanobacteria phormidium</u> by; ... (e) <u>maintaining flushing flows</u> " (g) <u>regulating land use activities and diffuse discharges to assist in preventing the occurrence of blooms</u> " Refer to Schedule 26 targets and timeframes for achievement.
5.10.3 Managing Adverse Effects From Land Use on Water Quality (Diffuse Discharges)						
17.3	Richard	Riddell	Olrig Limited	5.10.3 Policies: Managing Adverse Effects From Land Use on Water Quality (Diffuse Discharges)	Support	Support policies which recognise farmers and communities contributions to achieving environmental outcomes and give landowners the opportunity to continue to grow and develop 'ground up' approaches both individually or collectively. We ask for these to be retained as proposed.
21.3	Robert & Helen	Patullo	Newstead Farm Ltd	5.10.3 Policies: Managing Adverse Effects From Land Use on Water Quality (Diffuse Discharges)	Support	Support policies which recognise farmers and communities contributions to achieving environmental outcomes and give landowners the opportunity to continue to grow and develop 'ground up' approaches both individually or collectively. We ask for these to be retained as proposed.
40.3	Jeremy	White	J and S White Contracting Ltd	5.10.3 Policies: Managing Adverse Effects From Land Use on Water Quality (Diffuse Discharges)	Support	Support policies which recognise farmers and communities contributions to achieving environmental outcomes and give landowners the opportunity to continue to grow and develop 'ground up' approaches both individually or collectively. We ask for these to be retained as proposed.
45.5	Sydney	Parks	Westbrook Farm Ltd	5.10.3 Policies: Managing Adverse Effects From Land Use on Water Quality (Diffuse Discharges)	Support	Support policies which recognise farmers and communities contributions to achieving environmental outcomes and give landowners the opportunity to continue to grow and develop 'ground up' approaches both individually or collectively. We ask for these to be retained as proposed.
91.77	Johnny	Milmine	Berry Farms NZ	5.10.3 Policies: Managing Adverse Effects From Land Use on Water Quality (Diffuse Discharges)	Not Stated	Nospecific decision requested but implies that Change 9 should be amended to recognise and future proof other types of horticulture that may need more water than what is currently being modelled by providing flexibility around land use change and a flexible policy for increases in water allocation if it is required for development of intensive horticultural berry farms.

95.79	Johnny	Milmine	Prime Limes	5.10.3 Policies: Managing Adverse Effects From Land Use on Water Quality (Diffuse Discharges)	Not Stated	No specific decision requested but implies that Change 9 should be amended to recognise and future proof other types of horticulture that may need more water than what is currently being modelled by providing flexibility around land use change and a flexible policy for increases in water allocation if it is required for development of intensive horticultural berry farms.
112.3	Ainsley	Harte		5.10.3 Policies: Managing Adverse Effects From Land Use on Water Quality (Diffuse Discharges)	Support	Support policies 5.10.3 which recognise farmers and communities contributions to achieving environmental outcomes and give landowners the opportunity to continue to grow and develop 'ground up' approaches both individually or collectively. We ask for these to be retained as proposed.
120.23	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.3 Policies: Managing Adverse Effects From Land Use on Water Quality (Diffuse Discharges)	Amend	Regulate (require consent for) production land in priority catchments to resolve water quality issues in Schedule 28 and in catchments required to meet water quality targets in Schedule 26 within the life of the plan.
120.24	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.3 Policies: Managing Adverse Effects From Land Use on Water Quality (Diffuse Discharges)	Amend	Control the use of production land all other catchments to maintain water quality.
120.72	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.3 Policies: Managing Adverse Effects From Land Use on Water Quality (Diffuse Discharges)	Amend	Require Farm Environment Plans within specified, short term timeframes and within a consenting (not a permitted activity) framework with defined performance, monitoring and auditing standards.
120.107	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.3 Policies: Managing Adverse Effects From Land Use on Water Quality (Diffuse Discharges)	Amend	These policies must be subject to the objectives and targets in Schedule 26 and the priority water quality issues in Schedule 28.
127.19	Tania	Eden	Te Taiwhenua o Te Whanganui a Orotu	5.10.3 Policies: Managing Adverse Effects From Land Use on Water Quality (Diffuse Discharges)	Not Stated	Require farm plans for all farms >4ha in the TANK catchments.
128.2	Mike	Connor		5.10.3 Policies: Managing Adverse Effects From Land Use on Water Quality (Diffuse Discharges)	Not Stated	Concerned with the arbitrary area of 10 ha that I understand has been proposed as the maximum area of land that can have its use changed to a crop that has a higher N loss before triggering requirement for a Resource Consent. I propose that this area be determined as a % of the property size say 10%.
132.68	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10.3 Policies: Managing Adverse Effects From Land Use on Water Quality (Diffuse Discharges)	Amend	Include sensitive catchment criteria in TANK provisions, and expand to include restrictions on fertiliser use and nutrient limits {80kg/ha/yr} from all sources
132.178	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10.3 Policies: Managing Adverse Effects From Land Use on Water Quality (Diffuse Discharges)	Amend	Specify priority catchments in the plan and refer to them in the relevant schedules. Clearly link priority catchments to restrictions on land use in policies and methods, and SIN, TN and DRP limits in PC9.
192.4	Rebecca	Blunden	T&G Global Limited and ENZIL	5.10.3 Policies: Managing Adverse Effects From Land Use on Water Quality (Diffuse Discharges)	Amend	The provisions relating to Industry Programmes should be amended so that the requirements in the Plan Change align with existing and established industry programmes such as GAP schemes.
197.9	Lilly	Lawson	Beef + Lamb New Zealand Ltd	5.10.3 Policies: Managing Adverse Effects From Land Use on Water Quality (Diffuse Discharges)	Amend	Policies 17, 18, 19 and 21 - Amend existing and include as required new provisions to give effect to the following intent: * Management approaches are tailored to addressing water quality issues identified on a sub catchment basis... * Provide for flexibility in Nitrogen use and discharge where these will not exceed long term determined sub catchment determined loads. * Enable land uses which are leaching at or less than the 'sustainable level' to continue... * Enable changes in land use which occur within the sustainable level for the sub-catchment. Continued in submission.
240.21	Te Kaha	Hawaikirangi	Ngāti Pārau Hapū Trust	5.10.3 Policies: Managing Adverse Effects From Land Use on Water Quality (Diffuse Discharges)	Not Stated	Ensuring that all agricultural land use activities utilise best management practices to minimise erosion, sediment supply, and nutrient losses.
Adaptive Approach to Nutrient and Contaminant Management						
23.57	Kerry	Sixtus	Pattullo's Nurseries Limited	Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
29.11	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Adaptive Approach to Nutrient and Contaminant Management	Amend	Amend 17.a to read "establish programmes and processes through Farm Environment Plans, Catchment Collectives and , Industry Programmes and other catchment-based groups.... ", or similar wording to achieve the outcome sought in this submission.
32.57	Kent	Griffiths		Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
35.57	Colin	Campbell		Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
37.57	Greg	Evans	Dartmoor Estate Ltd	Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
38.57	Roger	Brownlie		Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
43.57	CA & GW	Wilson	Meiros Orchard Ltd	Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.

44.57	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
49.57	John	Parsons		Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
54.57	Mark	Apatu	Apatu Farms Ltd	Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
58.18	Peter	Wilson	Hawkes Bay Fish and Game Council	Adaptive Approach to Nutrient and Contaminant Management	Amend	Amend by directly referencing "rules that govern land use intensification"
61.57	Greg	Simpson		Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
62.57	Jonty	Moffett		Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
69.57	Jos	Dames	Dames Limited	Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
71.57	Carl	Knapp	Bellingham Orchard Ltd.	Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
72.57	Justin	Addis	Armada Orchard Ltd	Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
73.57	Bevan	Davidson		Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
77.57	David & Sheryl	Mackie		Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
79.57	Richard	Penreath		Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
86.57	Peter	Scott		Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
91.56	Johnny	Milmine	Berry Farms NZ	Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
95.57	Johnny	Milmine	Prime Limes	Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
96.57	Mike	Davis	Davis Orchards Ltd	Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
97.59	Lesley	Wilson	DN & LR Wilson Ltd	Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
99.83	Jerf	van Beek	Twyford Water	Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
104.57	John	Loughlin	Rockit Global Limited	Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
105.57	Scott	Lawson		Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
110.57	Edward	Whyte	Whyte & Co	Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
120.108	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Adaptive Approach to Nutrient and Contaminant Management	Amend	Where targets for water quality are not being achieved, clear management of land use activities which contribute to degraded water quality must be included in the plan with a timebound pathway of improvement to achieving targets.
120.110	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Adaptive Approach to Nutrient and Contaminant Management	Amend	Replace terms like 'good practice' with more directive wording, and define with regulatory performance standards
120.111	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Adaptive Approach to Nutrient and Contaminant Management	Amend	Critical source areas, nutrient budgeting, contaminant loss, reduction and mitigation, must all be required to meet performance standards
120.112	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Adaptive Approach to Nutrient and Contaminant Management	Amend	Action to reduce nutrient (and sediment) contamination of waterbodies is needed in PC9 now
122.57	Richard	Penreath	Ngai Tukairangi Trust	Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
132.111	Marei	Apatu	Te Taiwhenua o Heretaunga	Adaptive Approach to Nutrient and Contaminant Management	Amend	Where Overseer or another council approved method is to be used as a tool to calculate nitrogen leaching in TANK catchments, and inform consent activity status and relevant rules, ensure the use of Overseer (or its equivalent) does not result in water quality decline such that limits are breached and targets not achieved within specific FMUs, management zones or timeframes.
132.113	Marei	Apatu	Te Taiwhenua o Heretaunga	Adaptive Approach to Nutrient and Contaminant Management	Amend	Remove any threshold allowance for or increase from nitrogen leaching calculations and LUC classes, from being applicable for TANK catchment rules.

132.114	Marei	Apatu	Te Taiwhenua o Heretaunga	Adaptive Approach to Nutrient and Contaminant Management	Amend	Add Soluble Inorganic Nitrogen, Total Nitrogen and Soluble Reactive Phosphorus to provisions that regulate effects of land uses where Overseer or another approved system is used.
132.115	Marei	Apatu	Te Taiwhenua o Heretaunga	Adaptive Approach to Nutrient and Contaminant Management	Amend	Impose a management/monitoring/mitigation charge of 0.50 cents per kg for any N leaching above a 12 kg/ha/yr threshold for land use activities where nitrogen is applied directly to land
132.138	Marei	Apatu	Te Taiwhenua o Heretaunga	Adaptive Approach to Nutrient and Contaminant Management	Amend	For all other applications of nutrients within the TANK catchments, restrict applications of nitrogen from all sources to 120 kgs/hectare/year ¹⁶ . For intensive vegetable production restrict applications to 150kgs/hectare/per year. Impose a catchment load limit for Total Nitrogen within each of the four TANK catchments.
132.193	Marei	Apatu	Te Taiwhenua o Heretaunga	Adaptive Approach to Nutrient and Contaminant Management	Amend	Prevent use and encouragement of "adaptive management" practices in objectives, policies and methods in PC9, as it is a faulty methodology within an RMA, 1991 planning construct and does not always support sustainable management.
185.57	Allen	Kittow	Tremaine Farms Ltd	Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
186.57	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
195.3	Peter	Matich	Federated Farmers of New Zealand	Adaptive Approach to Nutrient and Contaminant Management	Amend	Implies support for a staged adaptive management approach and provides recommendations regarding successful implementation.
195.4	Peter	Matich	Federated Farmers of New Zealand	Adaptive Approach to Nutrient and Contaminant Management	Amend	Amend to provide a more balanced approach to nutrient management
196.59	Julian	Odering	Oderings Nurseries	Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
211.57	Brian	McLay		Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
214.57	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
215.57	Peter	Dooney	Dooney Partnership	Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
216.18	Phillipa	McVeagh	New Zealand Apples & Pears	Adaptive Approach to Nutrient and Contaminant Management	Not Stated	There are currently limited options available for modelling nutrient loss, particularly from horticultural systems, so it is important that flexibility is incorporated to allow the applicant to use an approved model to calculate their land use change impact.
217.56	Paul	Paynter	Johnny Appleseed Holdings Ltd	Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
218.57	Adrian	Mannering	Irrigation Services	Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
219.57	Michael & Julie	Russell		Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
220.57	Steve	Gillum	Gillum Springfield Trust	Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
221.57	WT	Scott		Adaptive Approach to Nutrient and Contaminant Management	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
POL TANK 17						
99.9	Jerf	van Beek	Twyford Water	POL TANK 17	Amend	Many horticultural growers have already adopted industry good practice, and in some cases operate above it, and this should be acknowledged in the wording of (a)(i) and (iii). With regards to (a)(ii), catchment groups, existing and established industry programmes should be recognised as being an important party and key to the achievement of this policy, and the wording at the start of the policy should be amended to reflect that.
123.52	Jenny	Nelson-Smith	Department of Conservation	POL TANK 17	Oppose	Delete Policy 17 and replace with: "Schedule 26 freshwater quality objectives will be maintained where they are currently met, and targets will be achieved by 2040 through regulating the use of land in priority catchments for the water quality issues in Schedule 28, the intensification of all land, and requiring farm plans in all catchments that: a) Meet industry good practice as defined in Schedule XX b) Manage all critical source areas c) Mitigate and reduce contaminant losses to water d) Meet nutrient budgets for nitrogen in priority catchments in Schedule 28 e) All land users providing contaminant loss and nutrient budget information annually, or on request by the Council" F) Provide for appropriate enforcement actions Or words to similar effect Include a regulatory implementation pathway to achieve objectives and targets by 2040 Include regulation of land use in priority catchments and for waterbodies where contaminants are not currently meeting objectives in Schedule 26 as a minimum and require FEPs for all farming land use >10ha.

126.17	James	Lyver	Maungaharuru-Tangitū Trust	POL TANK 17	Support	Insert new Policy 17A to read: In addition to Policy 1, require land use activities located within 'Low' and 'Long term' priority catchments (as described in Schedule 28) to prepare a Farm Environment Plan for; a) farming enterprises in accordance with Section C of Schedule 30; b) TANK catchment collectives, TANK industry programmes, catchment collectives and industry groups in accordance with Section A and B of Schedule 30; within 6 years of PC9 becoming operative.
126.18	James	Lyver	Maungaharuru-Tangitū Trust	POL TANK 17	Amend	Amend Policy 17 to read: The Council will achieve or maintain the freshwater targets or freshwater objectives in Schedule 26 with landowners, industry groups, and other stakeholders and will implement the following measures In addition to Policy 1, require land use activities located within 'High' or 'Medium' priority catchments (as described in Schedule 28) to (iv) prepare nutrient management plans in catchment not meeting targets for dissolved nitrogen. prepare a Farm Environment Plan for; a) farming enterprises establish programmes and processes through Farm Environment Plan in accordance with Section C and B of Schedule 30 inclusive of the matters set out in Policies 11, 14, 20, 21, 22 and 27; b) TANK catchment collectives, TANK industry programmes, catchment collectives and industry groups in accordance with Section A and B of Schedule 30 inclusive of the matters set out in Policies 11, 14, 20, 21, 22 and 27; within 3 years of PC9 becoming operative (i) adopt industry good practice; (ii) identify critical source areas of contaminants at both property and catchment scale; (iii) adopt effective measures to mitigate or reduce contaminant loss; (iv) prepare nutrient management plans in catchment not meeting targets for dissolved nitrogen.
135.23	Anna	Wilkes	Ravensdown Limited	POL TANK 17	Amend	Amend Policy 17 as follows: a) (iv) implement measures for prepare nutrient management plans in catchments not meeting targets for dissolved nitrogen.
194.35	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 17	Amend	Seeks that 5.10.3.17(iii) and (iv) be amended to differentiate between high and low contaminant and nitrogen loss land uses. This could be amended through reference to Schedules 29/30 which may themselves require consequential amendments.
195.42	Peter	Matich	Federated Farmers of New Zealand	POL TANK 17	Amend	Amend Policy 17 to include allowance for permitted activities that have only minor adverse effects in terms of nutrients and contaminants. Specific wording provided. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
210.38	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 17	Oppose	Delete Policy 17. Take components to a methods section. Replace with a policy that better reflects the requirements of the NPSFM, RMA, and NES FW, and references the targets and timeframes in Schedule 26.
POL TANK 18						
99.10	Jerf	van Beek	Twyford Water	POL TANK 18	Support	Supports the staged approach that has been adopted to nutrient management in this plan change that seeks to gather further information about sustainable nutrient loads over the first phase of this plan change (ie. the next ten years), and then only develop a nutrient allocation regime if this approach is not successful.
123.53	Jenny	Nelson-Smith	Department of Conservation	POL TANK 18	Oppose	"The maintenance or improvement of water quality to meet freshwater objectives and 123.53 targets by 2040 will be supported by: a) Collating, analysing and reporting on contaminant loss data provided by all land users (through Policy 17) b) Developing a contaminant allocation regime (nitrogen) in priority catchments c) Further regulation of land use in areas outside of priority catchments where targets are not being achieved by 2030 d) Measuring and reporting against the objectives and targets in Schedule 26 every five years e) Working with industry groups, landowners, mana whenua and other stakeholders to research and investigate additional mitigations and actions to meet targets at a property and catchment scale" Or words to similar effect

126.19	James	Lyver	Maungaharuru-Tangitū Trust	POL TANK 18	Oppose	Amend Policy 18 to read: The Council will <u>work with landowners, industry groups, and other stakeholders to assist with achieving or maintaining the short-term numerical attribute targets in Schedule 26AA or freshwater objectives in Schedule 26 by;</u> a) gathering information to determine sustainable nutrient loads; <u>a) establishing and operating a publicly available freshwater quality accounting system in each FMU;</u> <u>b) Collating and analysing contaminant loss data provided through Farm Environment Plans prepared in accordance with Policy 17A and Policy 17;</u> c) a) gathering information necessary to determine sustainable nutrient loads develop nutrient limits and a nutrient allocation regime for discharge of nitrogen in 'High' priority catchments; if the management framework in Policy 17 is not leading to improved attribute states by the time this plan is reviewed; <u>d) signalling further regulation of land use activities where there is a significant risk of increased nitrogen loss;</u> <u>e) gathering and assessing information about environmental state and trends and the impact of land use activities on these;</u> <u>f) working with industry groups, landowners and other stakeholders to undertake research and investigate into; additional measures to reduce nutrient losses at a property and catchment scale.</u> i). nutrient pathways, nitrogen att; ii). nutrient uptake and loss pathways at a property scale; iii). measures to reduce nutrient losses at a property as well as catchment scale including those delivered through industry programmes.
135.24	Anna	Wilkes	Ravensdown Limited	POL TANK 18	Amend	Amend Policy 18 as follows: <i>The Council will achieve or maintain the freshwater targets or freshwater objectives in Schedule 26 by;</i> • <i>a) gathering information to determine sustainable nutrient loads;</i> • <i>b) developing nutrient limits and a nutrient allocation regime if the management framework in Policy 17 is not achieving the freshwater quality objectives leading to improved attribute states by the time this plan is reviewed.</i>
180.29	Charlotte	Drury	Horticulture New Zealand	POL TANK 18	Amend	Amend as follows: 'The Council will achieve or maintain the freshwater targets or freshwater objectives in Schedule 26 by... c) regulating land use change to manage contaminant loss across a range of contaminants; e) working with industry groups, collectives, landowners and other stakeholders to undertake research and investigation into; (i) nutrient pathways, concentrations and loads in rivers and coastal receiving environments; (ii) nutrient uptake and loss pathways at a property scale; (iii) measures to reduce contaminant losses at a property as well as catchment scale including those delivered through industry programmes an landowner collectives.
195.43	Peter	Matich	Federated Farmers of New Zealand	POL TANK 18	Amend	Amend Policy 18 to include references to <u>adverse effects from</u> increased nitrogen loss and <u>reduceable</u> nutrient losses. Tracked changes provided. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
210.39	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 18	Not Stated	Delete Policy. Replace with a policy that better reflects the requirements of the NPSFM, RMA, and NES FW, and references the targets and timeframes in Schedule 26. A clear regulatory pathway is needed to achieve 2040 targets. That must include nutrient management – either via inputs or outputs.
POL TANK 19						
123.54	Jenny	Nelson-Smith	Department of Conservation	POL TANK 19	Oppose	Delete
126.20	James	Lyver	Maungaharuru-Tangitū Trust	POL TANK 19	Oppose	Delete Policy 19
135.25	Anna	Wilkes	Ravensdown Limited	POL TANK 19	Oppose	Delete Policy 19 in its entirety. <i>In catchments that do not meet objectives for dissolved nutrients specified in Schedule 26, the Council will ensure landowners, landowner collectives and industry groups have nutrient management plans according to the priority order in Schedule 28.</i>
142.19	Bill	Glazebrook	Big Hill Station Limited	POL TANK 19	Support	Strongly support
180.30	Charlotte	Drury	Horticulture New Zealand	POL TANK 19	Amend	Amend as follows: 'In catchments that do not meet objectives for dissolved nutrients <u>nitrogen</u> specified in Schedule 26, the Council will ensure landowners, landowner collectives and industry groups have nutrient management plans according to the <u>priority order in Schedule 28.</u> '
194.37	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 19	Amend	PRWM seeks that 5.10.3.19 be amended to differentiate between high and low nitrogen loss land uses. This could be amended through reference to Schedules 29/30 which may themselves require consequential amendments. In addition, PC9 should acknowledge the requirements for FMPs under Part 9 RMA and ensure the plan provisions are not <u>inconsistent or more stringent than these.</u>
195.44	Peter	Matich	Federated Farmers of New Zealand	POL TANK 19	Amend	Amend Policy 19 to read: ... have nutrient management plans <u>where Council State and Trend data on water quality indicates declining trends and poor state according to the priority order in Schedule 28.</u> And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.

210.40	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 19	Oppose	Delete
Sediment Management						
120.124	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Sediment Management	Amend	Amend Policy 20 AND/OR add new provisions to set out a clear plan for managing sedimentation
120.125	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Sediment Management	Amend	Amend Policy 20 to be more directive and directly reference achieving the water quality objectives and targets in Schedule 26 (including all of the objectives of Schedule 27)
120.126	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Sediment Management	Amend	Control both sources of sediment (adjacent to waterbodies and broader land use in highly erodible catchments)
240.24	Te Kaha	Hawaikurangi	Ngāti Pārau Hapū Trust	Sediment Management	Not Stated	The lack of targeted sediment reduction loads in both the Ahuriri (Te Whanganui a Orotu) and Waitangi estuaries.
POL TANK 20						
10.2	David	Renouf		POL TANK 20	Amend	Amend Policy 20 - Add to Sediment Management 20 'measuring the phosphorus and nitrogen mg/kg (dry basis) load in the sediments (mud) in the river systems will provide a better understanding of what is happening' Add to Sediment Management 20 'Targets of reducing phosphorus and nitrogen mg/kg levels in river sediments to at least ANZECC recommended levels by 2030'
46.6	Tom	Belford	Peter Beaven & Tom Belford	POL TANK 20	Support	States the accomplishments of PC9: Soil erosion is targeted and addressed as a key problem adversely affecting both freshwater and marine water quality and farming productivity.
123.55	Jenny	Nelson-Smith	Department of Conservation	POL TANK 20	Oppose	Amend Policy 20 as: "Sediment loss, erosion and effects on freshwater and coastal ecosystems will be mitigated and reduce to maintain the objectives and meet the targets in Schedule 26 by 2040 by: a) Controlling cultivation, stock access and vegetation clearance in all catchments b) Regulating land use in priority catchments vulnerable to erosion listed in Schedule 28 to manage critical source areas at the property and catchments scales c) requiring and supporting tree planting, afforestation and retirement of land, particularly where multiple water quality objectives and targets can be maintained or met d) Requiring and supporting and improved and sustainable riparian management in all catchments" <i>Amend to similar effect</i>
127.23	Tania	Eden	Te Taiwhenua o Te Whanganui a Orotu	POL TANK 20	Not Stated	Increase setbacks for vegetation clearance and cultivation to 10 metres to avoid sedimentation.
135.26	Anna	Wilkes	Ravensdown Limited	POL TANK 20	Amend	Amend Policy 20 as follows: <i>The Council will reduce manage adverse effects on freshwater and coastal aquatic ecosystems from eroded sediment, and from the phosphorus associated with this, by prioritising the following mitigation measures:</i>
142.16	Bill	Glazebrook	Big Hill Station Limited	POL TANK 20	Amend	Amend Policy 20: a) No regulatory impositions on sediment control until accurate data sets are available for defined catchments. b) With reference to accurate data sets establish reasonable and separate sediment and phosphorus outcome criteria for land users to abide by
142.18	Bill	Glazebrook	Big Hill Station Limited	POL TANK 20	Oppose	Remove policy 20a). Rely on approaches stated in policies 19, 23, 24, 25, 26 to produce good objective outcomes. Allow time for factual data sets to be completed.
195.45	Peter	Matich	Federated Farmers of New Zealand	POL TANK 20	Amend	That Policy 20 'Sediment Management' be amended as follows: 20. The Council will <u>manage land and water use</u> to reduce adverse effects on freshwater and coastal aquatic ecosystems from eroded sediment, and from the phosphorus associated with this, by prioritising the following mitigation measures; ... b) targeting priority areas and activities for sediment loss management where there is high sediment loss risk and working with land managers to identify and manage critical sources areas of contaminants at both property and catchment scale; ... And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
210.41	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 20	Oppose	Amend to make more directive towards management measures and bottom lines.
239.5	Mangaone	Catchment Group	Mangaone Catchment Group Incorporated	POL TANK 20	Amend	High level modelling about sediment loss does not represent actual on ground topography. It does not make sense that the Mangaone Catchment is the highest priority for sediment loss when the MCI index is the same as other catchments.
Land Use Change and Nutrient Losses						
23.64	Kerry	Sixtus	Pattullo's Nurseries Limited	Land Use Change and Nutrient Losses	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
23.69	Kerry	Sixtus	Pattullo's Nurseries Limited	Land Use Change and Nutrient Losses	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.

29.12	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Land Use Change and Nutrient Losses	Amend	Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives. Amend 21.d to read " subject to Policy 21 a-c), avoid land use change...." or similar wording to achieve the outcome sought in this submission.
29.16	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Land Use Change and Nutrient Losses	Amend	Add a new clause 26.a to read "work initially with the Catchment Collective or Industry Programme to achieve compliance through the Catchment Collective or Industry Programme rules;" or similar wording to achieve the outcome sought in this submission. Amend 26.c (now 26.d) to read " where the processes in Policy 26.a-c have been exhausted , take appropriate enforcement action " or similar wording to achieve the outcome sought in this submission.

20.8	Bruce	Nimon		POL TANK 21	Amend	Amend Policy 21 - Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives.
25.8	Xan	Harding		POL TANK 21	Amend	Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives. Amend 21.d to read "subject to Policy 21 a)-c), avoid land use change...." or similar wording to achieve the outcome sought in this submission.

26.8	Robin	Back	Dunvegan Estate	POL TANK 21	Amend	Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives. Amend 21.d to read "subject to Policy 21 a)-c), avoid land use change...." or similar wording to achieve the outcome sought in this submission.
28.8	Hamish	Clark	Saint Clair Family Estate Ltd	POL TANK 21	Amend	Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives. Amend 21.d to read "subject to Policy 21 a)-c), avoid land use change...." or similar wording to achieve the outcome sought in this submission.
34.8	Jonathan	Hamlet	Craggy Range Vineyards Limited	POL TANK 21	Amend	Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives. Amend 21.d to read "subject to Policy 21 a)-c), avoid land use change...." or similar wording to achieve the outcome sought in this submission.
39.8	Bridget	Wilton	MbandSons	POL TANK 21	Amend	Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives. Amend 21.d to read "subject to Policy 21 a)-c), avoid land use change...." or similar wording to achieve the outcome sought in this submission.
41.8	Jonathan	Milmine	Milmine Holdings Limited	POL TANK 21	Amend	Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives. Amend 21.d to read "subject to Policy 21 a)-c), avoid land use change...." or similar wording to achieve the outcome sought in this submission.
47.3	John	Bostock	John Bostock & Eddie Crasborn	POL TANK 21	Amend	Amend - Policy 21 d) - Changing crop types is important for growers where markets, varieties and circumstances are constantly changing. The rule framework needs to be clear as to what circumstances require regulation – with any regulation only applying to certainties where more than minor effects may arise.
48.8	Paul	Ham	Alpha Domus	POL TANK 21	Amend	Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives. Amend 21.d to read "subject to Policy 21 a)-c), avoid land use change...." or similar wording to achieve the outcome sought in this submission.
53.8	Chris	Howell	CD & CM Howell Partnership	POL TANK 21	Amend	Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives. Amend 21.d to read "subject to Policy 21 a)-c), avoid land use change...." or similar wording to achieve the outcome sought in this submission.
66.1	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	POL TANK 21	Oppose	Delete Section 21(d) in entirety
68.8	Geoffrey	Smith	Vine Nursery New Zealand and Waikahu Vineyard	POL TANK 21	Amend	Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives. Amend 21.d to read "subject to Policy 21 a)-c), avoid land use change...." or similar wording to achieve the outcome sought in this submission.
70.2	Mike	Glazebrook		POL TANK 21	Amend	Delete Policy 21 (d). Failing that, the wording of 21 (d) should be amended so that the word "avoid" retains its common meaning i.e. "to minimise" or "prevent as far as practical" rather than simply "not allow" as interpreted in the Supreme Court decision for Environmental Defence Society Inc v New Zealand King Salmon Company Limited (2014) NZSC 38 .
74.1	Kevin	Bayley	Bayley Produce Ltd	POL TANK 21	Amend	Amend Policy 21 d - Concerned about the above wording, in particular the use of 'avoid', and how this may imply a limitation on any further and future land use change across the TANK catchment, and on future growth opportunities for our business. The trigger in assessing changes in land use should be measured instead in relation to good management practice, not nitrogen limits which cannot be accurately understood nor measured.
75.8	Andria	Monin	Stonecroft Wines Limited	POL TANK 21	Amend	Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives. Amend 21.d to read "subject to Policy 21 a)-c), avoid land use change...." or similar wording to achieve the outcome sought in this submission.
76.8	Larry	Morgan	Te Mata Estate Winery Ltd	POL TANK 21	Amend	Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives. Amend 21.d to read "subject to Policy 21 a)-c), avoid land use change...." or similar wording to achieve the outcome sought in this submission.
81.8	Tony	Smith	Babich Wines	POL TANK 21	Amend	Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives. Amend 21.d to read "subject to Policy 21 a)-c), avoid land use change...." or similar wording to achieve the outcome sought in this submission.
84.8	Grant	Edmonds	Redmetal Vineyards Ltd	POL TANK 21	Amend	Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives. Amend 21.d to read "subject to Policy 21 a)-c), avoid land use change...." or similar wording to achieve the outcome sought in this submission.
87.8	Peter	Scott	Kereru Road Vineyard	POL TANK 21	Amend	Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives. Amend 21.d to read "subject to Policy 21 a)-c), avoid land use change...." or similar wording to achieve the outcome sought in this submission.

88.8	Jacqui	Cormack	Constellation Brands NZ Limited (CBNZ)	POL TANK 21	Amend	Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives. Amend 21.d to read "subject to Policy 21 a)-c), avoid land use change...." or similar wording to achieve the outcome sought in this submission.
94.8	Deane	Caughey	Indevin Group Ltd	POL TANK 21	Amend	Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives. Amend 21.d to read "subject to Policy 21 a)-c), avoid land use change...." or similar wording to achieve the outcome sought in this submission.
99.11	Jerf	van Beek	Twyford Water	POL TANK 21	Not Stated	Supports in the main the approach that is proposed to address land use change, however we do not agree that nitrogen loss is used as the only trigger trigger for resources consenting. There maybe other triggers that might be of concern and not Nitrogen in particular situations. The word avoid is concerning where minimal use is seen as good practice and prohibits a landowner to change the use of land. This is seen as punishment for good behaviour. Higher users of nitrogen are able to keep the status quo.
101.1	Greg	Mitchell	Mitchell Dairy Farms Ltd	POL TANK 21	Oppose	Remove increased Nitrogen loss from land use.
102.8	Ritchie	Garnham	Booster Wine Group	POL TANK 21	Amend	Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives. Amend 21.d to read "subject to Policy 21 a)-c), avoid land use change...." or similar wording to achieve the outcome sought in this submission.
103.6	Ian	Quinn	Two Terraces Vineyard	POL TANK 21	Amend	Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives. Amend 21.d to read "subject to Policy 21 a)-c), avoid land use change...." or similar wording to achieve the outcome sought in this submission.
107.8	Christopher	Harrison	Beach House Wines Ltd	POL TANK 21	Amend	Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives. Amend 21.d to read "subject to Policy 21 a)-c), avoid land use change...." or similar wording to achieve the outcome sought in this submission.
123.56	Jenny	Nelson-Smith	Department of Conservation	POL TANK 21	Oppose	Delete and reword as: "The impacts of diffuse contaminants from intensification of land use will be controlled in all catchments to maintain water quality where freshwater objectives are met and to improve water quality to meet targets by 2040. In making decisions on resource consents, taking into account: a) The current state and trends in water quality for the catchment in which intensification is planned b) Whether the intensification is in a priority catchment listed in Schedule 28 c) The efficient use of land to reduce contaminant losses d) Planned mitigations and timeframes for actions to reduce contaminant losses from intensive land use e) Industry good practice as defined by the standards in Schedule XX f) Avoiding land use intensification where water quality objectives will not be maintained, or targets not met g) Considering the contribution of intensification to degraded water quality, including cumulative contaminant loss in the catchment"
135.27	Anna	Wilkes	Ravensdown Limited	POL TANK 21	Amend	Amend Policy 21 as follows: <i>The Council will remedy or mitigate the potential impact of diffuse discharge of nitrogen on freshwater quality objectives by regulating <u>productive land uses</u>, land and water use changes that modelling indicates are likely to result in increased nitrogen loss (modelled on an annual, whole of property or whole of farm enterprise basis) and- <u>In</u> making decisions on resource consent applications, the Council will take into account:</i> ... <i>• b) where any relevant TANK Industry Programme or Catchment Collective is in place the extent to which the changed land use activity <u>productive land use activity</u> is consistent with the Industry Programme or Collective outcomes, mitigation measures and timeframes;</i> ... <i>d) avoid land use change that will result in increased nitrogen loss that contributes to <u>fresh</u> water quality objectives and</i>
141.1	Danny	Angland	Kereru Station	POL TANK 21	Support	Support in part. This should be 10% of farm area. Also this should be an op on again after every 3 years.
142.3	Bill	Glazebrook	Big Hill Station Limited	POL TANK 21	Oppose	I oppose District/Region wide regulatory measures and rules to remediate issues suggested or alerted to by modelling.
143.7	Peter	Hyslop	Strathallan Trust	POL TANK 21	Amend	Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives. Amend 21.d to read "subject to Policy 21 a)-c), avoid land use change...." or similar wording to achieve the outcome sought in this submission.
165.8	Caleb	Dennis	Aotearoa New Zealand Fine Wine Estates LP	POL TANK 21	Amend	Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives. Amend 21.d to read "subject to Policy 21 a)-c), avoid land use change...." or similar wording to achieve the outcome sought in this submission.

179.8	Wim	Barendsen	Otawhao Farms Ltd	POL TANK 21	Amend	Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives. Amend 21.d to read “subject to Policy 21 a)-c), avoid land use change....” or similar wording to achieve the outcome sought in <u>this submission</u> .
180.31	Charlotte	Drury	Horticulture New Zealand	POL TANK 21	Amend	Amend as follows: ‘The Council will remedy or mitigate the potential impact of diffuse discharge of nitrogen on freshwater quality objectives by regulating land and water use changes that modelling indicates are likely to result in increased <u>contaminant loss</u> (modelled on an <u>average</u> annual, whole of farm <u>or collective</u> basis) and in making decisions on resource consent applications, the Council will take into account: ... a) <u>contaminant losses modelled to result from the land use change, in relation to whether freshwater quality objectives or targets are being met in the catchment where the activity is to be undertaken; and will;</u> d) avoid land use change that will result in increased nitrogen loss that contributes to water quality objectives and targets in Schedule 26 for dissolved nitrogen not being met. e) <u>support crop rotation across highly productive land to maintain the soil health of highly productive land</u> f) <u>Recognise the importance of the TANK catchments for supplying vegetables for domestic food supply</u> g) <u>Support the transition to a low emissions economy by enabling land use change that reduces greenhouse gas emissions, improves sequestration and promotes climate change adaptation,</u>
193.2	Bruce	Mackay	Heinz Wattie's Limited	POL TANK 21	Amend	Change to include modelling on a whole of catchment basis, or to consider mitigations, would provide opportunities for land use change but still retain the maintain or improve overall objective. <u>Cropping rotations need to be considered in their entirety rather than seasonally.</u>
194.39	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 21	Amend	PRWM seeks that 5.10.3.21(d) be amended to differentiate between high and low nitrogen loss land uses. This could be amended through reference to Schedules 29.
195.46	Peter	Matich	Federated Farmers of New Zealand	POL TANK 21	Not Stated	That Policy 21 ‘Land Use Change and Nutrient Losses’ be amended as follows: <u>Land Use Change and Nutrient Losses: Nitrogen Management</u> 21. The Council will <u>manage</u> harmful increases of nitrogen to remedy or mitigate the potential impact of diffuse discharge of nitrogen on freshwater quality objectives by regulating land and water use changes that modelling indicates are likely to result in increased nitrogen <u>concentrations in water bodies</u> . loss (modelled on an annual, whole of property or whole of farm enterprise basis), and i In making decisions on resource consent applications, the Council will take into account: a) whether freshwater quality objectives or <u>attribute</u> targets are being met in the catchment where the activity is to be undertaken; b) where any relevant TANK Industry Programme or Catchment Collective is in place, the extent to which the changed nitrogen loss from land use activity is consistent with the Industry Programme or Collective outcomes, mitigation measures and timeframes aimed at preventing increased nitrogen concentration degrading water bodies; c) any mitigation measures required, and timeframes by which they are to be implemented that are necessary to ensure the actual or potential contaminant nitrogen loss occurring from the property, in combination with other contamination losses <u>and catchment processes (e.g. attenuation)</u> in the catchment will be <u>consistent with appropriate in</u> meeting freshwater quality objectives, including performance in relation to industry good practice, efficient use of nutrients and minimisation of reduction of reduceable nutrient losses; and will; d) avoid land use change that will result in increased nitrogen loss that contributes to water quality objectives and targets in Schedule 26 for dissolved nitrogen not being met. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
199.8	Peter	Robertson	Brookfields Vineyards/Ohiti Estate	POL TANK 21	Amend	Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives. Amend 21.d to read “subject to Policy 21 a)-c), avoid land use change....” or similar wording to achieve the outcome sought in <u>this submission</u> .
201.37	Liz	Munroe	Heretaunga Tamatea Settlement Trust	POL TANK 21	Amend	Strongly suggest that this Policy be more directive - to say that resource consents will only be granted where they will not contribute to an exceedance of a limit/failure to meet an objective or jeopardise achievement of a target.
204.8	Juliet	Gray	Peter Lyons Trust (Lyons Vineyard)	POL TANK 21	Amend	Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives. Amend 21.d to read “subject to Policy 21 a)-c), avoid land use change....” or similar wording to achieve the outcome sought in <u>this submission</u> .
208.8	Emma	Taylor	Villa Maria Estate Limited	POL TANK 21	Amend	Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives. Amend 21.d to read “subject to Policy 21 a)-c), avoid land use change....” or similar wording to achieve the outcome sought in <u>this submission</u> .
210.42	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 21	Oppose	Amend to provide more direction and clarity

213.8	Peter	Scott	The Wine Portfolio	POL TANK 21	Amend	Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives. Amend 21.d to read "subject to Policy 21 a)-c), avoid land use change...." or similar wording to achieve the outcome sought in <u>this submission</u> .
216.8	Phillipa	McVeagh	New Zealand Apples & Pears	POL TANK 21	Not Stated	Question nitrogen loss being used as a trigger for resource consent to allow a land use change to occur. Land use change should consider and encourage change based on land use suitability and overall environmental impact and against broader benefits / <u>impacts for the area or region, and not on nitrogen loss alone</u> .
238.8	Emma	Taylor	Gimblett Gravels Winegrowers Association	POL TANK 21	Amend	Amend so that Catchment Collectives and Industry Programmes may manage land use change in accordance with the 2040 timeline for meeting water quality objectives. Amend 21.d to read "subject to Policy 21 a)-c), avoid land use change...." or similar wording to achieve the outcome sought in <u>this submission</u> .
241.4	Penny and John	Reynolds		POL TANK 21	Amend	This policy needs to be clearer and reflect the practical realities of food production. The rule framework needs to be clear as to what circumstances require regulation; with any regulation only applying to certainties where more than minor effects may arise.
Stock Exclusion						
120.120	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Stock Exclusion	Support	Support the need to exclude stock from waterways
120.123	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Stock Exclusion	Amend	Amend to include provisions with respect to break-feeding of stock and setbacks from water, which may need to be more stringent than the regulations.
POL TANK 22						
29.43	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	POL TANK 22	Amend	Amend Rule TANK 22 to include the following new Condition: " <u>The activity does not comply with the conditions of Rule TANK 20</u> " or similar wording to achieve the outcome sought in this submission. Amend Schedule 34 title and site plan terminology (and provisions, if appropriate) to remove inconsistencies and allow for <u>rural locations</u> .
90.3	Sarah	Millington		POL TANK 22	Not Stated	The TANK Plan needs to require that stock must be excluded from all riparian zones along streams, rivers and lakes, as well as <u>from wetlands</u> .
101.2	Greg	Mitchell	Mitchell Dairy Farms Ltd	POL TANK 22	Support	We support Stock Exclusion
106.11	Kane	Koko	Taraia Marae	POL TANK 22	Not Stated	We think there should be a stronger requirement than what is written.
120.121	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	POL TANK 22	Amend	Amend Policy 22 to be directive and clear that stock will be excluded from all TANK waterbodies and clearly linked to achieving <u>the water quality objectives and targets in Schedule 26</u>
120.122	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	POL TANK 22	Amend	Amend Change 9 so that Stock exclusion conditions are included in FEP standards and setback distances from waterbodies are <u>defined</u>
123.14	Jenny	Nelson-Smith	Department of Conservation	POL TANK 22	Not Stated	Exclude stock from all wetlands, lakes and riparian margins used for fish spawning (specifically including inanga (Galaxias maculatus)) regardless of slope with minimum setbacks of at least 10 metres. Exclude break feeding from all waterbodies regardless of slope. Include defined setbacks from water for all stock exclusion provisions.
123.57	Jenny	Nelson-Smith	Department of Conservation	POL TANK 22	Oppose	Delete and amend as: " <u>To maintain water quality where objectives are met or to meet targets in Schedule 26 and to provide for the values in Schedule X, stock will be excluded from all waterbodies and their margins by 2023</u> " <u>Or words to similar effect</u>
124.8	Bridget	Margerison	Brownrigg Agriculture Group Ltd	POL TANK 22	Support	Policy 22(c) - Support
124.32	Bridget	Margerison	Brownrigg Agriculture Group Ltd	POL TANK 22	Oppose	Delete all provisions relating to the exclusion of stock from lakes, rivers, streams and wetlands.
127.20	Tania	Eden	Te Taiwhenua o Te Whanganui a Orotu	POL TANK 22	Not Stated	Exclude stock from all wetlands, lakes and rivers and from riparian margins used for fish spawning (specifically including inanga) regardless of slope with minimum setbacks of at least 10 metres. Include defined setbacks from water for all stock exclusion provisions.
127.21	Tania	Eden	Te Taiwhenua o Te Whanganui a Orotu	POL TANK 22	Not Stated	Exclude breakfeeding from all waterbodies regardless of slope.
195.47	Peter	Matich	Federated Farmers of New Zealand	POL TANK 22	Amend	Amend Policy 22 to read: a)assessment of sources, scale and significance of adverse effects of sediment, phosphorus, nitrogen and bacterial inputs to the waterbody that could effectively or efficiently be reduced, <u>where these are reduceable</u> , by stock exclusion, bridging or culverting; ... c) whether stock exclusion is <u>impracticable</u> in the circumstances including in relation to; ... (iv) reliance on stock access to waterways for livestock drinking, where water supply by reticulation or dams is not possible or is <u>impracticable</u> . (v) <u>terrain is difficult to fence due to cliffs, dense vegetation, or hard gravel/rock ground</u> (vi) <u>where the waterway is near a boundary; or the waterway cuts across paddocks; meaning that land then becomes isolated and unusable</u>

210.43	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 22	Amend	Amend to make more directive and include reference to schedule 26 targets and timeframes.
239.3	Mangaone	Catchment Group	Mangaone Catchment Group Incorporated	POL TANK 22	Amend	Change stock exclusion requirements to land less than 10 degrees in slope.
Industry Programmes and Catchment Management						
29.13	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Industry Programmes and Catchment Management	Amend	Change heading to read "Industry Programmes and Catchment Collectives" or similar wording to achieve the outcome sought in this submission.
29.14	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Industry Programmes and Catchment Management	Amend	Change all "Landowner Collective" references in the Plan to "Catchment Collective".
29.15	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Industry Programmes and Catchment Management	Amend	Amend 25 to read "Where a landowner's land is not part of an Industry Programme or Catchment Collective, the Council will require development and implementation of a Farm Environment Plan." or similar wording to achieve the outcome sought in this submission.
83.1	Jim	Galloway		Industry Programmes and Catchment Management	Support	Supports catchment catchment collectives to provide a path for farming without having to obtain a consent
83.3	Jim	Galloway		Industry Programmes and Catchment Management	Not Stated	Amend Change 9 to include time frame for collectives to be formed of 5 years after the plan becomes operational.
93.1	Brent	Paterson		Industry Programmes and Catchment Management	Oppose	A new catchment governance structure supported by HBRC formed by the chairpersons from each catchment group.
120.113	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Industry Programmes and Catchment Management	Amend	Introduce an element of discretion (e.g., through consenting pathways) into the Farm Environment Plan process
120.114	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Industry Programmes and Catchment Management	Amend	Amend Change 9 so that no contaminant loss is acceptable
120.115	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Industry Programmes and Catchment Management	Amend	All groundwater must be considered when considering the effects of land use on waterbodies.
120.116	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Industry Programmes and Catchment Management	Amend	Management of land use activities (and land use change) must be clearly linked to the water quality objectives and targets in Schedule 26
120.117	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Industry Programmes and Catchment Management	Amend	Ambitious but reasonable timeframes for regulating activities must be linked to a clear improvement pathway to maintain and achieve the water quality objectives and targets in Schedule 26 and to resolve the water quality issues in Schedule 28.
123.58	Jenny	Nelson-Smith	Department of Conservation	Industry Programmes and Catchment Management	Oppose	Delete policies 23 and 24
131.2	Dominic	Adams	Ballance Agri-Nutrients Limited	Industry Programmes and Catchment Management	Support	Supports encouraging the establishment of catchment collectives
140.1	Andrew and Tania	Kerr		Industry Programmes and Catchment Management	Amend	Support for Catchment groups, to set up and to operate, and to encourage the, to come together to share ideas and works closely with HBRC
140.2	Andrew and Tania	Kerr		Industry Programmes and Catchment Management	Amend	Support the effective operation of catchment groups to ensure they operate to their full potential
142.20	Bill	Glazebrook	Big Hill Station Limited	Industry Programmes and Catchment Management	Support	Strongly supports Policies 23, 24 and 25
195.1	Peter	Matich	Federated Farmers of New Zealand	Industry Programmes and Catchment Management	Support	Supports Farm Environment Plans, but not if they are part of a permitted activity requirement applicable to all farms over 10ha without good reason.
195.2	Peter	Matich	Federated Farmers of New Zealand	Industry Programmes and Catchment Management	Amend	Amend provisions for Catchment Collectives to align with best practice in community catchment management.
197.11	Lilly	Lawson	Beef + Lamb New Zealand Ltd	Industry Programmes and Catchment Management	Support	Policies 23, 24 and 25 - retain as proposed.
205.2	Ben	Hindmarsh	Ahuriri Farming Ltd	Industry Programmes and Catchment Management	Support	Supports policies 23 and 24. Agrees with acceleration and support that HBRC would give to catchment groups, however the groups must abide by a democratic process to appoint the decision makers. Confusion around initial formation of catchment groups. RRMP funded? Beef + Lamb involvement? Suggest a model or framework be used to give structure on clear goals and objectives. Support needed to education facilitators to help run and organise. Need buy in from all landowners
224.6	Peter	Holley	Mission Estate Winery	Industry Programmes and Catchment Management	Oppose	NZ Wine Growers and HB Wine Growers have already submitted that Farm Environment Plans can be collectively managed through the NZ Wine Growers SWINZ programme.
POL TANK 23						
8.6	Rengasamy	Balasubramaniam	Delegat Limited	POL TANK 23	Support	Support Policy 23
23.58	Kerry	Sixtus	Pattullo's Nurseries Limited	POL TANK 23	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.

220.59	Steve	Gillum	Gillum Springfield Trust	POL TANK 24	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
221.59	WT	Scott		POL TANK 24	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
POL TANK 25						
1.1	Ben	Goodwin		POL TANK 25	Amend	I think that a provision needs to be made for farms on the boundary of two catchments, such that the rules of catchment in which the majority of a farming enterprise is in, should apply to the whole farm and the rules of the minor part don't apply. <u>This would reduce the confusion and cost if rules differ from catchment to catchment.</u>
8.8	Rengasamy	Balasubramaniam	Delegat Limited	POL TANK 25	Support	Support Policy 25
58.22	Peter	Wilson	Hawkes Bay Fish and Game Council	POL TANK 25	Amend	Amend so that the dates and timeframes within this comply with any new NPS-FM changes.
101.4	Greg	Mitchell	Mitchell Dairy Farms Ltd	POL TANK 25	Support	Support this, subject to clear costs of what these catchment groups can charge members.
123.59	Jenny	Nelson-Smith	Department of Conservation	POL TANK 25	Oppose	Delete policy 25– already included in policy 17 relief
135.30	Anna	Wilkes	Ravensdown Limited	POL TANK 25	Support	Retain Policy 25 as notified.
194.41	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 25	Not Stated	Clarification on how/when FEP's can/will be required. Where possible this needs to be consistent with any applicable requirements to prepare a FMP under new Part 9A RMA. Amendments to the policy so that it is not confined to land owners and instead could apply where the leaseholder or operator of a Programme or Collective.
210.46	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 25	Oppose	Delete. Replace with a system that gives effect to NPSFM.
Management and compliance						
POL TANK 26						
29.59	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	POL TANK 26	Amend	Amend reference to farm plan to read "...development of a <u>Farm Environment Plan</u>;"
123.60	Jenny	Nelson-Smith	Department of Conservation	POL TANK 26	Oppose	Oppose. If a catchment collective or industry programme are included as methods for implementing PC9 then this policy will be needed in some form and should require resource consent application and the Council should take enforcement action.

135.31	Anna	Wilkes	Ravensdown Limited	POL TANK 26	Amend	Amend Policy 26 as follows: • <i>b) (i) require the development of a farm environment plan for that property within 6 months or;</i>
142.21	Bill	Glazebrook	Big Hill Station Limited	POL TANK 26	Not Stated	Strongly supports Policy 26. Define enforcement measures in Policy 26
180.34	Charlotte	Drury	Horticulture New Zealand	POL TANK 26	Amend	Amend as follows: Where individuals are members of a Catchment Collective or Industry Programme but do not undertake their activity in accordance with the approved plan prepared in accordance with Schedule 30, or do not follow the agreed terms of membership the Council will; a) provide a conflict resolution service; b) where an If a property/enterprise owner is not a member of a landowner collective or industry programme individual is no longer, or is deemed through conflict resolution processes not to be, a member the Council will;
195.5	Peter	Matich	Federated Farmers of New Zealand	POL TANK 26	Amend	Amend Policy 26 to read: aa) aim to achieve compliance through Catchment Collective or Industry Programme rules in the first instance ... c) take appropriate enforcement action <u>where all the processes above have been exhausted.</u> And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
210.47	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 26	Not Stated	Move to a 'methods' section if required.
Timeframes; Water and Ecosystem Quality						
29.17	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Timeframes; Water and Ecosystem Quality	Amend	Amend the table to adopt a consistent, explicit and comprehensive approach to inclusion of milestone timeframes, preferably <u>by reference to the operative date of the Plan.</u>
231.6	Peter	Kay		Timeframes; Water and Ecosystem Quality	Amend	Seek stock exclusion milestone be amended to be 2 years after the plan becomes operative. Also, the output to be reported on for nutrient management may not be necessary, won't always need a nutrient plan, up to the group to isolate it and remedy the problem. Seek deletion of reporting on management unless environmental outcomes are not being achieved.
POL TANK 27						
29.60	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	POL TANK 27	Amend	The reference to Schedule 29 as the milestone for stock exclusion and sediment mitigation should refer to Schedule 28.
58.19	Peter	Wilson	Hawkes Bay Fish and Game Council	POL TANK 27	Amend	Amend to include reference that these timeframes may change as a result of the NPS-FM changes
123.61	Jenny	Nelson-Smith	Department of Conservation	POL TANK 27	Amend	Delete Policy 27 and reframe into associated other policy relief
126.21	James	Lyver	Maungaharuru-Tangitū Trust	POL TANK 27	Amend	Re-word the header of Policy 27 as a non-regulatory Method to read: <u>The Council will work collectively with industry groups, landowners, water permit holders, tangata whenua, and other stakeholders to prepare and fund an implementation plan for PC9.</u> Amend Policy 27 so that the timeframes in Table 1 are re-worded and merged into proposed Policies 11 [Riparian land management], 14 [wetland and lake management], 20 [sediment control], 21 [land use change and nutrient losses], 22 [stock exclusion] and 27 [timeframes: water and ecosystem quality]
135.32	Anna	Wilkes	Ravensdown Limited	POL TANK 27	Oppose	Delete Policy 27 (including Table 1) in its entirety. <i>The Council will develop an implementation plan for this Plan Change with industry groups, landowners, water permit holders, tangata whenua, and other stakeholders to ensure that the land owners and lease holders are engaged in industry or landowner collective programmes or have prepared farm environmental plans within the timeframes in Schedule 28 and to ensure reporting (as specified in Schedule 30) on the milestones in Table 1 below.</i> Table 1: Milestones and Timeframes
180.35	Charlotte	Drury	Horticulture New Zealand	POL TANK 27	Oppose	Move table to Schedule 30, and then delete remainder of policy in its entirety
194.42	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 27	Amend	Table 1 of 5.10.3.27 should be amended to provide a consistent and comprehensive approach to milestones and timeframes. The timeframe for the implementation plan to be developed should be set out in an approach similar to that of POL TT16 of the RRMP.
195.51	Peter	Matich	Federated Farmers of New Zealand	POL TANK 27	Amend	Amend Policy 27 to be consistent with the NES (Stock Exclusion) 2020, further define wetland, and include dates from when the plan is operative. Specific changes provided.
201.38	Liz	Munroe	Heretaunga Tamatea Settlement Trust	POL TANK 27	Amend	Reference that these timeframes may change as a result of the NPS-FM 2020.
210.48	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 27	Not Stated	Delete and move intention to create implantation plan to a 'methods' section (while retaining key actions for implementation elsewhere in the plan). Integrate timeframes into the relevant policies.
5.10.4 Policies: Stormwater Management						
2.2	Angus	Wall		5.10.4 Policies: Stormwater Management	Support	Support
7.1	Neil	Eagles		5.10.4 Policies: Stormwater Management	Support	The Ahuriri Estuary wetland proposal to polish the Storm Water coming from Napier City & surrounding areas should be progressed as soon as possible. This is the only way to reduce future pollution. The Storm Water Working group has ground to a halt at present. Government support for funding to progress the wetland is available if action taken soon.

10.18	David	Renouf		5.10.4 Policies: Stormwater Management	Amend	Amend RRMP Policy 72A(1) - Add (c) That when a discharge of stormwater and road run off is into freshwater or groundwater there needs to be all the fundamental freshwater parameters with maximum limits in the discharge permit.
10.19	David	Renouf		5.10.4 Policies: Stormwater Management	Amend	Amend RRMP Policy 76A(1) Add (c) That when a discharge of stormwater and road run off is into freshwater or groundwater there needs to be all the fundamental freshwater parameters with maximum limits in the discharge permit.
46.8	Tom	Belford	Peter Beaven & Tom Belford	5.10.4 Policies: Stormwater Management	Support	States accomplishments of PC9: New standards and controls will be in place for managing stormwater.
63.59	Keith	Marshall	Napier City Council	5.10.4 Policies: Stormwater Management	Support	No specific decision requested but states support for the direction towards alignment between the three councils through an integrated catchment management approach and working to align policies, standards and bylaws to achieve water quality objectives.
63.60	Keith	Marshall	Napier City Council	5.10.4 Policies: Stormwater Management	Amend	Amend Change 9 to further refine the refine the risk matrix for industrial and trade premises in consultation with TLA officers to appropriately define low, medium and high risk sites.
120.137	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.4 Policies: Stormwater Management	Amend	Stormwater policies must address, and achieve, the objectives and achieve the targets in Schedule 26 within the life of the Plan.
120.138	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.4 Policies: Stormwater Management	Support	Support in principle the intent of Policies 28 - 32 but require redrafting to improve clarity
123.16	Jenny	Nelson-Smith	Department of Conservation	5.10.4 Policies: Stormwater Management	Not Stated	Regulate and manage all stormwater discharges and require them to meet water quality objectives and targets in Schedule 26 by 2040.
123.17	Jenny	Nelson-Smith	Department of Conservation	5.10.4 Policies: Stormwater Management	Not Stated	Regulate and manage all point source discharges and require them to meet water quality objectives and targets in Schedule 26 by 2040.
138.4	Marei	Apatu		5.10.4 Policies: Stormwater Management	Not Stated	PC9 impose more effective storm water management controls and that discharge consents carry a charge or levy to enable more constant monitoring including cultural monitoring by tangata whenua, as well as council monitoring. That way we can have a far better early warning system in place for the Karamu, to inform affirmative action.
207.69	Mark	Clews	Hastings District Council	5.10.4 Policies: Stormwater Management	Not Stated	It is important therefore that the Plan is clear and unambiguous in how what is expected of consent holders and that rules and conditions are proportionate to the likely effects and environmental benefits anticipated to be achieved.
207.78	Mark	Clews	Hastings District Council	5.10.4 Policies: Stormwater Management	Support	The HDC supports the direction towards alignment between District, City and Regional Councils to achieve integrated management for stormwater management, but seeks confirmation around roles and responsibilities, particularly with respect to defining receiving environments and for managing land uses which may impact indirectly on stormwater services (e.g. via overland flow).
207.79	Mark	Clews	Hastings District Council	5.10.4 Policies: Stormwater Management	Not Stated	Further refinement of the risk matrix for industrial and trade premises is also sought to appropriately define low, medium and high risk sites. In addition, confirmation of the rule status for medium risk sites is required.
229.10	Angie	Denby	Ahuriri Estuary Protection Society INC	5.10.4 Policies: Stormwater Management	Amend	Who is accountable for achieving outcomes in the Ahuriri catchment needs to be addressed and standards ought to be enforceable. We believe that standards should go so far as to prescribe that any discharge into the estuary shouldn't be required to just avoid adverse effects, but should instead be required to have a positive effect.
233.14	Dr Nicholas	Jones	Hawke's Bay District Health Board (HBDHB)	5.10.4 Policies: Stormwater Management	Amend	Manage the impact of solid contaminant and debris discharge in stormwater
Urban Infrastructure						
132.196	Marei	Apatu	Te Taiwhenua o Heretaunga	Urban Infrastructure	Amend	Add Table 3AA: New minimum flow sites or merge with Table 3A. Table provided.
203.13	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	Urban Infrastructure	Amend	Amend clauses g, j and k as follows: <i>g. adopting, where practicable, a good practice approach to stormwater management including adoption of Low Impact Design for stormwater systems and suitable mitigation where hazardous substances are stored and used;</i> • <i>encouraging, through education and public awareness programmes, greater uptake and installation of measures that reduce risk of stormwater contamination, including source control;</i> • <i>requiring, no later than 1 January 2025, the preparation and implementation of a site management plan and good site management practices on industrial and or trade premises with a high risk of stormwater contamination and those in the high priority areas:...</i> Clarify that MfE Guideline compliant petroleum industry sites are not high risk, for instance in the Auckland Unitary Plan.
210.49	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Urban Infrastructure	Support	Amend to refer to schedule 26 targets.

10.4	David	Renouf		POL TANK 28	Amend	Amend Policy 28 At 28(b) after available Add "and it is within 200 metres of that property Boundary" Delete the words "Urban Infrastructure" because many catchment are in rural catchments At 28(k) Delete high and after contamination delete. After contamination add in 'in the TANK catchments' Add 28(L) "Developing measures to monitor and introduce target figures with a time frame for captured stormwater pipe direct discharges into drains, streams and rivers where there is no reticulated stormwater network within 200 metres'. Add 28(m) "That local authorities must seek to identify all reasonable practicable options when making a decision on discharging stormwater and road runoff" See s77 & 79 LGA 2002
63.35	Keith	Marshall	Napier City Council	POL TANK 28	Amend	Amend Policy 28 to read: a) Local Authorities adopting an integrated catchment management approach to the management, collection, <u>treatment and discharge</u> of stormwater. b) requiring increased retention or detention of stormwater, <u>where necessary to prevent, while not exacerbating the exacerbation</u> of flood hazards. d) taking account sites specific constraints including areas of high groundwater, source protection zones <u>or extents</u> and or an outstanding water body. ... g) amending district plans , standards, codes of practice and bylaws to specify design standards for stormwater reticulation and discharge through consent conditions that will achieve freshwater objectives set out in this plan.
123.62	Jenny	Nelson-Smith	Department of Conservation	POL TANK 28	Amend	28g - "where practicable" should be deleted and "good practice" used at all times. If it is retained in some form, critical habitats (e.g., inanga spawning, wetlands) should also be taken into account at (d). Source control of contaminants in stormwater is the most efficient means by which contaminants to water can be reduced and is supported in principle.
126.22	James	Lyver	Maungaharuru-Tangitū Trust	POL TANK 28	Amend	Amend Policy 28 to read: The adverse effects of stormwater quality and quantity on aquatic ecosystems and community well-being arising from existing and new urban development (including infill development) industrial and trade premises and associated infrastructure, will be reduced or mitigated no later than 1 January 2025, by: a) Local Authorities adopting an integrated catchment management approach to the collection and discharge of stormwater; b) requiring stormwater to be discharged into a reticulated stormwater network where such a network is available or will be made available as part of the development; c) requiring increased retention or detention of stormwater, while not exacerbating flood hazards; d) <u>having particular regard to significant values of the receiving environment being either a TANK estuarine system, outstanding waterbody or wetland;</u> e) d) taking into account site specific constraints including areas with high groundwater, source protection zones, and/or an outstanding water body...
135.33	Anna	Wilkes	Ravensdown Limited	POL TANK 28	Amend	Amend Policy 28 as follows: The adverse effects of stormwater quality and quantity on aquatic ecosystems and community well-being arising from existing and new urban development (including infill development), industrial and trade premises and associated infrastructure, will be reduced or mitigated no later than 1 January 2025 , by: a) Local Authorities, <u>in conjunction with HBRC</u> , adopting a <u>consistent and</u> integrated catchment management approach to the collection and discharge of stormwater; ... c) requiring, <u>where feasible</u> , increased retention or detention of stormwater, while not exacerbating <u>ensuring that flood hazards are not exacerbated;</u> ... h) amending district plans, standards, codes of practice and bylaws to specify design standards for stormwater reticulation and discharge facilities through consent conditions , that will achieve the freshwater <u>quality</u> objectives set out in this plan; ... k) requiring, no later than 1 January 2025 <u>through resource consents</u> , ...
195.52	Peter	Matich	Federated Farmers of New Zealand	POL TANK 28	Support	That Policy 28 be retained as notified

207.53	Mark	Clews	Hastings District Council	POL TANK 28	Amend	Amend Policy 28 to read: a) Local Authorities adopting an integrated catchment management approach to the management, collection, <u>treatment and discharge</u> of stormwater. b) requiring increased retention or detention of stormwater, <u>where necessary to prevent, while not exacerbating the exacerbation</u> of flood hazards. d) taking account sites specific constraints including areas of high groundwater, source protection zones <u>or extents</u> and or an outstanding water body. ... g) amending district plans , standards, codes of practice and bylaws to specify design standards for stormwater reticulation and discharge through consent conditions that will achieve freshwater objectives set out in this plan.
233.16	Dr Nicholas	Jones	Hawke's Bay District Health Board (HBDHB)	POL TANK 28	Amend	Amend Policy 28 (L) : L) Requiring the management of solid contaminants and debris entering into the Stormwater network, and implementing measures to remove it once instream.
233.17	Dr Nicholas	Jones	Hawke's Bay District Health Board (HBDHB)	POL TANK 28	Amend	Amend Policy 29(c) to: controlling, and if necessary avoiding, activities that will result in water quality standards not being able to be met, <u>or that lead to solid contaminants and debris entering the stormwater network.</u>
Source Control						
203.14	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	Source Control	Amend	Recognise the important role of reducing contaminants through source control. This could be achieved by a new clause as follows: d) <u>Council working with the agencies which have roles and responsibility for the management of stormwater and through multi-agency collaboration to lobby central government seeking national measures and industry standards to reduce the discharge of contaminants in stormwater, including zinc and copper from metal roofs, car tyres and brake linings.</u>
POL TANK 29						
123.63	Jenny	Nelson-Smith	Department of Conservation	POL TANK 29	Amend	Source control of contaminants in stormwater is the most efficient means by which contaminants to water can be reduced and is supported in principle. Source control also considers the material used in new buildings to avoid production of metals and toxins which can contaminate water (e.g., no unpainted or sealed zinc alum roofing or copper downpipes). These specifications should be included as source controls. Temperature of stormwater is also an issue from hard stand areas in summer which <u>should be controlled at source.</u>
135.34	Anna	Wilkes	Ravensdown Limited	POL TANK 29	Oppose	Delete Policy 29 in its entirety.
195.53	Peter	Matich	Federated Farmers of New Zealand	POL TANK 29	Amend	That Policy 29 be amended as follows: 29. Sources of stormwater contamination and contaminated stormwater <u>discharged into publicly managed stormwater networks in urban and rural residential areas will be reduced, where these are reduceable, by: ...</u> And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
210.50	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 29	Support	Amend to provide more clarity.
Dealing with the Legacy						
203.15	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	Dealing with the Legacy	Amend	Amend Policy 30 as follows: 30. <u>Aquatic ecosystem health improvements and community wellbeing and reduced stormwater contamination will be achieved by HBRC working with the Napier City and Hastings District Councils requiring discharges from stormwater networks to meet (after reasonable mixing) : ...</u>
POL TANK 30						
10.5	David	Renouf		POL TANK 30	Amend	Amend Policy 30 Delete (a)(i) and (a)(ii) At 30(a) Add Proposed Plan Change 9 Schedules 26 and 27 Freshwater Quality Objectives as Freshwater Standards. •When the discharge of stormwater is directly into surface water, apply 'After reasonable mixing of distance of 200 metres down stream of the point of discharge' and at that point shall not cause a breach of Proposed Plan Change 9 Schedules 26 and 27 Freshwater Standards. •When the discharge of stormwater is onto land or where it may enter water that the Proposed Plan Change 9 Schedules 26 and 27, Freshwater Standards shall comply at point of discharge by 31 st December 2025 •All discharges of stormwater shall achieve at least Proposed Plan Change 9 Schedules 26 and 27 Freshwater Standards by 31 st December 2025 and the HB Regional Resource Management Plan 5.4 Surface Water Quality Tables 7 and 8 when PC) becomes operative.
58.20	Peter	Wilson	Hawkes Bay Fish and Game Council	POL TANK 30	Amend	Amend the policy to define the discharge zone as the zone of reasonable mixing or equivalent spatial area.
58.21	Peter	Wilson	Hawkes Bay Fish and Game Council	POL TANK 30	Amend	Remove the reference to the Stream Ecological Valuation methodology

63.36	Keith	Marshall	Napier City Council	POL TANK 30	Amend	Amend Policy 30(a) to read: “(i) the 80th percentile level of species protection in receiving waters <u>after reasonable mixing</u> by January 2025. (ii) the 95th percentile level of species in receiving waters after reasonable mixing protection by December 2040.”
123.64	Jenny	Nelson-Smith	Department of Conservation	POL TANK 30	Support	The policy needs to refer to maintaining objectives and achieving targets in Schedule 26. Timeframes for improvement of species protection levels by 2025 and 2040 are supported. Why does clause b) makes exception to clause a) – this is confusingly drafted. Both clauses should apply. References to the Stream Ecological Valuation should also refer to avoiding the loss of net stream length and ecosystem health as it is used to inform how much and of what quality any changes to the stream network will result in. This requires clarification
126.23	James	Lyver	Maungaharuru-Tangitū Trust	POL TANK 30	Amend	Amend Policy 30 to read: Aquatic ecosystem health improvements and community wellbeing and reduced stormwater contamination will be achieved by HBRC working with the Napier City and Hastings District Councils requiring Require discharges from stormwater networks to meet: a) water quality objectives (where they are degraded by stormwater) and the identification of measures that ensure stormwater discharges will achieve at least: i) the 80th percentile level of species protection in receiving waters by 1 January 2025; and ii) the 95th percentile level ³ of species protection by 31 December 2040. and b) except as in (a) above, the management freshwater objectives in Schedule 26 for freshwater and estuary health through resource consent conditions, including requirements...
132.192	Marei	Apatu	Te Taiwhenua o Heretaunga	POL TANK 30	Amend	Restrict use of 90th and 95th percentile measurements for water quality parameters, within and through the implementation of PC9, as some exceedances and therefore their adverse effects can only be noted after they have occurred i.e., after 12 months has expired, when they can no longer be avoided or remedied.
135.35	Anna	Wilkes	Ravensdown Limited	POL TANK 30	Amend	Amend Policy 30 as follows: Aquatic ecosystem health improvements and community wellbeing and reduced stormwater contamination will be achieved by HBRC working with the Napier City and Hastings District Councils requiring discharges from stormwater networks to meet: a) water quality objectives (where they are degraded by stormwater) and the identification of measures that ensure stormwater discharges will achieve at least: (i) the 80th percentile level of species protection in receiving waters by 1 January 2025; and (ii) the 95th percentile level³ of species protection by 31 December 2040. and b) except as in (a) above, the management freshwater quality objectives in Schedule 26 for freshwater and estuary health through resource consent conditions, including requirements;
195.54	Peter	Matich	Federated Farmers of New Zealand	POL TANK 30	Support	That Policy 30 be retained as notified
207.54	Mark	Clews	Hastings District Council	POL TANK 30	Amend	Amend Policy 30(a) to read: “(i) the 80th percentile level of species protection in receiving waters <u>after reasonable mixing</u> by January 2025. (ii) the 95th percentile level of species in receiving waters after reasonable mixing protection by December 2040.”
210.51	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 30	Support	Amend to make it clear that schedule 26 targets apply in all cases (i.e. clause b should not provide exception to clause a), that meeting targets is a requirement, and to refer to avoiding the loss of net stream length and ecosystem health.
233.18	Dr Nicholas	Jones	Hawke's Bay District Health Board (HBDHB)	POL TANK 30	Amend	Add wording to Policy 30 (b): <u>b)(vi) to implement measures that manage solid contaminants and physical debris entering into the stormwater network, and apply measures to remove solid contaminants and physical debris once entered into the stormwater network.</u>
Consistency and Collaboration; Integration of city, district and regional council rules and processes.						
203.16	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	Consistency and Collaboration; Integration of city, district and regional council rules and processes.	Support	Retain as notified.
POL TANK 31						
63.37	Keith	Marshall	Napier City Council	POL TANK 31	Amend	Amend Policy 31 to read: “b) consistent plan rules and bylaws” c) shared information and processes for monitoring and auditing individual site management on sites at high risk of stormwater contamination, <u>including clarification of roles and responsibilities for managing stormwater.</u> ” ... e) an integrated stormwater catchment management approach, <u>which determines roles and responsibilities for managing stormwater.</u> ”

123.65	Jenny	Nelson-Smith	Department of Conservation	POL TANK 31	Amend	Amend Policy 31 as: "To ensure stormwater management supports maintaining the objectives and achieving the targets in Schedule 26 by 2040, HBRC, NCC and HDC will, by no later than 1 January 2025, implement an integrated stormwater management approach/plan through: (a-h)..." Or words to similar effect
126.33	James	Lyver	Maungaharuru-Tangitū Trust	POL TANK 31	Amend	Amend Schedule 31 to insert minimum flows and allocation limits for TANK waterbodies within the Ahuriri catchment that are established using the procedure set out in amended Policy 43: Relief for Policy 43 refers - •Insert a timeframe and specify a procedure for establishing flow management regimes [including allocation limits] in the Ahuriri catch that enables HBRC to: o make necessary adjustments to minimum flows and allocation limits [over and above actual and reasonable use testing], including the use of best available science information, to ensure the flow management regime for the Ahuriri catchment is sustainable; o adjust rates of abstraction, times of abstraction and maximum volumes for abstraction for resource consents/permits for the Ahuriri catchment [on common expiry] to manage abstraction from the Ahuriri catchment within limits.
195.55	Peter	Matich	Federated Farmers of New Zealand	POL TANK 31	Support	That Policy 31 be retained as notified
207.55	Mark	Clews	Hastings District Council	POL TANK 31	Amend	Amend Policy 31 to read: "b) consistent plan rules and bylaws " c) shared information and processes for monitoring and auditing individual site management on sites at high risk of stormwater contamination, <u>including clarification of roles and responsibilities for managing stormwater.</u> " ... e) an integrated stormwater catchment management approach, <u>which determines roles and responsibilities for managing stormwater</u> "
210.52	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 31	Amend	Consider moving to a 'methods' section. Reword to: "To assist in achieving the freshwater quality objectives in Schedule 26 of this Plan by 2040, HBRC, with the Napier City and Hastings District Councils will, no later than 1 January 2025... g) undertaking completing a programme of mapping the <u>stormwater networks and recording their capacity</u> "
Ahuriri Catchment						
120.139	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Ahuriri Catchment	Amend	Amend to require an integrated catchment management for the Ahuriri (and the Waitangi) Estuary, which specifies a near future date
195.56	Peter	Matich	Federated Farmers of New Zealand	Ahuriri Catchment	Support	That Policy 32 be retained as notified
POL TANK 32						
123.66	Jenny	Nelson-Smith	Department of Conservation	POL TANK 32	Amend	Amend Policy 32 as: "HBRC will support the development of an Ahuriri Integrated Catchment Management Plan to be implemented by 1 January 2025 by..." Or words to similar effect
126.24	James	Lyver	Maungaharuru-Tangitū Trust	POL TANK 32	Amend	Amend Policy 32 to read: The Council will support the development of an Ahuriri Estuary Integrated Catchment Management Plan by; a) improving the quality of freshwater entering the Ahuriri Estuary Te Whanganui-a-Orotu (Ahuriri estuary) through the measures included in this plan; and b) carrying out investigations to help better understand processes and functions occurring within the estuary and its connected freshwater bodies including estuary hydrology functioning and environmental stressors
135.36	Anna	Wilkes	Ravensdown Limited	POL TANK 32	Support	Retain Policy 32 as notified.
180.32	Charlotte	Drury	Horticulture New Zealand	POL TANK 32	Amend	Amend as follows: 'The Council will support the establishment and operation of Industry Programmes and Catchment landowner Collectives and: a) ensure any relevant information or expertise for making sustainable land management decisions is available to land managers; b) support development and use of catchment scale models that assist in identification and management of critical source areas; c) support catchment collective and farm scale decision making to meet freshwater objectives and encourage local solutions and innovative and flexible responses to water quality issues;...
180.36	Charlotte	Drury	Horticulture New Zealand	POL TANK 32	Amend	Amend as follows: 'The Council will support the development of an Ahuriri Estuary Integrated Catchment Management Plan by <u>a representative group of stakeholders, that includes (but is not limited to) representatives from the primary sector;</u>

210.53	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 32	Oppose	Rework to remove circular nature. Consider moving to a 'methods' section. Amend to include a timeframe.
5.10.5 Policies: Monitoring and Review						
16.14	Bernadette	Hamlin		5.10.5 Policies: Monitoring and Review	Oppose	Amend Change 9 so that there are yearly reviews of adherence to plans.
67.6	Helen	Liddle	Focus Maraekakaho	5.10.5 Policies: Monitoring and Review	Amend	Amend Change 9 to allow for monthly water quality testing of the Maraekakaho Stream and the Ngaruroro River downstream of any commercial or industrial activity on the riparian strip
83.4	Jim	Galloway		5.10.5 Policies: Monitoring and Review	Not Stated	That HBRC provide resources for increased monitoring of water quality in greater detail at more sites and in real time
97.77	Lesley	Wilson	DN & LR Wilson Ltd	5.10.5 Policies: Monitoring and Review	Amend	How monitoring is going to occur needs to be clarified
111.12	Lisa	Tuhi	Ngati Hinemanu, Ngai Te Upokoiri	5.10.5 Policies: Monitoring and Review	Not Stated	Maintain healthy excellent monitoring on land usage to allow clean flourishing waterways
120.40	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.5 Policies: Monitoring and Review	Amend	Resource and support the development and implementation of a matauranga Maori framework to monitor the mauri of the Heretaunga Aquifer and its groundwater dependent ecosystems.
120.94	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.5 Policies: Monitoring and Review	Amend	There should be a clear separation between monitoring and review of the plan between knowledge systems (i.e., matauranga Maori and Western science).
120.95	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.5 Policies: Monitoring and Review	Amend	Monitoring policies in PC9 should specifically support and resource the development and implementation of matauranga Maori frameworks and tools (led by tangata whenua/hapO) to monitor the success of the Plan in improving Maori relationships with the environment and protection of mauri.
120.97	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.5 Policies: Monitoring and Review	Amend	Amend to include matauranga Maori monitoring of the mauri of the Heretaunga Aquifer, including all of its groundwater dependent ecosystems.
120.98	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.5 Policies: Monitoring and Review	Amend	Any implementation should be subject to clear policies and regulation which do not abdicate council statutory duties or functions to a third party and ideally are co-managed or co-governed in partnership with Ngati Kahungunu (e.g., under Mana Whakahono a Rohe or other mechanisms).
120.99	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.5 Policies: Monitoring and Review	Amend	Amend all monitoring and review provisions to ensure that cumulative effects are adequately monitored and reported on and that appropriate feedback loops are in place to ensure that cumulative effects are taken into account in decision making and plan review
120.100	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.5 Policies: Monitoring and Review	Amend	Data from monitoring as it becomes available is used to inform Council to refine targets and limits and subsequently how management might be adapted.
132.182	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10.5 Policies: Monitoring and Review	Amend	Add a diagram to a section of PC9 that expresses the different states of Mauri within freshwater bodies.
194.43	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	5.10.5 Policies: Monitoring and Review	Support	Retain as drafted
206.7	Waiariki	Davis	Waipatu Marae	5.10.5 Policies: Monitoring and Review	Oppose	Cultural monitoring
209.6	Waiariki	Davis		5.10.5 Policies: Monitoring and Review	Not Stated	Cultural monitoring.
234.1	Stephen	Randell	Hope Monitoring Omahu	5.10.5 Policies: Monitoring and Review	Amend	Maori whenua and wai Mauri Monitoring
239.6	Mangaone	Catchment Group	Mangaone Catchment Group Incorporated	5.10.5 Policies: Monitoring and Review	Amend	HBRC to work with CC's to develop monitoring programs that are related to catchment issues and structure.
Monitoring and Review						
29.18	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Monitoring and Review	Amend	Amend Policy 34 to require Council to establish and maintain a community catchment governance body to oversee subcatchment activities within the TANK catchments. We suggest that this should comprise representatives from the Regional Planning Committee, together with representatives from each of the subcatchments and should meet at least bi-annually.
132.107	Marei	Apatu	Te Taiwhenua o Heretaunga	Monitoring and Review	Amend	Resource and enable the development of Mauri monitoring, assessment and reporting through PC9 implementation. Include a substantive definition for Mauri that applies within the Ngaruroro and Karamo catchments and include the provided table or similar to assist with cultural monitoring.
POL TANK 33						
106.9	Kane	Koko	Taraia Marae	POL TANK 33	Support	Our streams water has been taken to fund individual businesses who have not left enough water for the stream, the life it supports and our community. Relief Sought: We think there should be a stronger requirement than 'recognise and support' – Maori need to be funded to monitor according to our tikanga.
123.67	Jenny	Nelson-Smith	Department of Conservation	POL TANK 33	Amend	Reword and include as two separate nonregulatory methods specific to mana whenua and then the local community Amend PC9 to include policy on how mana whenua will be involved in freshwater management and decision making, not only with respect to monitoring and matauranga Maori.
135.37	Anna	Wilkes	Ravensdown Limited	POL TANK 33	Amend	Amend Policy 33 as follows: c) assessing effectiveness of mitigation measures adopted to meet freshwater quality objectives;
195.57	Peter	Matich	Federated Farmers of New Zealand	POL TANK 33	Support	That Policy 33 be retained as notified
210.54	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 33	Amend	Move community monitoring to a 'methods' section.
POL TANK 34						
14.5	Ryan	Fraser		POL TANK 34	Amend	Amend Policy 34 - Amend to require Council to establish and maintain a community catchment governance body to oversee subcatchment activities within the TANK catchments.
15.7	Andrea and Phil	Cranswick	Meridiam Trust	POL TANK 34	Amend	Amend Policy 34 - Amend to require Council to establish and maintain a community catchment governance body to oversee subcatchment activities within the TANK catchments.

20.7	Bruce	Nimon		POL TANK 34	Amend	Amend Policy 34 - Amend to require Council to establish and maintain a community catchment governance body to oversee subcatchment activities within the TANK catchments.
123.68	Jenny	Nelson-Smith	Department of Conservation	POL TANK 34	Oppose	Amend as a non-regulatory method and delete clause (b)
126.25	James	Lyver	Maungaharuru-Tangitū Trust	POL TANK 34	Oppose	Delete Policy 34
141.7	Danny	Angland	Kereru Station	POL TANK 34	Support	We agree but needs to happen and be collaborative.
180.37	Charlotte	Drury	Horticulture New Zealand	POL TANK 34	Amend	Amend as follows: Council will meet regularly with representatives from a TANK stakeholder groups that includes representatives from all relevant sectors of the community, and will discuss (as appropriate) matters relating to: a) review and report on TANK implementation of the TANK plan; b) issues arising within the TANK Catchments that could be addressed by future plan changes; c) progress towards freshwater objectives/targets; d) possible options for consideration at time of plan review, and develop measures to enable their resolution.
195.58	Peter	Matich	Federated Farmers of New Zealand	POL TANK 34	Amend	Amend Policy 34 to read: Council will meet regularly with representatives from TANK stakeholder groups establish a representative Community Catchment Governance body to:.. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
210.55	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 34	Oppose	Move to a 'methods' section.
231.7	Peter	Kay		POL TANK 34	Support	Agree, but it is not happening. The process must remain collaborative.
238.15	Emma	Taylor	Gimblett Gravels Winegrowers Association	POL TANK 34	Amend	Amend Policy 34 to require Council to establish and maintain a community catchment governance body to oversee subcatchment activities within the TANK catchments. We suggest that this should comprise representatives from the Regional Planning Committee, together with representatives from each of the subcatchments and should meet at least bi- annually.

POL TANK 35

123.69	Jenny	Nelson-Smith	Department of Conservation	POL TANK 35	Oppose	Amend as a non-regulatory method using concise language.
126.26	James	Lyver	Maungaharuru-Tangitū Trust	POL TANK 35	Amend	Amend Policy 35 to read: The Council will monitor and report on the effectiveness of the TANK water quality management policies and rules and to assist in making decisions about reviewing or changing this management framework, the Council will: a) continue to monitor instream water quality and review and report on the progress towards and to achieving ement of the freshwater quality objectives in Schedule 26 and shortterm numerical attribute targets in new Schedule 26AA according to Objectives 2 and 3 of this Plan in its as part of regular State of the Environment monitoring; b) monitor and report...
135.38	Anna	Wilkes	Ravensdown Limited	POL TANK 35	Amend	Amend Policy 35 as follows: The Council will monitor and report on the effectiveness of the TANK water quality management policies and rules, and to assist in making decisions about reviewing or changing this management framework, the Council will: a) continue to monitor instream water quality and review and report on the progress towards and achievement of the fresh water quality objectives in Schedule 26 and according to Objectives 2 and 3 of this Plan in its regular State of the Environment monitoring; ... c) monitor the progress towards the milestones listed in Policy 27, according to timeframes specified in Schedule 28, and collate and report annually on information about; (i) the nature and extent of the mitigation measures being adopted to meet water quality and/or quantity outcomes through Catchment Collectives, Industry Programmes and Farm <u>Environment</u> Plans; ... And
195.59	Peter	Matich	Federated Farmers of New Zealand	POL TANK 35	Amend	Amend Policy 35 to read: c) monitor the progress towards the milestones listed in Policy 27, according to timeframes <u>priorities</u> specified in Schedule 28 and collate and report annually on information about; ... And f) commence a review of these provisions within ten years of in accordance with section 79 of the RMA. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
210.56	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 35	Oppose	Move to a 'methods' section and reword for clarity.
233.12	Dr Nicholas	Jones	Hawke's Bay District Health Board (HBDHB)	POL TANK 35	Amend	Link monitoring of attributes requiring improvements to achieve the attribute states in schedule 26 to milestones and timeframes for review (Policy 27 and schedule 28) Change bullet point f) to read. "Commence a review of these provisions if monitoring of attributes requiring improvement to achieve schedule 26 attribute states fails to show progress within 5 year of "operative date".

5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits

11.6	Matt	Edwards		5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Oppose	No further allocations from the Heretaunga Plains aquifer. It seems Council has in general denied resource consent applications for water since 2017. For applications pertaining to production of saleable export commodities, how is this an acceptable situation?
13.9	Alec	Duncan	Fire and Emergency New Zealand	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Support	Support 5.10.6 Policies - retain as proposed.
23.74	Kerry	Sixtus	Pattullo's Nurseries Limited	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Not Stated	No specific decision sought but states that the ability to access the reliable supply of water in sufficient quantities to irrigate crops is absolutely critical to the pip and stone fruit industries in Hawke's Bay.
32.74	Kent	Griffiths		5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Not Stated	No specific decision sought but states that it is essential as an apple grower over the few months of high heat to irrigate my crops a little often.
37.74	Greg	Evans	Dartmoor Estate Ltd	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Not Stated	No particular decision requested but states that having certainty around water supply is essential for the ongoing growth of the horticulture industry
38.74	Roger	Brownlie		5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Not Stated	Amend allocation of water to be on the crop grown rather than past water use.
42.14	Glenn	Riddell	Glenmore Orchard	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Not Stated	No specific decision requested but suggests a consistent and reliable water supply is essential for horticulture irrigation.
46.2	Tom	Belford	Peter Beaven & Tom Belford	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Not Stated	States the accomplishments of PC9: Puts a "sinking lid" in place whereby new consents for Heretaunga aquifer water are barred, to avoid exacerbating existing stress on the aquifer, while all existing consents will be reviewed and adjusted downward to reflect "actual and reasonable use".
48.2	Paul	Ham	Alpha Domus	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Oppose	Allow new water use if it is used to enhance the current business or maintain / improve a level of business supporting the local community. Do not reduce current levels of water usage.
48.21	Paul	Ham	Alpha Domus	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Oppose	Allow business with existing land use enough water to be able to continue farming in the way that it has been operating in the past 10 years.
63.53	Keith	Marshall	Napier City Council	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Amend	Amend Change 9 so that the current wording of an 'interim' aquifer limit of 90 million m3 is treated as a target, with a view to developing a formal limit in accordance with policy 42
63.57	Keith	Marshall	Napier City Council	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Not Stated	Requests more information about how the Stream Mitigation Scheme will be implemented, and effects for costs and meeting legislative requirements.
63.58	Keith	Marshall	Napier City Council	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Amend	Amend Change 9 so that municipal takes be excluded from this provision and instead, that a water conservation strategy approach be required, until certainty and clarity are provided regarding implementation and costs.
123.71	Jenny	Nelson-Smith	Department of Conservation	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Oppose	Policy 36, 37, 38, 39 and 42 - considers the actual and reasonable use of groundwater and the maximum sustainable abstraction from a groundwater system are two separate things (see point 123.72 and 123.73).
132.37	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Amend	Retention of Policy 77, insofar as clauses a) and d) from Policy 77 are included in groundwater a/location policies in PC9.
132.55	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Amend	Restrict all irrigation takes from groundwater within TANK catchments to a specific irrigation season of 01 November to 30 April in any year (not including irrigation from offline water storage dams)
132.56	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Amend	Take into account total permitted, controlled and restricted discretionary volumes above 60 m3 per week in a/location limits/quantum
132.93	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Amend	Acknowledge in PC9 the engineering works that have occurred at the confluence of the Maraekakaho River with the Ngaruroro River, the gravel raking and changes to braided reaches of the Ngaruroro through modifications to the riverbed, and their subsequent effects on HPAS recharge rates/quantities, in the setting of allocation limits for the HPAS.
132.98	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Amend	Superimpose HPAS spatial extension under the coastal marine area as shown in Figures 3-26 and 3-27 from the Heretaunga Aquifer Groundwater Model Scenarios Report (page 52). Use different shading to reflect where the aquifer is regulated under the RCEP.
132.132	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Amend	Delete any reference to or prevent the word "productive" from applying to aquifers and groundwater systems within TANK catchments.
132.152	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Amend	Delete flow augmentation/enhancement scheme provisions from proposed PC9 except for existing activities for Twyford/Ruapare, and for existing and proposed mitigations, for enhancing flows in the Paritua Stream. Make any additional schemes noncomplying activities.
132.153	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Amend	Enable 200 lps abstraction from the Ngaruroro River on a permanent basis for mitigating stream depletion in the Paritua Stream, and to assist groundwater recharge around the southern edge of the HPAS.
132.170	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Amend	Prescribe a cumulative rate of take limit for abstraction from the HPAS during the irrigation season, and a substantially reduced rate of take for the rest of the year.
145.8	Peter	Raikes	Awanui Station	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Not Stated	Science does not conclusively prove that the aquifer is at limits or over allocated. Gives examples to show the aquifer is not depleted.
145.10	Peter	Raikes	Awanui Station	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Not Stated	Very adequate process is available to HBRC to ensure that groundwater abstraction is not over done, and this can still be utilised for new bores that may need to be installed to provide for needs now and in the future.
179.2	Wim	Barendsen	Otawahao Farms Ltd	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Oppose	Seeks a more scientific approach to determine the amount of water that can sustainably be extracted from the aquifer. A reconsideration of the IRRICALC calculations and an allocation for planting and/or replanting.
193.17	Bruce	Mackay	Heinz Wattie's Limited	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Not Stated	Policies around water allocation and consent renewal need to be reconsidered so that they are more equitable to those water users in primary industry

193.22	Bruce	Mackay	Heinz Wattie's Limited	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Not Stated	The allocation process for “new water” i.e. water that is high flow harvested and stored is assumed to be on a “first in first served” basis. Heinz Wattie’s understands that of the 8000l/sec allocated in this draft plan change, 2400l/sec is existing allocation, 1600l/sec is reserved for Iwi allocation, and that consent applications for over 2100l/sec are before council. If this is true only 1900l/sec is available for allocation which is inequitable. If 4000l/sec was harvested for the periods that the Ngaruroro was flowing between mean and 3 times mean, and sufficient storage facilities exist, then enough water could be stored to fully irrigate the entire 22,000 irrigable hectares, so high flow allocation must allow for this.
197.8	Lilly	Lawson	Beef + Lamb New Zealand Ltd	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Oppose	Include new/ or amend existing Policies for Water quantity and allocation - <u>Water quantity is managed to ensure that the take and use of water is reasonable and justifiable for the intended use. The specific measures to ensure reasonable and justified use of water that must be taken into account when establishing catchment plans and considering consent applications are outlined in the submission.</u>
204.22	Juliet	Gray	Peter Lyons Trust (Lyons Vineyard)	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Support	Zone 1 properties to be able to move their bore outside zone 1 if such a location for a new bore exists on their property.
206.4	Waiariki	Davis	Waipatu Marae	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Oppose	Restore groundwater levels
206.5	Waiariki	Davis	Waipatu Marae	5.10.6 Policies: Heretaunga Plains Groundwater Levels and Allocation Limits	Oppose	Restore artesian pressure
Heretaunga Plains Aquifer Management						
29.19	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Heretaunga Plains Aquifer Management	Amend	Amend Policy 36.f to read “avoiding further adverse effects by controlling net groundwater use within the interim allocation limit set out in Policy 37 ” or similar wording to achieve the outcome sought in this submission. Amend Policy 36.g to read “ reducing existing levels of encouraging water use efficiency. ” or similar wording to achieve the outcome sought in this submission.
29.2	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Heretaunga Plains Aquifer Management	Amend	Amend Policy 37.a to read “adopt an interim allocation limit of 90 million cubic meters per year based on the actual-and-reasonable modelled peak water use prior to 2017;” or similar wording to achieve the outcome sought in this submission.
29.21	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Heretaunga Plains Aquifer Management	Amend	Amend Policy 37.b to read “avoid re-allocation of any water that might become available within the interim groundwater allocation limit (not including water made available by high flow take and release and by offset or managed aquifer recharge) or within the limit of any connected water body until there has been a review of the relevant allocation limits within this plan;” or similar wording to achieve the outcome sought in this submission.
29.22	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Heretaunga Plains Aquifer Management	Amend	Amend Policy 37.c to read “manage the Heretaunga Plains Water Management Unit as an over-allocated management unit and prevent any new allocations of groundwater (not including water made available by high flow take and release and by offset or managed aquifer recharge) ” or similar wording to achieve the outcome sought in this submission.
29.23	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Heretaunga Plains Aquifer Management	Amend	Amend Policy 37.d(ii) to read “(ii) apply an assessment of actual and reasonable use that reflects land use and water use authorised in the ten years up to August 2017-30 June 2020 (the end of the 2020 water year) ...”. or similar wording to achieve the outcome sought in this submission. Amend the Glossary definition of “Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: - the amount calculated by a Hawke’s Bay-specific IRRICALC model at 95% security of supply; - the volume of the expiring consent being replaced.”, or similar wording to achieve the outcome sought in this submission.
29.24	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Heretaunga Plains Aquifer Management	Not Stated	Amend Policy 38 to read “restrict the re-allocation of water (not including water made available by high flow take and release and by offset or managed aquifer recharge) to holders of permits to take and use water in the Heretaunga Water Management Unit issued before 2 May 2020” or similar wording to achieve the outcome sought in this submission.
58.23	Peter	Wilson	Hawkes Bay Fish and Game Council	Heretaunga Plains Aquifer Management	Amend	Amend Policies 36 and 37 to cap groundwater use at 70M cubic metres until the hydrological investigations and aquifer modelling have been undertaken.
63.5	Keith	Marshall	Napier City Council	Heretaunga Plains Aquifer Management	Amend	Introduce an additional Policy (referred to as Policy 37A) to guide situations where the granting of new takes will be considered. Suggested wording provided.
70.1	Mike	Glazebrook		Heretaunga Plains Aquifer Management	Amend	Policies 36 and 37 need to have added the same proviso that was agreed at the time of the moratorium. That is to say, in effect, “there will be no further allocations of groundwater without mitigation”.
123.70	Jenny	Nelson-Smith	Department of Conservation	Heretaunga Plains Aquifer Management	Oppose	Policy 36, 37 and 38 - Delete and include policy to give effect to the NPSFM 2014 section B
132.53	Marei	Apatu	Te Taiwhenua o Heretaunga	Heretaunga Plains Aquifer Management	Amend	Set total allocation volume limits from the Heretaunga Plains Aquifer System as regulated through the RRMP at 70 million m3 per year.
132.54	Marei	Apatu	Te Taiwhenua o Heretaunga	Heretaunga Plains Aquifer Management	Amend	For the management purposes for the HPAS, separate quantities/limits for abstraction from the unconfined aquifer, from quantities/limits for the abstraction from the semi-confined and confined aquifer.
132.58	Marei	Apatu	Te Taiwhenua o Heretaunga	Heretaunga Plains Aquifer Management	Amend	Manage groundwater within the Mateo area separately from the remainder of the Heretaunga Groundwater
132.61	Marei	Apatu	Te Taiwhenua o Heretaunga	Heretaunga Plains Aquifer Management	Amend	Allow for 20 m3 per week a/location to continue for existing and new domestic use (houses) as permitted activities
132.63	Marei	Apatu	Te Taiwhenua o Heretaunga	Heretaunga Plains Aquifer Management	Amend	Include water-short areas from Schedule VI and appropriate limits and assessment criteria in PC9 for resource consent applications/renewals/extensions to take groundwater in these groundwater management zones.
132.74	Marei	Apatu	Te Taiwhenua o Heretaunga	Heretaunga Plains Aquifer Management	Amend	Set separate allocation limits for the unconfined and confined parts of the Heretaunga Plains Aquifer System, and allow for separate management of Moteo groundwater

132.124	Marei	Apatu	Te Taiwhenua o Heretaunga	Heretaunga Plains Aquifer Management	Amend	Reserve a quantity of freshwater (both volume and total allocation rate) from the Heretaunga Plains Aquifer System for regulating under the HB Coastal Environment Plan, including for domestic uses, and acknowledge these amounts when setting total abstraction quantities for PC9 and the RRMP. Set this volume at 2 Million m3 per year.
132.126	Marei	Apatu	Te Taiwhenua o Heretaunga	Heretaunga Plains Aquifer Management	Amend	Include limit and criteria provided in Heretaunga Plains groundwater allocation policies, surface water allocation policies and align with relevant schedules.
132.127	Marei	Apatu	Te Taiwhenua o Heretaunga	Heretaunga Plains Aquifer Management	Amend	Require a financial contribution from all those who use Heretaunga Plains Aquifer System water for irrigation, of 10 cents per cubic metre to help pay for meetings, research, flow mitigations, oxygenation schemes and infrastructure, additional pumping capex and opex, and aquatic ecosystem enhancement, as well as any trials and experiments associated with these.
132.128	Marei	Apatu	Te Taiwhenua o Heretaunga	Heretaunga Plains Aquifer Management	Amend	Apply a total instantaneous rate of take limit in litres per second for water abstraction from the Heretaunga Plains Aquifer System during the irrigation season that does not exceed 12,500 lps and a substantially reduced allocation rate (and volume limit) for the other six months of the year.
132.130	Marei	Apatu	Te Taiwhenua o Heretaunga	Heretaunga Plains Aquifer Management	Amend	Prescribe an irrigation season and seasonal constraints for groundwater use, to prevent unsustainable abstraction, excessive surface water depletion, and mining of the aquifer.
134.4	Willem	Kupa	Patoka Trust	Heretaunga Plains Aquifer Management	Not Stated	Policies 36, 37 and 38 - further examples where rules and restrictions have been written without any reference to mitigation of the activity.
191.10	Rangiwhiua	Robin	Mangaroa Marae	Heretaunga Plains Aquifer Management	Oppose	More water in the aquifer so that the springs that feed into the Ngaruroro River and then the streams flows again.
195.60	Peter	Matich	Federated Farmers of New Zealand	Heretaunga Plains Aquifer Management	Amend	Amend Policies 36, 37 and 38 to focus them on avoiding increases/further overallocation and reducing existing overallocation, and to for total amount allocated by water permits, and permitted and allowed water use activities. Specific wording provided.
201.39	Liz	Munroe	Heretaunga Tamatea Settlement Trust	Heretaunga Plains Aquifer Management	Amend	Policy 36 and 37 - Amend to cap groundwater use at 70M cubic metres until the hydrological investigations and aquifer modelling have been undertaken.
203.17	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	Heretaunga Plains Aquifer Management	Not Stated	Amend clause f as follows: <i>f. avoiding further adverse effects by not allowing granting water permits for new water use;</i>
203.18	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	Heretaunga Plains Aquifer Management	Support	Ensure this policy supports permitted activity provisions with low potential for adverse effects.
204.20	Juliet	Gray	Peter Lyons Trust (Lyons Vineyard)	Heretaunga Plains Aquifer Management	Amend	Amend Change 9 so that soil type determines land use and viticulture land to have the same land use options as other horticultural fertile land in the area.
207.5	Mark	Clews	Hastings District Council	Heretaunga Plains Aquifer Management	Amend	Introduce an additional Policy (referred to as Policy 37A) to guide situations where the granting of new takes will be considered. Suggested wording provided.
210.57	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Heretaunga Plains Aquifer Management	Oppose	Delete and replace with a new policy that gives effect to the NPSFM. The new policy should include consideration of groundwater ecosystems, including stygofauna, and community and cultural values. Provision for "stream flow maintenance..." should be removed.
241.10	Penny and John	Reynolds		Heretaunga Plains Aquifer Management	Oppose	Policy 37 a-d) and 38 a-b) - oppose the limit of 90 million cubic metres as it is an arbitrary number without reference to location and identification of specific adverse effect. There is no provision for mitigation to exceed 90 million cubic metres. Disagree with treating the Heretaunga plains water management as an over-allocated unit. Believe any rules and regulations should be based on actual real world effects demonstrated by science on specific water bodies in specific locations and not on theoretical maximum allocations across the entire catchment.
POL TANK 36						
3.15	Gavin	Yort	Limestone Properties Limited	POL TANK 36	Oppose	Amend clause (g) to refer to reducing existing levels of water use to actual and reasonable water needs, as provided for in 5.10.6 Policy 37(d)(ii).
5.1	Daniel	Soltau		POL TANK 36	Oppose	Remove Clause (f) - avoiding further adverse effects by not allowing new water use Include a clause that allows for new consents to be considered, on the basis of growing horticultural products. Include a clause that allows for small horticultural enterprises to apply for new consents
8.31	Rengasamy	Balasubramaniam	Delegat Limited	POL TANK 36	Oppose	Oppose Policy 36(f) - Amend clause (f) so that it does not preclude the use of a consented but as yet unused allocation of water that relates to future planned primary production developments.
8.32	Rengasamy	Balasubramaniam	Delegat Limited	POL TANK 36	Oppose	Oppose Policy 36(g) - An unqualified reference to "reducing existing levels of water use" does not provide adequate guidance to decision-makers.
8.33	Rengasamy	Balasubramaniam	Delegat Limited	POL TANK 36	Oppose	Oppose Policy 36 - Amend Policy 36, and other Plan provisions as may be necessary, to enable water that has been allocated for irrigation on an actual and reasonable basis to also be abstracted, stored and thereafter used for irrigating crops in the eventuality of an irrigation ban being imposed later in the season, provided that in doing so a consent holder does not exceed their seasonal allocation.
18.9	Mark	Cairns	MD Cairns & AR Wright Partnership	POL TANK 36	Not Stated	Amend Policy 36.f to read "avoiding further adverse effects by controlling net groundwater use within the interim allocation limit set out in Policy 37" or similar wording to achieve the outcome sought in this submission. Amend Policy 36.g to read "reducing existing levels of encouraging water use efficiency." or similar wording to achieve the outcome sought in this submission.
23.77	Kerry	Sixtus	Pattullo's Nurseries Limited	POL TANK 36	Oppose	Amend every reference to 'actual and reasonable' to read "actual and reasonable".
25.9	Xan	Harding		POL TANK 36	Not Stated	Amend Policy 36.f to read "avoiding further adverse effects by controlling net groundwater use within the interim allocation limit set out in Policy 37" or similar wording to achieve the outcome sought in this submission. Amend Policy 36.g to read "reducing existing levels of encouraging water use efficiency." or similar wording to achieve the outcome sought in this submission.

26.9	Robin	Back	Dunvegan Estate	POL TANK 36	Not Stated	Amend Policy 36.f to read “avoiding further adverse effects by controlling net groundwater use within the interim allocation limit set out in Policy 37” or similar wording to achieve the outcome sought in this submission. Amend Policy 36.g to read “ reducing existing levels of encouraging water use efficiency.” or similar wording to achieve the outcome sought in this submission.
28.9	Hamish	Clark	Saint Clair Family Estate Ltd	POL TANK 36	Not Stated	Amend Policy 36.f to read “avoiding further adverse effects by controlling net groundwater use within the interim allocation limit set out in Policy 37” or similar wording to achieve the outcome sought in this submission. Amend Policy 36.g to read “ reducing existing levels of encouraging water use efficiency.” or similar wording to achieve the outcome sought in this submission.
32.76	Kent	Griffiths		POL TANK 36	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
34.9	Jonathan	Hamlet	Craggy Range Vineyards Limited	POL TANK 36	Not Stated	Amend Policy 36.f to read “avoiding further adverse effects by controlling net groundwater use within the interim allocation limit set out in Policy 37” or similar wording to achieve the outcome sought in this submission. Amend Policy 36.g to read “ reducing existing levels of encouraging water use efficiency.” or similar wording to achieve the outcome sought in this submission.
35.75	Colin	Campbell		POL TANK 36	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
37.76	Greg	Evans	Dartmoor Estate Ltd	POL TANK 36	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
38.78	Roger	Brownlie		POL TANK 36	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
39.9	Bridget	Wilton	MbandSons	POL TANK 36	Not Stated	Amend Policy 36.f to read “avoiding further adverse effects by controlling net groundwater use within the interim allocation limit set out in Policy 37” or similar wording to achieve the outcome sought in this submission. Amend Policy 36.g to read “ reducing existing levels of encouraging water use efficiency.” or similar wording to achieve the outcome sought in this submission.
41.9	Jonathan	Milmine	Milmine Holdings Limited	POL TANK 36	Not Stated	Amend Policy 36.f to read “avoiding further adverse effects by controlling net groundwater use within the interim allocation limit set out in Policy 37” or similar wording to achieve the outcome sought in this submission. Amend Policy 36.g to read “ reducing existing levels of encouraging water use efficiency.” or similar wording to achieve the outcome sought in this submission.
43.77	CA & GW	Wilson	Meiros Orchard Ltd	POL TANK 36	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
44.75	Brian	Fulford	Omahuri Orchards (2019) Ltd.	POL TANK 36	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
47.7	John	Bostock	John Bostock & Eddie Crasborn	POL TANK 36	Amend	Amend Policy 36 f) - This is a broad-brush approach without reference to location, adverse effects and mitigation.
48.9	Paul	Ham	Alpha Domus	POL TANK 36	Not Stated	Amend Policy 36.f to read “avoiding further adverse effects by controlling net groundwater use within the interim allocation limit set out in Policy 37” or similar wording to achieve the outcome sought in this submission. Amend Policy 36.g to read “ reducing existing levels of encouraging water use efficiency.” or similar wording to achieve the outcome sought in this submission.
49.78	John	Parsons		POL TANK 36	Oppose	Amend every reference to 'actual and reasonable' to read "actual and reasonable".
53.9	Chris	Howell	CD & CM Howell Partnership	POL TANK 36	Not Stated	Amend Policy 36.f to read “avoiding further adverse effects by controlling net groundwater use within the interim allocation limit set out in Policy 37” or similar wording to achieve the outcome sought in this submission. Amend Policy 36.g to read “ reducing existing levels of encouraging water use efficiency.” or similar wording to achieve the outcome sought in this submission.
54.75	Mark	Apatu	Apatu Farms Ltd	POL TANK 36	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
61.75	Greg	Simpson		POL TANK 36	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
62.75	Jonty	Moffett		POL TANK 36	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
63.3	Keith	Marshall	Napier City Council	POL TANK 36	Amend	Amend subclause (f) to allow new takes under ‘exceptional circumstances’ or similar terminology and introduce an additional Policy to guide what these circumstances may be (refer relief sought in relation to Policy 37). Suggested wording as follows: Suggested wording provided.
68.9	Geoffrey	Smith	Vine Nursery New Zealand and Waikahu Vineyard	POL TANK 36	Not Stated	Amend Policy 36.f to read “avoiding further adverse effects by controlling net groundwater use within the interim allocation limit set out in Policy 37” or similar wording to achieve the outcome sought in this submission. Amend Policy 36.g to read “ reducing existing levels of encouraging water use efficiency.” or similar wording to achieve the outcome sought in this submission.
69.76	Jos	Dames	Dames Limited	POL TANK 36	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
71.76	Carl	Knapp	Bellingham Orchard Ltd.	POL TANK 36	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
72.82	Justin	Addis	Armadale Orchard Ltd	POL TANK 36	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
73.82	Bevan	Davidson		POL TANK 36	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
75.9	Andria	Monin	Stonecroft Wines Limited	POL TANK 36	Not Stated	Amend Policy 36.f to read “avoiding further adverse effects by controlling net groundwater use within the interim allocation limit set out in Policy 37” or similar wording to achieve the outcome sought in this submission. Amend Policy 36.g to read “ reducing existing levels of encouraging water use efficiency.” or similar wording to achieve the outcome sought in this submission.
76.9	Larry	Morgan	Te Mata Estate Winery Ltd	POL TANK 36	Not Stated	Amend Policy 36.f to read “avoiding further adverse effects by controlling net groundwater use within the interim allocation limit set out in Policy 37” or similar wording to achieve the outcome sought in this submission. Amend Policy 36.g to read “ reducing existing levels of encouraging water use efficiency.” or similar wording to achieve the outcome sought in this submission.

76.20	Larry	Morgan	Te Mata Estate Winery Ltd	POL TANK 36	Not Stated	We ask that council put maximum effort into establishing accurate records of actual water use to enable fair allocation of existing resources. We also ask that any change of land use be assessed in terms of overall impact on the wider Hawkes Bay economy while taking into account any incremental increase in water use.
77.75	David & Sheryl	Mackie		POL TANK 36	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
79.77	Richard	Penreath		POL TANK 36	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
81.9	Tony	Smith	Babich Wines	POL TANK 36	Not Stated	Amend Policy 36.f to read "avoiding further adverse effects by controlling net groundwater use within the interim allocation limit set out in Policy 37" or similar wording to achieve the outcome sought in this submission. Amend Policy 36.g to read " reducing existing levels of encouraging water use efficiency." or similar wording to achieve the outcome sought in this submission.
82.6	Trevor	Robinson	Lowe Corporation Limited	POL TANK 36	Amend	Amend Policy 36(f) and (g) to permit increased water take and use by regionally significant industry, provided such increased water use accords with best industry practice, (including in relation to the efficiency of the take and use of water) and does not cause an allocation limit in the Plan to be exceeded.
82.11	Trevor	Robinson	Lowe Corporation Limited	POL TANK 36	Amend	Amend Policy 36(g) to refocus the policy on achieving reductions in cumulative water abstraction that target those periods in which cumulative abstractions will have greatest effect on other abstractors and on ecological and other ground or surface water values. We expect that such rewording would focus on reducing summer groundwater takes from the unconfined aquifer, particularly those assessed as causing a direct and virtually immediate effect on surface water flows.
84.9	Grant	Edmonds	Redmetal Vineyards Ltd	POL TANK 36	Not Stated	Amend Policy 36.f to read "avoiding further adverse effects by controlling net groundwater use within the interim allocation limit set out in Policy 37" or similar wording to achieve the outcome sought in this submission. Amend Policy 36.g to read " reducing existing levels of encouraging water use efficiency." or similar wording to achieve the outcome sought in this submission.
86.76	Peter	Scott		POL TANK 36	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
87.9	Peter	Scott	Kereru Road Vineyard	POL TANK 36	Not Stated	Amend Policy 36.f to read "avoiding further adverse effects by controlling net groundwater use within the interim allocation limit set out in Policy 37" or similar wording to achieve the outcome sought in this submission. Amend Policy 36.g to read " reducing existing levels of encouraging water use efficiency." or similar wording to achieve the outcome sought in this submission.
88.9	Jacqui	Cormack	Constellation Brands NZ Limited (CBNZ)	POL TANK 36	Not Stated	Amend Policy 36.f to read "avoiding further adverse effects by controlling net groundwater use within the interim allocation limit set out in Policy 37" or similar wording to achieve the outcome sought in this submission. Amend Policy 36.g to read " reducing existing levels of encouraging water use efficiency." or similar wording to achieve the outcome sought in this submission.
91.8	Johnny	Milmine	Berry Farms NZ	POL TANK 36	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
94.9	Deane	Caughey	Indevin Group Ltd	POL TANK 36	Not Stated	Amend Policy 36.f to read "avoiding further adverse effects by controlling net groundwater use within the interim allocation limit set out in Policy 37" or similar wording to achieve the outcome sought in this submission. Amend Policy 36.g to read " reducing existing levels of encouraging water use efficiency." or similar wording to achieve the outcome sought in this submission.
95.75	Johnny	Milmine	Prime Limes	POL TANK 36	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
96.75	Mike	Davis	Davis Orchards Ltd	POL TANK 36	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
97.9	Lesley	Wilson	DN & LR Wilson Ltd	POL TANK 36	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
99.12	Jerf	van Beek	Twyford Water	POL TANK 36	Not Stated	That new water use is proposed to be allowed through high flow takes, so f) must be reworded to enable that water to be taken. The wording of this policy as agreed by the TANK collaborative group was to 'restrict' new allocations, rather than avoid, and Twyford Water supports amendment to reflect that. Twyford Water also opposes the requirement to 'reduce existing levels of water use' set out in g) as this precludes the use of new stored water and fails to recognise that the interim allocation limit of 90 million cubic meters is intended to align with previous actual water usage and that the Heretaunga Plains Aquifer is considered to be overallocated based on cumulative consented volume but not on cumulative consented actual use.
99.101	Jerf	van Beek	Twyford Water	POL TANK 36	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
102.9	Ritchie	Garnham	Booster Wine Group	POL TANK 36	Not Stated	Amend Policy 36.f to read "avoiding further adverse effects by controlling net groundwater use within the interim allocation limit set out in Policy 37" or similar wording to achieve the outcome sought in this submission. Amend Policy 36.g to read " reducing existing levels of encouraging water use efficiency." or similar wording to achieve the outcome sought in this submission.
104.75	John	Loughlin	Rockit Global Limited	POL TANK 36	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
105.75	Scott	Lawson		POL TANK 36	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
107.9	Christopher	Harrison	Beach House Wines Ltd	POL TANK 36	Not Stated	Amend Policy 36.f to read "avoiding further adverse effects by controlling net groundwater use within the interim allocation limit set out in Policy 37" or similar wording to achieve the outcome sought in this submission. Amend Policy 36.g to read " reducing existing levels of encouraging water use efficiency." or similar wording to achieve the outcome sought in this submission.
110.75	Edward	Whyte	Whyte & Co	POL TANK 36	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
122.75	Richard	Penreath	Ngai Tukairangi Trust	POL TANK 36	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".

123.72	Jenny	Nelson-Smith	Department of Conservation	POL TANK 36	Oppose	Policy 36 - Add "Groundwater dependent ecosystems" to list. Policy 36 a) - Delete "aquifer depletion", means the same thing. Policy 36 b) – include water levels in wetlands Policy 36 d) - Stop at seawater intrusion, delete words after this, not needed. Add a clause – to include leaching of pollutants into groundwater
124.24	Bridget	Margerison	Brownrigg Agriculture Group Ltd	POL TANK 36	Oppose	Amend clause (g) to refer to reducing existing levels of irrigation water use to reasonable crop water needs, as provided for in 5.10.6 Policy 37(d)(ii).
135.39	Anna	Wilkes	Ravensdown Limited	POL TANK 36	Amend	Amend Policy 36 as follows: f) avoiding <u>mitigating</u> further adverse effects by not allowing <u>restricting</u> new water use ... k) including plan review directions to assess effectiveness of these measures.
143.8	Peter	Hyslop	Strathallan Trust	POL TANK 36	Not Stated	Amend Policy 36.f to read "avoiding further adverse effects by controlling net groundwater use within the interim allocation limit set out in Policy 37" or similar wording to achieve the outcome sought in this submission. 32.46	Kent	Griffiths		POL TANK 37	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
32.50	Kent	Griffiths		POL TANK 37	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
32.75	Kent	Griffiths		POL TANK 37	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
34.10	Jonathan	Hamlet	Craggy Range Vineyards Limited	POL TANK 37	Amend	Amend Policy 37.d(ii) to read "(ii) apply an assessment of actual and reasonable use that reflects land use and water use authorised in the ten years up to August 2017 30 June 2020 (the end of the 2020 water year)...". or similar wording to achieve the outcome sought in this submission.
35.9	Colin	Campbell		POL TANK 37	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
35.42	Colin	Campbell		POL TANK 37	Oppose	Amend Change 9 so that the re-allocation of any water that might become available within the interim groundwater allocation limit or within the limit of any connected water body is enabled (ie. can be re-allocated before a review of the relevant allocation limits in the plan is undertaken) where it is to be used for primary production purposes (and would be allocated in accordance with proposed definition of 'reasonable' outlined above), or used for a stream flow maintenance and augmentation scheme.
35.44	Colin	Campbell		POL TANK 37	Oppose	Amend Change 9 so that water can be re-allocated to any applicant - not restricted to existing water permit holders (as at 2020).
35.46	Colin	Campbell		POL TANK 37	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
35.50	Colin	Campbell		POL TANK 37	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
35.74	Colin	Campbell		POL TANK 37	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
36.4	Karen	Morrish	Mr Apple New Zealand Ltd	POL TANK 37	Not Stated	Concerns around Policy 37.a) - We consider that reducing annual allocation down to 90M m3 should be a target or goal, rather than a "limit". Enforcing 90M m3 as a limit does not leave room for augmentation against stream depletion over and above adequate irrigation needs (as per Irricalc modelling). Any new limit will also only be achieved over time, as consents are replaced. It may also be that over time, more information or science becomes available that is relevant to any hard "limit". It is also unclear what is meant by an "interim" limit. Does that suggest flexibility in the future for both a higher and a lower limit.
36.5	Karen	Morrish	Mr Apple New Zealand Ltd	POL TANK 37	Not Stated	Concerns around Policy 37. c) If there are to be no new allocations, this would have a significant effect on future land use/industry expansion. Mr Apple would like to see some flexibility around this rule, for example if the recent 3D helicopter survey or other new science returns results suggesting more water is available? Certainly, a scientific, evidence-based, approach should be adopted wherever possible - subject to ensuring that impacts on community and economic well-being are also sufficiently taken into account.
36.6	Karen	Morrish	Mr Apple New Zealand Ltd	POL TANK 37	Not Stated	Concerns around Policy 37.d) ii) - When renewing consents, it is proposed that new water allocations will be the lower of either the Irricalc volume or the highest-use year out of the 10 from 2007-2017. We have a number of concerns with this. Firstly, we do not believe that HBRC records over the 10-year period are reliable enough to make decisions on, so that weights against their use. Using Irricalc would also put everyone on the same footing. In fact, the proposal to use the lower of the two options could actually penalize water users who have been more efficient than Irricalc might anticipate - and potentially unfairly. For these reasons, we favor sole use of the Irricalc volume .
36.7	Karen	Morrish	Mr Apple New Zealand Ltd	POL TANK 37	Not Stated	Concerns around Policy 37.e) - We are supportive of providing for stream flow maintenance, ie flow augmentation. It is unclear if this will only be available through "schemes", and how these will be structured run, and costs recovered equitable. If water storage is a component of such schemes, which can be taken a high flows for augmentation at low flows, then takes for such purposes may not need to come out of the already reduced consents? It would be appropriate to have an opportunity to mitigate against our stream depletion effect before any bans are introduced?
37.9	Greg	Evans	Dartmoor Estate Ltd	POL TANK 37	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".

37.42	Greg	Evans	Dartmoor Estate Ltd	POL TANK 37	Oppose	Amend Change 9 so that the re-allocation of any water that might become available within the interim groundwater allocation limit or within the limit of any connected water body is enabled (ie. can be re-allocated before a review of the relevant allocation limits in the plan is undertaken) where it is to be used for primary production purposes (and would be allocated in accordance with proposed definition of 'reasonable' outlined above), or used for a stream flow maintenance and augmentation scheme.
37.44	Greg	Evans	Dartmoor Estate Ltd	POL TANK 37	Oppose	Amend Change 9 so that water can be re-allocated to any applicant - not restricted to existing water permit holders (as at 2020).
37.46	Greg	Evans	Dartmoor Estate Ltd	POL TANK 37	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
37.50	Greg	Evans	Dartmoor Estate Ltd	POL TANK 37	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.

73.81	Bevan	Davidson		POL TANK 37	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
75.1	Andria	Monin	Stonecroft Wines Limited	POL TANK 37	Amend	Amend Policy 37.d(ii) to read "(ii) apply an assessment of actual and reasonable use that reflects land use and water use authorised in the ten years up to August 2017 30 June 2020 (the end of the 2020 water year)...". or similar wording to achieve the outcome sought in this submission.

76.10	Larry	Morgan	Te Mata Estate Winery Ltd	POL TANK 37	Amend	Amend Policy 37.d(ii) to read "(ii) apply an assessment of actual and reasonable use that reflects land use and water use authorised in the ten years up to August 2017 30 June 2020 (the end of the 2020 water year)...". or similar wording to achieve the outcome sought in this submission.
76.21	Larry	Morgan	Te Mata Estate Winery Ltd	POL TANK 37	Not Stated	We ask that council take into account the fact that grapes have a very low water requirement and that many grape growers already employ a range of techniques to ensure that they only supply their vines with exactly the amount of water they require. Grape growers should not be penalised for efficiently managing a crop with an inherently low water requirement . The 2019/20 season would provide a reasonable baseline for the highest potential water use in any future season. The Irricalc model should be used in conjunction with 2019/20 data to provide a baseline for future allocations of water to vineyards.
77.9	David & Sheryl	Mackie		POL TANK 37	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
77.42	David & Sheryl	Mackie		POL TANK 37	Oppose	Amend Change 9 so that the re-allocation of any water that might become available within the interim groundwater allocation limit or within the limit of any connected water body is enabled (ie. can be re-allocated before a review of the relevant allocation limits in the plan is undertaken) where it is to be used for primary production purposes (and would be allocated in accordance with proposed definition of 'reasonable' outlined above), or used for a stream flow maintenance and augmentation scheme.

96.74	Mike	Davis	Davis Orchards Ltd	POL TANK 37	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
97.10	Lesley	Wilson	DN & LR Wilson Ltd	POL TANK 37	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
97.43	Lesley	Wilson	DN & LR Wilson Ltd	POL TANK 37	Oppose	Amend Change 9 so that the re-allocation of any water that might become available within the interim groundwater allocation limit or within the limit of any connected water body is enabled (ie. can be re-allocated before a review of the relevant allocation limits in the plan is undertaken) where it is to be used for primary production purposes (and would be allocated in accordance with proposed definition of 'reasonable' outlined above), or used for a stream flow maintenance and augmentation scheme.
97.45	Lesley	Wilson	DN & LR Wilson Ltd	POL TANK 37	Oppose	Amend Change 9 so that water can be re-allocated to any applicant - not restricted to existing water permit holders (as at 2020).
97.47	Lesley	Wilson	DN & LR Wilson Ltd	POL TANK 37	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
97.51	Lesley	Wilson	DN & LR Wilson Ltd	POL TANK 37	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
97.55	Lesley	Wilson	DN & LR Wilson Ltd	POL TANK 37	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
97.89	Lesley	Wilson	DN & LR Wilson Ltd	POL TANK 37	Not Stated	Amend so that the term reasonable, issued alongside crop modelling, be used.
99.13	Jerf	van Beek	Twyford Water	POL TANK 37	Not Stated	Strongly of the view that the specific reference to '90 million cubic meters per year ' should be deleted, and the wording amended to actual and reasonable use allocation be inserted without a numeric number. Questions the avoidance of re-allocation of water that might become available within the interim groundwater allocation, within the life of this plan. Twyford Water submits that this water could and should be made available if it is to be used for primary production purposes, or for use in stream flow maintenance and enhancement schemes. Arguably the re-allocation of water is not the allocation of new groundwater (and therefore would be consistent with c), and given the difficulty of gaining access to any new water, Twyford Water submits that ensuring that water that has already been used can be re-allocated to support the survival of the horticultural industry in the TANK Catchments. The "New high flow water" will be the tool to mitigate the over abstraction of the aquifer and through enhancement of lowland streams will add additional water to the environment above and below the surface.
99.35	Jerf	van Beek	Twyford Water	POL TANK 37	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
99.68	Jerf	van Beek	Twyford Water	POL TANK 37	Oppose	Amend Change 9 so that the re-allocation of any water that might become available within the interim groundwater allocation limit or within the limit of any connected water body is enabled (ie. can be re-allocated before a review of the relevant allocation limits in the plan is undertaken) where it is to be used for primary production purposes (and would be allocated in accordance with proposed definition of 'reasonable' outlined above), or used for a stream flow maintenance and augmentation scheme.
99.70	Jerf	van Beek	Twyford Water	POL TANK 37	Oppose	Amend Change 9 so that water can be re-allocated to any applicant - not restricted to existing water permit holders (as at 2020).
99.72	Jerf	van Beek	Twyford Water	POL TANK 37	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
99.76	Jerf	van Beek	Twyford Water	POL TANK 37	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
99.100	Jerf	van Beek	Twyford Water	POL TANK 37	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.

99.105	Jerf	van Beek	Twyford Water	POL TANK 37	Amend	Amend as follows: In managing the allocation and use of groundwater in the Heretaunga Plains Water Management Unit, the Council will; a) adopt an interim allocation limit based on reasonable use b) restrict the re-allocation of any water that might become available within the interim groundwater allocation limit or within the limit of any connected water body to primary production purposes, or for use in stream flow maintenance and enhancement schemes. c) manage the Heretaunga Plains Water Management Unit as an over-allocated management unit and prevent any new allocations of groundwater; d) when considering applications in respect of existing consents due for expiry, or when reviewing consents, to; (i) allocate groundwater on the basis of the maximum quantity that is able to be abstracted during each year or irrigation season expressed in cubic meters per year; (ii) apply an assessment of actual and reasonable use (using the Irricalc) e) mitigate stream depletion effects on lowland streams by providing for stream flow maintenance and habitat enhancement schemes.
102.1	Ritchie	Garnham	Booster Wine Group	POL TANK 37	Amend	Amend Policy 37.d(ii) to read "(ii) apply an assessment of actual and reasonable use that reflects land use and water use authorised in the ten years up to August 2017 30 June 2020 (the end of the 2020 water year)...". or similar wording to achieve the outcome sought in this submission.
103.7	Ian	Quinn	Two Terraces Vineyard	POL TANK 37	Amend	Amend Policy 37.d(ii) to read "(ii) apply an assessment of actual and reasonable use that reflects land use and water use authorised in the ten years up to August 2017 30 June 2020 (the end of the 2020 water year)...". or similar wording to achieve the outcome sought in this submission.
104.9	John	Loughlin	Rockit Global Limited	POL TANK 37	Oppose	Amend every reference to 'actual and reasonable' to read "actual and reasonable".
104.42	John	Loughlin	Rockit Global Limited	POL TANK 37	Oppose	Amend Change 9 so that the re-allocation of any water that might become available within the interim groundwater allocation limit or within the limit of any connected water body is enabled (ie. can be re-allocated before a review of the relevant allocation limits in the plan is undertaken) where it is to be used for primary production purposes (and would be allocated in accordance with proposed definition of 'reasonable' outlined above), or used for a stream flow maintenance and augmentation scheme.
104.44	John	Loughlin	Rockit Global Limited	POL TANK 37	Oppose	Amend Change 9 so that water can be re-allocated to any applicant - not restricted to existing water permit holders (as at 2020).
104.46	John	Loughlin	Rockit Global Limited	POL TANK 37	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
104.50	John	Loughlin	Rockit Global Limited	POL TANK 37	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
104.74	John	Loughlin	Rockit Global Limited	POL TANK 37	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
105.9	Scott	Lawson		POL TANK 37	Oppose	Amend every reference to 'actual and reasonable' to read "actual and reasonable".
105.42	Scott	Lawson		POL TANK 37	Oppose	Amend Change 9 so that the re-allocation of any water that might become available within the interim groundwater allocation limit or within the limit of any connected water body is enabled (ie. can be re-allocated before a review of the relevant allocation limits in the plan is undertaken) where it is to be used for primary production purposes (and would be allocated in accordance with proposed definition of 'reasonable' outlined above), or used for a stream flow maintenance and augmentation scheme.
105.44	Scott	Lawson		POL TANK 37	Oppose	Amend Change 9 so that water can be re-allocated to any applicant - not restricted to existing water permit holders (as at 2020).
105.46	Scott	Lawson		POL TANK 37	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
105.5	Scott	Lawson		POL TANK 37	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
105.74	Scott	Lawson		POL TANK 37	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
107.1	Christopher	Harrison	Beach House Wines Ltd	POL TANK 37	Amend	Amend Policy 37.d(ii) to read "(ii) apply an assessment of actual and reasonable use that reflects land use and water use authorised in the ten years up to August 2017 30 June 2020 (the end of the 2020 water year)...". or similar wording to achieve the outcome sought in this submission.
110.9	Edward	Whyte	Whyte & Co	POL TANK 37	Oppose	Amend every reference to 'actual and reasonable' to read "actual and reasonable".
110.42	Edward	Whyte	Whyte & Co	POL TANK 37	Oppose	Amend Change 9 so that the re-allocation of any water that might become available within the interim groundwater allocation limit or within the limit of any connected water body is enabled (ie. can be re-allocated before a review of the relevant allocation limits in the plan is undertaken) where it is to be used for primary production purposes (and would be allocated in accordance with proposed definition of 'reasonable' outlined above), or used for a stream flow maintenance and augmentation scheme.
110.44	Edward	Whyte	Whyte & Co	POL TANK 37	Oppose	Amend Change 9 so that water can be re-allocated to any applicant - not restricted to existing water permit holders (as at 2020).

110.46	Edward	Whyte	Whyte & Co	POL TANK 37	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
110.50	Edward	Whyte	Whyte & Co	POL TANK 37	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
110.74	Edward	Whyte	Whyte & Co	POL TANK 37	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
122.9	Richard	Penreath	Ngai Tukairangi Trust	POL TANK 37	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
122.42	Richard	Penreath	Ngai Tukairangi Trust	POL TANK 37	Oppose	Amend Change 9 so that the re-allocation of any water that might become available within the interim groundwater allocation limit or within the limit of any connected water body is enabled (ie. can be re-allocated before a review of the relevant allocation limits in the plan is undertaken) where it is to be used for primary production purposes (and would be allocated in accordance with proposed definition of 'reasonable' outlined above), or used for a stream flow maintenance and augmentation scheme.
122.44	Richard	Penreath	Ngai Tukairangi Trust	POL TANK 37	Oppose	Amend Change 9 so that water can be re-allocated to any applicant - not restricted to existing water permit holders (as at 2020).
122.46	Richard	Penreath	Ngai Tukairangi Trust	POL TANK 37	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
122.5	Richard	Penreath	Ngai Tukairangi Trust	POL TANK 37	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
122.74	Richard	Penreath	Ngai Tukairangi Trust	POL TANK 37	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
123.73	Jenny	Nelson-Smith	Department of Conservation	POL TANK 37	Oppose	Policy 37 – provide evidence to support that the allocation limit is less than the maximum sustainable yield of the groundwater system, and will not result in adverse effects, particularly to connected surface water bodies. This assessment should also include a comparison of the maximum sustainable yield against all groundwater abstraction, no just irrigation lakes. Policy 37 e) - insert mitigate stream depletion effects on lowland stream and wetlands.
124.9	Bridget	Margerison	Brownrigg Agriculture Group Ltd	POL TANK 37	Support	Policy 37 (a) and (d) - support
132.125	Marei	Apatu	Te Taiwhenua o Heretaunga	POL TANK 37	Amend	Take a precautionary approach for setting and managing the cumulative allocation volumes and rates, and abstraction from the HPAS, as the aquifer is being mined. Amend total abstraction volume from the HPAS, so that no more than 70 Million m3 abstraction per annum is allowed, inclusive of volumes regulated through the RCEP.
132.129	Marei	Apatu	Te Taiwhenua o Heretaunga	POL TANK 37	Amend	Include effects on Mauri, and on groundwater dependent ecosystems, in consent application criteria, consent renewal processes, and decision-making.
132.159	Marei	Apatu	Te Taiwhenua o Heretaunga	POL TANK 37	Amend	On resource consent expiry for groundwater takes for irrigation in the Heretaunga Plains Aquifer System area, reduce amounts of water ²¹ on a pro-rata basis of 12.5 percent, derived from average annual abstraction and use from the last 7 years. In addition, call-in all consents to abstract groundwater from the HPAS and reduce their abstraction amounts by 12.5% also, apart from those abstracting from water short areas (as identified in Schedule VI) where a 15% reduction shall apply - when PC9 becomes operative. Make consequential amendments to other PC9 provisions to enable the above to occur.
132.183	Marei	Apatu	Te Taiwhenua o Heretaunga	POL TANK 37	Amend	In groundwater allocation Policy 37, make the following amendments: <ul style="list-style-type: none"> •In clause a) replace "90 million" with "70 million" and delete "based on the actual and reasonable water use prior to 2017". •In clause b) add "Adopt a precautionary approach" before "avoid re-allocation." •In clause d) (i), delete "each year or" and "per year". In clause d) (ii), delete "of actual and reasonable use" and after "reflects" add "sustainable management of groundwater". Delete "authorised in the ten years up to August 2017". •In clause e), replace "maintenance" with "mitigation". •Add new clause, "f) The management of water abstraction volumes and rates from groundwater recharge zones to prevent reductions in mid-term (5-year) groundwater storage, and water mining of the Heretaunga Plains Aquifer System".
134.5	Willem	Kupa	Patoka Trust	POL TANK 37	Not Stated	Policy 37a - annual allocation of 90M3 should NOT be the limit. Does not leave room for augmentation against stream depletion over and above adequate irrigation needs (as per Irrcalc modelling). It is a round number not based on science. All restrictions need to identify the adverse effect and leave an opportunity for mitigation of that adverse effect. Disagree iwth treating the Heretaunga plains water management as an over-allocated unit preventing any further allocations of ground water without reference to adverse effects, mitigation and actual water usage.
135.40	Anna	Wilkes	Ravensdown Limited	POL TANK 37	Amend	Amend Policy 37 as follows: b) avoid <u>minimise</u> re-allocation of any water that might become available within the interim groundwater allocation limit or within the limit of any connected water body until there has been a review of the relevant allocation limits within this plan; c) manage the Heretaunga Plains Water Management Unit as an over-allocated management unit and prevent <u>restrict</u> any new allocations of groundwater;

143.9	Peter	Hyslop	Strathallan Trust	POL TANK 37	Amend	Amend Policy 37.d(ii) to read "(ii) apply an assessment of actual and reasonable use that reflects land use and water use authorised in the ten years up to August 2017 30 June 2020 (the end of the 2020 water year)...". or similar wording to achieve the outcome sought in this submission.
165.10	Caleb	Dennis	Aotearoa New Zealand Fine Wine Estates LP	POL TANK 37	Amend	Amend Policy 37.d(ii) to read "(ii) apply an assessment of actual and reasonable use that reflects land use and water use authorised in the ten years up to August 2017 30 June 2020 (the end of the 2020 water year)...". or similar wording to achieve the outcome sought in this submission.
179.10	Wim	Barendsen	Otawhao Farms Ltd	POL TANK 37	Amend	Amend Policy 37.d(ii) to read "(ii) apply an assessment of actual and reasonable use that reflects land use and water use authorised in the ten years up to August 2017 30 June 2020 (the end of the 2020 water year)...". or similar wording to achieve the outcome sought in this submission.
180.39	Charlotte	Drury	Horticulture New Zealand	POL TANK 37	Amend	Amend to avoid the policy being unnecessarily restrictive given that our knowledge about what a sustainable groundwater limit might be is still incomplete. Specific wording provided in submission.
185.9	Allen	Kittow	Tremaine Farms Ltd	POL TANK 37	Oppose	Amend every reference to 'actual and reasonable' to read "actual and reasonable".
185.42	Allen	Kittow	Tremaine Farms Ltd	POL TANK 37	Oppose	Amend Change 9 so that the re-allocation of any water that might become available within the interim groundwater allocation limit or within the limit of any connected water body is enabled (ie. can be re-allocated before a review of the relevant allocation limits in the plan is undertaken) where it is to be used for primary production purposes (and would be allocated in accordance with proposed definition of 'reasonable' outlined above), or used for a stream flow maintenance and augmentation scheme.
185.44	Allen	Kittow	Tremaine Farms Ltd	POL TANK 37	Oppose	Amend Change 9 so that water can be re-allocated to any applicant - not restricted to existing water permit holders (as at 2020).
185.46	Allen	Kittow	Tremaine Farms Ltd	POL TANK 37	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
185.50	Allen	Kittow	Tremaine Farms Ltd	POL TANK 37	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
185.74	Allen	Kittow	Tremaine Farms Ltd	POL TANK 37	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
186.9	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	POL TANK 37	Oppose	Amend every reference to 'actual and reasonable' to read "actual and reasonable".
186.42	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	POL TANK 37	Oppose	Amend Change 9 so that the re-allocation of any water that might become available within the interim groundwater allocation limit or within the limit of any connected water body is enabled (ie. can be re-allocated before a review of the relevant allocation limits in the plan is undertaken) where it is to be used for primary production purposes (and would be allocated in accordance with proposed definition of 'reasonable' outlined above), or used for a stream flow maintenance and augmentation scheme.
186.44	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	POL TANK 37	Oppose	Amend Change 9 so that water can be re-allocated to any applicant - not restricted to existing water permit holders (as at 2020).
186.46	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	POL TANK 37	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
186.50	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	POL TANK 37	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
186.74	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	POL TANK 37	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
191.12	Rangiwhiua	Robin	Mangaroa Marae	POL TANK 37	Oppose	Come up with another methodology for water allocation and water flow for actual and reasonable use
192.9	Rebecca	Blunden	T&G Global Limited and ENZIL	POL TANK 37	Amend	Amend Policy 37(d)(ii) to read: "apply an assessment of actual and reasonable use that reflects the water use authorised in the 10 years up to 2 May 2020 (except as provided by Policy 50);"
192.10	Rebecca	Blunden	T&G Global Limited and ENZIL	POL TANK 37	Amend	If water becomes available within the interim allocation limit and its intended use is primary production or would be used for stream flow maintenance, the plan should enable that water to be re-allocated. Policy 37(b) should be amended accordingly.
193.4	Bruce	Mackay	Heinz Wattie's Limited	POL TANK 37	Amend	Policy 37 a) and b) Retain 90 million m ³ per year as a target. Delete paragraph b)
193.5	Bruce	Mackay	Heinz Wattie's Limited	POL TANK 37	Amend	Delete the clause regarding the highest recorded water use in any of the 10 years preceding August 2017
194.46	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 37	Oppose	Policy 37 - general approach - Amend the definition of 'actual and reasonable' to provide for the efficient allocation and use of water.
194.47	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 37	Amend	Policy 37(a) - 5.10.6.37(a) should be amended along the lines of 'adopt an interim allocation limit of 90 million cubic meters per year based on <i>estimated/modelled</i> water use prior to 2017'. Clarification on how the interim allocation limit of 90 million cubic meters aligns with the provisions of PC9, particularly Schedule 31.

194.48	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 37	Oppose	Policy 37(b) - 5.10.6.37(b) should be amended along the lines of 'restrict or limit re-allocation of any allocated but unused groundwater that might become available within the interim groundwater allocation limit'. The term 're-allocation' also needs to be either defined or clarified in the provisions; PRWM submits that in the context of this policy it should be confined to redistribution of previously allocated water to new users, and not apply to standard replacement consent applications.
194.49	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 37	Amend	Policy 37(c) - 5.10.6.37(c) should be amended along the lines of 'manage the Heretaunga Plains Water Management Unit as an overallocated management unit (based on cumulative consented volume) and prevent any new allocations of groundwater above the interim allocation limit'.
194.50	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 37	Amend	Policy 37(d)(i) - 5.10.6.37(d) should be amended to reflect its intent more clearly.
194.51	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 37	Amend	Policy 37(d)(ii) - 5.10.6.37(d) should also be expressed as a standalone policy so as to apply to all applications rather than just those located within the HPWMU.
196.10	Julian	Odering	Oderings Nurseries	POL TANK 37	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
196.43	Julian	Odering	Oderings Nurseries	POL TANK 37	Oppose	Amend Change 9 so that the re-allocation of any water that might become available within the interim groundwater allocation limit or within the limit of any connected water body is enabled (ie. can be re-allocated before a review of the relevant allocation limits in the plan is undertaken) where it is to be used for primary production purposes (and would be allocated in accordance with proposed definition of 'reasonable' outlined above), or used for a stream flow maintenance and augmentation scheme.
196.45	Julian	Odering	Oderings Nurseries	POL TANK 37	Oppose	Amend Change 9 so that water can be re-allocated to any applicant - not restricted to existing water permit holders (as at 2020).
196.47	Julian	Odering	Oderings Nurseries	POL TANK 37	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
196.51	Julian	Odering	Oderings Nurseries	POL TANK 37	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
196.55	Julian	Odering	Oderings Nurseries	POL TANK 37	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
199.10	Peter	Robertson	Brookfields Vineyards/Ohiti Estate	POL TANK 37	Amend	Amend Policy 37.d(ii) to read "(ii) apply an assessment of actual and reasonable use that reflects land use and water use authorised in the ten years up to August 2017 30 June 2020 (the end of the 2020 water year)...". or similar wording to achieve the outcome sought in this submission.
204.1	Juliet	Gray	Peter Lyons Trust (Lyons Vineyard)	POL TANK 37	Amend	Amend Policy 37.d(ii) to read "(ii) apply an assessment of actual and reasonable use that reflects land use and water use authorised in the ten years up to August 2017 30 June 2020 (the end of the 2020 water year)...". or similar wording to achieve the outcome sought in this submission.
207.4	Mark	Clews	Hastings District Council	POL TANK 37	Amend	Amend Policy 37 to: <ul style="list-style-type: none"> •Treat the interim 'limit' as a target •Still manage the resource as over-allocated (generally) subject to exceptions – particularly those supported by Policy LW2 of the RPS. •Better acknowledge that new allocations based on actual use over previous years may not be a reasonable approach for all replacement processes. Suggested wording provided
208.9	Emma	Taylor	Villa Maria Estate Limited	POL TANK 37	Amend	Amend Policy 37.d(ii) to read "(ii) apply an assessment of actual and reasonable use that reflects land use and water use authorised in the ten years up to August 2017 30 June 2020 (the end of the 2020 water year)...". or similar wording to achieve the outcome sought in this submission.
210.58	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 37	Oppose	Delete and replace with a new policy that gives effect to the NPSFM.
211.9	Brian	McLay		POL TANK 37	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
211.42	Brian	McLay		POL TANK 37	Oppose	Amend Change 9 so that the re-allocation of any water that might become available within the interim groundwater allocation limit or within the limit of any connected water body is enabled (ie. can be re-allocated before a review of the relevant allocation limits in the plan is undertaken) where it is to be used for primary production purposes (and would be allocated in accordance with proposed definition of 'reasonable' outlined above), or used for a stream flow maintenance and augmentation scheme.
211.44	Brian	McLay		POL TANK 37	Oppose	Amend Change 9 so that water can be re-allocated to any applicant - not restricted to existing water permit holders (as at 2020).
211.46	Brian	McLay		POL TANK 37	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
211.50	Brian	McLay		POL TANK 37	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
211.74	Brian	McLay		POL TANK 37	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.

213.10	Peter	Scott	The Wine Portfolio	POL TANK 37	Amend	Amend Policy 37.d(ii) to read "(ii) apply an assessment of actual and reasonable use that reflects land use and water use authorised in the ten years up to August 2017 30 June 2020 (the end of the 2020 water year)...". or similar wording to achieve the outcome sought in this submission.
214.9	Scott	Lawson	Hawkes Bay Vegetable Growers Association	POL TANK 37	Oppose	Amend every reference to 'actual and reasonable' to read "actual and reasonable".
214.42	Scott	Lawson	Hawkes Bay Vegetable Growers Association	POL TANK 37	Oppose	Amend Change 9 so that the re-allocation of any water that might become available within the interim groundwater allocation limit or within the limit of any connected water body is enabled (ie. can be re-allocated before a review of the relevant allocation limits in the plan is undertaken) where it is to be used for primary production purposes (and would be allocated in accordance with proposed definition of 'reasonable' outlined above), or used for a stream flow maintenance and augmentation scheme.
214.44	Scott	Lawson	Hawkes Bay Vegetable Growers Association	POL TANK 37	Oppose	Amend Change 9 so that water can be re-allocated to any applicant - not restricted to existing water permit holders (as at 2020).
214.46	Scott	Lawson	Hawkes Bay Vegetable Growers Association	POL TANK 37	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
214.50	Scott	Lawson	Hawkes Bay Vegetable Growers Association	POL TANK 37	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
214.74	Scott	Lawson	Hawkes Bay Vegetable Growers Association	POL TANK 37	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.

91.42	Johnny	Milmine	Berry Farms NZ	POL TANK 38	Oppose	Amend Change 9 so that the re-allocation of any water that might become available within the interim groundwater allocation limit or within the limit of any connected water body is enabled (ie. can be re-allocated before a review of the relevant allocation limits in the plan is undertaken) where it is to be used for primary production purposes (and would be allocated in accordance with proposed definition of 'reasonable' outlined above), or used for a stream flow maintenance and augmentation scheme.
91.44	Johnny	Milmine	Berry Farms NZ	POL TANK 38	Oppose	Amend Change 9 so that water can be re-allocated to any applicant - not restricted to existing water permit holders (as at 2020).
92.1	Sally	Gallagher	Apollo Foods Limited	POL TANK 38	Amend	We would request that if a review is conducted of current water consents around water allocation that the Regional Council takes into consideration the following: Apollo Foods is a new business and it is unlikely that in the short term will be able to demonstrate full use of the current water allocation within consent WP170342T. This puts at risk the 30 million investment that has been made in Hawke's Bay to develop and grow a food beverage business with appropriate food processing infrastructure. Any review needs to take in to account the future potential of a specific consent, not just history. This is critical to allow any new business the opportunity to grow with the appropriate support from regional authorities.
95.43	Johnny	Milmine	Prime Limes	POL TANK 38	Oppose	Amend Change 9 so that the re-allocation of any water that might become available within the interim groundwater allocation limit or within the limit of any connected water body is enabled (ie. can be re-allocated before a review of the relevant allocation limits in the plan is undertaken) where it is to be used for primary production purposes (and would be allocated in accordance with proposed definition of 'reasonable' outlined above), or used for a stream flow maintenance and augmentation scheme.
95.45	Johnny	Milmine	Prime Limes	POL TANK 38	Oppose	Amend Change 9 so that water can be re-allocated to any applicant - not restricted to existing water permit holders (as at 2020).

99.73	Jerf	van Beek	Twyford Water	Flow maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
99.77	Jerf	van Beek	Twyford Water	Flow maintenance	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
99.80	Jerf	van Beek	Twyford Water	Flow maintenance	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
103.17	Ian	Quinn	Two Terraces Vineyard	Flow maintenance	Not Stated	No specific relief sought but concerned that without the benefit of HBRC's leadership (supported by other stakeholders of course), the plan change could be implemented but without some of the initiatives that mitigate some of the likely impacts.

104.47	John	Loughlin	Rockit Global Limited	Flow maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
104.51	John	Loughlin	Rockit Global Limited	Flow maintenance	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
104.54	John	Loughlin	Rockit Global Limited	Flow maintenance	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
105.47	Scott	Lawson		Flow maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
105.51	Scott	Lawson		Flow maintenance	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
105.54	Scott	Lawson		Flow maintenance	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
110.47	Edward	Whyte	Whyte & Co	Flow maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
110.51	Edward	Whyte	Whyte & Co	Flow maintenance	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
110.54	Edward	Whyte	Whyte & Co	Flow maintenance	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
120.54	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Flow maintenance	Amend	Remove and do not enable managed aquifer recharge or flow maintenance policies and schemes.
120.75	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Flow maintenance	Amend	Remove provisions relating to 'stream flow maintenance and enhancement' and the ability to transfer water take permits between catchments. Instead address the effects of stream depletion and over-abstraction and require riparian habitat enhancement through consent standards for Farm Environment Plans
122.47	Richard	Penreath	Ngai Tukairangi Trust	Flow maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
122.51	Richard	Penreath	Ngai Tukairangi Trust	Flow maintenance	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
122.54	Richard	Penreath	Ngai Tukairangi Trust	Flow maintenance	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
132.116	Marei	Apatu	Te Taiwhenua o Heretaunga	Flow maintenance	Amend	Replace "stream flow maintenance" and "flow augmentation" with "surface flow mitigation" within the proposed plan, and move any such provisions in proposed Policy 39 and schedules to a non-regulation section of the plan so that research, hui, meetings, formulation of ideas etc, can be undertaken outside of objectives and management methods. In proposed Policy 39, remove references to trigger flows, so they are no longer applicable to flow maintenance or flow augmentation, apart from for existing activities.
132.151	Marei	Apatu	Te Taiwhenua o Heretaunga	Flow maintenance	Amend	Delete all trigger flow references in PC9 provisions/schedules, including their use for flow enhancement or augmentation schemes.
185.47	Allen	Kittow	Tremaine Farms Ltd	Flow maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
185.51	Allen	Kittow	Tremaine Farms Ltd	Flow maintenance	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
185.54	Allen	Kittow	Tremaine Farms Ltd	Flow maintenance	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
186.47	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Flow maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
186.51	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Flow maintenance	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
186.54	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Flow maintenance	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
192.11	Rebecca	Blunden	T&G Global Limited and ENZIL	Flow maintenance	Amend	Amend Policies 39, 40 and 41 so that they require the Council to fully implement Policy 41 before individual consent holders are required to develop or contribute to stream flow maintenance and habitat enhancement schemes.

196.48	Julian	Odering	Oderings Nurseries	Flow maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
196.52	Julian	Odering	Oderings Nurseries	Flow maintenance	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
196.56	Julian	Odering	Oderings Nurseries	Flow maintenance	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
201.40	Liz	Munroe	Heretaunga Tamatea Settlement Trust	Flow maintenance	Amend	Policy 39, 40 and 41 - Amend to ensure at a minimum to include clauses that consider: a) Mitigating stream depletion effects by regulating takes through appropriate minimum flow triggers" b) A numeric assessment of the degree of aquifer/streamflow depletion at the point of take versus the length and value of the habitat restored by streamflow enhancement"
211.47	Brian	McLay		Flow maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
211.51	Brian	McLay		Flow maintenance	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
211.54	Brian	McLay		Flow maintenance	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
214.47	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Flow maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
214.51	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Flow maintenance	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
214.54	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Flow maintenance	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
215.47	Peter	Dooney	Dooney Partnership	Flow maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
215.51	Peter	Dooney	Dooney Partnership	Flow maintenance	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
215.54	Peter	Dooney	Dooney Partnership	Flow maintenance	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
217.46	Paul	Paynter	Johnny Appleseed Holdings Ltd	Flow maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
217.50	Paul	Paynter	Johnny Appleseed Holdings Ltd	Flow maintenance	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
217.53	Paul	Paynter	Johnny Appleseed Holdings Ltd	Flow maintenance	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
218.47	Adrian	Mannering	Irrigation Services	Flow maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
218.51	Adrian	Mannering	Irrigation Services	Flow maintenance	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
218.54	Adrian	Mannering	Irrigation Services	Flow maintenance	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
219.47	Michael & Julie	Russell		Flow maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
219.51	Michael & Julie	Russell		Flow maintenance	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
219.54	Michael & Julie	Russell		Flow maintenance	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
219.78	Michael & Julie	Russell		Flow maintenance	Amend	I see no need for us to contribute to stream flow maintenance schemes as I see no impacts from our operations, and from other extensive irrigation operations in our vicinity on the two streams neighbouring our property.

220.47	Steve	Gillum	Gillum Springfield Trust	Flow maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
220.51	Steve	Gillum	Gillum Springfield Trust	Flow maintenance	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
220.54	Steve	Gillum	Gillum Springfield Trust	Flow maintenance	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
221.47	WT	Scott		Flow maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
221.51	WT	Scott		Flow maintenance	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
221.54	WT	Scott		Flow maintenance	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
222.4	Owen Jerry	Hāpuku		Flow maintenance	Oppose	If stream flow enhancement schemes are included in the TANK plan, a lot more detail should be required
224.5	Peter	Holley	Mission Estate Winery	Flow maintenance	Oppose	No specific relief requested but states that there has been no indication as to the costs involved nor the phasing in period.
23.48	Kerry	Sixtus	Pattullo's Nurseries Limited	Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
23.52	Kerry	Sixtus	Pattullo's Nurseries Limited	Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
23.55	Kerry	Sixtus	Pattullo's Nurseries Limited	Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
32.48	Kent	Griffiths		Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
32.52	Kent	Griffiths		Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
32.55	Kent	Griffiths		Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
35.48	Colin	Campbell		Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
35.52	Colin	Campbell		Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
35.55	Colin	Campbell		Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
37.48	Greg	Evans	Dartmoor Estate Ltd	Flow Maintenance	Oppose	Rule TANK 18 - Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
37.52	Greg	Evans	Dartmoor Estate Ltd	Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
37.55	Greg	Evans	Dartmoor Estate Ltd	Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
38.48	Roger	Brownlie		Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
38.52	Roger	Brownlie		Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
38.55	Roger	Brownlie		Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
43.48	CA & GW	Wilson	Meiros Orchard Ltd	Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.

43.52	CA & GW	Wilson	Meiros Orchard Ltd	Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
43.55	CA & GW	Wilson	Meiros Orchard Ltd	Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
44.48	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
44.52	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
44.55	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
49.48	John	Parsons		Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
49.52	John	Parsons		Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
49.55	John	Parsons		Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
54.48	Mark	Apatu	Apatu Farms Ltd	Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
54.52	Mark	Apatu	Apatu Farms Ltd	Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
54.55	Mark	Apatu	Apatu Farms Ltd	Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
61.48	Greg	Simpson		Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
61.52	Greg	Simpson		Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
61.55	Greg	Simpson		Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
62.48	Jonty	Moffett		Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
62.52	Jonty	Moffett		Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
62.55	Jonty	Moffett		Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
69.48	Jos	Dames	Dames Limited	Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
69.52	Jos	Dames	Dames Limited	Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
69.55	Jos	Dames	Dames Limited	Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
71.48	Carl	Knapp	Bellingham Orchard Ltd.	Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
71.52	Carl	Knapp	Bellingham Orchard Ltd.	Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
71.55	Carl	Knapp	Bellingham Orchard Ltd.	Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
72.48	Justin	Addis	Armada Orchard Ltd	Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.

72.52	Justin	Addis	Armadale Orchard Ltd	Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
72.55	Justin	Addis	Armadale Orchard Ltd	Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
73.48	Bevan	Davidson		Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
73.52	Bevan	Davidson		Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
73.55	Bevan	Davidson		Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
77.48	David & Sheryl	Mackie		Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
77.52	David & Sheryl	Mackie		Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
77.55	David & Sheryl	Mackie		Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
79.48	Richard	Penreath		Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
79.52	Richard	Penreath		Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
79.55	Richard	Penreath		Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
86.48	Peter	Scott		Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
86.52	Peter	Scott		Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
86.55	Peter	Scott		Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
91.47	Johnny	Milmine	Berry Farms NZ	Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
91.51	Johnny	Milmine	Berry Farms NZ	Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
91.54	Johnny	Milmine	Berry Farms NZ	Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
95.48	Johnny	Milmine	Prime Limes	Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
95.52	Johnny	Milmine	Prime Limes	Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
95.55	Johnny	Milmine	Prime Limes	Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
96.48	Mike	Davis	Davis Orchards Ltd	Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
96.52	Mike	Davis	Davis Orchards Ltd	Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
96.55	Mike	Davis	Davis Orchards Ltd	Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
97.49	Lesley	Wilson	DN & LR Wilson Ltd	Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.

97.53	Lesley	Wilson	DN & LR Wilson Ltd	Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
97.57	Lesley	Wilson	DN & LR Wilson Ltd	Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
99.74	Jerf	van Beek	Twyford Water	Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
99.78	Jerf	van Beek	Twyford Water	Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
99.81	Jerf	van Beek	Twyford Water	Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
104.48	John	Loughlin	Rockit Global Limited	Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
104.52	John	Loughlin	Rockit Global Limited	Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
104.55	John	Loughlin	Rockit Global Limited	Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
105.48	Scott	Lawson		Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
105.52	Scott	Lawson		Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
105.55	Scott	Lawson		Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
110.48	Edward	Whyte	Whyte & Co	Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
110.52	Edward	Whyte	Whyte & Co	Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
110.55	Edward	Whyte	Whyte & Co	Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
122.48	Richard	Penreath	Ngai Tukairangi Trust	Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
122.52	Richard	Penreath	Ngai Tukairangi Trust	Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
122.55	Richard	Penreath	Ngai Tukairangi Trust	Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
132.73	Marei	Apatu	Te Taiwhenua o Heretaunga	Flow Maintenance	Amend	Rule TANK 9 - Omit the stream depletion tool from informing water management and resource consent processes until the tool is recalibrated using data and extrapolations of data from surface water depletion effects acquired during the irrigation season, and inclusion of depletion effects on surface water flows during low-flow events (at flows below MALF).
185.48	Allen	Kittow	Tremaine Farms Ltd	Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
185.52	Allen	Kittow	Tremaine Farms Ltd	Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
185.55	Allen	Kittow	Tremaine Farms Ltd	Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
186.48	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
186.52	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
186.55	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.

195.96	Peter	Matich	Federated Farmers of New Zealand	Flow Maintenance	Support	That Rule TANK 18 retained as notified
196.49	Julian	Odering	Oderings Nurseries	Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
196.53	Julian	Odering	Oderings Nurseries	Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
196.57	Julian	Odering	Oderings Nurseries	Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
210.99	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Flow Maintenance	Oppose	TANK 18: Delete rule and associated framework for stream flow compensation schemes. Delete all references to maintenance/enhancement/augmentation throughout the plan.
211.48	Brian	McLay		Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
211.52	Brian	McLay		Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
211.55	Brian	McLay		Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
214.48	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
214.52	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
214.55	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
215.48	Peter	Dooney	Dooney Partnership	Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
215.52	Peter	Dooney	Dooney Partnership	Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
215.55	Peter	Dooney	Dooney Partnership	Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
217.47	Paul	Paynter	Johnny Appleseed Holdings Ltd	Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
217.51	Paul	Paynter	Johnny Appleseed Holdings Ltd	Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
217.54	Paul	Paynter	Johnny Appleseed Holdings Ltd	Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
218.48	Adrian	Mannering	Irrigation Services	Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
218.52	Adrian	Mannering	Irrigation Services	Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
218.55	Adrian	Mannering	Irrigation Services	Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
219.48	Michael & Julie	Russell		Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
219.52	Michael & Julie	Russell		Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
219.55	Michael & Julie	Russell		Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.

220.48	Steve	Gillum	Gillum Springfield Trust	Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
220.52	Steve	Gillum	Gillum Springfield Trust	Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
220.55	Steve	Gillum	Gillum Springfield Trust	Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
221.48	WT	Scott		Flow Maintenance	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
221.52	WT	Scott		Flow Maintenance	Oppose	TANK 18: Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
221.55	WT	Scott		Flow Maintenance	Oppose	TANK18: Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
POL TANK 39						
3.17	Gavin	Yort	Limestone Properties Limited	POL TANK 39	Oppose	Amend Policy 5.10.6 Policy 39 to be consistent with RRMP POL TT11 and Table 5.9.7.
8.36	Rengasamy	Balasubramaniam	Delegat Limited	POL TANK 39	Oppose	Oppose Policy 39 - Amend Policies 39, 40 and 45 and Schedule 36 to enable an individual consent holder to mitigate their stream depletion effects, including though the use of stored water captured at times of high river flow.
8.40	Rengasamy	Balasubramaniam	Delegat Limited	POL TANK 39	Oppose	Oppose Policy 39 - Amend Policies 39, 40 and 41 so that it is clear that HBRC will fully implement Policy 41 <u>before</u> requiring individual consent holders to mitigate stream depletion effects by way of contributions to "stream flow maintenance and habitat enhancement schemes".
14.8	Ryan	Fraser		POL TANK 39	Amend	Amend Policy 39 - Amend to apply flow maintenance requirement only to suitable lowland streams, remove the presumption that the mainstem of the Ngaruroro River should be augmented in whole or in part and require Council to take a central role in establishment of flow maintenance schemes in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels (excluding an allowance for basic human needs), based on annual consent volume
15.1	Andrea and Phil	Cranswick	Meridiem Trust	POL TANK 39	Amend	Amend Policy 39 - Amend to apply flow maintenance requirement only to suitable lowland streams, remove the presumption that the mainstem of the Ngaruroro River should be augmented in whole or in part and require Council to take a central role in establishment of flow maintenance schemes in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels (excluding an allowance for basic human needs), based on annual consent volume
18.12	Mark	Cairns	MD Cairns & AR Wright Partnership	POL TANK 39	Not Stated	Understand that HBRC will be submitting a proposed alternative approach to the requirements in Policy 39. I support, in principle, jointly-funded collective stream flow maintenance schemes on suitable lowland streams, facilitated by HBRC.
20.10	Bruce	Nimon		POL TANK 39	Amend	Amend Policy 39 - Amend to apply flow maintenance requirement only to suitable lowland streams, remove the presumption that the mainstem of the Ngaruroro River should be augmented in whole or in part and require Council to take a central role in establishment of flow maintenance schemes in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels (excluding an allowance for basic human needs), based on annual consent volume
25.12	Xan	Harding		POL TANK 39	Not Stated	Understand that HBRC will be submitting a proposed alternative approach to the requirements in Policy 39. I support, in principle, jointly-funded collective stream flow maintenance schemes on suitable lowland streams, facilitated by HBRC.
26.12	Robin	Back	Dunvegan Estate	POL TANK 39	Not Stated	Understand that HBRC will be submitting a proposed alternative approach to the requirements in Policy 39. I support, in principle, jointly-funded collective stream flow maintenance schemes on suitable lowland streams, facilitated by HBRC.
28.12	Hamish	Clark	Saint Clair Family Estate Ltd	POL TANK 39	Not Stated	Understand that HBRC will be submitting a proposed alternative approach to the requirements in Policy 39. I support, in principle, jointly-funded collective stream flow maintenance schemes on suitable lowland streams, facilitated by HBRC.
34.12	Jonathan	Hamlet	Craggy Range Vineyards Limited	POL TANK 39	Not Stated	Understand that HBRC will be submitting a proposed alternative approach to the requirements in Policy 39. I support, in principle, jointly-funded collective stream flow maintenance schemes on suitable lowland streams, facilitated by HBRC.
36.10	Karen	Morrish	Mr Apple New Zealand Ltd	POL TANK 39	Amend	Clarify/amend Policy 39. b) It is understood that domestic takes are to be reduced from 20m3 to 5m3/day. Does this include Recognised Seasonal Employer (RSE) accommodations? If not, then are these accommodation sites taken into consideration when calculating reasonable water allocations? What is an individual's water use considered to be daily? We can have 90 or more seasonal employees staying on-site. They generally use water from our "general" commercial water-takes, which can add up. We would want to make sure that water remains available for them, and that our commercial use is not unduly penalised, because in response to worker accommodation issues, we are providing that on-site.

39.12	Bridget	Wilton	MbandSons	POL TANK 39	Not Stated	Understand that HBRC will be submitting a proposed alternative approach to the requirements in Policy 39. I support, in principle, jointly-funded collective stream flow maintenance schemes on suitable lowland streams, facilitated by HBRC.
41.12	Jonathan	Milmine	Milmine Holdings Limited	POL TANK 39	Not Stated	Understand that HBRC will be submitting a proposed alternative approach to the requirements in Policy 39. I support, in principle, jointly-funded collective stream flow maintenance schemes on suitable lowland streams, facilitated by HBRC.
42.8	Glenn	Riddell	Glenmore Orchard	POL TANK 39	Oppose	Amend Plan Change 9 so that permit holders who are required to cease abstraction because they are linked to the Ngaruroro River "low flow trigger limit" are exempt from policy 39(a)(i)
42.10	Glenn	Riddell	Glenmore Orchard	POL TANK 39	Oppose	Amend Change 9 so that the costs associated with implementing an augmentation scheme is funded by all permit holders who benefit from such a scheme, including municipal and industrial users
48.12	Paul	Ham	Alpha Domus	POL TANK 39	Not Stated	Understand that HBRC will be submitting a proposed alternative approach to the requirements in Policy 39. I support, in principle, jointly-funded collective stream flow maintenance schemes on suitable lowland streams, facilitated by HBRC.
53.12	Chris	Howell	CD & CM Howell Partnership	POL TANK 39	Not Stated	Understand that HBRC will be submitting a proposed alternative approach to the requirements in Policy 39. I support, in principle, jointly-funded collective stream flow maintenance schemes on suitable lowland streams, facilitated by HBRC.
63.7	Keith	Marshall	Napier City Council	POL TANK 39	Amend	Amend Policy 39 as follow to: 1. Re-order the sequence of the Policy (shift ba and c to a and b) 2. Provide for a Water Conservation Strategy approach for municipal takes rather than a requirement to cease. <u>Suggested wording provided.</u>
68.12	Geoffrey	Smith	Vine Nursery New Zealand and Waikahu Vineyard	POL TANK 39	Not Stated	Understand that HBRC will be submitting a proposed alternative approach to the requirements in Policy 39. I support, in principle, jointly-funded collective stream flow maintenance schemes on suitable lowland streams, facilitated by HBRC.
75.12	Andria	Monin	Stonecroft Wines Limited	POL TANK 39	Not Stated	Understand that HBRC will be submitting a proposed alternative approach to the requirements in Policy 39. I support, in principle, jointly-funded collective stream flow maintenance schemes on suitable lowland streams, facilitated by HBRC.
76.12	Larry	Morgan	Te Mata Estate Winery Ltd	POL TANK 39	Not Stated	Understand that HBRC will be submitting a proposed alternative approach to the requirements in Policy 39. I support, in principle, jointly-funded collective stream flow maintenance schemes on suitable lowland streams, facilitated by HBRC.
81.12	Tony	Smith	Babich Wines	POL TANK 39	Not Stated	Understand that HBRC will be submitting a proposed alternative approach to the requirements in Policy 39. I support, in principle, jointly-funded collective stream flow maintenance schemes on suitable lowland streams, facilitated by HBRC.
82.13	Trevor	Robinson	Lowe Corporation Limited	POL TANK 39	Amend	Delete Policy 39 and substitute: A Council commitment to assess and develop stream augmentation options in consultation with all sectors of the community including iwi that are efficient, cost effective, and which ensure satisfactory ecosystem outcomes in the surface water bodies affected by groundwater takes from the Heretaunga Aquifer during summer low flow periods; and Require applications to renew consents for groundwater abstraction in the Heretaunga Plains Water Management Unit to demonstrate and implement industry good practice standards in the interim in accordance with Policy 52'.
82.14	Trevor	Robinson	Lowe Corporation Limited	POL TANK 39	Amend	Amend the rules in PC9 to be consistent with submission point 8.13.
84.12	Grant	Edmonds	Redmetal Vineyards Ltd	POL TANK 39	Not Stated	Understand that HBRC will be submitting a proposed alternative approach to the requirements in Policy 39. I support, in principle, jointly-funded collective stream flow maintenance schemes on suitable lowland streams, facilitated by HBRC.
87.12	Peter	Scott	Kereru Road Vineyard	POL TANK 39	Not Stated	Understand that HBRC will be submitting a proposed alternative approach to the requirements in Policy 39. I support, in principle, jointly-funded collective stream flow maintenance schemes on suitable lowland streams, facilitated by HBRC.
88.12	Jacqui	Cormack	Constellation Brands NZ Limited (CBNZ)	POL TANK 39	Not Stated	Understand that HBRC will be submitting a proposed alternative approach to the requirements in Policy 39. I support, in principle, jointly-funded collective stream flow maintenance schemes on suitable lowland streams, facilitated by HBRC.
94.12	Deane	Caughey	Indevin Group Ltd	POL TANK 39	Not Stated	Understand that HBRC will be submitting a proposed alternative approach to the requirements in Policy 39. I support, in principle, jointly-funded collective stream flow maintenance schemes on suitable lowland streams, facilitated by HBRC.
99.15	Jerf	van Beek	Twyford Water	POL TANK 39	Not Stated	Supports maintaining (a)(i) and providing ongoing ability for individuals to manage their own effects. Twyford Water also supports the ability for stream depletion effects to be managed collectively, but believes it will be extremely difficult for schemes to be developed by consent applicants, and therefore submits that these schemes are developed in a progressive manner by HBRC – based on water permit expiry dates . It is critical that HBRC takes on a central role in their development. Important to ensure that the stream depletion calculator, that will be used to calculate the stream depletion effect of each take, has been developed using robust scientific approaches, and it has been adequately peer reviewed, given how significant the impact of its calculations are going to be for water permit holders.
102.12	Ritchie	Garnham	Booster Wine Group	POL TANK 39	Not Stated	Understand that HBRC will be submitting a proposed alternative approach to the requirements in Policy 39. I support, in principle, jointly-funded collective stream flow maintenance schemes on suitable lowland streams, facilitated by HBRC.

107.12	Christopher	Harrison	Beach House Wines Ltd	POL TANK 39	Not Stated	Understand that HBRC will be submitting a proposed alternative approach to the requirements in Policy 39. I support, in principle, jointly-funded collective stream flow maintenance schemes on suitable lowland streams, facilitated by HBRC.
123.74	Jenny	Nelson-Smith	Department of Conservation	POL TANK 39	Oppose	Delete all references to stream flow maintenance from PC9. Policy 39 a) - Insert wording to the effect that flows need to be above cut off trigger when schemes start.
124.25	Bridget	Margerison	Brownrigg Agriculture Group Ltd	POL TANK 39	Oppose	Amend Policy 5.10.6 Policy 39 to also enable individual consent holder stream augmentation mitigation or offsetting actions.
129.2	Ceri	Edmonds	Hawke's Bay Regional Council	POL TANK 39	Oppose	Delete policy 39 and replace with new policy in relation to assessing applications to take groundwater in the Heretaunga Plains that includes the following direction: A commitment by Council to: (a) consult with iwi and other relevant parties to investigate the environmental, technical, cultural and economic feasibility of options for stream flow maintenance and habitat enhancement schemes including water storage and release options and groundwater pumping and discharge options that: (i) maintain stream flows in lowland rivers above trigger levels where groundwater abstraction is depleting stream flows and: (ii) improve oxygen levels and reduce water temperatures. (b) determine the preferred solutions taking into account whether: (i) wide-scale aquatic ecosystem benefits are provided by maintaining stream flow across multiple streams (ii) multiple benefits can be met including for flood control and climate change resilience (iii) the solutions are efficient and cost effective (iv) scheme design elements to improve ecological health of affected waterbodies have been incorporated (v) opportunities can be provided to improved public access to affected waterways. (c) develop and implement a funding mechanism that enables the Council to recover the costs of developing, constructing and operating stream flow maintenance and habitat enhancement schemes from permit holders, including where appropriate, (i) management responses that enable permit holders to manage local solutions and (ii) commitment to develop any further plan change within an agreed timeframe if necessary to implement a funding solution. (d) ensure that stream flow maintenance and habitat enhancement schemes are constructed and operating within ten years of the operative date of the Plan while adopting a priority regime according to the following criteria: (i) solutions that provide wide-scale benefit for maintaining stream flow across multiple streams (ii) solutions that provide flow maintenance for streams that are high priority for management action because of low oxygen levels. (e) review as per Policy 42 if no stream flow maintenance and habitat enhancement schemes are found to be feasible
135.42	Anna	Wilkes	Ravensdown Limited	POL TANK 39	Amend	Amend policy 39 as follows: • a)(ii) enable <u>encourage</u> consent applicants to develop or contribute to stream flow maintenance and habitat enhancement schemes that; ... • b) assess the relative the contribution to stream depletion from groundwater takes and require stream depletion to be offset equitably by consent holders while providing for exceptions for the use of water for essential human health; and
143.11	Peter	Hyslop	Strathallan Trust	POL TANK 39	Not Stated	Understand that HBRC will be submitting a proposed alternative approach to the requirements in Policy 39. I support, in principle, jointly-funded collective stream flow maintenance schemes on suitable lowland streams, facilitated by HBRC.
165.12	Caleb	Dennis	Aotearoa New Zealand Fine Wine Estates LP	POL TANK 39	Not Stated	Understand that HBRC will be submitting a proposed alternative approach to the requirements in Policy 39. I support, in principle, jointly-funded collective stream flow maintenance schemes on suitable lowland streams, facilitated by HBRC.
179.12	Wim	Barendsen	Otawahao Farms Ltd	POL TANK 39	Not Stated	Understand that HBRC will be submitting a proposed alternative approach to the requirements in Policy 39. I support, in principle, jointly-funded collective stream flow maintenance schemes on suitable lowland streams, facilitated by HBRC.
180.41	Charlotte	Drury	Horticulture New Zealand	POL TANK 39	Amend	Amend as follows: e) enable permit holders to progressively and collectively through Water User Collectives develop and implement flow maintenance and habitat enhancement schemes as water permits are replaced or reviewed, in the order consistent with water permit expiry dates.)
193.6	Bruce	Mackay	Heinz Wattie's Limited	POL TANK 39	Amend	Policy 39 b) - There should be a stated volume per head per day, thereafter municipal authorities are responsible to offset equitably the cost of these "unknown" schemes. Develop the stream depletion maintenance and enhancement programmes based on water supply originating from stored water. Begin the programme with the most responsive and cost effective surface water bodies, and monitor effectiveness. Policy needs to be considered in terms of possible financial impacts on water users

194.53	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 39	Oppose	Clarification on the intent of Policy 39.
195.61	Peter	Matich	Federated Farmers of New Zealand	POL TANK 39	Amend	That Policy 39 be deleted: ... b) assess the relative the contribution to stream depletion from groundwater takes and require stream depletion to be off-set equitably by consent holders while providing for exceptions for the use of water for essential human health; and And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
199.12	Peter	Robertson	Brookfields Vineyards/Ohiti Estate	POL TANK 39	Not Stated	Understand that HBRC will be submitting a proposed alternative approach to the requirements in Policy 39. I support, in principle, jointly-funded collective stream flow maintenance schemes on suitable lowland streams, facilitated by HBRC.
204.12	Juliet	Gray	Peter Lyons Trust (Lyons Vineyard)	POL TANK 39	Not Stated	Understand that HBRC will be submitting a proposed alternative approach to the requirements in Policy 39. I support, in principle, jointly-funded collective stream flow maintenance schemes on suitable lowland streams, facilitated by HBRC.
207.7	Mark	Clews	Hastings District Council	POL TANK 39	Amend	Amend Policy 39 as follow to: 1. Re-order the sequence of the Policy (shift ba and c to a and b) 2. Provide for a Water Conservation Strategy approach for municipal takes rather than a requirement to cease. Suggested wording provided.
208.11	Emma	Taylor	Villa Maria Estate Limited	POL TANK 39	Not Stated	Understand that HBRC will be submitting a proposed alternative approach to the requirements in Policy 39. I support, in principle, jointly-funded collective stream flow maintenance schemes on suitable lowland streams, facilitated by HBRC.
210.60	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 39	Oppose	Delete policy and all references to stream flow maintenance in the plan
213.12	Peter	Scott	The Wine Portfolio	POL TANK 39	Not Stated	Understand that HBRC will be submitting a proposed alternative approach to the requirements in Policy 39. I support, in principle, jointly-funded collective stream flow maintenance schemes on suitable lowland streams, facilitated by HBRC.
238.11	Emma	Taylor	Gimblett Gravels Winegrowers Association	POL TANK 39	Support	Understand that HBRC will be submitting a proposed alternative approach to the requirements in Policy 39. I support, in principle, jointly- funded collective stream flow maintenance schemes on suitable lowland streams, facilitated by HBRC.
POL TANK 40						
8.37	Rengasamy	Balasubramaniam	Delegat Limited	POL TANK 40	Oppose	Oppose Policy 40 - Amend Policies 39, 40 and 45 and Schedule 36 to enable an individual consent holder to mitigate their stream depletion effects, including though the use of stored water captured at times of high river flow.
8.41	Rengasamy	Balasubramaniam	Delegat Limited	POL TANK 40	Oppose	Oppose Policy 40 - Amend Policies 39, 40 and 41 so that it is clear that HBRC will fully implement Policy 41 <u>before</u> requiring individual consent holders to mitigate stream depletion effects by way of contributions to “stream flow maintenance and habitat enhancement schemes”.
59.7	Ronald	McFetridge	WaterForce Limited	POL TANK 40	Support	No specific decision requested but states support for Policy 40(e)(iii).
63.8	Keith	Marshall	Napier City Council	POL TANK 40	Amend	Amend Policy 40 to enable transfers of allocated but un-used water if this to assist augmentation. Suggested wording provided.
66.7	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	POL TANK 40	Support	States support for Policy 40(e)(iii)
123.75	Jenny	Nelson-Smith	Department of Conservation	POL TANK 40	Oppose	Delete all references to stream flow maintenance from PC9.
194.56	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 40	Support	Retain as drafted.
195.62	Peter	Matich	Federated Farmers of New Zealand	POL TANK 40	Amend	Amend policy 40 to refer to <u>anticipated</u> improvements to water quality, and 25-year consent durations. Specific wording provided. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
207.8	Mark	Clews	Hastings District Council	POL TANK 40	Amend	Amend Policy 40 to enable transfers of allocated but un-used water if this to assist augmentation. Suggested wording provided.
210.61	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 40	Oppose	Delete policy and all references to stream flow maintenance in the plan
POL TANK 41						
8.42	Rengasamy	Balasubramaniam	Delegat Limited	POL TANK 41	Oppose	Oppose Policy 41 - Amend Policies 39, 40 and 41 so that it is clear that HBRC will fully implement Policy 41 <u>before</u> requiring individual consent holders to mitigate stream depletion effects by way of contributions to “stream flow maintenance and habitat enhancement schemes”.
42.9	Glenn	Riddell	Glenmore Orchard	POL TANK 41	Oppose	Amend Plan Change 9 so that permit holders who are required to cease abstraction because they are linked to the Ngaruroro River "low flow trigger limit" should be exempt from policy 39 a (i).
42.11	Glenn	Riddell	Glenmore Orchard	POL TANK 41	Oppose	Amend Change 9 so that costs associated with implementing an augmentation scheme are funded by all permit holders who benefit from such a scheme, including municipal and industrial users
59.8	Ronald	McFetridge	WaterForce Limited	POL TANK 41	Not Stated	No specific decision requested but states support for Policy 41(a).

63.9	Keith	Marshall	Napier City Council	POL TANK 41	Amend	Amend Policy 41 so there is a clear intention to be working towards this such that its implementation can be considered as part of the Plan review in 10 years when the groundwater limit is to be defined as this is likely to be a very relevant factor. <u>Suggested wording provided.</u>
66.8	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	POL TANK 41	Support	Amend Policy 40(e) to read: "further investigating the environmental, technical, cultural and economic feasibility of a water storage and release scheme to offset the <u>effects of flow below the minimum flow (2400L/s) cumulative stream depletion effect of groundwater takes</u> "
99.16	Jerf	van Beek	Twyford Water	POL TANK 41	Not Stated	Opposes the current wording of this policy, as 'remedying' the effects of all groundwater takes on the Ngaruroro which would be a huge undertaking and the only me when this would be beneficial is at the trigger of the low flow of 2400l/s. The wording of the policy needs to be amended so that the trigger point for remedying the effects is at the low flow level of 2400l/s which then clearly will see a beneficial gain of the river flow for environmental outcomes.
99.106	Jerf	van Beek	Twyford Water	POL TANK 41	Amend	Amended so that the trigger point for remedying the effects is at the low flow level of 2400l/s which then clearly will see a beneficial gain of the river flow for environmental outcomes. "remedy" should come from "all users" of water on the Heretaunga plains <u>including suburban households and industry.</u>
123.76	Jenny	Nelson-Smith	Department of Conservation	POL TANK 41	Oppose	Delete and include policies to manage stream depletion effects through sustainable allocation of water resources
135.43	Anna	Wilkes	Ravensdown Limited	POL TANK 41	Support	Retain Policy 41 as notified.
180.42	Charlotte	Drury	Horticulture New Zealand	POL TANK 41	Oppose	Amend as follows: The Council will <u>further consider the option of remedying</u> the stream depletion effects of groundwater takes in the Heretaunga Plains Water Management Unit on the Ngaruroro River, in consultation with mana whenua, land and water users and the wider community through: a) further investigating the environmental, technical, cultural, <u>social</u> and economic feasibility of a water storage and release <u>scheme to off-set the cumulative stream depletion effect of groundwater takes:</u>
194.57	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 41	Oppose	Amend the policy to refer to offsetting 'in full or in part' (or equivalent language to indicate that something less than a 100% offset would be able to be considered).
195.63	Peter	Matich	Federated Farmers of New Zealand	POL TANK 41	Support	That Policy 41 be retained as notified
207.9	Mark	Clews	Hastings District Council	POL TANK 41	Amend	Amend Policy 41 so there is a clear intention to be working towards this such that its implementation can be considered as part of the Plan review in 10 years when the groundwater limit is to be defined as this is likely to be a very relevant factor. <u>Suggested wording provided.</u>
210.62	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 41	Oppose	Delete. Include policies to manage stream depletion effects through the sustainable allocation of water.
Groundwater Management Review						
29.27	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Groundwater Management Review	Amend	Amend Policy 42.d to read "the extent of any stream flow maintenance, <u>groundwater augmentation</u> and habitat enhancement schemes..." or similar wording to achieve the outcome sought in this submission. Amend Policy 42.e(ii) to read "effectiveness of <u>any</u> stream flow maintenance schemes and <u>groundwater augmentation schemes</u> in maintaining water flows <u>and levels</u> ..." or similar wording to achieve the outcome sought in this submission.
63.1	Keith	Marshall	Napier City Council	Groundwater Management Review	Amend	Amend Change 9 so that there is a more strategic approach around investigating and establishing flow enhancement schemes <u>to inform/enable this review.</u>
84.21	Grant	Edmonds	Redmetal Vineyards Ltd	Groundwater Management Review	Oppose	Amend the policy to give efficient users of the resource a greater proportion of their calculated needs and also to allow some leeway in the event of a crop change that would require higher water use. This could be achieved by an "averaging" of water use so that inefficient users would need to become significantly more efficient and already efficient users would not have their property values constrained by a lack of allocation for more water intensive crops. This particularly applies to smaller blocks where water storage is impractical and they are more likely to convert to more intensive high value crops.
207.10	Mark	Clews	Hastings District Council	Groundwater Management Review	Amend	Amend Change 9 so that there is a more strategic approach around investigating and establishing flow enhancement schemes <u>to inform/enable this review.</u>
POL TANK 42						
34.2	Jonathan	Hamlet	Craggy Range Vineyards Limited	POL TANK 42	Amend	Amend Policy 37.d(ii) to read "(ii) apply an assessment of actual and reasonable use that reflects land use and water use authorised in the ten years up to <u>August 2017-30 June 2020 (the end of the 2020 water year)</u> ..." or similar wording to achieve the outcome sought in this submission. Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: •the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; •The volume of expiring consent being replaced", <u>or similar wording to achieve the outcome sought in this submission.</u>
47.8	John	Bostock	John Bostock & Eddie Crasborn	POL TANK 42	Amend	Amend Policy 42 g) - The plan change should not be based on theoretical over-allocation but on actual use and real-world <u>adverse effects and mitigation.</u>
58.25	Peter	Wilson	Hawkes Bay Fish and Game Council	POL TANK 42	Amend	Remove Policy 42 in its entirety.

63.11	Keith	Marshall	Napier City Council	POL TANK 42	Amend	Amend the Policy to include consideration of information on the long term sustainable equilibrium of the groundwater resource. Suggested wording provided.
123.77	Jenny	Nelson-Smith	Department of Conservation	POL TANK 42	Oppose	42 g) - Provide a date when the over allocation of groundwater will be phased out.
135.44	Anna	Wilkes	Ravensdown Limited	POL TANK 42	Oppose	Delete Policy 42 in its entirety.
194.58	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 42	Amend	Policy 5.10.6.42(d) should be amended along the lines of 'the extent of any stream flow maintenance, augmentation, or habitat enhancement schemes'. Policy 5.10.6.42(e)(ii) should be amended along the lines of 'effectiveness of stream flow maintenance schemes and augmentation schemes in maintaining water flows and improving water quality'.
195.64	Peter	Matich	Federated Farmers of New Zealand	POL TANK 42	Amend	That Policy 42 be amended as follows 42. After water has been re-allocated and consents reviewed in accordance with Policies 36 - 38, the Council will commence a review of these provisions <u>by 2025</u> within ten years of in accordance with Section 79 of the RMA and will determine: ... And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
201.41	Liz	Munroe	Heretaunga Tamatea Settlement Trust	POL TANK 42	Oppose	Withdraw Policy 42.
207.11	Mark	Clews	Hastings District Council	POL TANK 42	Amend	Amend the Policy to include consideration of information on the long term sustainable equilibrium of the groundwater resource. Suggested wording provided.
210.63	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 42	Oppose	Delete. Replace with a policy to phase out overallocation.
5.10.7 Policies: Surface Water Low Flow Management						
13.1	Alec	Duncan	Fire and Emergency New Zealand	5.10.7 Policies: Surface Water Low Flow Management	Support	Support 5.10.7 Policies - retain as proposed.
16.4	Bernadette	Hamlin		5.10.7 Policies: Surface Water Low Flow Management	Oppose	Amend Change 9 to reduce allocations and abstractions that contribute to low flow that are affecting traditional waterbodies.
91.76	Johnny	Milmine	Berry Farms NZ	5.10.7 Policies: Surface Water Low Flow Management	Not Stated	No specific decision requested but states that not having irrigation water is not an option.
91.78	Johnny	Milmine	Berry Farms NZ	5.10.7 Policies: Surface Water Low Flow Management	Not Stated	No specific decision requested but implies opposition to modelling relying on water use history from 2007-17 for growers that utilize tunnels, glass houses, or other cover types.
95.8	Johnny	Milmine	Prime Limes	5.10.7 Policies: Surface Water Low Flow Management	Not Stated	No specific decision requested but implies opposition to modelling relying on water use history from 2007-17 for growers that utilize tunnels, glass houses, or other cover types.
118.2	Hugo	Beamish		5.10.7 Policies: Surface Water Low Flow Management	Amend	47a) In support with the following revision: Recommend the words "technical", "physically" and "wasted" be removed.
120.42	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.7 Policies: Surface Water Low Flow Management	Amend	Ensure all water takes are required to cease at minimum flows, except essential water takes for human drinking water supplies (which should be required to reduce during water shortages and at minimum flows).
120.44	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.7 Policies: Surface Water Low Flow Management	Amend	Abstractions which deplete streams should cease when minimum flows are reached in all cases
132.14	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10.7 Policies: Surface Water Low Flow Management	Amend	Security of supply provisions should relate directly to sustainable amounts of abstraction for groundwater and surface water, be based on a sound methodology and reliable research, take into account the effects and constraints due to climate change, and be drafted so as to promote the purpose of the Act and give effect to the NPS-FM (2017).
132.44	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10.7 Policies: Surface Water Low Flow Management	Amend	Introduce elevated minimum flow limits and targets that ultimately result in 90% habitat protection/provision for trout/torrentfish during the irrigation season by June 2029
132.49	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10.7 Policies: Surface Water Low Flow Management	Amend	Require renewal of existing consents to take surface water upon current consent expiry, or when PC9 becomes operative, whichever occurs first.
132.142	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10.7 Policies: Surface Water Low Flow Management	Amend	Reduce the number of 'minimum flows' used for regulating water abstraction in rivers and streams in the TANK catchments, and include all flows used for resource consent processes and management purposes, in PC9.
132.147	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10.7 Policies: Surface Water Low Flow Management	Amend	Include an updated Q95 methodology for setting minimum flows 18, related allocatable volumes, and derive a security of supply regime for surface water abstractions, and surface water depleting abstractions, from this.
132.149	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10.7 Policies: Surface Water Low Flow Management	Amend	Require all abstraction for irrigation to cease when flows recede below minimum flows.
132.150	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10.7 Policies: Surface Water Low Flow Management	Amend	Apply minimum flows for major rivers and their main tributaries for the period 01 May to 30 Oct that equates to 2x MALF.
132.169	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10.7 Policies: Surface Water Low Flow Management	Amend	Ensure a cultural flow of 2x MALF is provided for outside of the six-month irrigation season - i.e., from 1 May through to 30 October, for all main rivers and their major tributaries in the TANK catchments. Amend the proposed plan to make irrigation of crops and pasture from surface water bodies (other than from water storage, and for frost protection purposes) during these months a "non-complying activity".
132.174	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10.7 Policies: Surface Water Low Flow Management	Amend	Where streams are dry due to excessive abstraction of groundwater, reduce surface water depleting takes to help restore groundwater tables and levels, and enable the surface water body to flow again.
132.189	Marei	Apatu	Te Taiwhenua o Heretaunga	5.10.7 Policies: Surface Water Low Flow Management	Amend	Make the taking of water for irrigation below minimum flows, a prohibited activity.
185.76	Allen	Kittow	Tremaine Farms Ltd	5.10.7 Policies: Surface Water Low Flow Management	Not Stated	No specific decision requested but implies reduced access to water from the Paritua Stream could have economic effects.

191.9	Rangiwhiua	Robin	Mangaroa Marae	5.10.7 Policies: Surface Water Low Flow Management	Oppose	Gradual elevation of minimum flow
194.6	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	5.10.7 Policies: Surface Water Low Flow Management	Support	Policies 44 and 55 - Retain as drafted.
206.3	Waiariki	Davis	Waipatu Marae	5.10.7 Policies: Surface Water Low Flow Management	Oppose	Restore streams to improve water flows
210.13	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	5.10.7 Policies: Surface Water Low Flow Management	Amend	Remove any provisions for 'stream flow augmentation/maintenance/enhancement'
210.16	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	5.10.7 Policies: Surface Water Low Flow Management	Amend	Insert increased minimum flows, for the Ngaruroro River in particular, with interim timeframes to achievement (like that for the Tukituki River in PC6)
210.17	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	5.10.7 Policies: Surface Water Low Flow Management	Amend	Insert minimum flows for the Ahuriri catchment (and other omitted waterbodies).
232.6	Levi	Walford	Matahiwi Marae	5.10.7 Policies: Surface Water Low Flow Management	Oppose	Elevate the minimum flow in all rivers to provide a 90% habitat provision for the range of aquatic life that prefer fast flowing river reaches
Flow Management Regimes; Tutaekuri, Ahuriri, Ngaruroro and Karamu						
16.6	Bernadette	Hamlin		Flow Management Regimes; Tutaekuri, Ahuriri, Ngaruroro and Karamu	Oppose	Amend Change 9 so that the minimum flow in the Ngaruroro River is raised to provide 90% habitat provision for species that prefer fast flows.
120.48	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Flow Management Regimes; Tutaekuri, Ahuriri, Ngaruroro and Karamu	Amend	Set minimum flows for the Ahuriri catchment (and estuary).
120.50	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Flow Management Regimes; Tutaekuri, Ahuriri, Ngaruroro and Karamu	Amend	Significantly increase the minimum flow in the Ngaruroro River to provide more habitat for indigenous fish at low flows.
132.40	Marei	Apatu	Te Taiwhenua o Heretaunga	Flow Management Regimes; Tutaekuri, Ahuriri, Ngaruroro and Karamu	Amend	Enable a gradual reduction in allocations from the Ngaruroro River to 700,000 m3 per week total, and a cumulative allocation rate of 1,581 lps (inclusive of rates of take and surface water depletion rates from Ngaruroro tributaries) from the date PC9 becomes operative - as regulated from Fernhill Bridge.
132.41	Marei	Apatu	Te Taiwhenua o Heretaunga	Flow Management Regimes; Tutaekuri, Ahuriri, Ngaruroro and Karamu	Amend	Provide for staged increases to the minimum flow for the Ngaruroro up to 4200 litres per second by 01 July 2029
132.42	Marei	Apatu	Te Taiwhenua o Heretaunga	Flow Management Regimes; Tutaekuri, Ahuriri, Ngaruroro and Karamu	Amend	Amend to: •Reduce allocations from the Tutaekuri River to 626,572 m3 per week •increase the minimum flow to 2500 lps at Puketapu Bridge from PC9 operative date. •Aim for target minimum flow of 3,300 lps for the Tutaekuri River by 01 June 2029 •Reduce total allocation rate from the Tutaekuri (inclusive of takes from its tributaries - Mangaone, Mangatutu, Waikonini and Otakarara) to 1036 lps total
132.165	Marei	Apatu	Te Taiwhenua o Heretaunga	Flow Management Regimes; Tutaekuri, Ahuriri, Ngaruroro and Karamu	Amend	Amend PC9 minimum flows during the irrigation season to enable 90% trout and torrentfish habitat protection in the TOtaekurT and Ngaruroro Rivers, and in their major tributaries by 1 July 2029 (See Table 3A below).
132.167	Marei	Apatu	Te Taiwhenua o Heretaunga	Flow Management Regimes; Tutaekuri, Ahuriri, Ngaruroro and Karamu	Amend	Provide for a cultural flow that applies across all rivers and streams in the Tutaekuri, Ahuriri, Ngaruroro and Karamu catchments.
132.173	Marei	Apatu	Te Taiwhenua o Heretaunga	Flow Management Regimes; Tutaekuri, Ahuriri, Ngaruroro and Karamu	Amend	Substantially amend Policy 43 to expand on Zone 1 references and include groundwater takes and their effects that result in 0.5 lps surface water depletion rates or greater. Provide for these calculations to be assessed during the irrigation season.
132.175	Marei	Apatu	Te Taiwhenua o Heretaunga	Flow Management Regimes; Tutaekuri, Ahuriri, Ngaruroro and Karamu	Amend	Make consequential amendments to other parts of PC9 that reference Zone 1, so that the "0.5 lps or greater" depletion rate applies within rules and schedules, and include a security of supply policy that links directly to sustainable volumes and rates of abstraction for both surface water takes and surface water depleting takes.
132.176	Marei	Apatu	Te Taiwhenua o Heretaunga	Flow Management Regimes; Tutaekuri, Ahuriri, Ngaruroro and Karamu	Amend	Ensure these matters (points 174 - 175) acknowledge current uncertainty and the need to adopt a precautionary approach in the interim to safeguard life supporting capacity, and that the method promotes the purpose of the Act and gives effect to the NPS-FM.
132.180	Marei	Apatu	Te Taiwhenua o Heretaunga	Flow Management Regimes; Tutaekuri, Ahuriri, Ngaruroro and Karamu	Amend	Add new Policy 43A and include reference in it to: •Reducing abstraction amounts and abstraction rates from the Ngaruroro River mainstem and from connected groundwaters in Zones 1 and 2; from the Tutaekuri River mainstem and tributaries, and from the Karamu River mainstem and tributaries to achieve limits and targets. •Gradually increasing flow minima in the Ngaruroro River at Fernhill as prescribed in Table 3A, so as to enhance the life-supporting capacity of freshwater and groundwater and increase instream habitat provision for torrentfish and trout.
199.20	Peter	Robertson	Brookfields Vineyards/Ohiti Estate	Flow Management Regimes; Tutaekuri, Ahuriri, Ngaruroro and Karamu	Support	Would object to any change to the Ngaruroro Zone 1 parameter
POL TANK 43						
3.4	Gavin	Yort	Limestone Properties Limited	POL TANK 43	Support	Retain the provision - Policy 43(a) to (d)
8.15	Rengasamy	Balasubramaniam	Delegat Limited	POL TANK 43	Support	Support policy 43 (a), (c) and (d)
30.4	Anthea	Yule	Paranui Farming Trust	POL TANK 43	Amend	Retain clause a) for Ngaruroro River provided that it does not apply to any higher minimum flows than those specified in Schedule 31.

36.11	Karen	Morrish	Mr Apple New Zealand Ltd	POL TANK 43	Amend	Clarify/amend Policy 43. e) No other catchments are increasing. This is an increase from 2000L/s to 2500L/S. What is the science behind this change as 2700L/s has been the lowest flow rate seen in the past? We are concerned at the need for the increase. We are also aware that a number of orchards have been planted recently, and may not have been factored into the analysis.
42.12	Glenn	Riddell	Glenmore Orchard	POL TANK 43	Oppose	Amend Change 9 so that historical low flow river bans are taken into account when determining actual use of individual permit holders.
47.11	John	Bostock	John Bostock & Eddie Crasborn	POL TANK 43	Amend	Amend Policy 43 - BF do not believe the adverse effects of the current allocation minimum flow have been demonstrated and do not warrant raising the minimum flow. The benefits of irrigation bans on the Tutaekuri's natural flow have not been quantified.
51.1	Ivan	Knauf	Wairua Dairies Ltd	POL TANK 43	Support	Support Policy 43.a. Maintaining existing minimum flows for the Ngaruroro River and its' tributaries.
51.2	Ivan	Knauf	Wairua Dairies Ltd	POL TANK 43	Oppose	Oppose Policy 43.b. Reducing the effects of abstraction from the mainstem and connected groundwater in Zone 1 by reducing allocation limit for the Ngaruroro River. If the proposed allocation reduction, was implemented, we believe the maximum effective take would reduce from 650,000 m ³ /week (68% of current allocation) to 534,643 m ³ /week 56% of current allocation and 68% of the recommended 786,240 m ³ /week allocation. I.e. (786,240 m ³ /week x 68% = 534,643 m ³ /week). This would place further stress on irrigation reliant crops not only in drought years. Low flow limits and rates of take are effectively an allocation limit. To further reduce the volume of water by reducing the allocation limit would put further stress on existing irrigators and their business viability and viability of downstream infrastructure in future dry years.
51.3	Ivan	Knauf	Wairua Dairies Ltd	POL TANK 43	Oppose	Policy 43.b. - The Agfirst and Nimmo Bell economic analysis presented to TANK specifically looked at the effects of increasing low flow ban settings on the Ngaruroro and Tutaekuri rivers. We suggest it would be beneficial to investigate the financial effects of this change to allocation in the same way. This type of economic analysis may also help to inform better decision making with less community stress. We believe a new methodology and terminology should be developed to maximise water availability at the same time as protecting the environment. The current system fails to maximise the economic benefit of this resource, which is a requirement of Regional Council under the Resource Management Act along with environmental protection. If the Twyford Zone 1 was to be included as part of the Ngaruroro River allocation the current Twyford Zone allocation should be added to the Ngaruroro River allocation limit. In the past, Zone 1 has been affecting river flows, but has not been included in the river allocation limits or the actual river take figures. Consent holders facing a reduction in allocation of 2400 l/sec water should be offered at least an equivalent volume of high flow water in compensation.
97.88	Lesley	Wilson	DN & LR Wilson Ltd	POL TANK 43	Amend	Keep the Low Flow limit at 2000. We also note that there is a move to decrease the allocation on the Tutaekuri but no mention of what this is to. What do these two policies put together mean. We need analysis which is sorely lacking in this Plan Change.
123.78	Jenny	Nelson-Smith	Department of Conservation	POL TANK 43	Oppose	Delete and amend to cease takes at minimum flows in Schedule 31.
124.13	Bridget	Margerison	Brownrigg Agriculture Group Ltd	POL TANK 43	Support	Policy 43(i) - Support
126.27	James	Lyver	Maungaharuru-Tangitū Trust	POL TANK 43	Amend	Amend Policy 43 to: •Insert a timeframe and specify a procedure for establishing flow management regimes [including allocation limits] in the Ahuriri catch that enables HBRC to: o make necessary adjustments to minimum flows and allocation limits [over and above actual and reasonable use testing], including the use of best available science information, to ensure the flow management regime for the Ahuriri catchment is sustainable; o adjust rates of abstraction, times of abstraction and maximum volumes for abstraction for resource consents/permits for the Ahuriri catchment [on common expiry] to manage abstraction from the Ahuriri catchment within limits.
129.3	Ceri	Edmonds	Hawke's Bay Regional Council	POL TANK 43	Amend	Insert into clauses (b) and (e) reference to the allocation limit being for consumptive water use at times of low flow.
129.4	Ceri	Edmonds	Hawke's Bay Regional Council	POL TANK 43	Amend	Insert into clause (j) reference to the allocation limit being for consumptive use and the total of all abstraction throughout the year.
134.3	Willem	Kupa	Patoka Trust	POL TANK 43	Oppose	Policy 43 has no consideration for mitigation of adverse effects during low flow periods in Zone 1. The kupa family believe mitigation of adverse effects including augmentation should be central to all rules and policies in the plan.
193.7	Bruce	Mackay	Heinz Wattie's Limited	POL TANK 43	Amend	Policy 43 f) - No changes to minimum flows in the Tutaekuri, and no minimum flows established on the Mangone and Mangatutu without further community engagement and agreement.
194.59	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 43	Oppose	Policy 43 (d), (h), and (k) - Amend the definition of 'actual and reasonable' to provide for the efficient allocation and use of water

195.65	Peter	Matich	Federated Farmers of New Zealand	POL TANK 43	Amend	That Policy 43 be amended as follows: 43. The Council will manage river flows and lake or wetland water levels affected by surface water abstraction activities, including groundwater abstraction in Zone 1, during low flow periods so that they meet objectives for aquatic ecosystem health, mauri, tikanga Maori values, and other instream values <u>and out-of-stream reliability of use</u> by;... And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns
201.42	Liz	Munroe	Heretaunga Tamatea Settlement Trust	POL TANK 43	Not Stated	The council will: a) investigate opportunities for wetland creation to improve hydrological functioning and water quality in the river, especially consented for water during low flows; b) improve riparian management to provide shade, reduce macrophyte growth, increased dissolved oxygen levels and decrease water is problematic. c) reduce water permits to ensure flow management regimes provide for 90% of trout habitat
210.64	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 43	Oppose	Delete. Amend to state that flows will be managed to the minimum flows in Schedule 31 (noting our suggested amendments to schedule 31).
Paritua/Karewarewa Streams						
120.49	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Paritua/Karewarewa Streams	Amend	Recognise the Karewarewa and Paritua as separate distinct streams with separate characteristic hydrology and mauri with each having their own individual minimum flows, and respective flow monitoring sites.
POL TANK 44						
123.79	Jenny	Nelson-Smith	Department of Conservation	POL TANK 44	Oppose	The Council "will recognise" should be reframed as "the Council recognises".
195.66	Peter	Matich	Federated Farmers of New Zealand	POL TANK 44	Support	That Policy 44 be retained as notified
210.65	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 44	Oppose	Reframe as "The Council will recognises..." Amend as " <u>investigate opportunities for create</u> wetlands creation to..." Delete provisions d-f Amend to be consistent with RMA and NPSFM requirements to manage effects.
General Water Allocation Policies						
29.28	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	General Water Allocation Policies	Amend	Modify 5.10.7.45.d as required to align with any changes to Policy 39.
132.57	Marei	Apatu	Te Taiwhenua o Heretaunga	General Water Allocation Policies	Amend	Count surface-water depletion effects above 0.5 fps or greater in surface water a/locations.
132.141	Marei	Apatu	Te Taiwhenua o Heretaunga	General Water Allocation Policies	Amend	Apply total instantaneous rate of take limits for TANK rivers and their tributaries, and ensure rates of take are based on sustainable management principles and within sustainable allocation limits. Ensure that these equate directly to allocatable volume totals and allocation rates for each surface water body. Include rates of take for abstraction permits regulated by other <u>flows up to median flows</u> .
132.166	Marei	Apatu	Te Taiwhenua o Heretaunga	General Water Allocation Policies	Amend	Establish minimum flow sites for the Mangaone, Mangatutu and Taruarau Rivers and for the Poporangi, Otamauri, Mangatahi, Kikowhero, Waitio and Ohiwia Streams, near their confluence with the main river channels. For the irrigation season, require minimum flows for these sites that provide for ecosystem health, life-supporting capacity and 90% habitat protection.
203.19	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	General Water Allocation Policies	Amend	Provide a permitted activity pathway for temporary construction dewatering takes to avoid a technical requirement for water metering which is not practicable given the nature of these takes.
238.16	Emma	Taylor	Gimblett Gravels Winegrowers Association	General Water Allocation Policies	Amend	Modify 5.10.7.45.d as required to align with any changes to Policy 39, and ensure that these are in place before zone changes are made.
POL TANK 45						
3.18	Gavin	Yort	Limestone Properties Limited	POL TANK 45	Oppose	Amend Policy 5.10.7 Policy 45 to be consistent with RRMP POL TT11 and Table 5.9.7.
8.16	Rengasamy	Balasubramaniam	Delegat Limited	POL TANK 45	Support	Support policy 45(a)
8.38	Rengasamy	Balasubramaniam	Delegat Limited	POL TANK 45	Oppose	Oppose Policy 45(d) - Amend Policies 39, 40 and 45 and Schedule 36 to enable an individual consent holder to mitigate their stream depletion effects, including though the use of stored water captured at times of high river flow.
58.26	Peter	Wilson	Hawkes Bay Fish and Game Council	POL TANK 45	Amend	Remove Policy 45(a) and/or clarify to ensure it is not misused.
59.9	Ronald	McFetridge	WaterForce Limited	POL TANK 45	Support	No specific decision requested but states support for Policy 45(b).
59.10	Ronald	McFetridge	WaterForce Limited	POL TANK 45	Support	Amend Policy 45(b) to include reference to the installation and verification of water meters to be completed by a person with suitable qualifications and that the work is completed to the industry agreed code of practice The New Zealand Water <u>Measurement Code of Practice</u> .
66.9	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	POL TANK 45	Support	States support for Policy 45(b)
123.80	Jenny	Nelson-Smith	Department of Conservation	POL TANK 45	Oppose	Requiring metering and telemetry of water takes is supported and is consistent with national regulations. However, the regulations do not allow metering exceptions (e.g., in cases of technical limitations) and this part of the clause should be <u>deleted</u> .
132.158	Marei	Apatu	Te Taiwhenua o Heretaunga	POL TANK 45	Amend	Ensure that a precautionary approach is given to the renewal of resource consents to abstract water, and Te Mana o Te Wai and Te Mana o Te Taiao are given appropriate priority when renewing or reviewing resource consents. Enable this to occur in a timely fashion through PC9.

194.2	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 45	Not Stated	Takes an unnecessarily conservative approach to allocation limits and flows, and is unduly restrictive in applying prohibited activity status to takes beyond those limits.
194.7	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 45	Not Stated	Has not been appropriately justified through a Section 32 report in sufficient detail. In particular, the Section 32 Report fails to fully justify the approach to allocation limits, minimum flows, the degree of groundwater connection, and the interim allocation limit for the Heretaunga Plains Water Management Unit (of 90 million cubic metres).
194.61	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 45	Support	Retain clause 5.10.7.45(a) as drafted. Considers that consequential amendment is needed to 5.10.6.36(f) and 5.10.7.52(a) in order to reflect and align these policies with 5.10.7.45(a).
194.62	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 45	Oppose	Policy 45 (d)(ii) - 5.10.7.45(d)(ii) should be amended to reflect POL TT9(1)(f)(iva) of the RRMP, along the lines of 'require the water take to cease when the minimum flow is reached in the relevant zone, excluding the taking of water for the sole purpose of avoiding the death of horticultural or viticultural root stock or crops should be exempt from cease takes...'
195.67	Peter	Matich	Federated Farmers of New Zealand	POL TANK 45	Amend	That Policy 45 be amended to delete clause d) and associated subclauses. Tracked changes provided. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
210.66	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 45	Oppose	Amend the provisions around high flows to clearly state that allocation of high flows will be managed in a way that gives effect to the NPSFM, protects Te Mana o te Wai and ecosystem health, and meets Schedule 26 targets. Retain requirements for telemetric monitoring and ensure they are consistent with recent NPS/NES direction.
224.7	Peter	Holley	Mission Estate Winery	POL TANK 45	Oppose	Where telemetry equipment is operating to specification and needs to be replaced this cost should be subsidised.
Water Use and Allocation – Efficiency						
11.3	Matt	Edwards		Water Use and Allocation – Efficiency	Support	Requiring greater efficiency of use by fruitgrower consent holders.
29.29	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Water Use and Allocation – Efficiency	Amend	Include a definition of "IRRICALC water demand model" in the Glossary that reflects the agreement to develop a Hawke's Bay-specific model.
29.3	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Water Use and Allocation – Efficiency	Not Stated	Amend 5.10.7.47.f to read "...maintained and operated to ensure on- going efficient water use in accordance with any the most relevant applicable industry codes of practice." or similar wording to achieve the outcome sought in this submission.
132.121	Marei	Apatu	Te Taiwhenua o Heretaunga	Water Use and Allocation – Efficiency	Amend	Remove the "efficient taking" proviso for wells, so it no longer applies for domestic takes within TANK catchments.
195.68	Peter	Matich	Federated Farmers of New Zealand	Water Use and Allocation – Efficiency	Support	That Policy 46 and 47 be retained as notified.
POL TANK 46						
3.5	Gavin	Yort	Limestone Properties Limited	POL TANK 46	Support	Retain the provisions - Policy 46(b)
8.10	Rengasamy	Balasubramaniam	Delegat Limited	POL TANK 46	Support	Support Policy 46
8.17	Rengasamy	Balasubramaniam	Delegat Limited	POL TANK 46	Support	Support Policy 46(b)
8.43	Rengasamy	Balasubramaniam	Delegat Limited	POL TANK 46	Oppose	Amend clause (a) to read: ensuring allocation limits and allocations of water for abstraction are calculated with known security of supply, including an irrigation reliability standard that meets demand 95% of the time.
23.10	Kerry	Sixtus	Pattullo's Nurseries Limited	POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
29.61	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	POL TANK 46	Amend	The reference to "actual and reasonable" should be capitalised as this is a defined term in the Glossary.
32.10	Kent	Griffiths		POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
35.10	Colin	Campbell		POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
37.10	Greg	Evans	Dartmoor Estate Ltd	POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
38.10	Roger	Brownlie		POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
43.10	CA & GW	Wilson	Meiros Orchard Ltd	POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
44.10	Brian	Fulford	Omahuri Orchards (2019) Ltd.	POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
49.10	John	Parsons		POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
54.10	Mark	Apatu	Apatu Farms Ltd	POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
61.10	Greg	Simpson		POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
62.10	Jonty	Moffett		POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
69.10	Jos	Dames	Dames Limited	POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
71.10	Carl	Knapp	Bellingham Orchard Ltd.	POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
72.10	Justin	Addis	Armada Orchard Ltd	POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
73.10	Bevan	Davidson		POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
74.2	Kevin	Bayley	Bayley Produce Ltd	POL TANK 46	Amend	Amend Policy 46 - The wording in c) above specifically states the Council will ensure efficient allocation by "encouraging and supporting flexible management of water by permit holders..." 2, yet the proposed policy around transfers contradicts this statement. Regarding d) on---going data collection and monitoring of water use, we would like to see effective and meaningful use of this data, not only to verify actual use information, but to ensure the investment made on behalf of the landowner is justified.
77.10	David & Sheryl	Mackie		POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
79.10	Richard	Penreath		POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
86.10	Peter	Scott		POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".

91.90	Johnny	Milmine	Berry Farms NZ	POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
95.10	Johnny	Milmine	Prime Limes	POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
96.10	Mike	Davis	Davis Orchards Ltd	POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
97.11	Lesley	Wilson	DN & LR Wilson Ltd	POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
99.36	Jerf	van Beek	Twyford Water	POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
104.10	John	Loughlin	Rockit Global Limited	POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
105.10	Scott	Lawson		POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
110.10	Edward	Whyte	Whyte & Co	POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
122.1	Richard	Penreath	Ngai Tukairangi Trust	POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
123.81	Jenny	Nelson-Smith	Department of Conservation	POL TANK 46	Oppose	Delete policy 46
124.14	Bridget	Margerison	Brownrigg Agriculture Group Ltd	POL TANK 46	Support	Policy 46(b) - support
124.26	Bridget	Margerison	Brownrigg Agriculture Group Ltd	POL TANK 46	Oppose	Amend clause (a) to read: ensuring allocation limits and allocations of water for abstraction are calculated with known security of supply, <u>including an irrigation reliability standard that meets demand 95% of the time.</u>
135.45	Anna	Wilkes	Ravensdown Limited	POL TANK 46	Support	Retain Policy 46 as notified.
185.10	Allen	Kittow	Tremaine Farms Ltd	POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
186.10	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
192.12	Rebecca	Blunden	T&G Global Limited and ENZIL	POL TANK 46	Amend	Add to Policy 46(a): “, which for irrigation takes means to a 95% reliability of supply.”
194.63	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 46	Support	Retain Policy 5.10.7.46 as drafted. Make consequential changes to other parts of PC9 to reflect this policy.
194.64	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 46	Amend	Policy 46(b) - Amend 5.10.7.46(b) to refer to actual and reasonable use, rather than actual and reasonable requirements.
194.65	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 46	Oppose	Policy 46(b) - Amend the definition of ‘actual and reasonable’ to provide for the efficient allocation and use of water.
196.11	Julian	Odering	Oderings Nurseries	POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
210.67	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 46	Oppose	Delete
211.10	Brian	McLay		POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
214.10	Scott	Lawson	Hawkes Bay Vegetable Growers Association	POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
215.10	Peter	Dooney	Dooney Partnership	POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
217.9	Paul	Paynter	Johnny Appleseed Holdings Ltd	POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
218.10	Adrian	Mannering	Irrigation Services	POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
219.10	Michael & Julie	Russell		POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
220.10	Steve	Gillum	Gillum Springfield Trust	POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
221.10	WT	Scott		POL TANK 46	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
POL TANK 47						
3.6	Gavin	Yort	Limestone Properties Limited	POL TANK 47	Support	Retain the provision - Policy 47(a)(ii) and (d)
8.18	Rengasamy	Balasubramaniam	Delegat Limited	POL TANK 47	Support	Support Policy 47(c)
8.44	Rengasamy	Balasubramaniam	Delegat Limited	POL TANK 47	Oppose	Oppose Policy 47(b) - Amend clause (b) to read: “using the IRRICALC water demand model if available for the land use being applied for (or otherwise by a suitable equivalent approved by Council) or a similar reasonable use model that utilises crop type, soil type and climatic conditions to determine efficient water allocations for irrigation uses;
51.4	Ivan	Knauf	Wairua Dairies Ltd	POL TANK 47	Oppose	Policy 47. c&d. Opposes the current wording and recommend the following wording. It is recommended that HBRC adopt the definition “80% of applied water is retained within the root zone, after an irrigation event and/or for the irrigation season”.
58.27	Peter	Wilson	Hawkes Bay Fish and Game Council	POL TANK 47	Amend	Replace with 90% reliability to reflect other regions or explain why 95% is required.
59.11	Ronald	McFetridge	WaterForce Limited	POL TANK 47	Support	Amend Policy 47(a) to read: a) ensuring that the technical means of using use of water are physically is efficient through; (i) allocation of water for irrigation and uses based on soil, climate and plant crop needs; (ii) requiring the adoption of good (or best) practice water use technology and processes that minimise the amount of water wasted lost from the soil profile; and (iii) the use of water meters;
59.12	Ronald	McFetridge	WaterForce Limited	POL TANK 47	Support	No specific decision requested but states support for Policy 47(b).
59.13	Ronald	McFetridge	WaterForce Limited	POL TANK 47	Support	Amend Change 9 in relation to Policy 47(c) to include a definition for application efficiency.
59.14	Ronald	McFetridge	WaterForce Limited	POL TANK 47	Support	No specific decision requested but states that the definition of "reliability standard of 95%" is non-sensical.
59.15	Ronald	McFetridge	WaterForce Limited	POL TANK 47	Support	Amend Change 9 to include a definition for Distribution Uniformity.
59.16	Ronald	McFetridge	WaterForce Limited	POL TANK 47	Support	No specific decision requested but states support for Policy 47(e) and (f).

59.17	Ronald	Mcfetridge	WaterForce Limited	POL TANK 47	Support	Amend Change 9 in relation to Policy 47(e) and (f) to list these codes of practice; <ul style="list-style-type: none"> •The New Zealand Piped Irrigation Systems Design Code of Practice •The New Zealand Piped Irrigation Systems Design Standards •The New Zealand Piped Irrigation Systems Installation Code of Practice •The New Zealand Water Measurement Code of Practice •The New Zealand Performance Assessment Code of Practice
66.10	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	POL TANK 47	Support	Amend Policy 47(a) to remove the words “technical”, “physically” and “wasted. Suggested wording provided.
66.11	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	POL TANK 47	Support	States support for Policy 47(b)
66.12	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	POL TANK 47	Oppose	Amend Policy 47(c) references to application efficiency standards and reliability standards, and add definitions for application efficiency and distribution uniformity. Suggested wording provided.
66.13	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	POL TANK 47	Support	Supports Policy 47(e) and (f)
91.75	Johnny	Milmine	Berry Farms NZ	POL TANK 47	Not Stated	No specific decision requested but implies that reliance on IRRICALC is unsuitable for growers that utilize tunnels, glass houses, or other cover types.
95.78	Johnny	Milmine	Prime Limes	POL TANK 47	Not Stated	No specific decision requested but implies that reliance on IRRICALC is unsuitable for growers that utilize tunnels, glass houses, or other cover types.
118.3	Hugo	Beamish		POL TANK 47	Oppose	47c) - remove application efficiency standard
123.82	Jenny	Nelson-Smith	Department of Conservation	POL TANK 47	Amend	Reliability standards to meet demand are not water use efficiency measures and should be deleted, otherwise clauses a-f are supported.
123.84	Jenny	Nelson-Smith	Department of Conservation	POL TANK 47	Oppose	47 b) - Allow applicants to use their own more detailed soil information within Irricalc when this data is of higher resolution and quality than existing available data.
124.15	Bridget	Margerison	Brownrigg Agriculture Group Ltd	POL TANK 47	Support	Policy 47(c) - support
135.46	Anna	Wilkes	Ravensdown Limited	POL TANK 47	Support	Retain Policy 47 as notified.
180.43	Charlotte	Drury	Horticulture New Zealand	POL TANK 47	Amend	Amend to better align the policy with terminology as used within the irrigation industry. Specific wording provided in submission.
192.13	Rebecca	Blunden	T&G Global Limited and ENZIL	POL TANK 47	Amend	Amend Policy 47(b) to say: “using the IRRICALC water demand model or a suitable equivalent approved by Council to determine efficient water allocations for irrigation uses;”
194.66	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 47	Support	The relief sought is that the Glossary and Policy 47 are amended to ‘as specified by a consistent and appropriate water demand model’, where IRRICALC can be included as an example.
201.43	Liz	Munroe	Heretaunga Tamatea Settlement Trust	POL TANK 47	Amend	Amend c) replace with 90% reliability standard.
210.68	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 47	Amend	Amend to state “best practice” Delete reference to reliability standard.
Water Use Change/Transfer						
63.56	Keith	Marshall	Napier City Council	Water Use Change/Transfer	Amend	Amend Change 9 so that where the policy wording allows transfer to municipal supplies but excludes transfers to industrial uses above 15m3, this option be reinstated.
120.52	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Water Use Change/Transfer	Amend	Do not allow transfer of water permits into over-allocated ground and surface water management units or between catchments
132.59	Marei	Apatu	Te Taiwhenua o Heretaunga	Water Use Change/Transfer	Amend	Prevent the transfer of consents/permits between the unconfined part of the HPAS and the confined aquifer
132.75	Marei	Apatu	Te Taiwhenua o Heretaunga	Water Use Change/Transfer	Amend	Prohibit the transfer of consents and water abstraction permits from the unconfined aquifer to the confined aquifer, and vice versa, and from the main part of the aquifer up to Moteo.
132.76	Marei	Apatu	Te Taiwhenua o Heretaunga	Water Use Change/Transfer	Amend	Prohibit or prevent the transfer of consents to abstract water from surface water to ground water takes and vice versa.
132.77	Marei	Apatu	Te Taiwhenua o Heretaunga	Water Use Change/Transfer	Amend	Prevent the input or inducement of lower quality water into the confined aquifer
132.109	Marei	Apatu	Te Taiwhenua o Heretaunga	Water Use Change/Transfer	Amend	Include in proposed plan provisions for the transfer of water permits to abstract water; "The transfer will not result in an increase in the scale or intensity of adverse effects and will not occur in over-allocated catchments or aquifers".
POL TANK 48						
3.19	Gavin	Yort	Limestone Properties Limited	POL TANK 48	Oppose	Amend clause (e) to read: except where a change of use and/or transfer is for the purpose of a flow enhancement or ecosystem improvement scheme or is intended to provide for the reasonable consumptive needs of people and communities, declining
6.3	Daniel	Soltau		POL TANK 48	Amend	Amend Clause (f) do not allow the transfer of any allocations between properties or owners
23.36	Kerry	Sixtus	Pattullo's Nurseries Limited	POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
32.36	Kent	Griffiths		POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
35.36	Colin	Campbell		POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.

36.12	Karen	Morrish	Mr Apple New Zealand Ltd	POL TANK 48	Amend	Clarify/amend Policy 48. e) - If the water allocation of 90 million cubic meters is achieved, why would consent holders be disallowed to transfer water volumes between consent within the same zone? Even if the target is not achieved, or while it is in progress, it is not unreasonable to allow transfer of water from one site to another within the same catchment. It is often the case that different users have different water demands at different times, and so can "share" their allocations so as to enable efficient use. Surely this would be better than having some producers with insufficient water so as to reduce their production?
37.36	Greg	Evans	Dartmoor Estate Ltd	POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
38.36	Roger	Brownlie		POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
43.36	CA & GW	Wilson	Meiros Orchard Ltd	POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
44.36	Brian	Fulford	Omahuri Orchards (2019) Ltd.	POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
49.36	John	Parsons		POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
54.36	Mark	Apatu	Apatu Farms Ltd	POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
59.18	Ronald	McFetridge	WaterForce Limited	POL TANK 48	Support	No specific decision requested but states support for Policy 48(e)
61.36	Greg	Simpson		POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
62.36	Jonty	Moffett		POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
63.12	Keith	Marshall	Napier City Council	POL TANK 48	Amend	Amend the Policy as follows to: •Allow transfers under (e) to food processing uses •Regarding (f), allow the transfer of allocated but unused water where this enables flow enhancement schemes •Allow transfers to be a tool for managing urban growth. Suggested wording provided.
63.55	Keith	Marshall	Napier City Council	POL TANK 48	Support	Amend policy to expand it to allow transfer to food processing uses as these uses also support the economic vitality of the Heretaunga plains
66.14	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	POL TANK 48	Support	Supports Policy 48(e)
69.36	Jos	Dames	Dames Limited	POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
71.36	Carl	Knapp	Bellingham Orchard Ltd.	POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
72.36	Justin	Addis	Armada Orchard Ltd	POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
73.36	Bevan	Davidson		POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
74.3	Kevin	Bayley	Bayley Produce Ltd	POL TANK 48	Oppose	The policy offers little to no flexibility when it comes to transferring water across consents and subsequent locations. This poses risk to the reliability of supply in terms of adequate volume and timing which is critical to production needs.
77.36	David & Sheryl	Mackie		POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
79.36	Richard	Penreath		POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
86.36	Peter	Scott		POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
91.35	Johnny	Milmine	Berry Farms NZ	POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
95.36	Johnny	Milmine	Prime Limes	POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
96.36	Mike	Davis	Davis Orchards Ltd	POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
97.37	Lesley	Wilson	DN & LR Wilson Ltd	POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
99.62	Jerf	van Beek	Twyford Water	POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
104.36	John	Loughlin	Rockit Global Limited	POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
105.36	Scott	Lawson		POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
110.36	Edward	Whyte	Whyte & Co	POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
122.36	Richard	Penreath	Ngai Tukairangi Trust	POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
123.83	Jenny	Nelson-Smith	Department of Conservation	POL TANK 48	Oppose	Water use change or transfer should not be allowed in any overallocated waterbody – applications to transfer into overallocated waterbodies should be declined (and supported by a prohibited activity status in the rules of PC9). Transfers should be declined wherever significant adverse effects on life-supporting capacity, ecosystem health and other instream freshwater values are likely. References to flow enhancement or ecosystem improvement schemes should be deleted as these are inappropriate measures to manage adverse effects. The needs of people and communities for water supply for drinking and domestic use should be prioritised above water used for irrigation. Clause g is supported – water used for frost protection generally is not used when rivers and streams are under the most flow stress (e.g., summer).
123.85	Jenny	Nelson-Smith	Department of Conservation	POL TANK 48	Oppose	48 a) - Make the transfer of surface water to groundwater a separate line item to make people more aware of this option. Also allow the use of alternative defensible models/methods.

180.44	Charlotte	Drury	Horticulture New Zealand	POL TANK 48	Amend	Amend as follows: 'When considering any application to change the water use specified by a water permit, or to transfer a point of take to another point of take, to consider:...' g) declining applications for a change of use from frost protection to any other end use <u>except primary production</u> ;
185.36	Allen	Kittow	Tremaine Farms Ltd	POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
186.36	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
194.67	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 48	Support	Policy 48(e) - Retain the substance of the policy but consider whether exceptions could be allowed in respect of clause (e).
194.68	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 48	Oppose	Policy 47(f) - Clause (f) should be amended to 'in Water Quality Management Units that are over-allocated, ensuring that transfers do not result in increased water use at the WMU level'.
194.69	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 48	Oppose	Policy 48(g) - Clause (g) be deleted.
195.69	Peter	Matich	Federated Farmers of New Zealand	POL TANK 48	Amend	That Policy 48 be amended as follows: Water Use Change /Transfer 48. When considering any application to change <u>increase</u> the water use <u>take</u> specified by a water permit, or to transfer a point of take to another point of take, to consider: a) declining applications <u>the adverse effect on the freshwater resource</u> where the transfer is to another water management zone unless including; ... g) declining applications for a change of use from frost protection to any other end use; ...
196.37	Julian	Odering	Oderings Nurseries	POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
207.12	Mark	Clews	Hastings District Council	POL TANK 48	Amend	Amend the Policy as follows to: •Allow transfers under (e) to food processing uses •Regarding (f), allow the transfer of allocated but unused water where this enables flow enhancement schemes •Allow transfers to be a tool for managing urban growth. Suggested wording provided.
210.69	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 48	Amend	Amend to make it clear that applications for transfer to overallocated zones and waterbodies will be declined. Delete reference to stream flow augmentation/maintenance schemes Increase consistency with NPSFM and RMA direction on allocation Elevate status of ecosystem health, te mana o te wai, and human health over irrigation and other uses. Include provision for mana whenua consultation when considering transferring use and takes <u>Retain clause (g)</u>
211.36	Brian	McLay		POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
214.36	Scott	Lawson	Hawkes Bay Vegetable Growers Association	POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
215.36	Peter	Dooney	Dooney Partnership	POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.

220.36	Steve	Gillum	Gillum Springfield Trust	POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
221.36	WT	Scott		POL TANK 48	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
Water Allocation - Permit Duration						
29.31	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Water Allocation - Permit Duration	Amend	Amend 5.10.7.49 to ensure that public notification of consents is not required, if the requirement is triggered only by the cumulative effect of consents that individually have no more than minor effect.
29.32	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Water Allocation - Permit Duration	Amend	Amend 5.10.7.49.f to read " <u>efficacy operation</u> of flow enhancement <u>and aquifer recharge</u> schemes and any riparian margin upgrades;" or similar wording to achieve the outcome sought in this submission.
192.14	Rebecca	Blunden	T&G Global Limited and ENZIL	Water Allocation - Permit Duration	Amend	Delete the words "and to prevent the transfer of allocated but unused water" from Policy 48(f).
208.15	Emma	Taylor	Villa Maria Estate Limited	Water Allocation - Permit Duration	Amend	Amend along the lines of 5.10.7.49 to ensure that public notification of consents is not required, if the requirement is triggered only by the cumulative effect of consents that individually have no more than minor effect.
238.17	Emma	Taylor	Gimblett Gravels Winegrowers Association	Water Allocation - Permit Duration	Amend	Amend Policy 49 along the lines of... to ensure that public notification of consents is not required, if the requirement is triggered only by the cumulative effect of consents that individually have no more than minor effect.
POL TANK 49						
3.7	Gavin	Yort	Limestone Properties Limited	POL TANK 49	Support	Retain Policy 49(g)
8.19	Rengasamy	Balasubramaniam	Delegat Limited	POL TANK 49	Not Stated	Support Policy 49(g)

51.5	Ivan	Knauf	Wairua Dairies Ltd	POL TANK 49	Support	Policy 49. g&h - We support the improvement, but a 30 year duration would be preferred.
59.19	Ronald	McFetridge	WaterForce Limited	POL TANK 49	Support	No specific decision requested but states support for Policy 49(g)
63.13	Keith	Marshall	Napier City Council	POL TANK 49	Amend	Amend the Policy as follows: ... h) will impose a consent duration for municipal supply for 30 years to align with the required infrastructure and planning decisions under the NPS-UD 2020 consistent with most recent HPUDS and will impose consent review requirements that align with the expiry of all other consents in the applicable management unit.
66.15	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	POL TANK 49	Support	Supports Policy 49(g)
99.17	Jerf	van Beek	Twfyord Water	POL TANK 49	Not Stated	Supportive of large scale water storage however the timeframe of consents needs to be well beyond the 15 year timeframe. An exemption from a 15 year term would be pragmatic.
99.107	Jerf	van Beek	Twfyord Water	POL TANK 49	Amend	An exemption from a 15 year term consent duration for high flow storage.
103.2	Ian	Quinn	Two Terraces Vineyard	POL TANK 49	Support	Supports the proposed 15 year term for consents (49.g, Schedule 33).
123.86	Jenny	Nelson-Smith	Department of Conservation	POL TANK 49	Oppose	Impose shorter water permit durations
124.16	Bridget	Margerison	Brownrigg Agriculture Group Ltd	POL TANK 49	Support	Policy 49(g) - support
135.47	Anna	Wilkes	Ravensdown Limited	POL TANK 49	Amend	Amend Policy 49 as follows: <i>When making decisions about applications for resource consent to take and use water, the Council will set common expiry dates, or include a review condition, for water permits to take water in each water management zone, that enables consistent and efficient management of the resource and will set durations that provide a periodic opportunity to review effects of the cumulative water use and to take into account potential effects of changes in:</i> ... g) will impose consent durations of 15 years, or impose review conditions reflecting the same timeframe, according to specified water management unit expiry dates. Future dates for expiry or review of consents within that catchment are every 15 years thereafter. ... • i) may grant consents granted within three years prior to the relevant common catchment expiry date with a duration to align with the second common expiry or review condition date, except where the application is subject to section 8.2.4 of the
141.9	Danny	Angland	Kereru Station	POL TANK 49	Oppose	Strongly oppose. This needs to be a minimum of 25years
180.45	Charlotte	Drury	Horticulture New Zealand	POL TANK 49	Amend	Amend as follows: "...i) except where an application is to take and use water storage projects, consent durations of greater than 15 years will be considered and may be granted if a longer consent term is justified on the basis of the quantum of investment required to construct the scheme.
193.8	Bruce	Mackay	Heinz Wattie's Limited	POL TANK 49	Amend	Consents that required significant investment either in water storage, or improved technology or in other areas should be considered at terms up to 35 years.
194.70	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 49	Oppose	Amend 5.10.7.49 or create a new policy to address the cumulative effects of grouped consents that are likely to be more than minor and trigger s95 public notification.
195.70	Peter	Matich	Federated Farmers of New Zealand	POL TANK 49	Amend	Amend Policy 49 to refer to 20 year consents. Specific wording provided. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
207.13	Mark	Clews	Hastings District Council	POL TANK 49	Amend	Amend the Policy as follows: ... h) will impose a consent duration for municipal supply for 30 years to align with the required infrastructure and planning decisions under the NPS-UD 2020 consistent with most recent HPUDS and will impose consent review requirements that align with the expiry of all other consents in the applicable management unit.
210.70	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 49	Amend	Amend to explicitly state that consent reviews allow council to change allocated amounts of water. Shorten consent duration or remove this reference to 15 years.
231.8	Peter	Kay		POL TANK 49	Oppose	15 years is too short a time for consent duration considering the amount of capital needed in the first place. Seek that the policy be amended to 20 years minimum consent duration.
Water Allocation - Priority						
29.33	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Water Allocation - Priority	Amend	Amend 5.10.7.51 to read "...emergency water management group that shall have representatives from Napier City and Hastings District Councils, NZ Fire Service, DHB, iwi, affected primary sector groups and MPI, to make decisions ..." or similar wording to achieve the outcome sought in this submission.
POL TANK 50						
13.11	Alec	Duncan	Fire and Emergency New Zealand	POL TANK 50	Support	Support Policy 50 - retain as proposed.
53.22	Chris	Howell	CD & CM Howell Partnership	POL TANK 50	Amend	Amend to require territorial authority applicants to promote water conservation in the urban community by way of metered supplies at the consumer level Amend to ensure territorial authorities have a continuous improvement model for reducing water reticulation losses rather than a broad statement of an Infrastructure Leakage Index of 4 or better
63.14	Keith	Marshall	Napier City Council	POL TANK 50	Amend	Amend the Policy to: • Include successive versions of HPUDS. • Ensure that the definition of non-residential includes all possible scenarios that municipal demand can supply. • Not limit the measure of efficiency to the 'Infrastructure Leakage Index 4' tool. Suggested wording provided

63.52	Keith	Marshall	Napier City Council	POL TANK 50	Amend	Amend Policy 50 to ensure that sufficient water is allocated for domestic and municipal supplies to allow for future and existing growth demands.
82.3	Trevor	Robinson	Lowe Corporation Limited	POL TANK 50	Amend	Amend Policy 50 to refer in the first line to resource consent applications for regionally significant industry and insert a new Policy 50(aa) worded as follows: "Allocate water for the operational needs of existing and future regionally significant industry not supplied as part of a municipal water supply based on existing and likely demand for that purpose, while requiring water use by regionally significant industry to meet or exceed best industry practice, including for efficiency of water supply and water use." Alternatively, provide at a policy level for water allocation enabling continuity of supply to regionally significant industry.
123.87	Jenny	Nelson-Smith	Department of Conservation	POL TANK 50	Support	Retain as notified
132.177	Marei	Apatu	Te Taiwhenua o Heretaunga	POL TANK 50	Amend	Re-configure Policy 50 so that the priority setting for water allocation has the health and well-being of the water body first, the health and well-being of people second (domestic uses) and uses for economic gain third, consistent with Te Mana o te Wai and the NPS-FM (2020).
195.71	Peter	Matich	Federated Farmers of New Zealand	POL TANK 50	Amend	That Policy 50 be amended as follows: 50. In making decisions about resource consent applications for municipal and papakainga water supply the Council will ensure the water needs of future community growth are met within water limits and; a) allocate water for population and urban development projections for the area according to estimates provided by the HPUDS (2017) to 2045; b) calculate water demand according to existing and likely planned residential, non-residential (schools, hospitals, commercial and industrial) demand within the expected reticulation areas; and (i) require that water demand and supply management plans are developed and adopted and industry good practice targets for water infrastructure management and water use efficiency including whether an Infrastructure Leakage Index of 4 <u>1</u> or better can be achieved; And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
207.14	Mark	Clews	Hastings District Council	POL TANK 50	Amend	Amend the Policy to: •Include successive versions of HPUDS. •Ensure that the definition of non-residential includes all possible scenarios that municipal demand can supply. •Not limit the measure of efficiency to the 'Infrastructure Leakage Index 4' tool. <i>Suggested wording provided</i>
210.71	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 50	Support	Retain Introduce a new clause "(d) investigate water metering for all residential and commercial urban water users"
POL TANK 51						
10.6	David	Renouf		POL TANK 51	Amend	Amend Policy 51 - Add at Water Allocation 'Water for essential for the survival of seed, vegetable, stock crops, trees, grape vines, animals, and pasture'
13.12	Alec	Duncan	Fire and Emergency New Zealand	POL TANK 51	Amend	Amend Policy 51 - ... the Council will establish and consult with an emergency water management group that shall have representatives from Napier City and Hastings District Councils, NZ Fire Service Fire and Emergency New Zealand, DHB, iwi and MPI, to make decisions about providing for water uses in the following priority order; ... c) water essential for community safety, well-being and health.
14.9	Ryan	Fraser		POL TANK 51	Amend	Amend Policy 51 - Require inclusion of primary sector representatives in any emergency water management group when making water shortage directions under Section 329 of the RMA.

104.32	John	Loughlin	Rockit Global Limited	POL TANK 51	Oppose	Amend Change 9 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
105.32	Scott	Lawson		POL TANK 51	Oppose	Amend Change 9 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
107.13	Christopher	Harrison	Beach House Wines Ltd	POL TANK 51	Amend	Amend Policy 51 to read "...emergency water management group that shall have representatives from Napier City and Hastings District Councils, NZ Fire Service, DHB, iwi, <u>affected</u> primary sector groups and MPI, to make decisions ..." or similar wording to achieve the outcome sought in this submission.
110.32	Edward	Whyte	Whyte & Co	POL TANK 51	Oppose	Amend Change 9 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
120.93	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	POL TANK 51	Amend	Remove policy 51 d, e, f and remove MPI from proposed water management group
122.32	Richard	Penreath	Ngai Tukairangi Trust	POL TANK 51	Oppose	Amend Change 9 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
123.88	Jenny	Nelson-Smith	Department of Conservation	POL TANK 51	Amend	Remove reference to horticultural crops and primary production.
132.179	Marei	Apatu	Te Taiwhenua o Heretaunga	POL TANK 51	Amend	Move Policy 51 to a non-regulatory section of the plan.
135.48	Anna	Wilkes	Ravensdown Limited	POL TANK 51	Amend	Amend Policy 51 as follows: e) uses where water uses is subject to required to meet the seasonal demands for of primary production; f) uses for which water is essential for the continued operation of a business (commercial or industrial activity) and primary production not provided for by (e) above. , except where water is subject to seasonal demand for primary production or processing. The following uses will not be authorised under a water shortage direction: g) use of water not associated with the continued operation of a business (commercial or industrial activity) or community well being.
143.12	Peter	Hyslop	Strathallan Trust	POL TANK 51	Amend	Amend 5.10.7.51 to read "...emergency water management group that shall have representatives from Napier City and Hastings District Councils, NZ Fire Service, DHB, iwi, <u>affected</u> primary sector groups and MPI, to make decisions ..." or similar wording to achieve the outcome sought in this submission.
146.2	Rebecca	Davies	New Zealand Defence Force	POL TANK 51	Support	Retain as notified.
165.13	Caleb	Dennis	Aotearoa New Zealand Fine Wine Estates LP	POL TANK 51	Amend	Amend Policy 51 to read "...emergency water management group that shall have representatives from Napier City and Hastings District Councils, NZ Fire Service, DHB, iwi, <u>affected</u> primary sector groups and MPI, to make decisions ..." or similar wording to achieve the outcome sought in this submission.
179.13	Wim	Barendsen	Otawahao Farms Ltd	POL TANK 51	Amend	Amend Policy 51 to read "...emergency water management group that shall have representatives from Napier City and Hastings District Councils, NZ Fire Service, DHB, iwi, <u>affected</u> primary sector groups and MPI, to make decisions ..." or similar wording to achieve the outcome sought in this submission.
180.46	Charlotte	Drury	Horticulture New Zealand	POL TANK 51	Support	HortNZ supports the recognition of the need to enable water to be made available to irrigate horticultural tree crops to ensure their survival.

185.32	Allen	Kittow	Tremaine Farms Ltd	POL TANK 51	Oppose	Amend Change 9 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
186.32	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	POL TANK 51	Oppose	Amend Change 9 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
194.71	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 51	Amend	Amend to include primary sector representatives to make decisions about providing for water uses. 5.10.7.51(d) should be amended to either: 'water essential for survival of horticultural and viticultural crops' or 'water essential for survival of horticultural tree and vine crops'. Expand the approach of providing for horticultural and viticultural crops to minim flow restrictions generally (not just water shortage directions), including in relation to Policy 5.10.6.39 and the new policy sought by PWRM above.
195.72	Peter	Matich	Federated Farmers of New Zealand	POL TANK 51	Amend	Amend Policy 51 as follows: e) uses where water is subject to seasonal demand for primary production, <u>excluding water for individual reasonable domestic needs and the reasonable needs of a persons' animals for drinking water;</u> And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
196.33	Julian	Odering	Oderings Nurseries	POL TANK 51	Oppose	Amend Change 9 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
199.13	Peter	Robertson	Brookfields Vineyards/Ohiti Estate	POL TANK 51	Amend	Amend Policy 51 to read "...emergency water management group that shall have representatives from Napier City and Hastings District Councils, NZ Fire Service, DHB, iwi, <u>affected</u> primary sector groups and MPI, to make decisions ..." or similar wording to achieve the outcome sought in this submission.
204.13	Juliet	Gray	Peter Lyons Trust (Lyons Vineyard)	POL TANK 51	Amend	Amend Policy 51 to read "...emergency water management group that shall have representatives from Napier City and Hastings District Councils, NZ Fire Service, DHB, iwi, <u>affected</u> primary sector groups and MPI, to make decisions ..." or similar wording to achieve the outcome sought in this submission.
210.72	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 51	Amend	Remove reference to horticultural crops.
211.32	Brian	McLay		POL TANK 51	Oppose	Amend Change 9 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
213.13	Peter	Scott	The Wine Portfolio	POL TANK 51	Amend	Amend Policy 51 to read "...emergency water management group that shall have representatives from Napier City and Hastings District Councils, NZ Fire Service, DHB, iwi, <u>affected</u> primary sector groups and MPI, to make decisions ..." or similar wording to achieve the outcome sought in this submission.
214.32	Scott	Lawson	Hawkes Bay Vegetable Growers Association	POL TANK 51	Oppose	Amend Change 9 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
215.32	Peter	Dooney	Dooney Partnership	POL TANK 51	Oppose	Amend Change 9 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
217.31	Paul	Paynter	Johnny Appleseed Holdings Ltd	POL TANK 51	Oppose	Amend Change 9 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.

51.6	Ivan	Knauf	Wairua Dairies Ltd	POL TANK 52	Oppose	Policy 52b)(i) - oppose. Many consents have been sort with multi-year developments planned. Unused allocation averaged over the past 10 years up to 2 May 2020 will be deducted from a consent to enable the total river allocation to be reduced by 17.8%. This is in-equitable for those planning long term development. A further 14.2 % of current allocation could be extracted without exceeding the new allocation limit. First an economic assessment of the impact of this allocation change should be commissioned, then alternative options for implementation of this allocation change should be investigated. Consent holders who face losing 2400 l/sec water under this allocation change should be granted an equivalent volume of high flow water to compensate for their loss.
54.11	Mark	Apatu	Apatu Farms Ltd	POL TANK 52	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
54.33	Mark	Apatu	Apatu Farms Ltd	POL TANK 52	Oppose	Amend Change 9 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.

97.38	Lesley	Wilson	DN & LR Wilson Ltd	POL TANK 52	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.

99.19	Jerf	van Beek	Twyford Water	POL TANK 52	Not Stated	The wording of a) needs to be amended to make it explicitly clear that new water is available for allocation from high flows. Do not support actual water being used as the basis for water re-allocation at this time given the raft of issues with not only the availability of accurate water meter data, and where it does exist, in many cases does not accurately reflect present water use. Twyford Water submits that the focus should instead be on fair and reasonable water needs – requiring amendments to the drafting of (b)(i). Twyford Water supports the requirements for irrigators to operate at (or above) good management practice. The council cannot simply change the rate at which a system must operate – that would require considerable redesign and potentially redevelopment of irrigation infrastructure which is arguably not justified from an effects perspective. With regards to (f), Twyford Water submits that water permits should be able to be transferred (if they have been exercised) and the volume of water to be transferred is reasonable for its intended use. New Water will be used to overcome over allocation.
99.37	Jerf	van Beek	Twyford Water	POL TANK 52	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
99.59	Jerf	van Beek	Twyford Water	POL TANK 52	Oppose	Amend Change 9 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
99.63	Jerf	van Beek	Twyford Water	POL TANK 52	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.

185.37	Allen	Kittow	Tremaine Farms Ltd	POL TANK 52	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
186.11	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	POL TANK 52	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
186.33	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	POL TANK 52	Oppose	Amend Change 9 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
186.37	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	POL TANK 52	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
193.9	Bruce	Mackay	Heinz Wattie's Limited	POL TANK 52	Amend	Policy 52 a) - New water use can be allocated from stored water sources. Stored water should be harvested at times between median and 3 times median flows, into an off stem containment or a dam on a minor (not named) tributary, hopefully well up the catchment, then water is released to the mainstem when required for any potential use, that can then provide an environmental benefit as it travels down the mainstem, recharging the aquifer which is then extracted using existing groundwater takes infrastructure.

194.72	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 52	Amend	Amend along the lines of 'preventing any new allocation of water excluding water taken at times of high flow and stored and released for subsequent use (not including any reallocation in respect of permits issued before 2 May 2020)'. Amend 5.10.7.52(b)(i) to refer to "actual and reasonable use", rather than actual and reasonable need (if this has the same intent/definition)
194.73	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 52	Oppose	Policy 53(b)(i) - Amend the definition of 'actual and reasonable' to provide for the efficient allocation and use of water
196.12	Julian	Odering	Oderings Nurseries	POL TANK 52	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
196.34	Julian	Odering	Oderings Nurseries	POL TANK 52	Oppose	Amend Change 9 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
196.38	Julian	Odering	Oderings Nurseries	POL TANK 52	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
200.2	Ray	Knowles	Aspyron Trust	POL TANK 52	Not Stated	That the Actual & Reasonable criteria be dropped as a way of reducing over-allocation within existing consents & be replaced with a much fairer system based on a pro-rata across the board reduction to all consent holders based on their % of the total take.
201.44	Liz	Munroe	Heretaunga Tamatea Settlement Trust	POL TANK 52	Amend	Amend to place priority on the total allocation volume driving the consent consideration.
207.15	Mark	Clews	Hastings District Council	POL TANK 52	Amend	Amend the Policy if it applies from the outset so as to better align with other areas of relief sought in relation to concerns raised. Suggested wording provided
210.73	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 52	Oppose	Include clear methods for how overallocation will be addressed with timeframes.
211.11	Brian	McLay		POL TANK 52	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
211.33	Brian	McLay		POL TANK 52	Oppose	Amend Change 9 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
211.37	Brian	McLay		POL TANK 52	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
214.11	Scott	Lawson	Hawkes Bay Vegetable Growers Association	POL TANK 52	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
214.33	Scott	Lawson	Hawkes Bay Vegetable Growers Association	POL TANK 52	Oppose	Amend Change 9 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
214.37	Scott	Lawson	Hawkes Bay Vegetable Growers Association	POL TANK 52	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
215.11	Peter	Dooney	Dooney Partnership	POL TANK 52	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
215.33	Peter	Dooney	Dooney Partnership	POL TANK 52	Oppose	Amend Change 9 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
215.37	Peter	Dooney	Dooney Partnership	POL TANK 52	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
217.10	Paul	Paynter	Johnny Appleseed Holdings Ltd	POL TANK 52	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
217.32	Paul	Paynter	Johnny Appleseed Holdings Ltd	POL TANK 52	Oppose	Amend Change 9 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
217.36	Paul	Paynter	Johnny Appleseed Holdings Ltd	POL TANK 52	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
218.11	Adrian	Mannering	Irrigation Services	POL TANK 52	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
218.33	Adrian	Mannering	Irrigation Services	POL TANK 52	Oppose	Amend Change 9 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
218.37	Adrian	Mannering	Irrigation Services	POL TANK 52	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
219.11	Michael & Julie	Russell		POL TANK 52	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
219.33	Michael & Julie	Russell		POL TANK 52	Oppose	Amend Change 9 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
219.37	Michael & Julie	Russell		POL TANK 52	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
220.11	Steve	Gillum	Gillum Springfield Trust	POL TANK 52	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
220.33	Steve	Gillum	Gillum Springfield Trust	POL TANK 52	Oppose	Amend Change 9 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
220.37	Steve	Gillum	Gillum Springfield Trust	POL TANK 52	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
221.11	WT	Scott		POL TANK 52	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
221.33	WT	Scott		POL TANK 52	Oppose	Amend Change 9 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
221.37	WT	Scott		POL TANK 52	Oppose	Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
Frost Protection						
195.73	Peter	Matich	Federated Farmers of New Zealand	Frost Protection	Amend	That Policy 52 be amended as follows: b) (i) allocate water according to demonstrated actual and reasonable need (except as provided for by Policy 50) ... d) reducing the amount of water permitted to be taken without consent, including those provided for by Section 14 (3)(b) of the RMA , except for authorised uses existing before 2 May 2020; And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns

203.21	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	Frost Protection	Amend	Amend policy 53 to apply to both frost protection and temporary construction dewatering. <i>Frost protection and <u>temporary construction dewatering</u>.</i> 53. When considering applications to take water for frost protection or <u>temporary construction dewatering</u> , the Council will avoid, remedy or mitigate actual and potential effects of the take on its own or in combination with other water takes;
POL TANK 53						
8.45	Rengasamy	Balasubramaniam	Delegat Limited	POL TANK 53	Oppose	Oppose Policy 53 - Amend Policy 53 to require applicants for frost protection water to firstly investigate and discount alternative non-water reliant options such as frost fans.
123.90	Jenny	Nelson-Smith	Department of Conservation	POL TANK 53	Oppose	Water used for frost protection should always be within allocation limits and minimum flows.
180.48	Charlotte	Drury	Horticulture New Zealand	POL TANK 53	Amend	Amend to more appropriately reflect the limited scope of any effects that do occur as a result of frost protection takes. Specific wording provided in submission.
194.74	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 53	Amend	Amend 5.10.7.53 to recognise that takes for frost protection are excluded from the total allocation limits in Schedule 31.
195.74	Peter	Matich	Federated Farmers of New Zealand	POL TANK 53	Support	That Policy 53 be retained as notified
210.74	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 53	Oppose	Remove policy. Treat water for frost protection like all other uses.
5.10.8 Policies: High Flow Allocation						
59.2	Ronald	McFetridge	WaterForce Limited	5.10.8 Policies: High Flow Allocation	Support	No specific decision requested but states support for Policies 54-58
66.16	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	5.10.8 Policies: High Flow Allocation	Support	Supports Policies 54-58
72.78	Justin	Addis	Armadale Orchard Ltd	5.10.8 Policies: High Flow Allocation	Support	Not specific decision requested but states support for water storage concepts (council owned dams) that are recharged in winter months.
72.79	Justin	Addis	Armadale Orchard Ltd	5.10.8 Policies: High Flow Allocation	Not Stated	No specific decision requested but states support for paying reasonable levies to contribute to construction of council owned dams, on the basis our water takes are protected for our growing requirements long term and sustainability targets are met.
73.78	Bevan	Davidson		5.10.8 Policies: High Flow Allocation	Support	Not specific decision requested but states support for water storage concepts (council owned dams) that are recharged in winter months.
73.79	Bevan	Davidson		5.10.8 Policies: High Flow Allocation	Not Stated	No specific decision requested but states support for paying reasonable levies to contribute to construction of council owned dams, on the basis our water takes are protected for our growing requirements long term and sustainability targets are met.
120.51	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.8 Policies: High Flow Allocation	Amend	Set high flow allocations for all rivers that ensure hydrological alteration of the flow regime is minimised and maintained close to natural flow regimes
120.53	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.8 Policies: High Flow Allocation	Amend	Prohibit all new large run-of-river damming and require safe fish passage for all new small dams (catchment <50ha).
120.63	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.8 Policies: High Flow Allocation	Amend	Ensure to streams and rivers for the purposes of diverting water for impoundment does not alter the natural character of the area, does not impede fish passage or recruitment processes, and does not significantly adversely effect the ability of tangata whenua to exercise Kaitiakitanga, and conduct their cultural practices.
120.133	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.8 Policies: High Flow Allocation	Amend	Offline storage activities should be considered on a case by case basis and not enabled through objectives and policies
120.134	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.8 Policies: High Flow Allocation	Amend	Any allocation to storage must also be captured within allocation limits and minimum flows, not exempt from them
120.135	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.8 Policies: High Flow Allocation	Amend	New, large run of river damming should be prohibited
120.136	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	5.10.8 Policies: High Flow Allocation	Amend	The focus of this policy should be on water retention and not simply water storage.
185.77	Allen	Kittow	Tremaine Farms Ltd	5.10.8 Policies: High Flow Allocation	Not Stated	No specific decision requested but implies support for high flow storage schemes.
194.75	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	5.10.8 Policies: High Flow Allocation	Support	Policies 54, 56-59 - retain as drafted.
202.6	Donna	Awatere Huata	Māori Climate Commission	5.10.8 Policies: High Flow Allocation	Support	We support the building of water storage facilities.
202.7	Donna	Awatere Huata	Māori Climate Commission	5.10.8 Policies: High Flow Allocation	Support	Supports ownership of water storage by Mana Whenua
216.9	Phillipa	McVeagh	New Zealand Apples & Pears	5.10.8 Policies: High Flow Allocation	Support	Harvesting of water at high flows, and storage for later utilisation, is provided for by the TANK plan and recognised as an important means of securing water for future generations.
Adverse Effects - Water Damming						
POL TANK 54						
23.16	Kerry	Sixtus	Pattullo's Nurseries Limited	POL TANK 54	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
23.24	Kerry	Sixtus	Pattullo's Nurseries Limited	POL TANK 54	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
32.16	Kent	Griffiths		POL TANK 54	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.

218.24	Adrian	Mannering	Irrigation Services	POL TANK 54	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
219.16	Michael & Julie	Russell		POL TANK 54	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
219.24	Michael & Julie	Russell		POL TANK 54	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
220.16	Steve	Gillum	Gillum Springfield Trust	POL TANK 54	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
220.24	Steve	Gillum	Gillum Springfield Trust	POL TANK 54	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
221.16	WT	Scott		POL TANK 54	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
221.24	WT	Scott		POL TANK 54	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).

Adverse Effects - Water Take and Storage

POL TANK 55

23.17	Kerry	Sixtus	Pattullo's Nurseries Limited	POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
23.25	Kerry	Sixtus	Pattullo's Nurseries Limited	POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
32.17	Kent	Griffiths		POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
32.25	Kent	Griffiths		POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
35.17	Colin	Campbell		POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
35.25	Colin	Campbell		POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
37.17	Greg	Evans	Dartmoor Estate Ltd	POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
37.25	Greg	Evans	Dartmoor Estate Ltd	POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
38.17	Roger	Brownlie		POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
38.25	Roger	Brownlie		POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
43.17	CA & GW	Wilson	Meiros Orchard Ltd	POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
43.25	CA & GW	Wilson	Meiros Orchard Ltd	POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
44.17	Brian	Fulford	Omahuri Orchards (2019) Ltd.	POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
44.25	Brian	Fulford	Omahuri Orchards (2019) Ltd.	POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
49.17	John	Parsons		POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
49.25	John	Parsons		POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
54.17	Mark	Apatu	Apatu Farms Ltd	POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
54.25	Mark	Apatu	Apatu Farms Ltd	POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
58.29	Peter	Wilson	Hawkes Bay Fish and Game Council	POL TANK 55	Amend	Insert 50:50 flow sharing to ensure that blocks of water between median and FRE3 are fairly allocated. Further information on this is in the Rules and Schedules.
61.17	Greg	Simpson		POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
61.25	Greg	Simpson		POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
62.17	Jonty	Moffett		POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
62.25	Jonty	Moffett		POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
69.17	Jos	Dames	Dames Limited	POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
69.25	Jos	Dames	Dames Limited	POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
71.17	Carl	Knapp	Bellingham Orchard Ltd.	POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
71.25	Carl	Knapp	Bellingham Orchard Ltd.	POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
72.17	Justin	Addis	Armadale Orchard Ltd	POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
72.25	Justin	Addis	Armadale Orchard Ltd	POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
73.17	Bevan	Davidson		POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
73.25	Bevan	Davidson		POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
77.17	David & Sheryl	Mackie		POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
77.25	David & Sheryl	Mackie		POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
79.17	Richard	Penreath		POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
79.25	Richard	Penreath		POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
86.17	Peter	Scott		POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
86.25	Peter	Scott		POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
91.16	Johnny	Milmine	Berry Farms NZ	POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
91.24	Johnny	Milmine	Berry Farms NZ	POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
95.17	Johnny	Milmine	Prime Limes	POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.

95.25	Johnny	Milmine	Prime Limes	POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
96.17	Mike	Davis	Davis Orchards Ltd	POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
96.25	Mike	Davis	Davis Orchards Ltd	POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
97.18	Lesley	Wilson	DN & LR Wilson Ltd	POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
97.26	Lesley	Wilson	DN & LR Wilson Ltd	POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
99.43	Jerf	van Beek	Twyford Water	POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
99.51	Jerf	van Beek	Twyford Water	POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
104.17	John	Loughlin	Rockit Global Limited	POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
104.25	John	Loughlin	Rockit Global Limited	POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
105.17	Scott	Lawson		POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
105.25	Scott	Lawson		POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
108.3	Brian	Eccles	Jet Boating New Zealand	POL TANK 55	Support	Support this clause in its entirety. Special reference to <i>and will limit the amount of flow alteration so that the taking of surface water does not cumulatively adversely affect the frequency of flows above three times the median flow by more than a minor amount and provided that</i> ;
110.17	Edward	Whyte	Whyte & Co	POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
110.25	Edward	Whyte	Whyte & Co	POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
122.17	Richard	Penreath	Ngai Tukairangi Trust	POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
122.25	Richard	Penreath	Ngai Tukairangi Trust	POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
123.92	Jenny	Nelson-Smith	Department of Conservation	POL TANK 55	Not Stated	Water taken for offline storage should be subject to minimum flows and allocation limits (including high flow allocation limits). 55b- request clarification of this point.
180.5	Charlotte	Drury	Horticulture New Zealand	POL TANK 55	Amend	Amend to more appropriately reflect the water take focus of the policy, and the fact it relates to offstream dams, which have less effects than in-stream dams. Specific wording provided in submission.
185.17	Allen	Kittow	Tremaine Farms Ltd	POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
185.25	Allen	Kittow	Tremaine Farms Ltd	POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
186.17	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
186.25	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
193.10	Bruce	Mackay	Heinz Wattie's Limited	POL TANK 55	Amend	Stored water should be harvested at times between median and 3 times median flows, into an off stem containment or a dam on a minor (not named) tributary, hopefully well up the catchment, then water is released to the mainstem when required for any potential use, that can then provide an environmental benefit as it travels down the mainstem, recharging the aquifer which is then extracted using existing groundwater takes infrastructure.
194.76	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 55	Support	Retain as drafted.
195.76	Peter	Matich	Federated Farmers of New Zealand	POL TANK 55	Support	That Policy 55 be retained as notified
196.18	Julian	Odering	Oderings Nurseries	POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
196.26	Julian	Odering	Oderings Nurseries	POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
210.76	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 55	Amend	Add (viii) "the physical condition of the active channel, riparian areas, and floodplain, and the habitat they provides" Amend (ix) to state that takes are subject to minimum flows and allocation limits, and state where the allocation limits and cease takes are situated in the plan (i.e. what schedule). Insert limit on the proportion of flow that can be taken above the median flow and reflect that in a relevant schedule.
211.17	Brian	McLay		POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
211.25	Brian	McLay		POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
214.17	Scott	Lawson	Hawkes Bay Vegetable Growers Association	POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
214.25	Scott	Lawson	Hawkes Bay Vegetable Growers Association	POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).

215.17	Peter	Dooney	Dooney Partnership	POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
215.25	Peter	Dooney	Dooney Partnership	POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
217.16	Paul	Paynter	Johnny Appleseed Holdings Ltd	POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
217.24	Paul	Paynter	Johnny Appleseed Holdings Ltd	POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
218.17	Adrian	Mannering	Irrigation Services	POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
218.25	Adrian	Mannering	Irrigation Services	POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
219.17	Michael & Julie	Russell		POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
219.25	Michael & Julie	Russell		POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
220.17	Steve	Gillum	Gillum Springfield Trust	POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
220.25	Steve	Gillum	Gillum Springfield Trust	POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
221.17	WT	Scott		POL TANK 55	Oppose	No specific decision sought but state that the allocation limit for high flow takes should be revisited.
221.25	WT	Scott		POL TANK 55	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
241.11	Penny and John	Reynolds		POL TANK 55	Amend	Policy 55 ix) and x) - We support this with amendments and clarification. We are concerned this will have a detrimental effect on our business.
Benefits of Water Storage and Augmentation						
11.11	Matt	Edwards		Benefits of Water Storage and Augmentation	Not Stated	Augmentation. If developed this would alleviate the situation for sometime. No answer on this topic when I put the question. Is this going to be another Ruataniwha with millions wasted? More water was needed yesterday, not tomorrow. I cannot understand why construction isn't proceeding right now, with urgency.
30.5	Anthea	Yule	Paranui Farming Trust	Benefits of Water Storage and Augmentation	Support	Retain policies 56, 57, 58 relating to the benefits of water storage and augmentation.
46.9	Tom	Belford	Peter Beaven & Tom Belford	Benefits of Water Storage and Augmentation	Support	States accomplishments of PC9: A programme to augment stream and spring flows (thereby improving water quality and ecosystem health in our lowland streams like the Karamu) will be trialled and monitored closely for effectiveness.
195.5	Peter	Matich	Federated Farmers of New Zealand	Benefits of Water Storage and Augmentation	Amend	HBRC should play a central role in establishing lowland stream augmentation schemes.
195.77	Peter	Matich	Federated Farmers of New Zealand	Benefits of Water Storage and Augmentation	Support	That Policies 56, 57 and 58 be retained as notified
POL TANK 56						
8.20	Rengasamy	Balasubramaniam	Delegat Limited	POL TANK 56	Support	Support Policy 56
10.7	David	Renouf		POL TANK 56	Amend	Amend Policy 56 - The Council will – Add 'actively encourage and' That the Council will put in a condition into new resource consents to take water from wells. Add 'Where possible positive artesian pressure be maintained under abstraction conditions'
23.18	Kerry	Sixtus	Pattullo's Nurseries Limited	POL TANK 56	Oppose	No specific relief sought but states that the allocation limit for high flow takes should be revisited.
23.26	Kerry	Sixtus	Pattullo's Nurseries Limited	POL TANK 56	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
32.18	Kent	Griffiths		POL TANK 56	Oppose	No specific relief sought but states that the allocation limit for high flow takes should be revisited.
32.26	Kent	Griffiths		POL TANK 56	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
35.18	Colin	Campbell		POL TANK 56	Oppose	No specific relief sought but states that the allocation limit for high flow takes should be revisited.
35.26	Colin	Campbell		POL TANK 56	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
37.18	Greg	Evans	Dartmoor Estate Ltd	POL TANK 56	Oppose	No specific relief sought but states that the allocation limit for high flow takes should be revisited.
37.26	Greg	Evans	Dartmoor Estate Ltd	POL TANK 56	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
38.18	Roger	Brownlie		POL TANK 56	Oppose	No specific relief sought but states that the allocation limit for high flow takes should be revisited.
38.26	Roger	Brownlie		POL TANK 56	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
43.18	CA & GW	Wilson	Meiros Orchard Ltd	POL TANK 56	Oppose	No specific relief sought but states that the allocation limit for high flow takes should be revisited.
43.26	CA & GW	Wilson	Meiros Orchard Ltd	POL TANK 56	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
44.18	Brian	Fulford	Omahuri Orchards (2019) Ltd.	POL TANK 56	Oppose	No specific relief sought but states that the allocation limit for high flow takes should be revisited.
44.26	Brian	Fulford	Omahuri Orchards (2019) Ltd.	POL TANK 56	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
47.10	John	Bostock	John Bostock & Eddie Crasborn	POL TANK 56	Amend	Amend policies - Policy 42g), 52a) and 52d) are inconsistent with Policy 56c.
49.18	John	Parsons		POL TANK 56	Oppose	No specific relief sought but states that the allocation limit for high flow takes should be revisited.

49.26	John	Parsons		POL TANK 56	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
51.70	Ivan	Knauf	Wairua Dairies Ltd	POL TANK 56	Support	Policy 56 a-h - support. Enabling water storage is a critical part of that planning. Although we continue to invest in on-farm storage, we believe our catchment community should be investing for the future as well, not leaving these important strategic investments to adhoc private investors only. Thereby a broader scheme with wider community benefits can be developed.
54.18	Mark	Apatu	Apatu Farms Ltd	POL TANK 56	Oppose	No specific relief sought but states that the allocation limit for high flow takes should be revisited.
54.26	Mark	Apatu	Apatu Farms Ltd	POL TANK 56	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
58.30	Peter	Wilson	Hawkes Bay Fish and Game Council	POL TANK 56	Amend	No specific decision requested but raises issues relating to internal consistency
61.18	Greg	Simpson		POL TANK 56	Oppose	No specific relief sought but states that the allocation limit for high flow takes should be revisited.
61.26	Greg	Simpson		POL TANK 56	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
62.18	Jonty	Moffett		POL TANK 56	Oppose	No specific relief sought but states that the allocation limit for high flow takes should be revisited.
62.26	Jonty	Moffett		POL TANK 56	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
63.16	Keith	Marshall	Napier City Council	POL TANK 56	Amend	Amend the Policy to provide discretion as to the type of activity and scale of activity that is to be subject to the full extent of the Policy. Suggested wording provided.
69.18	Jos	Dames	Dames Limited	POL TANK 56	Oppose	No specific relief sought but states that the allocation limit for high flow takes should be revisited.
69.26	Jos	Dames	Dames Limited	POL TANK 56	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
71.18	Carl	Knapp	Bellingham Orchard Ltd.	POL TANK 56	Oppose	No specific relief sought but states that the allocation limit for high flow takes should be revisited.
71.26	Carl	Knapp	Bellingham Orchard Ltd.	POL TANK 56	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
72.18	Justin	Addis	Armada Orchard Ltd	POL TANK 56	Oppose	No specific relief sought but states that the allocation limit for high flow takes should be revisited.
72.26	Justin	Addis	Armada Orchard Ltd	POL TANK 56	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
73.18	Bevan	Davidson		POL TANK 56	Oppose	No specific relief sought but states that the allocation limit for high flow takes should be revisited.
73.26	Bevan	Davidson		POL TANK 56	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
77.18	David & Sheryl	Mackie		POL TANK 56	Oppose	No specific relief sought but states that the allocation limit for high flow takes should be revisited.
77.26	David & Sheryl	Mackie		POL TANK 56	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
79.18	Richard	Penreath		POL TANK 56	Oppose	No specific relief sought but states that the allocation limit for high flow takes should be revisited.
79.26	Richard	Penreath		POL TANK 56	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
86.18	Peter	Scott		POL TANK 56	Oppose	No specific relief sought but states that the allocation limit for high flow takes should be revisited.
86.26	Peter	Scott		POL TANK 56	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
91.17	Johnny	Milmine	Berry Farms NZ	POL TANK 56	Oppose	No specific relief sought but states that the allocation limit for high flow takes should be revisited.
91.25	Johnny	Milmine	Berry Farms NZ	POL TANK 56	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
95.18	Johnny	Milmine	Prime Limes	POL TANK 56	Oppose	No specific relief sought but states that the allocation limit for high flow takes should be revisited.
95.26	Johnny	Milmine	Prime Limes	POL TANK 56	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
96.18	Mike	Davis	Davis Orchards Ltd	POL TANK 56	Oppose	No specific relief sought but states that the allocation limit for high flow takes should be revisited.
96.26	Mike	Davis	Davis Orchards Ltd	POL TANK 56	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
97.19	Lesley	Wilson	DN & LR Wilson Ltd	POL TANK 56	Oppose	No specific relief sought but states that the allocation limit for high flow takes should be revisited.
97.27	Lesley	Wilson	DN & LR Wilson Ltd	POL TANK 56	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
99.44	Jerf	van Beek	Twyford Water	POL TANK 56	Oppose	No specific relief sought but states that the allocation limit for high flow takes should be revisited.
99.52	Jerf	van Beek	Twyford Water	POL TANK 56	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
104.18	John	Loughlin	Rockit Global Limited	POL TANK 56	Oppose	No specific relief sought but states that the allocation limit for high flow takes should be revisited.
104.26	John	Loughlin	Rockit Global Limited	POL TANK 56	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
105.18	Scott	Lawson		POL TANK 56	Oppose	No specific relief sought but states that the allocation limit for high flow takes should be revisited.
105.26	Scott	Lawson		POL TANK 56	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
110.18	Edward	Whyte	Whyte & Co	POL TANK 56	Oppose	No specific relief sought but states that the allocation limit for high flow takes should be revisited.

110.26	Edward	Whyte	Whyte & Co	POL TANK 56	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).

POL TANK 58						
108.4	Brian	Eccles	Jet Boating New Zealand	POL TANK 58	Support	Support policy 58, retention of this clause as it is worded. JBNZ opposes dams in the main stems of these rivers because: - 1. The potential downstream effects on braiding caused by interruption to aggregate movement and interruption to the frequency of flows above three times the median flow. 2. The blocking of passage by craft
123.95	Jenny	Nelson-Smith	Department of Conservation	POL TANK 58	Support	Support in part - all run of river dams should be prohibited
210.79	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 58	Support	Amend to prohibit all run of river dams (i.e. only allow 'off line' storage).
High Flow Reservation						
29.35	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	High Flow Reservation	Oppose	Policy 59 needs significant re-write to address the above inconsistencies between the policy as it now stands and the framework agreed in TANK. It should distinguish clearly between water for environmental enhancement and water for Maori development, reduce the proposed Maori development reservation for the Ngaruroro River from 1600L/s to 1200L/s in line with the 20% new-water allocation agreed at TANK and remove the presumption that the private sector will fund the infrastructure costs in relation to exercise of the Maori development portion of the high flow allocation.
29.36	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	High Flow Reservation	Amend	Amend Policy 60 to read "When making decisions about resource consent applications to take and store high flow water, the Council will may take into account the following matters: a) whether water allocated any benefits for development of Maori well-being." [deleting the wording in clauses b-f], or similar wording to achieve the outcome sought in this submission.
132.47	Marei	Apatu	Te Taiwhenua o Heretaunga	High Flow Reservation	Not Stated	Restrict high flow abstractions to 15 May - 15 October in any year
195.6	Peter	Matich	Federated Farmers of New Zealand	High Flow Reservation	Amend	Amend to distinguish clearly between water for environmental enhancement and water for Maori development
195.78	Peter	Matich	Federated Farmers of New Zealand	High Flow Reservation	Amend	That Policies 59 and 60 be deleted, And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
POL TANK 59						
14.10	Ryan	Fraser		POL TANK 59	Amend	Amend Policy 59 - Require rewrite of the policy to distinguish clearly between water for environmental enhancement and water for Maori development, reduce the proposed Maori development reservation for the Ngaruroro River from 1600L/s to 1200L/s in line with the 20% new-water allocation agreed at TANK and remove the presumption that the private sector will fund the infrastructure costs in relation to exercise of the Maori development portion of the high flow allocation.

76.14	Larry	Morgan	Te Mata Estate Winery Ltd	POL TANK 59	Not Stated	Policy 59 needs significant re-write to address the above inconsistencies between the policy as it now stands, and the framework agreed in TANK. It should distinguish clearly between water for environmental enhancement and water for Maori development, reduce the proposed Maori development reservation for the Ngaruroro River from 1600L/s to 1200L/s in line with the 20% new-water allocation agreed at TANK and remove the presumption that the private sector will fund the infrastructure costs in relation to exercise of the Maori development portion of the high flow allocation.
81.14	Tony	Smith	Babich Wines	POL TANK 59	Not Stated	Policy 59 needs significant re-write to address the above inconsistencies between the policy as it now stands, and the framework agreed in TANK. It should distinguish clearly between water for environmental enhancement and water for Maori development, reduce the proposed Maori development reservation for the Ngaruroro River from 1600L/s to 1200L/s in line with the 20% new-water allocation agreed at TANK and remove the presumption that the private sector will fund the infrastructure costs in relation to exercise of the Maori development portion of the high flow allocation.

84.14	Grant	Edmonds	Redmetal Vineyards Ltd	POL TANK 59	Not Stated	Policy 59 needs significant re-write to address the above inconsistencies between the policy as it now stands, and the framework agreed in TANK. It should distinguish clearly between water for environmental enhancement and water for Maori development, reduce the proposed Maori development reservation for the Ngaruroro River from 1600L/s to 1200L/s in line with the 20% new-water allocation agreed at TANK and remove the presumption that the private sector will fund the infrastructure costs in relation to exercise of the Maori development portion of the high flow allocation.
87.19	Peter	Scott	Kereru Road Vineyard	POL TANK 59	Not Stated	Policy 59 needs significant re-write to address the above inconsistencies between the policy as it now stands, and the framework agreed in TANK. It should distinguish clearly between water for environmental enhancement and water for Maori development, reduce the proposed Maori development reservation for the Ngaruroro River from 1600L/s to 1200L/s in line with the 20% new-water allocation agreed at TANK and remove the presumption that the private sector will fund the infrastructure costs in relation to exercise of the Maori development portion of the high flow allocation.
94.14	Deane	Caughey	Indevin Group Ltd	POL TANK 59	Not Stated	Policy 59 needs significant re-write to address the above inconsistencies between the policy as it now stands, and the framework agreed in TANK. It should distinguish clearly between water for environmental enhancement and water for Maori development, reduce the proposed Maori development reservation for the Ngaruroro River from 1600L/s to 1200L/s in line with the 20% new-water allocation agreed at TANK and remove the presumption that the private sector will fund the infrastructure costs in relation to exercise of the Maori development portion of the high flow allocation.
99.21	Jerf	van Beek	Twynford Water	POL TANK 59	Not Stated	Not opposed to a portion of 20% high flow allocation to be reserved for Maori. However this high flow allocation must be used for environmental flows or unlocking Maori land that is unconsented and therefore is not able to access existing water and is therefore reliant on "New Water" from the high flow allocation.
102.14	Ritchie	Garnham	Booster Wine Group	POL TANK 59	Not Stated	Policy 59 needs significant re-write to address the above inconsistencies between the policy as it now stands, and the framework agreed in TANK. It should distinguish clearly between water for environmental enhancement and water for Maori development, reduce the proposed Maori development reservation for the Ngaruroro River from 1600L/s to 1200L/s in line with the 20% new-water allocation agreed at TANK and remove the presumption that the private sector will fund the infrastructure costs in relation to exercise of the Maori development portion of the high flow allocation.
107.14	Christopher	Harrison	Beach House Wines Ltd	POL TANK 59	Not Stated	Policy 59 needs significant re-write to address the above inconsistencies between the policy as it now stands, and the framework agreed in TANK. It should distinguish clearly between water for environmental enhancement and water for Maori development, reduce the proposed Maori development reservation for the Ngaruroro River from 1600L/s to 1200L/s in line with the 20% new-water allocation agreed at TANK and remove the presumption that the private sector will fund the infrastructure costs in relation to exercise of the Maori development portion of the high flow allocation.
108.5	Brian	Eccles	Jet Boating New Zealand	POL TANK 59	Oppose	Oppose policy 59, the allocation of 20% of the total water available. JBNZ is concerned about the changes to riverbed morphology that will result from high flow takes beyond those specified in Schedule 32 and seeks a change to the policy so that the schedule reflects the policy. Schedule 32 sets an acceptable take when the river exceeds the high flow trigger. The massive gap between the sensible schedule 32 and the policy it sits under must be resolved. Wording like the following is proposed <i>Abstraction at high flows will limit the amount of flow alteration so that the take, either on its own or in combination with other takes in the catchment does not cumulatively adversely affect the frequency of flows above three times the median flow by more than a minor amount.</i>
133.4	Wi	Huata		POL TANK 59	Amend	Policy 59 needs to be changed so that the 20% is for Maori development full stop. Concern that where council staff are involved in allocating resources, water or finance, then Pakeha will take the resources meant to right an injustice through the environmental enhancement loophole or through Pakeha paying for the "Maori development" water and funds used for Maori goods.
141.10	Danny	Angland	Kereru Station	POL TANK 59	Oppose	Oppose in part. more explanation is needed. Up until iwi can demonstrate they have the infrastructure to utilize it on their properties the 20% should be made available to consent holders.
143.13	Peter	Hyslop	Strathallan Trust	POL TANK 59	Not Stated	Policy 59 needs significant re-write to address the above inconsistencies between the policy as it now stands, and the framework agreed in TANK. It should distinguish clearly between water for environmental enhancement and water for Maori development, reduce the proposed Maori development reservation for the Ngaruroro River from 1600L/s to 1200L/s in line with the 20% new-water allocation agreed at TANK and remove the presumption that the private sector will fund the infrastructure costs in relation to exercise of the Maori development portion of the high flow allocation.
165.14	Caleb	Dennis	Aotearoa New Zealand Fine Wine Estates LP	POL TANK 59	Not Stated	Policy 59 needs significant re-write to address the above inconsistencies between the policy as it now stands, and the framework agreed in TANK. It should distinguish clearly between water for environmental enhancement and water for Maori development, reduce the proposed Maori development reservation for the Ngaruroro River from 1600L/s to 1200L/s in line with the 20% new-water allocation agreed at TANK and remove the presumption that the private sector will fund the infrastructure costs in relation to exercise of the Maori development portion of the high flow allocation.

179.14	Wim	Barendsen	Otawhao Farms Ltd	POL TANK 59	Not Stated	Policy 59 needs significant re-write to address the above inconsistencies between the policy as it now stands, and the framework agreed in TANK. It should distinguish clearly between water for environmental enhancement and water for Maori development, reduce the proposed Maori development reservation for the Ngaruroro River from 1600L/s to 1200L/s in line with the 20% new-water allocation agreed at TANK and remove the presumption that the private sector will fund the infrastructure costs in relation to exercise of the Maori development portion of the high flow allocation.
180.51	Charlotte	Drury	Horticulture New Zealand	POL TANK 59	Amend	Amend by deleting c).
193.12	Bruce	Mackay	Heinz Wattie's Limited	POL TANK 59	Amend	Policy 59 c) - Has inadvertently created a "price" for water, that being "the commercial returns resulting from the application. The reservation of some allocation is not opposed in principle, however the opportunity to "sell" that reservation and apply that financial benefit to a sector of our society (for Maori land) is opposed.
199.14	Peter	Robertson	Brookfields Vineyards/Ohiti Estate	POL TANK 59	Not Stated	Policy 59 needs significant re-write to address the above inconsistencies between the policy as it now stands, and the framework agreed in TANK. It should distinguish clearly between water for environmental enhancement and water for Maori development, reduce the proposed Maori development reservation for the Ngaruroro River from 1600L/s to 1200L/s in line with the 20% new-water allocation agreed at TANK and remove the presumption that the private sector will fund the infrastructure costs in relation to exercise of the Maori development portion of the high flow allocation.
201.46	Liz	Munroe	Heretaunga Tamatea Settlement Trust	POL TANK 59	Amend	The council will allocate 20% of the total water available at times of high flow to Heretaunga Tamatea Settlement Trust to provide for development of Heretaunga Tamatea hapu and Marae in relation to Maori cultural, social, economic wellbeings and will have regard to the views of any affected PSGE. iwi authority.
204.14	Juliet	Gray	Peter Lyons Trust (Lyons Vineyard)	POL TANK 59	Not Stated	Policy 59 needs significant re-write to address the above inconsistencies between the policy as it now stands, and the framework agreed in TANK. It should distinguish clearly between water for environmental enhancement and water for Maori development, reduce the proposed Maori development reservation for the Ngaruroro River from 1600L/s to 1200L/s in line with the 20% new-water allocation agreed at TANK and remove the presumption that the private sector will fund the infrastructure costs in relation to exercise of the Maori development portion of the high flow allocation.
205.1	Ben	Hindmarsh	Ahuriri Farming Ltd	POL TANK 59	Oppose	Thoroughly opposes the proposed ability for local iwi to be gifted the right to use 20% of a water body created by a landowner. Would rather see a significant effort to support iwi in building their own site specific projects where they need them most and 100% funded by their own means.
210.8	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 59	Amend	Revise with iwi input Make it clear that any allocation to iwi is independent of allocations to address environmental issues (i.e. low flows). Ensure consistency with NPSFM and RMA.
213.14	Peter	Scott	The Wine Portfolio	POL TANK 59	Not Stated	Policy 59 needs significant re-write to address the above inconsistencies between the policy as it now stands, and the framework agreed in TANK. It should distinguish clearly between water for environmental enhancement and water for Maori development, reduce the proposed Maori development reservation for the Ngaruroro River from 1600L/s to 1200L/s in line with the 20% new-water allocation agreed at TANK and remove the presumption that the private sector will fund the infrastructure costs in relation to exercise of the Maori development portion of the high flow allocation.
231.9	Peter	Kay		POL TANK 59	Amend	Agree in part. Essential we use water available at high flow times, but concerns about the exclusivity the rules are making. Defining commercial returns would be very hard to do. Agree with the straight 20% allocation reserved for Iwi for Maori land development.
POL TANK 60						
63.18	Keith	Marshall	Napier City Council	POL TANK 60	Amend	Amend the Policy to link it to takes considered under Policy 59. Suggested wording provided.
99.22	Jerf	van Beek	Twynford Water	POL TANK 60	Amend	Submits that an amendment is required to make clear that Policy 60 is only relevant to consideration of applications under Policy 59.
108.6	Brian	Eccles	Jet Boating New Zealand	POL TANK 60	Oppose	Oppose policy 60 as currently worded. Proposes the addition of clauses that the council should take into account: - 1. The effect of the take on the morphology of the downstream riverbed, including the effect of reducing the frequency of flows exceeding three times the median flow (FRE3) by more than a minor amount. 2. The impact of intake works on the riverbed 3. Any restrictions the intake may place on access to the river within the area of the intake.
180.52	Charlotte	Drury	Horticulture New Zealand	POL TANK 60	Amend	Amend as follows: 'When making decisions about resource consent applications to take and store high flow water in accordance with Policy 59, the Council will take into account the following matters:...'
194.77	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	POL TANK 60	Amend	Amend 5.10.8.60 in order to clarify that (b)-(f) only relate to decisions about applications relating to 5.10.8.59, and for all other applications to take and store high water flow – only 5.10.8.60(a) applies. Or conversely, if it is intended to apply more generally, clarify this and also consider whether it would be appropriate to confine these requirements to takes over a certain threshold.
207.18	Mark	Clews	Hastings District Council	POL TANK 60	Amend	Amend the Policy to link it to takes considered under Policy 59. Suggested wording provided.
210.81	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	POL TANK 60	Amend	Revise with iwi input

Chapter 6: New Regional Rules

17.7	Richard	Riddell	Olrig Limited	Chapter 6 New Regional Rules	Oppose	Rule TANK 3 and 7 - oppose provisions which are ambiguous and where the implications for my farm or community are not clear. We seek that these are deleted or alternatively amended to provide clarity and ensure that they can be implemented on farm in a practicable way.
21.7	Robert & Helen	Patullo	Newstead Farm Ltd	Chapter 6 New Regional Rules	Oppose	Rule TANK 3 and 7 - oppose provisions which are ambiguous and where the implications for my farm or community are not clear. We seek that these are deleted or alternatively amended to provide clarity and ensure that they can be implemented on farm in a practicable way.
29.44	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Chapter 6 New Regional Rules	Amend	TANK Rule 1 - Add a Condition to 6.3.1 Rule 1 reading: "c. The bore is located within a Source Protection Zone but is a replacement for an existing bore that will be decommissioned." or similar wording to achieve the outcome sought in this submission.
35.79	Colin	Campbell		Chapter 6 New Regional Rules	Oppose	I oppose provisions which are ambiguous and where the implications for my farm or community are not clear (Rule TANK 3, TANK 7). I seek that these are deleted, or amended to provide clarity and ensure that they can be implemented on farm in a practicable way. In particular, I seek clarity about what waterways will need to be excluded from stock access.
40.7	Jeremy	White	J and S White Contracting Ltd	Chapter 6 New Regional Rules	Oppose	Rule TANK 3 and 7 - oppose provisions which are ambiguous and where the implications for my farm or community are not clear. We seek that these are deleted or alternatively amended to provide clarity and ensure that they can be implemented on farm in a practicable way.
45.9	Sydney	Parks	Westbrook Farm Ltd	Chapter 6 New Regional Rules	Oppose	Rule TANK 3 and 7 - oppose provisions which are ambiguous and where the implications for my farm or community are not clear. We seek that these are deleted or alternatively amended to provide clarity and ensure that they can be implemented on farm in a practicable way.
58.31	Peter	Wilson	Hawkes Bay Fish and Game Council	Chapter 6 New Regional Rules	Amend	Amend all rules to state matters of control/discretion/notification
63.19	Keith	Marshall	Napier City Council	Chapter 6 New Regional Rules	Not Stated	No specific decision requested but states that sub-headings above the conditions also confuse the understanding of the rule framework and are not necessary.
109.5	Stuart	Macintyre	Turamoe Farm	Chapter 6 New Regional Rules	Amend	Structure PC9 rules to account for differences in farm size. Providing rules which allow graduated requirements by farm size allow these rules to provide the biggest positive impact from a smaller number of farms which have the greatest overall environmental impact; thus, making these rules more efficient. (TANK 1, TANK 2)
109.6	Stuart	Macintyre	Turamoe Farm	Chapter 6 New Regional Rules	Oppose	Strongly oppose provisions which are ambiguous and where the implications for our farm or community are not clear (Rule TANK 1, TANK 2, TANK 3, TANK 5 and 6, TANK 7, Schedule 29, Schedule 30). We seek that these are deleted, or alternatively amended to provide clarity and ensure that they can be implemented on farm in a practicable way. In particular, we seek clarity about what waterways will need to be excluded from stock access.
112.7	Ainsley	Harte		Chapter 6 New Regional Rules	Oppose	Rule TANK 3 and 7 - oppose provisions which are ambiguous and where the implications for my farm or community are not clear. We seek that these are deleted or alternatively amended to provide clarity and ensure that they can be implemented on farm in a practicable way.
114.4	James	Lyons		Chapter 6 New Regional Rules	Oppose	Rule TANK 3 and 7 - oppose provisions which are ambiguous and where the implications for my farm or community are not clear. We seek that these are deleted or alternatively amended to provide clarity and ensure that they can be implemented on farm in a practicable way.
120.103	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Chapter 6 New Regional Rules	Amend	Amend Change 9 so that it does not permit the discharge of contaminants to water from land use (TANK 1)
129.5	Ceri	Edmonds	Hawke's Bay Regional Council	Chapter 6 New Regional Rules	Amend	Amend the provisions of the proposed TANK Plan Change so that they are consistent with the Resource Management (National Environmental Standards for Freshwater) Regulations 2020 (Freshwater NES),
129.6	Ceri	Edmonds	Hawke's Bay Regional Council	Chapter 6 New Regional Rules	Amend	Amend the provisions of the proposed TANK Plan Change so that they are consistent with the Resource Management (Stock Exclusion) Regulations 2020.
132.79	Marei	Apatu	Te Taiwhenua o Heretaunga	Chapter 6 New Regional Rules	Oppose	Opposes all the rules
195.7	Peter	Matich	Federated Farmers of New Zealand	Chapter 6 New Regional Rules	Amend	Amend to remove references to assessment of 'actual or potential effects' of activities in the SPZs on Registered Drinking Water Supplies in Rules TANK 4/5/6/9/10
207.21	Mark	Clews	Hastings District Council	Chapter 6 New Regional Rules	Not Stated	No specific decision requested but states that sub-headings above the conditions also confuse the understanding of the rule framework and are not necessary.
208.16	Emma	Taylor	Villa Maria Estate Limited	Chapter 6 New Regional Rules	Amend	Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10.
210.82	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Chapter 6 New Regional Rules	Oppose	TANK 1: Amend to make consistent with the NPSFM and to increase Council's scope to assess whether an activity and associated discharge is appropriate. This could be achieved by making the use of productive land for farming a restricted discretionary activity in some catchments or where water quality targets are not met a full discretionary activity. Amend to include matters of discretion. Provide scope for council reviews of all farm plans.
238.19	Emma	Taylor	Gimblett Gravels Winegrowers Association	Chapter 6 New Regional Rules	Oppose	Remove the references to assessment of actual or potential effects of activities in the SPZs on Registered Drinking Water Supplies from Rules TANK 4/5/6/9/10.
6.10.1 Use of Production Land						
8.21	Rengasamy	Balasubramaniam	Delegat Limited	6.10.1 Use of Production Land	Support	Support Rule TANK 1

8.46	Rengasamy	Balasubramaniam	Delegat Limited	6.10.1 Use of Production Land	Oppose	Oppose Rule TANK 5 - Either delete Rules TANK 5 and 6 and Schedule 29 <u>or</u> amend them to ensure they are no more onerous than Government's proposed national environmental standards restricting agricultural intensification.
8.47	Rengasamy	Balasubramaniam	Delegat Limited	6.10.1 Use of Production Land	Oppose	Oppose Rule TANK 6 - Either delete Rules TANK 5 and 6 and Schedule 29 <u>or</u> amend them to ensure they are no more onerous than Government's proposed national environmental standards restricting agricultural intensification.
8.49	Rengasamy	Balasubramaniam	Delegat Limited	6.10.1 Use of Production Land	Oppose	Oppose Rule TANK 5 - If Rule 5 is retained, amend condition (a) to read: <i>Any change to a production land use activity over more than 10ha of the property or enterprise area commencing after 2 May 2020 does not result in the annual nitrogen loss increasing by more than the applicable amount shown in Table 2 in Schedule 29</i>
14.11	Ryan	Fraser		6.10.1 Use of Production Land	Amend	Amend Rule TANK 5 - Rewrite to provide clarity about what constitutes a change to production land use activity.
14.12	Ryan	Fraser		6.10.1 Use of Production Land	Amend	Amend Rule TANK 6 - Review the Table 2 Schedule 29 grape figures to account for the effects of autumn/winter sheep grazing.
15.13	Andrea and Phil	Cranswick	Meridien Trust	6.10.1 Use of Production Land	Amend	Amend Rule TANK 5 - Rewrite to provide clarity about what constitutes a change to production land use activity.
15.14	Andrea and Phil	Cranswick	Meridien Trust	6.10.1 Use of Production Land	Amend	Amend Rule TANK 6 - Review the Table 2 Schedule 29 grape figures to account for the effects of autumn/winter sheep grazing.
18.15	Mark	Cairns	MD Cairns & AR Wright Partnership	6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.
18.16	Mark	Cairns	MD Cairns & AR Wright Partnership	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address the effects of model and/or version changes to modelled outputs.
20.13	Bruce	Nimon		6.10.1 Use of Production Land	Amend	Amend Rule TANK 5 - Rewrite to provide clarity about what constitutes a change to production land use activity.
20.14	Bruce	Nimon		6.10.1 Use of Production Land	Amend	Amend Rule TANK 6 - Review the Table 2 Schedule 29 grape figures to account for the effects of autumn/winter sheep grazing.
21.8	Robert & Helen	Patullo	Newstead Farm Ltd	6.10.1 Use of Production Land	Amend	Rule TANK 1 - The preparation of a Farm Environmental Plan must not become an expensive, beauracatic document that is a barrier to getting them done. However there must be some consistency around targets and goals in each FEP that meet the objectives of TANK. Farmers should be involved in the preparation of their own Farm Plan and 'own' the document.
21.10	Robert & Helen	Patullo	Newstead Farm Ltd	6.10.1 Use of Production Land	Support	Rule TANK 2 - retain as proposed.
21.11	Robert & Helen	Patullo	Newstead Farm Ltd	6.10.1 Use of Production Land	Amend	Rule TANK 3 - seek that the word 'bed' in TANK 3 & 4 is defined and that the definition used by Horizon s Council is adopted being ' <i>Active bed means the bed of a river that is intermittently flowing and where the bed is predominantly unvegetated and comprises sand, gravel, boulders or similar material</i> ' Seek that the provision is changed to align with the National Policy Statement for Essential Freshwater Management, specifically that exclusion only apply to waterways greater than 1m wide, the stocking rate of 18su/ha is deleted and that hill country farms are excluded.
21.12	Robert & Helen	Patullo	Newstead Farm Ltd	6.10.1 Use of Production Land	Amend	Rule TANK 5 - Seek that Condition b) be amended to include Farm Environment Plans meeting the requirements of Schedule 30C. ·Seek that this rule is amended so that the threshold for change is 20ha or 20% of the property whichever is greater. This is consistent with TANK 1 & 2 which encourage the development of Farm Environment Plans or landowners to be part of Catchment Collectives.
25.15	Xan	Harding		6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.
25.16	Xan	Harding		6.10.1 Use of Production Land	Amend	Rule TANK 6 - Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address the effects of model and/or version changes to modelled outputs.
26.15	Robin	Back	Dunvegan Estate	6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.
26.16	Robin	Back	Dunvegan Estate	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address the effects of model and/or version changes to modelled outputs.
27.1	Richmond	Beetham		6.10.1 Use of Production Land	Oppose	Rule TANK 3 - That the permitted activity rule around grazing cattle on land above 15 degrees is removed specifically the 18SU/Ha on a paddock basis Threshold which captures any sort of rotational grazing of cattle on hill country with permanent and intermittent streams.
28.15	Hamish	Clark	Saint Clair Family Estate Ltd	6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.
28.16	Hamish	Clark	Saint Clair Family Estate Ltd	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address the effects of model and/or version changes to modelled outputs.
29.37	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	6.10.1 Use of Production Land	Amend	TANK 1 - Amend all references to Farm Environment Plan in this Plan Change to "freshwater farm plan" and otherwise align the Plan Change requirements to those of the Resource Management Amendment Act 2020 and related S.360 regulations.

29.38	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	6.10.1 Use of Production Land	Amend	TANK 2 - Amend all references to Farm Environment Plan in this Plan Change to "freshwater farm plan" and otherwise align the Plan Change requirements to those of the Resource Management Amendment Act 2020 and related S.360 regulations.
29.62	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	6.10.1 Use of Production Land	Amend	Amend TANK 5 conditions/standards/terms to read "...subject to a Catchment Collective Programme meeting the requirements of Schedule 30B or by a TANK Catchment Collective..."
34.15	Jonathan	Hamlet	Craggy Range Vineyards Limited	6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.
34.16	Jonathan	Hamlet	Craggy Range Vineyards Limited	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address the effects of model and/or version changes to modelled outputs.
35.80	Colin	Campbell		6.10.1 Use of Production Land	Amend	Rule TANK 1 - The requirement for the Farm Environmental Plan be prepared by a person with qualifications be removed and propose that farmers are able to prepare their own plans. Farmers should be involved in the preparation of their own Farm Plan and 'own' the document.
35.82	Colin	Campbell		6.10.1 Use of Production Land	Support	Rule TANK 2 - retain as proposed.
35.83	Colin	Campbell		6.10.1 Use of Production Land	Amend	Rule TANK 3 - seek that the word 'bed' in TANK 3 & 4 is defined and that the definition used by Horizon s Council is adopted being 'Active bed means the bed of a river that is intermittently flowing and where the bed is predominantly unvegetated and comprises sand, gravel, boulders or similar material' Seek that the provision is changed to align with the National Policy Statement for Essential Freshwater Management, specifically that exclusion only apply to waterways greater than 1m wide, the stocking rate of 18su/ha is deleted and that hill country farms are excluded
35.84	Colin	Campbell		6.10.1 Use of Production Land	Amend	Rule TANK 5 - Seek that Condition b) be amended to include Farm Environment Plans meeting the requirements of Schedule 30C. -Seek that this rule is amended so that the threshold for change is 20ha or 20% of the property whichever is greater. This is consistent with TANK 1 & 2 which encourage the development of Farm Environment Plans or landowners to be part of Catchment Collectives.
39.15	Bridget	Wilton	MbandSons	6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.
39.16	Bridget	Wilton	MbandSons	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address the effects of model and/or version changes to modelled outputs.
40.8	Jeremy	White	J and S White Contracting Ltd	6.10.1 Use of Production Land	Amend	Rule TANK 1 - The requirement for the Farm Environmental Plan be prepared by a person with the professional qualifications to prepare such a plan be removed and propose that farmers are able to prepare their own plan. Farmers should be involved in the preparation of their own Farm Plan and 'own' the document.
40.10	Jeremy	White	J and S White Contracting Ltd	6.10.1 Use of Production Land	Support	Rule TANK 2 - retain as proposed.
40.11	Jeremy	White	J and S White Contracting Ltd	6.10.1 Use of Production Land	Amend	Rule TANK 3 - seek that the word 'bed' in TANK 3 & 4 is defined and that the definition used by Horizon s Council is adopted being 'Active bed means the bed of a river that is intermittently flowing and where the bed is predominantly unvegetated and comprises sand, gravel, boulders or similar material' Seek that the provision is changed to align with the National Policy Statement for Essential Freshwater Management, specifically that exclusion only apply to waterways greater than 1m wide, the stocking rate of 18su/ha is deleted and that hill country farms are excluded
40.12	Jeremy	White	J and S White Contracting Ltd	6.10.1 Use of Production Land	Amend	Rule TANK 5 - Seek that Condition b) be amended to include Farm Environment Plans meeting the requirements of Schedule 30C. -Seek that this rule is amended so that the threshold for change is 20ha or 20% of the property whichever is greater. This is consistent with TANK 1 & 2 which encourage the development of Farm Environment Plans or landowners to be part of Catchment Collectives.
41.15	Jonathan	Milmine	Milmine Holdings Limited	6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.
41.16	Jonathan	Milmine	Milmine Holdings Limited	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address the effects of model and/or version changes to modelled outputs.
48.15	Paul	Ham	Alpha Domus	6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.
48.16	Paul	Ham	Alpha Domus	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address the effects of model and/or version changes to modelled outputs.
50.12	Alastair & Jo	Lawrence	Olrig Limited	6.10.1 Use of Production Land	Oppose	Rule TANK 5&6 - Do not support the cap of a maximum 10ha on discretionary land change. The underlying assumption is that land change will have adverse environmental consequences. If we are all farming to a set of FEPS, and within Tank Plan guidelines, there should be no limit. We consider this to be a fundamental incursion on our property rights. We do not wish to be constrained from doing what we need to do to ensure the viability of the farm and to manage risk through diversifying income sources.

50.13	Alastair & Jo	Lawrence	Olrig Limited	6.10.1 Use of Production Land	Not Stated	Rule TANK 5&6 - If there is to be a cap, the cap needs to be meaningful. A cap representing 15% of the land area would be more appropriate. Flexible farming systems will be the key to our viability. A 15% change offers us the opportunity to materially diversify our income sources, without the need to incur additional cost and time delay associated with the need for regulatory approval.
50.14	Alastair & Jo	Lawrence	Olrig Limited	6.10.1 Use of Production Land	Not Stated	Rule TANK 5&6 - Submit that this should not be a one-off event, but flexibility refreshed around a time horizon, say three years. To illustrate, Olrig may adopt a land use change over 130 ha. Five years later, it may wish to do the same again. Providing it is compliant with its FEP or the Collective Catchment FEP, why should we have to incur cost and delay of approval process.
51.8	Ivan	Knauf	Wairua Dairies Ltd	6.10.1 Use of Production Land	Amend	Amend Rules TANK 5&6 - "Any change to production land use activity over more than 50 ha or 10% of the enterprise or farm area whichever is greater commencing from 2 May 2020" Our reasons regarding this, are included in comments on Schedule 29 in submission point 51.10.
53.15	Chris	Howell	CD & CM Howell Partnership	6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.
53.16	Chris	Howell	CD & CM Howell Partnership	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address the effects of model and/or version changes to modelled outputs.
66.17	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	6.10.1 Use of Production Land	Oppose	Amend TANK 5(a) to read: a) Any change to the production land use activity commencing after 2 May 2020 is <u>either over more than 10 hectares or 10%</u> of the property or farming enterprise area, <u>whichever is the greater</u>
66.18	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	6.10.1 Use of Production Land	Oppose	Amend TANK 6(b) to read: b) Any change to a production land use activity over more than either, 10ha <u>or 10%</u> of the property or enterprise area <u>whichever is the greater</u> , commencing after 2 May 2020 that results in the annual nitrogen loss increasing by more than the applicable amount shown in Table 2 in Schedule 29.
67.8	Helen	Liddle	Focus Maraekakaho	6.10.1 Use of Production Land	Amend	Amend TANK 1 - land size to be increased to 50ha
67.9	Helen	Liddle	Focus Maraekakaho	6.10.1 Use of Production Land	Amend	TANK 5 - use of productive land should no be locked in
68.15	Geoffrey	Smith	Vine Nursery New Zealand and Waikahu Vineyard	6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.
68.16	Geoffrey	Smith	Vine Nursery New Zealand and Waikahu Vineyard	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address the effects of model and/or version changes to modelled outputs.
75.15	Andria	Monin	Stonecroft Wines Limited	6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.
75.16	Andria	Monin	Stonecroft Wines Limited	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address the effects of model and/or version changes to modelled outputs.
76.15	Larry	Morgan	Te Mata Estate Winery Ltd	6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.
76.16	Larry	Morgan	Te Mata Estate Winery Ltd	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address the effects of model and/or version changes to modelled outputs.
80.1	Graeme	Gleeson		6.10.1 Use of Production Land	Oppose	Oppose and Amend Rule TANK 3 - disregards farm system management and practice, and it is mischevious in assessing and identifying risk of contaminant loss which makes application of the rule impractical thereby it will force many farmers to seek a consent rather than continue operating as a permitted activity supported by a farm plan and community group.
81.15	Tony	Smith	Babich Wines	6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.
81.16	Tony	Smith	Babich Wines	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address the effects of model and/or version changes to modelled outputs.
83.8	Jim	Galloway		6.10.1 Use of Production Land	Not Stated	Rule TANK 1 - Amend Change 9 so that the minimum area to need a Farm Environment Plan to be lifted to 50ha
84.15	Grant	Edmonds	Redmetal Vineyards Ltd	6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.

84.16	Grant	Edmonds	Redmetal Vineyards Ltd	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address the effects of model and/or version changes to modelled outputs.
84.2	Grant	Edmonds	Redmetal Vineyards Ltd	6.10.1 Use of Production Land	Oppose	Rule TANK 5 - Ensure that the rule allows for consideration of future unforeseen circumstances on potential land use change.
85.2	Matthew	Truebridge		6.10.1 Use of Production Land	Support	Rule TANK 1 - support that farmers are provided a Permitted Activity pathway and are able to continue to farm without requiring a Resource Consent.
85.3	Matthew	Truebridge		6.10.1 Use of Production Land	Oppose	Rule TANK 5 - oppose land use specific Nitrogen Loss restrictions. Farmers should be able to remain flexible and adaptive to change in circumstances. I support more flexibility and amendment so that the land use threshold for change is 20ha or 20% of the property whichever is greater.
85.6	Matthew	Truebridge		6.10.1 Use of Production Land	Amend	Rule TANK 3 - Clarification and some certainty is required that farm access is not compromised by the need for expensive engineered bridges and crossings. I support a more practical approach where a measure of frequency would be far more reasonable. I seek further clarification for this rule. I further seek the me frame to comply with this rule is extended to 2025.
87.14	Peter	Scott	Kereru Road Vineyard	6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.
87.15	Peter	Scott	Kereru Road Vineyard	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address the effects of model and/or version changes to modelled outputs.
88.14	Jacqui	Cormack	Constellation Brands NZ Limited (CBNZ)	6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.
88.15	Jacqui	Cormack	Constellation Brands NZ Limited (CBNZ)	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address the effects of model and/or version changes to modelled outputs.
94.15	Deane	Caughey	Indevin Group Ltd	6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.
94.16	Deane	Caughey	Indevin Group Ltd	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address the effects of model and/or version changes to modelled outputs.
99.23	Jerf	van Beek	Twyford Water	6.10.1 Use of Production Land	Not Stated	Rule TANK 1 - questions how do we accommodate those growers who extensively crop right across the Heretaunga plains and by good practice rotate crops frequently to maintain productivity etc . How are farm plans in those instances expected to be managed, as multiple owners are involved, and the definition of farming enterprise requires common ownership.
99.24	Jerf	van Beek	Twyford Water	6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - If catchment collectives are genuinely to be enabled to help manage land use in an integrated way, then a) should be reworded to make the 'trigger' for consent a change in land use over more than 10% of the land area managed by the collective.
100.4	Stephanie	Murphy	Hawke's Bay Airport	6.10.1 Use of Production Land	Not Stated	Rule TANK 1 - Due to the broad definition of "production land", and "farming enterprises" there is potential for HBAL's land to be considered "production land" and thus when HBAL comes to develop this land in the future, resource consents to be required under the relevant "Use of Production Land" rules. This was unlikely to be the intent of these rules, particularly given the location of the site in the lower Ahuriri Catchment and given that any discharges in this area are to the coastal environment.
102.15	Ritchie	Garnham	Booster Wine Group	6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.
102.16	Ritchie	Garnham	Booster Wine Group	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address the effects of model and/or version changes to modelled outputs.
103.10	Ian	Quinn	Two Terraces Vineyard	6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.
103.11	Ian	Quinn	Two Terraces Vineyard	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address the effects of model and/or version changes to modelled outputs.
107.15	Christopher	Harrison	Beach House Wines Ltd	6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.
107.16	Christopher	Harrison	Beach House Wines Ltd	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address the effects of model and/or version changes to modelled outputs.

109.9	Stuart	Macintyre	Turamoe Farm	6.10.1 Use of Production Land	Amend	Rule TANK 1 - Seek that TANK 1 is modified as per the suggested TANK 1, TANK 1A, TANK 1B which identify conditions for 'permitted', 'controlled', and 'restricted discretionary' classifications. Details of amendments in submisison.
109.10	Stuart	Macintyre	Turamoe Farm	6.10.1 Use of Production Land	Amend	Rule TANK 2 - seek that TANK 2 Rules, and the proposed headings of the rules to be modified. This will align the headings of section 6.10 with the table headings of the previous sections. Amendments outlined in submission.
109.12	Stuart	Macintyre	Turamoe Farm	6.10.1 Use of Production Land	Amend	Rule TANK 5 - seek that area requirement of this rule be increased from 10 hectares to 200 hectares.
109.13	Stuart	Macintyre	Turamoe Farm	6.10.1 Use of Production Land	Amend	Rule TANK 6 - In conjunction with the modification to TANK 5 rule in submission point 109.12, we seek that the TANK 5 and TANK 6 Conditions/Standards/Terms, and Matters for Control/Discretion are reviewed against each other and combined into one rule.
112.8	Ainsley	Harte		6.10.1 Use of Production Land	Amend	Rule TANK 1 - The Farm Environmental Plan be prepared by a person with professional qualifications be removed and that farmers are able to prepare their own plan. Farmers should be involved in the preparation of their own Farm Plan and 'own' the document.
112.10	Ainsley	Harte		6.10.1 Use of Production Land	Support	Rule TANK 2 - retain as proposed.
112.11	Ainsley	Harte		6.10.1 Use of Production Land	Amend	Rule TANK 3 - seek that the word 'bed' in TANK 3 & 4 is defined and that the definition used by Horizons Council is adopted being 'Active bed means the bed of a river that is intermittently flowing and where the bed is predominantly unvegetated and comprises sand, gravel, boulders or similar material' Seek that the provision is changed to align with the National Policy Statement for Essential Freshwater Management, specifically that exclusion only apply to waterways greater than 1m wide, the stocking rate of 18su/ha is deleted and that hill country farms are excluded
112.12	Ainsley	Harte		6.10.1 Use of Production Land	Amend	Rule TANK 5 - Seek that Condition b) be amended to include Farm Environment Plans meeting the requirements of Schedule 30C. ·Seek that this rule is amended so that the threshold for change is 20ha or 20% of the property whichever is greater. This is consistent with TANK 1 & 2 which encourage the development of Farm Environment Plans or landowners to be part of Catchment Collectives.
114.5	James	Lyons		6.10.1 Use of Production Land	Amend	Rule TANK 1 - The requirement for the Farm Environmental Plan to be prepared by a person with qualifications be removed and propose that farmers are able to prepare their own plans. Farmers should be involved in the preparation of their own Farm Plan and 'own' the document.
114.7	James	Lyons		6.10.1 Use of Production Land	Support	Rule TANK 2 - retain as proposed.
114.8	James	Lyons		6.10.1 Use of Production Land	Amend	Rule TANK 3 - seek that the word 'bed' in TANK 3 & 4 is defined and that the definition used by Horizons Council is adopted being 'Active bed means the bed of a river that is intermittently flowing and where the bed is predominantly unvegetated and comprises sand, gravel, boulders or similar material' Seek that the provision is changed to align with the National Policy Statement for Essential Freshwater Management, specifically that exclusion only apply to waterways greater than 1m wide, the stocking rate of 18su/ha is deleted and that hill country farms are excluded
114.9	James	Lyons		6.10.1 Use of Production Land	Amend	Rule TANK 5 - Seek that Condition b) be amended to include Farm Environment Plans meeting the requirements of Schedule 30C. ·Seek that this rule is amended so that the threshold for change is 20ha or 20% of the property whichever is greater. This is consistent with TANK 1 & 2 which encourage the development of Farm Environment Plans or landowners to be part of Catchment Collectives.
116.2	Alexander John	Macphee		6.10.1 Use of Production Land	Support	Rule TANK 1 and 2 - strongly support these rules as written.
116.3	Alexander John	Macphee		6.10.1 Use of Production Land	Not Stated	Rule TANK 3 - Given that it will be 2 to 3 years from now before the proposed Plan Change 9 is finally accepted as law, would it not be more appropriate to specify a period of say 2 or 3 years from the date of acceptance until these rules are to be enforced. It is possible that acceptance may not even occur before 31 may 2023.
116.4	Alexander John	Macphee		6.10.1 Use of Production Land	Not Stated	Rule TANK 5 and 6 - Contradicting figures. Both 10% of the property, or 10 ha per property is referred to. 10 ha is far too restrictive for a large property. I suggest that it should read "10 ha, or 10% of the property, whichever is the greater"
119.13	Liz	Lambert	Hawke's Bay Drinking Water Governance Joint Committee	6.10.1 Use of Production Land	Support	Rule TANK 1 - Support
119.14	Liz	Lambert	Hawke's Bay Drinking Water Governance Joint Committee	6.10.1 Use of Production Land	Support	Rule TANK 2 - support
119.15	Liz	Lambert	Hawke's Bay Drinking Water Governance Joint Committee	6.10.1 Use of Production Land	Support	Rule TANK 4 - Support
119.16	Liz	Lambert	Hawke's Bay Drinking Water Governance Joint Committee	6.10.1 Use of Production Land	Support	Rule TANK 5 - support
119.17	Liz	Lambert	Hawke's Bay Drinking Water Governance Joint Committee	6.10.1 Use of Production Land	Support	Rule TANK 6 - Support
120.25	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	6.10.1 Use of Production Land	Amend	Rule TANK 1 - Require farm plans for all farms >4ha in the TANK catchments
120.3	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	6.10.1 Use of Production Land	Amend	Rule TANK 2 - Regulate and manage all point source discharges and require them to meet water quality objectives and targets in Schedule 26 within the life of the plan
120.102	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	6.10.1 Use of Production Land	Amend	Rule TANK 1 - Amend so that land uses in catchments with identified water quality issues are regulated activities
123.96	Jenny	Nelson-Smith	Department of Conservation	6.10.1 Use of Production Land	Oppose	Rule TANK 1 - Amend Rule 1 so that the use of productive land for farming is a restricted discretionary activity in priority catchments (with water quality issues as specified in Schedule 28) or where water quality targets are not being met. Amend to include the matters of discretion in Rule 2 and include additional provisions for audit and review of all farm plans (including catchment collectives and industry programmes if retained).

123.97	Jenny	Nelson-Smith	Department of Conservation	6.10.1 Use of Production Land	Oppose	Rule TANK 2 - Amend Rule 2 so that the use of productive land for farming that is not in priority catchments (with water quality issues as specified in Schedule 28) or where water quality objectives in Schedule 26 are being met is controlled. Amend to include additional provisions for audit and review of all farm plans (including catchment collectives and industry programmes if retained) in the matters of control for Rule 2.
123.98	Jenny	Nelson-Smith	Department of Conservation	6.10.1 Use of Production Land	Oppose	Rule TANK 3 - Amend Rule 3 to exclude stock from all waterbodies when breakfeeding on pasture or crops on land of any slope. Amend to exclude stock from all wetlands and lakes (regardless of land slope) with a 10m minimum setback from water. Amend to exclude stock from all riparian margins use for spawning by indigenous fish particularly inanga. Amend to require a minimum setback from all waterbodies subject to stock exclusion. Include stock exclusion from all outstanding waterbodies.
123.99	Jenny	Nelson-Smith	Department of Conservation	6.10.1 Use of Production Land	Amend	Rule TANK 4 - Amend matters of discretion to include: -Breakfeeding of crops or pasture on land of any slope. -Wetlands and lakes. -Priority catchment in Schedule 28. -Catchments where water quality targets are not met in Schedule 26. -Waterbodies with riparian margins used for fish spawning (e.g., inanga). -Appropriate setback distances to manage effects. Outstanding waterbodies.
123.100	Jenny	Nelson-Smith	Department of Conservation	6.10.1 Use of Production Land	Oppose	Rule TANK 1 and 2 - Amend to discretionary activity for priority catchments in Schedule 28 and where water quality targets in Schedule 26 are not being met.
123.101	Jenny	Nelson-Smith	Department of Conservation	6.10.1 Use of Production Land	Oppose	Rule TANK 6 - Amend to include reference to priority catchment in Schedule 28 and where water quality targets are not being met in Schedule 26. Amend to refer to the extent to which water quality will be maintained or improved.
124.27	Bridget	Margerison	Brownrigg Agriculture Group Ltd	6.10.1 Use of Production Land	Oppose	Rule TANK 5 - Amend condition (a) to read: <i>Any change to a production land use activity over more than 10ha of the property or enterprise area commencing after 2 May 2020 that does not result in the annual nitrogen loss increasing by more than the applicable amount shown in Table 2 in Schedule 29.</i> Delete condition (b). Amend matter of control 2 to read: <i>"The measures being undertaken by the individual landowner or the TANK Landowner Collective."</i>
126.28	James	Lyver	Maungaharuru-Tangitū Trust	6.10.1 Use of Production Land	Oppose	Rule TANK 1 and 2 - Re-write TANK1 and TANK2 to accommodate the direction set out in new Policy 17A and amended Policy 17. Specifically, the rule hierarchy might be: •Permitted activity rule - Properties •Controlled activity rule - Farming enterprises that are located in 'Low' or 'Long term' priority catchments; •Restricted discretionary activity rule - Farming enterprises that are located in 'High' or 'Medium' priority catchments •Discretionary activity rule – land use change
135.5	Anna	Wilkes	Ravensdown Limited	6.10.1 Use of Production Land	Amend	Amend permitted activity Rule TANK 1 by changing the land area used within the rule from 10ha, to the land areas that apply to different farming activities under the NES-F (Regulation 8) and to which FFPs will be required by way of regulation in the near future (section 271D of the RMAA).
135.51	Anna	Wilkes	Ravensdown Limited	6.10.1 Use of Production Land	Amend	Amend controlled activity Rule TANK 2 as follows: • - amend the activity status from controlled to restricted discretionary; • - change the land area used within the rule from 10ha, to the land areas that apply to different farming activities under the NES-F (Regulation 8) and to which FFPs will be required by way of regulation in the near future (section 271D of the RMAA); and • - amend Matter for Control/Discretion 1 as follows: 1. The freshwater water quality objectives and targets in Schedule 26 for
135.52	Anna	Wilkes	Ravensdown Limited	6.10.1 Use of Production Land	Oppose	Delete controlled activity Rule TANK 5 in its entirety.
135.53	Anna	Wilkes	Ravensdown Limited	6.10.1 Use of Production Land	Amend	Amend restricted discretionary activity Rule TANK 6 as follows: - amend the rule title as follows: Change of Use of Production Land - amend the activity status from restricted discretionary to discretionary; - amend the activity description as follows: The changing of a use of production land to a more intensive land use activity on farm properties or farming enterprises ... • - insert a new 'Conditions/Standards/Terms' that reflect the conditions attached to permitted activity regulations in Part 1, Subpart 2 of the NES- F; and • - delete the Matters of Discretion. Or, alternatively , delete this rule and refer to or insert the NES-F regulations (Part 1, Subpart 2 of the NES-F).

140.5	Andrew and Tania	Kerr		6.10.1 Use of Production Land	Support	Rule TANK 1 - Stock exclusion rules should match the new national standards.
142.22	Bill	Glazebrook	Big Hill Station Limited	6.10.1 Use of Production Land	Amend	For both Rule TANK 5 and TANK 6, add the following to 'Matters for Control/Discretion': 'If water quality limits and targets in Schedule 26 are being met in the catchment, consent applications in that catchment will be considered without public notification and without the need to, obtain written approval of affected persons. Delete the following from TANK 5: Consent applications will generally be considered without notification and without the need to obtain written approval of affected persons.
143.14	Peter	Hyslop	Strathallan Trust	6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.
143.15	Peter	Hyslop	Strathallan Trust	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address the effects of model and/or version changes to modelled outputs.
146.3	Rebecca	Davies	New Zealand Defence Force	6.10.1 Use of Production Land	Oppose	Rule TANK 3 - NZDF seeks a new permitted activity rule and standards be inserted to provide for temporary take, use and discharge of water for water treatment units. Suggested wording is as follows: <u>The take, use and discharge to land or surface water for use of water treatment units.</u> <u>a) The instantaneous take rate must not exceed 5% of the river flow at the point of take at any time.</u> <u>b) The take, use and discharge must be conducted by the New Zealand Defence Force.</u> <u>c) The take must not occur for more than ten consecutive days.</u>
165.15	Caleb	Dennis	Aotearoa New Zealand Fine Wine Estates LP	6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.
165.16	Caleb	Dennis	Aotearoa New Zealand Fine Wine Estates LP	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address the effects of model and/or version changes to modelled outputs.
179.15	Wim	Barendsen	Otawhao Farms Ltd	6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.
179.16	Wim	Barendsen	Otawhao Farms Ltd	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address the effects of model and/or version changes to modelled outputs.
180.53	Charlotte	Drury	Horticulture New Zealand	6.10.1 Use of Production Land	Amend	Rule TANK 1 - Amend by replacing (throughout plan) terms farm property/farming enterprises with term 'farm.
180.54	Charlotte	Drury	Horticulture New Zealand	6.10.1 Use of Production Land	Amend	Rule TANK 3 - Add definition of 'active formed channel' to plan
180.55	Charlotte	Drury	Horticulture New Zealand	6.10.1 Use of Production Land	Amend	Rule TANK 5 - Amendments including incentivising landowners to join collectives, vegetable rotations, assessments for the average annual discharge load over the full duration and including the full sequence of crops and pasture. Specific wording provided in submission.
180.56	Charlotte	Drury	Horticulture New Zealand	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Amend condition b) to combined the load allowance per farm to provide greater flexibility for collectives. Specific wording provided in submission.
180.57	Charlotte	Drury	Horticulture New Zealand	6.10.1 Use of Production Land	Support	TANK 6A - Insert new rule that provides a clear consenting pathway for activities that don't comply with TANK6. The activity status for this should be discretionary.
192.16	Rebecca	Blunden	T&G Global Limited and ENZIL	6.10.1 Use of Production Land	Amend	Condition TANK 5 (a) should be amended to read: "Any change to a production land use activity commencing after 2 May 2020 that does not result in the annual nitrogen loss increasing".
193.13	Bruce	Mackay	Heinz Wattie's Limited	6.10.1 Use of Production Land	Amend	Rule TANK 6 - A per hectare measure should be used
194.78	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	6.10.1 Use of Production Land	Amend	Rule TANK 1 and 2 - Clarification on how/when FEP's can/will be required.
194.79	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	6.10.1 Use of Production Land	Amend	Rule TANK 5 - TANK 5 requires further clarification and/or guidance in terms of what constitutes a 'change to the production land use activity'. This could be achieved by defining 'change of use' or 'land use change' in the Glossary.
194.80	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	6.10.1 Use of Production Land	Oppose	Rule TANK 5 - Oppose
194.81	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Further guidance is required throughout PC9 about whether the Conditions/Standards/Terms are intended to be an 'and', 'or' or 'either' etc approach. Generally the rules do not 'cascade' particularly well, and there are several instances where some of the conditions/terms would be better located in the "activity" column instead (i.e. because they describe the circumstances in which the rule applies, rather than its requirements).
194.82	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	6.10.1 Use of Production Land	Oppose	Rule TANK 6 - TANK 6 and the related nitrogen loss provisions are amended.
197.12	Lilly	Lawson	Beef + Lamb New Zealand Ltd	6.10.1 Use of Production Land	Amend	Rule TANK 1 - Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan. Section C: Farm Environment Plans 1.1 A Farm Environment Plan shall; a) be prepared by a person with the professional qualifications to prepare such a plan or be prepared by the Farm Owner or Manager with assistance and/or review by a suitably qualified and experienced person

197.13	Lilly	Lawson	Beef + Lamb New Zealand Ltd	6.10.1 Use of Production Land	Support	Rule TANK 2 - retain as proposed.
197.14	Lilly	Lawson	Beef + Lamb New Zealand Ltd	6.10.1 Use of Production Land	Amend	Rule TANK 3 - B+LNZ seek that the word 'bed' in TANK 3 & 4 is defined and included in Chapter 9 Glossary: Bed means the bed of a river that is intermittently flowing and where the bed is predominantly unvegetated and comprises sand, gravel, boulders or similar material. a)The entry into or over the bed of any riverlake or wetland by cattle, deer and pigs is a permitted activity provided that; i)stock that are at a stocking rate less than 18su/ha in the paddock adjacent to the river the stock have access to; and ii) The slope over 60% or more of the paddock is greater than 15 degrees of slope. i) <u>The river does not have a bed that is wider than 1m anywhere in a land parcel</u> <u>and</u> ii) <u>the land slope is greater than 10 degrees as shown by the National Scale Map or as determined at the paddock or farm spatial scale.</u> <u>and</u> iii) <u>stock do not cross the same lake or wide river more than 12 times in any year.</u>
197.15	Lilly	Lawson	Beef + Lamb New Zealand Ltd	6.10.1 Use of Production Land	Amend	Rule TANK 5 - a)Any change to the production land use activity commencing after 2 May 2020 is over more than 10% of the property or farming enterprise area 20ha or 20% of the property whichever is greater. b)The production land is subject to a Catchment Collective Programme meeting the requirements of Schedule 30B by a TANK Catchment Collective which meets the requirements of Schedule 30A <u>or has a Farm Environment Plan which meets the requirements of Schedule 30 (as amended in accordance with this submission)</u>
199.15	Peter	Robertson	Brookfields Vineyards/Ohiti Estate	6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.
199.16	Peter	Robertson	Brookfields Vineyards/Ohiti Estate	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address <u>the effects of model and/or version changes to modelled outputs.</u>
204.15	Juliet	Gray	Peter Lyons Trust (Lyons Vineyard)	6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.
204.16	Juliet	Gray	Peter Lyons Trust (Lyons Vineyard)	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address <u>the effects of model and/or version changes to modelled outputs.</u>
207.43	Mark	Clews	Hastings District Council	6.10.1 Use of Production Land	Support	Support Rules TANK 1-6 subject to: <i>SPZs being made high priority areas for preparation of FEPs</i> <i>Source Protection Extents being made medium priority areas for preparation of FEPs.</i> <i>(Refer to submission point under Schedule 28)</i>
207.44	Mark	Clews	Hastings District Council	6.10.1 Use of Production Land	Support	Support Rules TANK 1-6 subject to: Amend the FEP / Catchment Collective Plan / Industry Programme requirements in Schedule 29 to encourage engagement with water suppliers in their preparation and for a copy of the FEPs / Catchment Collective Plans / Industry Programmes to be provided to the respective water suppliers. [Refer submission point under Schedule 30]
207.45	Mark	Clews	Hastings District Council	6.10.1 Use of Production Land	Support	Support Rules TANK 1-6 subject to: <i>Add</i> the below words at (1)(g) in TANK 2, (4) in TANK 4, (2)(g) in TANK 5 and (4)(g) in TANK 6: "Measures to prevent or minimise any adverse effects on the quality of the source water used for a Registered Drinking Water Supply, irrespective of any treatment process for the Registered Drinking Water Supply."
208.12	Emma	Taylor	Villa Maria Estate Limited	6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.
208.13	Emma	Taylor	Villa Maria Estate Limited	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address <u>the effects of model and/or version changes to modelled outputs.</u>
210.83	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	6.10.1 Use of Production Land	Oppose	TANK 2: Amend to give effect to the NPSFM, in particular by including explicit reference to effects on life-supporting capacity, ecosystem processes, and indigenous species including their associated ecosystems from the NPSFM, rather than just referencing 'Schedule 26'. Amend Schedule 26 to include the values and catchments in Schedule 27, and to include measures of fish community integrity, using the Fish Index of Biological Integrity, and habitat quality, using the Habitat Quality Index.

210.84	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	6.10.1 Use of Production Land	Oppose	TANK 3: Amend to clearly prohibit dairy cattle access to rivers, lakes and streams; and to prohibit all stock from accessing wetlands. Exclude stock from all fish spawning riparian areas and estuarine environments. Also address the lack of clarity around ephemeral rivers and the definition of active formed channel, and amend to give effect to the NPSEM.
210.85	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	6.10.1 Use of Production Land	Oppose	TANK 4: Amend to give effect to the NPSFM. Amend to give more discretion to council over stock type, waterbody type, habitat type, and other relevant land use activities and natural values.
210.86	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	6.10.1 Use of Production Land	Oppose	TANK 5: Amend to give effect to the NPSFM, and to address the issues of clarity and risk noted in our comments. Amend to provide more scope for public notification of proposals to intensify land use and to provide council more scope to decline consent.
210.87	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	6.10.1 Use of Production Land	Oppose	TANK 6: Amend to provide more scope for public notification of proposals to intensify land use.
213.15	Peter	Scott	The Wine Portfolio	6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.
213.16	Peter	Scott	The Wine Portfolio	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address the effects of model and/or version changes to modelled outputs.
231.10	Peter	Kay		6.10.1 Use of Production Land	Amend	Rule TANK 1 and 5 - Seek that date is retained as the property of the catchment collective, and cannot be shared without the permission of the collective. Seek that the land management plan be retained with amendments - enable the plan to be developed by farmer or collective, delete requirements to have plan prepared by an expert, enable flexible farm systems and ensure the plan is underpinned by robust soil conservation principles.
238.12	Emma	Taylor	Gimblett Gravels Winegrowers Association	6.10.1 Use of Production Land	Not Stated	Rule TANK 5 - The rule needs further development to give more guidance on what changes are intended to be controlled and to control change by farming enterprises within a water quality management unit more appropriately.
238.13	Emma	Taylor	Gimblett Gravels Winegrowers Association	6.10.1 Use of Production Land	Amend	Rule TANK 6 - Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address the effects of model and/or version changes to modelled outputs.
241.8	Penny and John	Reynolds		6.10.1 Use of Production Land	Amend	Rule TANK 3 - We support requirements to avoid adverse effects on waterways caused by stock but seek to have rules amended to provide clarity eg the definition of the word "bed" and be practical when implemented.
241.9	Penny and John	Reynolds		6.10.1 Use of Production Land	Oppose	Rule TANK 6 - oppose that the TANK plan does not appropriately provide for either stock drinking water or domestic water as a permitted activity and a priority take.
RULES: Farm Plans						
23.61	Kerry	Sixtus	Pattullo's Nurseries Limited	Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
32.60	Kent	Griffiths		Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
35.60	Colin	Campbell		Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
37.60	Greg	Evans	Dartmoor Estate Ltd	Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
38.60	Roger	Brownlie		Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
43.60	CA & GW	Wilson	Meiros Orchard Ltd	Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
44.60	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
49.60	John	Parsons		Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
54.60	Mark	Apatu	Apatu Farms Ltd	Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
61.60	Greg	Simpson		Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
62.60	Jonty	Moffett		Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
69.60	Jos	Dames	Dames Limited	Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
71.60	Carl	Knapp	Bellingham Orchard Ltd.	Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
72.60	Justin	Addis	Armada Orchard Ltd	Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.

73.60	Bevan	Davidson		Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
77.60	David & Sheryl	Mackie		Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
79.60	Richard	Penreath		Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
86.60	Peter	Scott		Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
91.59	Johnny	Milmine	Berry Farms NZ	Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
95.60	Johnny	Milmine	Prime Limes	Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
96.60	Mike	Davis	Davis Orchards Ltd	Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
97.62	Lesley	Wilson	DN & LR Wilson Ltd	Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
99.86	Jerf	van Beek	Twyford Water	Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
104.60	John	Loughlin	Rockit Global Limited	Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
105.60	Scott	Lawson		Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
110.60	Edward	Whyte	Whyte & Co	Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
120.101	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Farm Plans	Amend	Amend so that Farm Environment Plans are mandatory for all production land uses in exceedance of 4 hectares.
122.60	Richard	Penreath	Ngai Tukairangi Trust	Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
132.103	Marei	Apatu	Te Taiwhenua o Heretaunga	Farm Plans	Amend	Require properties within TANK catchments, including sensitive catchments (Other than in the Heretaunga Plains unconfined aquifer area, where FEPs are required for intensive vegetable production on areas of 2 hectares or greater), that are 4 hectares or larger, to develop and implement FEPs, and regulate productive land use where there are identified water quality issues or <u>water quality objectives are not being met (i.e. targets apply)</u> .
185.60	Allen	Kittow	Tremaine Farms Ltd	Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
186.60	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
192.5	Rebecca	Blunden	T&G Global Limited and ENZIL	Farm Plans	Amend	The provisions relating to Industry Programmes should be amended so that the requirements in the Plan Change align with existing and established industry programmes such as GAP schemes.
195.79	Peter	Matich	Federated Farmers of New Zealand	Farm Plans	Amend	Amend TANK1 to refer to <u>50</u> hectares OR Amend TANK 1 so that different farm area thresholds be applied for agriculture, horticulture, viticulture, and silviculture systems, and that the threshold for requiring Farm Environment Plans and Catchment Collectives for pastoral agriculture be 50ha, with appropriate Permitted Activity Conditions specified in the Plan. <u>And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.</u>
195.80	Peter	Matich	Federated Farmers of New Zealand	Farm Plans	Amend	Amend TANK2 to refer to <u>50</u> hectares OR Amend TANK 2 so that different farm area thresholds be applied for agriculture, horticulture, viticulture, and silviculture systems, and that the threshold for requiring resource consent for pastoral agriculture farming properties be 50ha minimum. And that the following amendment be made: ... Matters for Control/Discretion 1. a) Efficient use of nutrients and minimisation of <u>reduction of reduceable</u> nutrient losses, <u>And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.</u>
196.62	Julian	Odering	Oderings Nurseries	Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
211.60	Brian	McLay		Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
214.60	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
215.60	Peter	Dooney	Dooney Partnership	Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.

217.59	Paul	Paynter	Johnny Appleseed Holdings Ltd	Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
218.60	Adrian	Mannering	Irrigation Services	Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
219.60	Michael & Julie	Russell		Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
220.60	Steve	Gillum	Gillum Springfield Trust	Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
221.60	WT	Scott		Farm Plans	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
RULES: Stock Access						
2.3	Angus	Wall		Stock Access	Support	Support
83.9	Jim	Galloway		Stock Access	Amend	Amend TANK 3 to allow stock to cross 2 times per month across a stream or river.
83.10	Jim	Galloway		Stock Access	Amend	Amend the definition of "bed" relevant to TANK 3. Suggested wording provided.
83.11	Jim	Galloway		Stock Access	Amend	Amend TANK 3 to align with the NPS for Freshwater Management specifically that it only applies to streams over 1m wide and that hill country is excluded.
89.1	Dave	Read		Stock Access	Amend	Please choose the yearly stocking rate and make this explicit in the regulations. It is essential that it is average stocking rate for the whole year NOT stocking rate on any one day.
118.4	Hugo	Beamish		Stock Access	Oppose	Tank 3 -;Remove limit of 18SU/Ha.
120.26	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Stock Access	Amend	Exclude stock from all wetlands, lakes and rivers and from riparian margins used for fish spawning (specifically including inanga) regardless of slope with minimum setbacks of at least 10 metres.
120.27	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Stock Access	Amend	Rule TANK 3 - Exclude breakfeeding from all waterbodies regardless of slope.
120.28	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Stock Access	Amend	Include defined setbacks from water for all stock exclusion provisions
121.1	James	Brownlie		Stock Access	Amend	Amend Change 9 to take a 'Whole Farm' approach to measuring stock rate intensity, not at individual paddock rates.
131.12	Dominic	Adams	Ballance Agri-Nutrients Limited	Stock Access	Amend	Amend Change 9 so to use digital mapping information to identify paddocks that fall under Rule 3
141.8	Danny	Angland	Kereru Station	Stock Access	Oppose	Opposes TANK 3. More thought is needed.
195.81	Peter	Matich	Federated Farmers of New Zealand	Stock Access	Amend	That Rule TANK 3 be deleted OR amended as follows: Conditions/Standards/Terms (a) The entry into or over the bed of any river lake or wetland by cattle, deer and pigs is a permitted activity provided that; (i) stock are at a stocking rate less than 18su/ha in the paddock adjacent to the river the stock have access to; and or: (ii) <u>Alternative measures are taken to prevent stock from causing bank erosion or sediment losses to water, such as permanent or temporary stock-proof fencing, and providing reticulated water for stock.</u> (ii) The slope over 60% or more of the paddock is greater than 15 degrees of slope. (ii) <u>stock shall not be excluded from any type of wet, damp or boggy ground that is not a wetland, or that might incidentally occur on farm land as a result of land compaction for normal farming operations, nor any ditch, drain, silt-trap, pit, bund, stockwater dam, or treatment pond associated with farming operations.</u> (b) Rivers that are crossed by formed stock races are bridged or culverted by 31 May 2023 . (c) The entry into or over the bed of any river, lake or wetland by cattle, deer and pigs not permitted by condition (a) is a permitted activity until 31 May 2023 . (d) For rivers, conditions (a) to (c) apply only to rivers with an active formed channel, <u>except that for rivers and streams with an intermittently flowing waterway, stock shall be permitted to cross the dried up bed at times when the waterway is not flowing.</u> <u>Stock in hill country where average gradient is steeper than 7 degrees over 60% or more of the paddock, are exempt from requirement for stock exclusion under this rule.</u> And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.82	Peter	Matich	Federated Farmers of New Zealand	Stock Access	Amend	That Rule TANK 4 be deleted or alternatively amended as follows: Matters for Control/Discretion 1. An assessment of sources, scale and significance of adverse effects of sediment, phosphorus, nitrogen and bacterial inputs to the waterbody that could be effectively or efficiently reduced, <u>where these are reduceable</u> , by stock exclusion, bridging or culverting ... And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
RULES: Land Use Change						
23.65	Kerry	Sixtus	Pattullo's Nurseries Limited	Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.

23.70	Kerry	Sixtus	Pattullo's Nurseries Limited	Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
32.65	Kent	Griffiths		Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.

8.50	Rengasamy	Balasubramaniam	Delegat Limited	6.10.2 Water	Oppose	Oppose Rule TANK 9(e) - Amend clauses (e)(ii) and (g)(iii) to refer to "preceding 1 August 2017 2 May 2020".
8.51	Rengasamy	Balasubramaniam	Delegat Limited	6.10.2 Water	Oppose	Oppose Rule TANK 10(g) - Amend clauses (e)(ii) and (g)(iii) to refer to "preceding 1 August 2017 2 May 2020".
10.21	David	Renouf		6.10.2 Water	Amend	Amend Rule TANK 9 - Add '(h) Where possible positive artesian be maintained under abstraction conditions'
12.15	Alec	Duncan	Ministry of Education	6.10.2 Water	Amend	Amend Rule TANK 7 - ... (i) Takes existing as at 2 May 2020 may continue to take up to 20 cubic metres per property per day and to meet the reasonable needs of animals for drinking water; (iii) (ii) Takes occurring for a period of less than 28 days within any 90 day period, the total volume taken on any property shall not exceed 200 cubic metre per 7 day period. (iii) Takes existing as at 2 May 2020 may continue to take up to 20 cubic metres per property per day and to meet the reasonable needs of social infrastructure. c) The taking of water does not cause any stream or river flow to cease. ...
12.16	Alec	Duncan	Ministry of Education	6.10.2 Water	Amend	Amend Rule TANK 8 - ... (iii) The taking of water for aquifer testing is not restricted (iv) Takes existing as at 2 May 2020 may continue to take up to 20 cubic metres per property per day and to meet the <u>reasonable needs of social infrastructure.</u> c) The rate of take shall not exceed 10 l/s other than aquifer testing for which the rate of take is not restricted. ...
13.13	Alec	Duncan	Fire and Emergency New Zealand	6.10.2 Water	Oppose	Amend PC9 - 6.10.2 Water – Take and Use The following rules do not apply to the taking and use of water that occurs in accordance with section 14(3)(e) of the RMA: • Tank 7 - 17 The take and use of water for emergency or training purposes in accordance with section 48 of the Fire and Emergency New Zealand Act 2017, including from locations within the groundwater management zones in Schedule 31 is exempt from the water take and use provisions and restrictions as provided for within section 14(3)(e) of the Resource Management Act 1991.
18.17	Mark	Cairns	MD Cairns & AR Wright Partnership	6.10.2 Water	Support	Rule TANK 13 - Supported, subject to amendments to POL 59 & 60 to address concerns about drafting details relating to the 20% Maori/environment reservation.
21.13	Robert & Helen	Patullo	Newstead Farm Ltd	6.10.2 Water	Oppose	Rule TANK 8 - Propose that the taking of water for reasonable domestics needs and the needs of animals for drinking water is appropriately provided for and that taking of water for these purposes is prioritised above other nonessential takes.
25.17	Xan	Harding		6.10.2 Water	Support	Rule TANK 13 - Supported, subject to amendments to POL 59 & 60 to address concerns about drafting details relating to the 20% Maori/environment reservation.
26.17	Robin	Back	Dunvegan Estate	6.10.2 Water	Support	Rule TANK 13 - Supported, subject to amendments to POL 59 & 60 to address concerns about drafting details relating to the 20% Maori/environment reservation.
28.17	Hamish	Clark	Saint Clair Family Estate Ltd	6.10.2 Water	Support	Rule TANK 13 - Supported, subject to amendments to POL 59 & 60 to address concerns about drafting details relating to the 20% Maori/environment reservation.
30.6	Anthea	Yule	Paranui Farming Trust	6.10.2 Water	Amend	Amend Rule TANK 10 - Amend condition c) to where The take was previously subject to a condition restricting the take at flows that are higher than the applicable flow specified in Schedule 31., the higher flow will continue to apply Add new condition as follows: Where the take is for any other purpose other than for irrigation and it was previously subject to a condition restricting the take at flows that are higher than specified in Schedule 31, the higher flow will continue to apply.
30.8	Anthea	Yule	Paranui Farming Trust	6.10.2 Water	Oppose	Oppose Rule TANK 10, condition e) with respect to the definition of Actual and Reasonable and Amend point 1 of Matters for Discretion. Separate d into d. and e. d. crop rotation e. development phase of the business operation Add f. level of existing investment made g. actual and farming system is reasonable use post 2 May 2020 where the business operation is still in a development phase h. impact of any reduction of water allocation on the overall business operation.

31.3	Bernie	Kelly	Hawke's Bay Canoe Club	6.10.2 Water	Not Stated	Rule TANK 7 - 17 Any of the proposed rules around abstraction and damming are also very weak and ambiguous.
31.4	Bernie	Kelly	Hawke's Bay Canoe Club	6.10.2 Water	Amend	Amend Rule TANK 17 - to include all tributaries to these rivers as any halt to flow would have undesirable effects downstream to these important rivers.
34.17	Jonathan	Hamlet	Craggy Range Vineyards Limited	6.10.2 Water	Support	Rule TANK 13 - Supported, subject to amendments to POL 59 & 60 to address concerns about drafting details relating to the 20% Maori/environment reservation.
35.85	Colin	Campbell		6.10.2 Water	Oppose	Rule TANK 7 and 8 - Propose that the taking of water for reasonable domestics needs and the needs of animals for drinking water is appropriately provided for and that taking of water for these purposes is prioritised above other nonessential takes.
36.8	Karen	Morrish	Mr Apple New Zealand Ltd	6.10.2 Water	Not Stated	Concerns around Rule TANK 9. c) - "Actual vs Reasonable" - as indicated above, this would see previously inefficient irrigators benefit from this. The 10-year period prior to 2017 is also unlikely to have enough data for an accurate analysis, in which case it is unclear where this data will come from exactly? To put this in context, the last compulsory installation of water meters was required in 2016, so the data may simply be unavailable in many instances.
36.9	Karen	Morrish	Mr Apple New Zealand Ltd	6.10.2 Water	Not Stated	Concerns around Rule 9(e) - Looking at the annual water use over the years, are there any trends, e.g. have water takes been increasing yearly?; and, if so, is there potential that this will continue to happen? for example, is a one in 10-year drought potentially becoming more frequent under recent climate change observations? (Point 'iii')
39.17	Bridget	Wilton	MbandSons	6.10.2 Water	Support	Rule TANK 13 - Supported, subject to amendments to POL 59 & 60 to address concerns about drafting details relating to the 20% Maori/environment reservation.
40.13	Jeremy	White	J and S White Contracting Ltd	6.10.2 Water	Oppose	Rule TANK 7 and 8 - Stock water and domestic needs to be our right as nz farmers, so there should be no limit to the water take nor the need to monitor from any water source, there should be no influence on the way we farm regarding stocks need for water.
41.17	Jonathan	Milmine	Milmine Holdings Limited	6.10.2 Water	Support	Rule TANK 13 - Supported, subject to amendments to POL 59 & 60 to address concerns about drafting details relating to the 20% Maori/environment reservation.
47.13	John	Bostock	John Bostock & Eddie Crasborn	6.10.2 Water	Amend	Amend Rule TANK 9 - This condition is too restrictive and may have the perverse effect of incentivising growers to stay with high water demand crops. BF believe water allocation should be based on the Irricalc calculator model for crop types in place or planned. The last water metres were required to be installed in 2016 therefore taking the maximum in last 10 years will use incomplete data
48.17	Paul	Ham	Alpha Domus	6.10.2 Water	Support	Rule TANK 13 - Supported, subject to amendments to POL 59 & 60 to address concerns about drafting details relating to the 20% Maori/environment reservation.
50.20	Alastair & Jo	Lawrence	Olrig Limited	6.10.2 Water	Oppose	Rule TANK 16, 17 - strongly oppose the proposed limits reducing water for these purposes from 20cm ³ to 5cm ³ . The right to take water for those purposes is critical to survival and health of stock on farm, and normal human behaviour. Analysis we have seen suggests this falls materially below sustainability levels. There appears to be no basis for this proposed reduction. Due to its critical nature, we see no reason for any caps/limits to be imposed. HBRC has remedies it can pursue if it finds any property abusing the right.
53.17	Chris	Howell	CD & CM Howell Partnership	6.10.2 Water	Support	Rule TANK 13 - Supported, subject to amendments to POL 59 & 60 to address concerns about drafting details relating to the 20% Maori/environment reservation.
58.32	Peter	Wilson	Hawkes Bay Fish and Game Council	6.10.2 Water	Amend	Amend TANK 17 to also include the following rivers and tributaries Gold Creek Donald River Otararara Stream Kiwi Creek Rocks Ahead Stream Ngaawapurua (Harkness) Stream Panoko Stream (Gold Creek) Mangamingi Stream Te Waiotupuritia Stream Poporangi Stream Ohara Stream Waikonini Stream
63.20	Keith	Marshall	Napier City Council	6.10.2 Water	Amend	Amend the Activity Description in Rule 9 to read; "Replacement of an existing Resource Consent to take of water from the Heretaunga Plains Water Management Unit where Section 124 of the RMA applies (applies to existing consents) "
63.21	Keith	Marshall	Napier City Council	6.10.2 Water	Amend	Amend Condition (g) of TANK 9 to read; "(g) Any take authorised under clause (d) is not subject to conditions (f) but instead the water permit holder will comply with a Water Conservation Strategy approved as part of the application. in respect of that part of the total allocated amount used for essential human health "

63.22	Keith	Marshall	Napier City Council	6.10.2 Water	Amend	Amend Matter for Control/Discretion 5 in TANK 9 to read: "Where the take is in a Source protection Zone or Source Protection Extent"
63.23	Keith	Marshall	Napier City Council	6.10.2 Water	Amend	Amend Matter of Control/Discretion 6 in TANK 9 to read: " a) provisions for demand management over time so that water use is at reasonable and justifiable levels including whether an infrastructure Leakage Index of 4 or better will be achieved b) Rate and volumes of take limited to the projected demand for the urban area provided in HPUDS 2017, or successive versions c) water demand based on residential and nonresidential use including for schools, rest homes, hospitals, <u>commercial, industrial, recreational, social, cultural and religious</u> demands within the planned reticulated area."
63.24	Keith	Marshall	Napier City Council	6.10.2 Water	Amend	Amend Activity description in Rule 10 to read: Replacement of an existing Resource Consent to take of water from the Heretaunga Plains Water Management Unit where Section 124 of the RMA applies (applies to existing consents)
63.25	Keith	Marshall	Napier City Council	6.10.2 Water	Amend	Amend Matter of Discretion 4 in TANK 10 to read: "Where the take is in a Source protection Zone or Source Protection Extent"
63.26	Keith	Marshall	Napier City Council	6.10.2 Water	Not Stated	Amend Matter of Discretion 5 in TANK 10 to read: •provisions for demand management over time so that water use is at reasonable and justifiable levels including whether an infrastructure Leakage Index of 4 or better will be achieved' •Rate and volumes of take limited to the projected demand for the urban area provided in HPUDS 2017, or successive versions."
63.27	Keith	Marshall	Napier City Council	6.10.2 Water	Amend	Amend Rule 11 to EITHER: (a) avoid new takes within the existing allocation as at the date of the plan becoming operative falling to Prohibited, OR (b) consider the introduction of a new Noncomplying activity 'in-between' and clarify the effect of the interim limit/target and the long term limit set in line with Policy 42 in relation to this rule.
63.28	Keith	Marshall	Napier City Council	6.10.2 Water	Amend	Amend Change 9 so that only takes where the existing allocation (as at the date of the Plan becoming operative) will be exceeded or the limit set pursuant to Policy 42, fall to prohibited under Rule 12.
63.29	Keith	Marshall	Napier City Council	6.10.2 Water	Amend	Amend the Activity Status of Rule 12 to Non-Complying (Subject to the outcome of relief sought in relation to Rule TANK 11 - see submission points 27 and 28)
63.32	Keith	Marshall	Napier City Council	6.10.2 Water	Amend	Amend TANK 15 to add "That does not comply with the conditions of TANK Rule 7" to the Activity Description and delete Condition (a).
63.33	Keith	Marshall	Napier City Council	6.10.2 Water	Amend	Amend TANK 16 to Add "That does not comply with the conditions of TANK Rules 13-15" to the Activity Description and delete "The activity does not comply with the conditions of TANK Rules 13-15" in the Conditions/Standards and Terms.
63.34	Keith	Marshall	Napier City Council	6.10.2 Water	Amend	Amend TANK 18 to Delete condition (a) and refer to Schedule 36 in the right hand column as an Assessment Criteria (not a matter of control/restriction).
66.19	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	6.10.2 Water	Support	Supports TANK 7
66.20	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	6.10.2 Water	Support	Supports TANK 8
66.21	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	6.10.2 Water	Support	Amend definition of Actual and Reasonable in relation to TANK 9(c)
66.22	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	6.10.2 Water	Support	Supports TANK 9(e) that the rule does not apply to irrigation takes
66.23	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	6.10.2 Water	Support	Amend TANK 9 (e)(iii) to add a definition for Accurate Water Use Data
66.24	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	6.10.2 Water	Support	Amend TANK 9 matters for control/discretion (1) so that water meter records do not apply to irrigation takes
66.25	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	6.10.2 Water	Support	Amend TANK 9 matters for control/discretion to clarify the definition of the completeness of the water use record. Suggested wording and requirements provided.
66.26	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	6.10.2 Water	Oppose	Amend TANK 9 matter for control/discretion 4) to ensure the rate of take and therefor the system flow rate is protected. Suggested wording provided.
66.27	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	6.10.2 Water	Oppose	Opposes TANK 9 matter for control/discretion 7
66.28	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	6.10.2 Water	Support	Rule TANK 9 - Amend definition of Actual and Reasonable. Suggested wording provided.
66.29	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	6.10.2 Water	Support	Supports TANK 10(g) that is does not apply to irrigation takes
66.30	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	6.10.2 Water	Amend	Amend TANK 10(g)(iii) to include a definition for Accurate Water Use Data. Suggested wording provided.
66.31	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	6.10.2 Water	Support	Amend TANK 10 matters for control/discretion so that water meter records do not apply to irrigation takes
66.32	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	6.10.2 Water	Amend	Amend TANK 10 matters for control/discretion to clarify the definition of the completeness of the water use record. Suggested wording provided.
66.33	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	6.10.2 Water	Oppose	Amend TANK 10 matters for control/discretion to ensure the rate of take and therefor system flow rate is protected. Suggest wording and requirements provided.
66.34	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	6.10.2 Water	Oppose	Opposes TANK 10 matters for control/discretion 10
66.35	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	6.10.2 Water	Support	Supports TANK 11
66.36	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	6.10.2 Water	Support	Supports TANK 12
66.37	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	6.10.2 Water	Support	Supports TANK 13
66.38	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	6.10.2 Water	Support	Support TANK 14
66.39	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	6.10.2 Water	Support	Supports TANK 15

66.40	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	6.10.2 Water	Support	Supports TANK 16
66.41	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	6.10.2 Water	Support	Supports TANK 17
66.42	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	6.10.2 Water	Support	Supports TANK 18
67.1	Helen	Liddle	Focus Maraekakaho	6.10.2 Water	Support	No specific decision requested but states support for TANK 8, and in particular (d)
67.2	Helen	Liddle	Focus Maraekakaho	6.10.2 Water	Support	No specific decision requested but states support for TANK 11
68.17	Geoffrey	Smith	Vine Nursery New Zealand and Waikahu Vineyard	6.10.2 Water	Support	Rule TANK 13 - Supported, subject to amendments to POL 59 & 60 to address concerns about drafting details relating to the 20% Maori/environment reservation.
75.17	Andria	Monin	Stonecroft Wines Limited	6.10.2 Water	Support	Rule TANK 13 - Supported, subject to amendments to POL 59 & 60 to address concerns about drafting details relating to the 20% Maori/environment reservation.
76.17	Larry	Morgan	Te Mata Estate Winery Ltd	6.10.2 Water	Support	Rule TANK 13 - Supported, subject to amendments to POL 59 & 60 to address concerns about drafting details relating to the 20% Maori/environment reservation.
81.17	Tony	Smith	Babich Wines	6.10.2 Water	Support	Rule TANK 13 - Supported, subject to amendments to POL 59 & 60 to address concerns about drafting details relating to the 20% Maori/environment reservation.
84.17	Grant	Edmonds	Redmetal Vineyards Ltd	6.10.2 Water	Support	Rule TANK 13 - Supported, subject to amendments to POL 59 & 60 to address concerns about drafting details relating to the 20% Maori/environment reservation.
85.7	Matthew	Truebridge		6.10.2 Water	Amend	Rule TANK 7 - I seek support to lift this limit from 20m3 to 30m3. Note a recommendation to Horizons was for 30m3 /day. This would be more in line with an average 4-5000su property and consistent with industry best practice.
87.16	Peter	Scott	Kereru Road Vineyard	6.10.2 Water	Support	Rule TANK 13 - Supported, subject to amendments to POL 59 & 60 to address concerns about drafting details relating to the 20% Maori/environment reservation.
88.16	Jacqui	Cormack	Constellation Brands NZ Limited (CBNZ)	6.10.2 Water	Support	Rule TANK 13 - Supported, subject to amendments to POL 59 & 60 to address concerns about drafting details relating to the 20% Maori/environment reservation.
94.17	Deane	Caughey	Indevin Group Ltd	6.10.2 Water	Support	Rule TANK 13 - Supported, subject to amendments to POL 59 & 60 to address concerns about drafting details relating to the 20% Maori/environment reservation.
99.25	Jerf	van Beek	Twyford Water	6.10.2 Water	Not Stated	Rule TANK 7 & 8 - In general supports the reduction of permitted water takes . However, during periods of low flow when water permits linked to minimum flows have been unable to be us the permitted take of up to 20m3 could be used to irrigate to ensure the survival of horticultural tree crops. An exclusion should be provided within both TANK 7 & 8. Such takes could be considered to be existing, because they have occurred prior to 2 May 2020 . However it is not clear if this will remain in place when consents are renewed. Therefore an additional exclusion should be added to subsection b) takes up to 20 cubic meter’s per property per day to aid the survival of permanent horticultural crops and/or for stock water use
99.26	Jerf	van Beek	Twyford Water	6.10.2 Water	Not Stated	Rule TANK 9&10 - the quantity of water taken and used for irrigation should be the actual and reasonable amount – as determined based on the quantity specified on the expiring water permit, or Irricalc – whichever is the lesser. Supports the inclusion of the option to cease take when trigger level is reached, although questions why the cease take is not linked to the minimum flow . The inclusion of options is important, and while there are clearly advantages to joining a stream maintenance and habitat enhancement scheme
99.27	Jerf	van Beek	Twyford Water	6.10.2 Water	Not Stated	Rule TANK 18 - questions the discretionary status of such applications, and suggests that this doesn’t incentivize joining a stream flow maintenance and habitat enhancement scheme. A restricted discretionary status provides a slightly higher level of comfort for an applicant, and also through identification of matters of discretion, provides clearer guidance about what information needs to be provided in a consent application, which has material impacts on cost and me associated with preparing them
102.17	Ritchie	Garnham	Booster Wine Group	6.10.2 Water	Support	Rule TANK 13 - Supported, subject to amendments to POL 59 & 60 to address concerns about drafting details relating to the 20% Maori/environment reservation.
103.12	Ian	Quinn	Two Terraces Vineyard	6.10.2 Water	Support	Rule TANK 13 - Supported, subject to amendments to POL 59 & 60 to address concerns about drafting details relating to the 20% Maori/environment reservation.
107.17	Christopher	Harrison	Beach House Wines Ltd	6.10.2 Water	Support	Rule TANK 13 - Supported, subject to amendments to POL 59 & 60 to address concerns about drafting details relating to the 20% Maori/environment reservation.
108.7	Brian	Eccles	Jet Boating New Zealand	6.10.2 Water	Support	Support Rule TANK 13 - Support the rule and in particular the reference to the conditional rule detailed in schedule 32.
108.8	Brian	Eccles	Jet Boating New Zealand	6.10.2 Water	Support	Support RULE TANK 14 - Support the rule and in particular the reference to the conditional rule detailed in schedule 32.
108.9	Brian	Eccles	Jet Boating New Zealand	6.10.2 Water	Support	Support Rule TANK 15 - Support the rule and in particular the reference to the conditional rule detailed in schedule 32.
108.10	Brian	Eccles	Jet Boating New Zealand	6.10.2 Water	Support	Support Rule TANK 17 - Support the status of Prohibited for dams on the main stems of the listed rivers.
109.7	Stuart	Macintyre	Turamoe Farm	6.10.2 Water	Oppose	Rule TANK 9 - strongly oppose the the ambiguous water takes wordings in the TANK 9 rule. Specifically, the wording under the ‘Actual and Reasonable Re-allocation’, ‘section c)’ is unclear and can mean very different amounts.
109.14	Stuart	Macintyre	Turamoe Farm	6.10.2 Water	Amend	Rule TANK 9 - c.) under the Actual and Reasonable section, that the terms ‘actual and reasonable’ amounts are clearly defined. We seek that within paragraph. e.) under the Actual and Reasonable section, that the the words “For farms with total areas equal to, or greater than 200 ha,” be inserted at the beginning of the sentence. f.) under the Stream Flow Maintenance section, that the the words “For farms with total areas equal to, or greater than 200 ha.” be inserted at the beginning of the sentence

109.18	Stuart	Macintyre	Turamoe Farm	6.10.2 Water	Oppose	Rule TANK 7 and 8 - We propose that the taking of water for reasonable domestics needs and the needs of animals for drinking water is appropriately provided for and that taking of water for these purposes is prioritised above other non-essential takes.
112.13	Ainsley	Harte		6.10.2 Water	Oppose	Rule TANK 7 and 8 - Propose that the taking of water for reasonable domestics needs and the needs of animals for drinking water is appropriately provided for and that taking of water for these purposes is prioritised above other nonessential takes.
114.10	James	Lyons		6.10.2 Water	Oppose	Rule TANK 7 and 8 - Propose that the taking of water for reasonable domestics needs and the needs of animals for drinking water is appropriately provided for and that taking of water for these purposes is prioritised above other nonessential takes.
115.90	Patricia D	Nuku		6.10.2 Water	Not Stated	Rule TANK 9 - I ask for a reduction in total allocation of surface water abstraction of up to 90%. I oppose the Global consents process alot more detail should be required and such schemes given anon-complying activity status rather than restricted discretionary as is currently the case for rule TANK 9.
116.5	Alexander John	Macphee		6.10.2 Water	Not Stated	Rule TANK 7 (b) - This is unworkable, and even with the existing allowance of 20m3 per day, it is simply not possible on many farms. The rule makes no allowance for properties of differing sizes and assumes that a 10 ha property has the same requirements as a 100 or even 1000 ha property. There should be no limit on the amount of water that can reasonably be taken for both stock water and domestic use. The right to take water for irrigation purposes on hill country - the landowner, through perhaps a controlled activity, should have a right to use a percentage of that water for their commercial use. That should not add to the overall take from the catchment as a whole, but may mean a reduction as to the take of those "downstream"
117.2	Alison	Johnston	Silver Fern Farms Limited	6.10.2 Water	Not Stated	Opposes Proposed TANK Rule 12 - prohibited activity status for water take exceeding water allocation limits for the relevant water management units is considered to have considerable effects for primary production operators. Seeks the relief of a non-complying activity status for TANK Rule 12.
119.18	Liz	Lambert	Hawke's Bay Drinking Water Governance Joint Committee	6.10.2 Water	Support	Rule TANK 9 - Support
119.19	Liz	Lambert	Hawke's Bay Drinking Water Governance Joint Committee	6.10.2 Water	Support	Rule TANK 10 - Support
120.60	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	6.10.2 Water	Amend	Rule TANK 9 - Introduce prohibited status for allocations that do not meet the above criteria
123.102	Jenny	Nelson-Smith	Department of Conservation	6.10.2 Water	Not Stated	Rule TANK 7 - Retain as notified with amendment to clarify that Rule 7(b)(i) AND (ii) apply together
123.103	Jenny	Nelson-Smith	Department of Conservation	6.10.2 Water	Oppose	Rule TANK 8 - Change to: e) <u>The take shall not cause changes to the flows or levels of water in any connected wetland or surface water body.</u>
123.104	Jenny	Nelson-Smith	Department of Conservation	6.10.2 Water	Oppose	Rule TANK 9 f) (i) and (ii) - f) The water permit holder either: <u>(i) contributes to or develops an applicable stream maintenance and habitat enhancement scheme that complies with the requirements of Schedule 36 at a rate equivalent to the stream flow depletion (in l/sec) which will be calculated using the Stream Depletion Calculator and based on the allocated amount of water; or an alternative method where it can be demonstrated to provide a more realistic prediction of effects.</u> or <u>(ii) where a groundwater take is demonstrated as having a high or direct connection to surface water, the water take ceases when the flow or level of water in the surface water body falls below the trigger level specified in Schedule 31. Where a groundwater take is predicted to have a moderate or lesser connection to surface water, the surface water depletion effect must be offset using an applicable water scheme instead as outlined in (i) above.</u>
123.105	Jenny	Nelson-Smith	Department of Conservation	6.10.2 Water	Oppose	Rule 10 (g)(iii) may allow maximum annual water use in the last 10 years to become the reallocated volume As currently drafted it appears as though water will be able to be taken under minimum flow when it is an existing take and meets reasonable and actual use.
123.106	Jenny	Nelson-Smith	Department of Conservation	6.10.2 Water	Not Stated	Rule TANK 11 - Delete reference to water storage. All takes outside of the allocation limits should be prohibited.
123.107	Jenny	Nelson-Smith	Department of Conservation	6.10.2 Water	Amend	Rule TANK 12 - Consequential to amendment of Rule 11 (submission point 123.106)
123.108	Jenny	Nelson-Smith	Department of Conservation	6.10.2 Water	Not Stated	Rule TANK 13 - Include in matters of discretion: • The significant values of outstanding waterbodies and wetlands • Te Mana o te Wai • Ecosystem health • <u>All other instream freshwater values (including indigenous fish habitat)</u>
123.109	Jenny	Nelson-Smith	Department of Conservation	6.10.2 Water	Not Stated	Rule TANK 14 - Include in matters of discretion: • The significant values of outstanding waterbodies and wetlands • Te Mana o te Wai • Ecosystem health • <u>All other instream freshwater values (including indigenous fish habitat)</u>

123.110	Jenny	Nelson-Smith	Department of Conservation	6.10.2 Water	Not Stated	Rule TANK 15 - Include in matters of discretion: <ul style="list-style-type: none"> • The significant values of outstanding waterbodies and wetlands • Te Mana o te Wai • Ecosystem health <u>All other instream freshwater values (including indigenous fish habitat)</u>
123.111	Jenny	Nelson-Smith	Department of Conservation	6.10.2 Water	Oppose	Rule TANK 16 - Amend activity status to prohibited.
123.112	Jenny	Nelson-Smith	Department of Conservation	6.10.2 Water	Support	Rule TANK 17 - retain as notified.
123.113	Jenny	Nelson-Smith	Department of Conservation	6.10.2 Water	Oppose	Rule TANK 18 - Include as a matter of control whether water quality targets in Schedule 26 or water quality issues in priority catchments (Schedule 28) will be achieved or addressed as a result of the quality of discharged groundwater to surface water.
124.11	Bridget	Margerison	Brownrigg Agriculture Group Ltd	6.10.2 Water	Support	Rule TANK 9 - support
124.12	Bridget	Margerison	Brownrigg Agriculture Group Ltd	6.10.2 Water	Support	Rule TANK 10 conditions (e) and (g) - Support
124.17	Bridget	Margerison	Brownrigg Agriculture Group Ltd	6.10.2 Water	Not Stated	Rule TANK 11(b)(i) - support
124.28	Bridget	Margerison	Brownrigg Agriculture Group Ltd	6.10.2 Water	Oppose	Rule TANK 9 - Amend TANK Rule 9 condition (f) to make it clear that individual consent holder stream augmentation mitigation or offsetting actions are acceptable.
131.7	Dominic	Adams	Ballance Agri-Nutrients Limited	6.10.2 Water	Amend	Rule TANK 7 or 8 - Amend to provide clarity over the supply of water for domestic and stock water. Specific wording provided.
141.4	Danny	Angland	Kereru Station	6.10.2 Water	Oppose	Opposes Rule 7. Water for domestic and stock should be a permitted activity and not limited to 5 cubic metres for new takes or 20 cubic metres for existing takes.
141.5	Danny	Angland	Kereru Station	6.10.2 Water	Oppose	Disagrees with Rules 11 and 18
143.16	Peter	Hyslop	Strathallan Trust	6.10.2 Water	Support	Rule TANK 13 - Supported, subject to amendments to POL 59 & 60 to address concerns about drafting details relating to the 20% Maori/environment reservation.
165.17	Caleb	Dennis	Aotearoa New Zealand Fine Wine Estates LP	6.10.2 Water	Support	Rule TANK 13 - Supported, subject to amendments to POL 59 & 60 to address concerns about drafting details relating to the 20% Maori/environment reservation.
179.17	Wim	Barendsen	Otawhao Farms Ltd	6.10.2 Water	Support	Rule TANK 13 - Supported, subject to amendments to POL 59 & 60 to address concerns about drafting details relating to the 20% Maori/environment reservation.
180.58	Charlotte	Drury	Horticulture New Zealand	6.10.2 Water	Amend	Rule TANK 7&8 - Amend to include a specific exemption for the ongoing abstraction of up to 20m3 if water is abstracted for the purpose of assisting the survival of permanent horticultural crops.
180.59	Charlotte	Drury	Horticulture New Zealand	6.10.2 Water	Amend	Rule TANK 9&10 - All references to 'actual and reasonable' are amended to just be to 'reasonable'. An additional matter of discretion is added as follows: <u>'The effects of any take and use for root stock survival on flows in connected surface water bodies.'</u>
180.60	Charlotte	Drury	Horticulture New Zealand	6.10.2 Water	Oppose	Rule TANK 12 - Amend status to be 'noncomplying'
180.61	Charlotte	Drury	Horticulture New Zealand	6.10.2 Water	Oppose	Rule TANK 18 - Amend status to be 'restricted discretionary'
192.15	Rebecca	Blunden	T&G Global Limited and ENZIL	6.10.2 Water	Amend	A specific exemption should be provided in TANK 7 and 8 to allow up to 20m3 per day to be taken to assist in survival of permanent horticultural crops and rootstock.
192.17	Rebecca	Blunden	T&G Global Limited and ENZIL	6.10.2 Water	Amend	Condition TANK 9 (e)(iii) should be amended to refer to "the maximum annual water use in any one year within the 10 years preceding 2 May 2020 (including as demonstrated by accurate water meter records)."
194.83	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	6.10.2 Water	Support	Rule TANK 7 - Clarify in the 'Rule' and/or 'Activity' column of TANK 7 that TANK 7 provides for takes from water storage/impoundments.
194.84	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	6.10.2 Water	Amend	Rule TANK 9 - seeks changes to this policy and the definition of 'actual and reasonable' to allow sufficient water to enable increases in intensification (e.g. reduction in vineyard row spacing) where this can be shown to represent a more efficient use of water. The proposed approach is too rigid, and instead seeks sufficient flexibility in the provisions to enable the best or most efficient use of water, and overall best outcomes for freshwater management
194.85	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	6.10.2 Water	Amend	Rule TANK 9(c)-(e) - Amend TANK 9 along the lines of: Actual and Reasonable Reallocation c) The quantity taken and used, other than provided for under d) is: (i) the actual and reasonable amount; or (ii) any lesser quantity applied for. d) The quantity taken and used for municipal, community and papakainga water supply is: (i) the quantity specified on the permit being renewed; or (ii) any lesser quantity applied for.
194.86	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	6.10.2 Water	Oppose	Rule TANK 9(f) - Clarification on the intent and operation of flow maintenance schemes.
194.87	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	6.10.2 Water	Oppose	Rule TANK 9(f)(ii) - Amend TANK 9 to allow that the taking of water for the sole purpose of avoiding the death of horticultural or viticultural root stock or crops should be exempt from cease takes. Also amend TANK 9 and related provisions to account for the extent to which groundwater takes have a stream depleting effect on the surface water body.

194.88	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	6.10.2 Water	Amend	Rule TANK 10 - Actual and Reasonable Reallocation e) The quantity taken and used, other than provided for under d) is: (i) the actual and reasonable amount; or (ii) any lesser quantity applied for. f) The quantity taken and used for municipal, community and papakainga water supply is: (i) the quantity specified on the permit being renewed; or (ii) any lesser quantity applied for.
194.89	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	6.10.2 Water	Oppose	Rule TANK 10(e) - Amend the definition of 'actual and reasonable' to provide for the efficient allocation and use of water.
194.90	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	6.10.2 Water	Oppose	Rule TANK 10(h) - Amend TANK 10 to: 1) allow that the taking of water for the sole purpose of avoiding the death of horticultural or viticultural root stock or crops should be exempt from cease takes; 2) take into account the extent to which groundwater takes have a stream depleting effect on surface water and apply restrictions in a proportional way.
194.91	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	6.10.2 Water	Oppose	Rule TANK10(h) - Clarify how Zone 1 takes relate to stream flow maintenance schemes and how they are to be provided for under TANK 18 and Schedule 36.
194.92	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	6.10.2 Water	Amend	Rule TANK 11 - Amend TANK 11 to clarify that frost protection is exempt from complying with the allocation limits in Schedule 31. It would also be clearer to include paragraph (a) of the conditions/terms as part of the description in the 'Activity' column – as these are not requirements to be met under Rule TANK 11 but the circumstances (activity) for which the rule is triggered. Amend the 'Activity' column of TANK 11 to recognise that this rule applies to s124 and new takes.
194.93	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	6.10.2 Water	Oppose	TANK 12 should be amended to be a Non-Complying activity rather than a Prohibited Activity.
194.94	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	6.10.2 Water	Support	Rule TANK 13 - Retain as drafted.
194.95	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	6.10.2 Water	Support	Rule TANK 14 - Retain as drafted.
194.96	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	6.10.2 Water	Amend	Rule TANK 15 - Amend to clarify application of this rule and what would need to be assessed.
194.97	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	6.10.2 Water	Amend	Rule TANK 18 - Amend Schedule 36 to provide more comprehensive guidance about how the schemes would operate and the extent to which (and circumstances in which) water takes would be able to continue once minimum flow (or flow maintenance) levels were reached.
197.16	Lilly	Lawson	Beef + Lamb New Zealand Ltd	6.10.2 Water	Oppose	Rule TANK 7 and 8 - B+LNZ seek that 6.10.2 is amended so as to preclude water take for stock drinking water from any Take and Use Rules. Water quantity rules are amended in accordance with relief sought above (Obj 16,17,18) Water quantity Policies - Water quantity is managed to ensure that the take and use of water is reasonable and justifiable for the intended use, and takes for stock drinking water are permitted to provide for the health and wellbeing of domestic and production animals
199.17	Peter	Robertson	Brookfields Vineyards/Ohiti Estate	6.10.2 Water	Support	Rule TANK 13 - Supported, subject to amendments to POL 59 & 60 to address concerns about drafting details relating to the 20% Maori/environment reservation.
200.1	Ray	Knowles	Aspyron Trust	6.10.2 Water	Not Stated	Rule TANK 10 - Actual and reasonable re-allocation - will the water usage data suffice? We have proven water usage data but the IRRICALC system does not provide any estimates for some of our crops – namely plant nursery & various nut crops.
204.17	Juliet	Gray	Peter Lyons Trust (Lyons Vineyard)	6.10.2 Water	Support	Rule TANK 13 - Supported, subject to amendments to POL 59 & 60 to address concerns about drafting details relating to the 20% Maori/environment reservation.
207.19	Mark	Clews	Hastings District Council	6.10.2 Water	Amend	Amend TANK 7 condition (f) to read: (i) domestic or community take, which existed prior to commencement of the take.
207.20	Mark	Clews	Hastings District Council	6.10.2 Water	Amend	Amend TANK 8 Condition d) to read: (i) domestic or community take, which existed prior to commencement of the take.
207.22	Mark	Clews	Hastings District Council	6.10.2 Water	Amend	Amend the Activity Description in Rule 9 to read; "Replacement of an existing Resource Consent to take of water from the Heretaunga Plains Water Management Unit where Section 124 of the RMA applies (applies to existing consents)"
207.23	Mark	Clews	Hastings District Council	6.10.2 Water	Amend	Amend Condition (g) of TANK 9 to read; "(g) Any take authorised under clause (d) is not subject to conditions (f) but instead the water permit holder will comply with a Water Conservation Strategy approved as part of the application, in respect of that part of the total allocated amount used for essential human health
207.24	Mark	Clews	Hastings District Council	6.10.2 Water	Amend	Amend Matter for Control/Discretion 5 in TANK 9 to read: "Where the take is in a Source protection Zone or Source Protection Extent"

207.25	Mark	Clews	Hastings District Council	6.10.2 Water	Amend	Amend Matter of Control/Discretion 6 in TANK 9 to read: " a) provisions for demand management over time so that water use is at reasonable and justifiable levels including whether an infrastructure Leakage Index of 4 or better will be achieved b) Rate and volumes of take limited to the projected demand for the urban area provided in HPUDS 2017, or successive versions c) water demand based on residential and nonresidential use including for schools, rest homes, hospitals, <u>commercial, industrial, recreational, social, cultural and religious</u> demands within the planned reticulated area."
207.26	Mark	Clews	Hastings District Council	6.10.2 Water	Amend	Amend Activity description in Rule 10 to read: Replacement of an existing Resource Consent to take of water from the Heretaunga Plains Water Management Unit where Section 124 of the RMA applies (applies to existing consents)"
207.27	Mark	Clews	Hastings District Council	6.10.2 Water	Amend	Amend Matter of Discretion 4 in TANK 10 to read: "Where the take is in a Source protection Zone or Source Protection Extent"
207.28	Mark	Clews	Hastings District Council	6.10.2 Water	Amend	Amend Matter of Discretion 5 in TANK 10 to read: •provisions for demand management over time so that water use is at reasonable and justifiable levels including whether an infrastructure Leakage Index of 4 or better will be achieved •Rate and volumes of take limited to the projected demand for the urban area provided in HPUDS 2017, <u>or successive versions to 2045</u> "
207.29	Mark	Clews	Hastings District Council	6.10.2 Water	Amend	Amend Rule 11 to EITHER: (a) avoid new takes within the existing allocation as at the date of the plan becoming operative falling to Prohibited, OR (b) consider the introduction of a new Noncomplying activity 'in-between' and clarify the effect of the interim limit/target and the long term limit set in line with Policy 42 in relation to this rule.
207.30	Mark	Clews	Hastings District Council	6.10.2 Water	Amend	Amend Change 9 so that only takes where the existing allocation (as at the date of the Plan becoming operative) will be exceeded or the limit set pursuant to Policy 42, fall to prohibited under Rule 12.
207.31	Mark	Clews	Hastings District Council	6.10.2 Water	Amend	Amend the Activity Status of Rule 12 to Non-Complying (Subject to the outcome of relief sought in relation to Rule TANK 11 - see submission points 27 and 28)
207.34	Mark	Clews	Hastings District Council	6.10.2 Water	Amend	Amend TANK 15 to add " <u>That does not comply with the conditions of TANK Rule 7</u> " to the Activity Description and delete Condition (a).
207.35	Mark	Clews	Hastings District Council	6.10.2 Water	Amend	Amend TANK 16 to Add " <u>That does not comply with the conditions of TANK Rules 13-15</u> " to the Activity Description and delete " The activity does not comply with the conditions of TANK Rules 13-15 " in the Conditions/Standards and Terms.
207.36	Mark	Clews	Hastings District Council	6.10.2 Water	Amend	Amend TANK 18 to Delete condition (a) and refer to Schedule 36 in the right hand column as an Assessment Criteria (not a matter of control/restriction).
213.17	Peter	Scott	The Wine Portfolio	6.10.2 Water	Support	Rule TANK 13 - Supported, subject to amendments to POL 59 & 60 to address concerns about drafting details relating to the 20% Maori/environment reservation.
231.11	Peter	Kay		6.10.2 Water	Oppose	Rule TANK 7 - seek that the take limit is kept at 20 cubic meters per day. Stock and domestic drinking water is the top priority. This rule does not address water sources serving more than one property.
239.7	Mangaone	Catchment Group	Mangaone Catchment Group Incorporated	6.10.2 Water	Amend	Rule TANK 7 - Maintain current 20m3 allowance for new water takes.
241.13	Penny and John	Reynolds		6.10.2 Water	Support	Rule TANK 7 and 8 - In support.
241.14	Penny and John	Reynolds		6.10.2 Water	Oppose	Rule TANK 9 - disagree with this as its important for us to maintain flexibility to rotate and change crop type over the longer term to meet changing circumstances. As water meters were not compulsory until 2016, the water use data is incomplete.
RULES: Water Take and Use						
3.8	Gavin	Yort	Limestone Properties Limited	Water Take and Use	Support	Retain the provision - TANK 9
3.20	Gavin	Yort	Limestone Properties Limited	Water Take and Use	Oppose	Amend TANK Rule 9 condition (f) to be consistent with RRMP POL TT11 and Table 5.9.7.
8.12	Rengasamy	Balasubramaniam	Delegat Limited	Water Take and Use	Support	Support Rule Tank 9 conditions (c) and (d)
8.13	Rengasamy	Balasubramaniam	Delegat Limited	Water Take and Use	Support	Support Rule TANK 10 conditions (e) and (g)
8.22	Rengasamy	Balasubramaniam	Delegat Limited	Water Take and Use	Support	Support Rule TANK 9
8.23	Rengasamy	Balasubramaniam	Delegat Limited	Water Take and Use	Support	Support Rule TANK 13
23.12	Kerry	Sixtus	Pattullo's Nurseries Limited	Water Take and Use	Oppose	TANK 9: Amend every reference to 'actual and reasonable' to read " actual and reasonable ".
23.13	Kerry	Sixtus	Pattullo's Nurseries Limited	Water Take and Use	Oppose	TANK 10: Amend every reference to 'actual and reasonable' to read " actual and reasonable ".
23.14	Kerry	Sixtus	Pattullo's Nurseries Limited	Water Take and Use	Oppose	TANK 11: Amend every reference to 'actual and reasonable' to read " actual and reasonable ".
23.20	Kerry	Sixtus	Pattullo's Nurseries Limited	Water Take and Use	Oppose	TANK 13: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
23.28	Kerry	Sixtus	Pattullo's Nurseries Limited	Water Take and Use	Oppose	TANK 13: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
23.34	Kerry	Sixtus	Pattullo's Nurseries Limited	Water Take and Use	Oppose	Amend TANK 7 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
23.35	Kerry	Sixtus	Pattullo's Nurseries Limited	Water Take and Use	Oppose	Amend TANK 8 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.

29.47	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Water Take and Use	Amend	Delete TANK 9 Condition d.i for the Heretaunga Plains Water Management Unit (Quantity) and introduce a materiality test for nature and scale of drawdown effects on neighbouring bores or connected waterbodies as a result of transfers.
32.12	Kent	Griffiths		Water Take and Use	Oppose	TANK 9: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
32.13	Kent	Griffiths		Water Take and Use	Oppose	TANK 10: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
32.14	Kent	Griffiths		Water Take and Use	Oppose	TANK 11: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
32.20	Kent	Griffiths		Water Take and Use	Oppose	TANK 13: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
32.28	Kent	Griffiths		Water Take and Use	Oppose	TANK 13: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
32.34	Kent	Griffiths		Water Take and Use	Oppose	Amend TANK 7 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
32.35	Kent	Griffiths		Water Take and Use	Oppose	Amend TANK 8 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
35.12	Colin	Campbell		Water Take and Use	Oppose	TANK 9: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
35.13	Colin	Campbell		Water Take and Use	Oppose	TANK 10: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
35.14	Colin	Campbell		Water Take and Use	Oppose	TANK 11: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
35.20	Colin	Campbell		Water Take and Use	Oppose	TANK 13: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
35.28	Colin	Campbell		Water Take and Use	Oppose	TANK 13: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
35.34	Colin	Campbell		Water Take and Use	Oppose	Amend TANK 7 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
35.35	Colin	Campbell		Water Take and Use	Oppose	Amend TANK 8 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
37.12	Greg	Evans	Dartmoor Estate Ltd	Water Take and Use	Oppose	TANK 9: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
37.13	Greg	Evans	Dartmoor Estate Ltd	Water Take and Use	Oppose	TANK 10: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
37.14	Greg	Evans	Dartmoor Estate Ltd	Water Take and Use	Oppose	TANK 11: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
37.20	Greg	Evans	Dartmoor Estate Ltd	Water Take and Use	Oppose	TANK 13: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
37.28	Greg	Evans	Dartmoor Estate Ltd	Water Take and Use	Oppose	TANK 13: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
37.34	Greg	Evans	Dartmoor Estate Ltd	Water Take and Use	Oppose	Amend TANK 7 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
37.35	Greg	Evans	Dartmoor Estate Ltd	Water Take and Use	Oppose	Amend TANK 8 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
38.12	Roger	Brownlie		Water Take and Use	Oppose	TANK 9: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
38.13	Roger	Brownlie		Water Take and Use	Oppose	TANK 10: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
38.14	Roger	Brownlie		Water Take and Use	Oppose	TANK 11: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
38.20	Roger	Brownlie		Water Take and Use	Oppose	TANK 13: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
38.28	Roger	Brownlie		Water Take and Use	Oppose	TANK 13: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
38.34	Roger	Brownlie		Water Take and Use	Oppose	Amend TANK 7 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
38.35	Roger	Brownlie		Water Take and Use	Oppose	Amend TANK 8 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
43.12	CA & GW	Wilson	Meiros Orchard Ltd	Water Take and Use	Oppose	TANK 9: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
43.13	CA & GW	Wilson	Meiros Orchard Ltd	Water Take and Use	Oppose	TANK 10: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
43.14	CA & GW	Wilson	Meiros Orchard Ltd	Water Take and Use	Oppose	TANK 11: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
43.20	CA & GW	Wilson	Meiros Orchard Ltd	Water Take and Use	Oppose	TANK 13: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
43.28	CA & GW	Wilson	Meiros Orchard Ltd	Water Take and Use	Oppose	TANK 13: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
43.34	CA & GW	Wilson	Meiros Orchard Ltd	Water Take and Use	Oppose	Amend TANK 7 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
43.35	CA & GW	Wilson	Meiros Orchard Ltd	Water Take and Use	Oppose	Amend TANK 8 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
44.12	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Water Take and Use	Oppose	TANK 9: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
44.13	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Water Take and Use	Oppose	TANK 10: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
44.14	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Water Take and Use	Oppose	TANK 11: Amend every reference to 'actual and reasonable' to read " actual and reasonable".

44.20	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Water Take and Use	Oppose	TANK 13: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
44.28	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Water Take and Use	Oppose	TANK 13: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
44.34	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Water Take and Use	Oppose	Amend TANK 7 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
44.35	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Water Take and Use	Oppose	Amend TANK 8 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
49.12	John	Parsons		Water Take and Use	Oppose	TANK 9: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
49.13	John	Parsons		Water Take and Use	Oppose	TANK 10: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
49.14	John	Parsons		Water Take and Use	Oppose	TANK 11: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
49.20	John	Parsons		Water Take and Use	Oppose	TANK 13: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
49.28	John	Parsons		Water Take and Use	Oppose	TANK 13: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
49.34	John	Parsons		Water Take and Use	Oppose	Amend TANK 7 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
49.35	John	Parsons		Water Take and Use	Oppose	Amend TANK 8 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
54.12	Mark	Apatu	Apatu Farms Ltd	Water Take and Use	Oppose	TANK 9: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
54.13	Mark	Apatu	Apatu Farms Ltd	Water Take and Use	Oppose	TANK 10: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
54.14	Mark	Apatu	Apatu Farms Ltd	Water Take and Use	Oppose	TANK 11: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
54.20	Mark	Apatu	Apatu Farms Ltd	Water Take and Use	Oppose	TANK 13: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
54.28	Mark	Apatu	Apatu Farms Ltd	Water Take and Use	Oppose	TANK 13: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
54.34	Mark	Apatu	Apatu Farms Ltd	Water Take and Use	Oppose	Amend TANK 7 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
54.35	Mark	Apatu	Apatu Farms Ltd	Water Take and Use	Oppose	Amend TANK 8 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
59.21	Ronald	McFetridge	WaterForce Limited	Water Take and Use	Support	No specific decision requested but states support for rules TANK 7, 8, 11, 12, 13, 14, 15, 16, 17, and 18.
59.22	Ronald	McFetridge	WaterForce Limited	Water Take and Use	Support	Rule TANK 9 - Support with the variation to the definition proposed to the definition of Actual and Reasonable (see point 39).
59.23	Ronald	McFetridge	WaterForce Limited	Water Take and Use	Support	No specific decision requested but states support for TANK 9 conditions/standards/terms (e) that does not apply to irrigation takes
59.24	Ronald	McFetridge	WaterForce Limited	Water Take and Use	Amend	Amend TANK 9 conditions/standards/terms (e)(iii) to include a definition for Accurate Water Use Data (see point 40).
59.25	Ronald	McFetridge	WaterForce Limited	Water Take and Use	Support	Support TANK 9 matters for control/discretion with the addition of clarification on the definition of the completeness of the water use record (see point 40).
59.26	Ronald	McFetridge	WaterForce Limited	Water Take and Use	Oppose	Amend TANK 9 matters for control/discretion (4) to read: The quantity, rate and timing of the take, including rates of take and any other requirements in relation to any minimum or trigger flow or level given in Schedule 31 and rates of take to limit drawdown effects on neighbouring bores. For irrigation takes, the consented rate of take will be no less than that of the irrigation systems designed rate of take.
59.27	Ronald	McFetridge	WaterForce Limited	Water Take and Use	Oppose	Amend TANK 9 matters for control/discretion (7) to read: Measures to achieve efficient water use or water conservation and avoid adverse water quality effects including the method of irrigation application necessary to achieve efficient use of the water and avoid adverse water effects through ponding and runoff and percolation to groundwater.
59.28	Ronald	McFetridge	WaterForce Limited	Water Take and Use	Support	Support TANK 10 conditions/standards/terms (e) with the variation to the definition proposed to "Actual and Reasonable" (see point 40)
59.29	Ronald	McFetridge	WaterForce Limited	Water Take and Use	Support	Support TANK 10 conditions/standards/terms (g) that it does not apply to irrigation takes.
59.30	Ronald	McFetridge	WaterForce Limited	Water Take and Use	Support	Amend Change 9 to include a definition for Accurate Water Use Data in relation to TANK 10 conditions/standards/terms (g)(iii) (see point 47).
59.31	Ronald	McFetridge	WaterForce Limited	Water Take and Use	Support	Support TANK 10 matters for control/discretion (1) with the amendment that water meter records do not apply to irrigation takes as per the definition proposed in Table 4 of this submission.
59.32	Ronald	McFetridge	WaterForce Limited	Water Take and Use	Oppose	Amend TANK 10 matters for control/discretion (3) to read: The quantity, rate and timing of the take, including rates of take and any other requirements in relation to any minimum or trigger flow or level given in Schedule 31 and rates of take to limit drawdown effects on neighbouring bores. For irrigation takes, the consented rate of take will be no less than that of the irrigation systems designed rate of take.
59.33	Ronald	McFetridge	WaterForce Limited	Water Take and Use	Oppose	No specific decision requested but states partial opposition to TANK 10 matters for control/discretion (10).
61.12	Greg	Simpson		Water Take and Use	Oppose	TANK 9: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
61.13	Greg	Simpson		Water Take and Use	Oppose	TANK 10: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
61.14	Greg	Simpson		Water Take and Use	Oppose	TANK 11: Amend every reference to 'actual and reasonable' to read " actual and reasonable".

61.20	Greg	Simpson		Water Take and Use	Oppose	TANK 13: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
61.28	Greg	Simpson		Water Take and Use	Oppose	TANK 13: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
61.34	Greg	Simpson		Water Take and Use	Oppose	Amend TANK 7 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
61.35	Greg	Simpson		Water Take and Use	Oppose	Amend TANK 8 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
62.12	Jonty	Moffett		Water Take and Use	Oppose	TANK 9: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
62.13	Jonty	Moffett		Water Take and Use	Oppose	TANK 10: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
62.14	Jonty	Moffett		Water Take and Use	Oppose	TANK 11: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
62.20	Jonty	Moffett		Water Take and Use	Oppose	TANK 13: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
62.28	Jonty	Moffett		Water Take and Use	Oppose	TANK 13: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
62.34	Jonty	Moffett		Water Take and Use	Oppose	Amend TANK 7 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
62.35	Jonty	Moffett		Water Take and Use	Oppose	Amend TANK 8 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
69.12	Jos	Dames	Dames Limited	Water Take and Use	Oppose	TANK 9: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
69.13	Jos	Dames	Dames Limited	Water Take and Use	Oppose	TANK 10: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
69.14	Jos	Dames	Dames Limited	Water Take and Use	Oppose	TANK 11: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
69.20	Jos	Dames	Dames Limited	Water Take and Use	Oppose	TANK 13: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
69.28	Jos	Dames	Dames Limited	Water Take and Use	Oppose	TANK 13: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
69.34	Jos	Dames	Dames Limited	Water Take and Use	Oppose	Amend TANK 7 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
69.35	Jos	Dames	Dames Limited	Water Take and Use	Oppose	Amend TANK 8 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
71.12	Carl	Knapp	Bellingham Orchard Ltd.	Water Take and Use	Oppose	TANK 9: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
71.13	Carl	Knapp	Bellingham Orchard Ltd.	Water Take and Use	Oppose	TANK 10: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
71.14	Carl	Knapp	Bellingham Orchard Ltd.	Water Take and Use	Oppose	TANK 11: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
71.20	Carl	Knapp	Bellingham Orchard Ltd.	Water Take and Use	Oppose	TANK 13: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
71.28	Carl	Knapp	Bellingham Orchard Ltd.	Water Take and Use	Oppose	TANK 13: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
71.34	Carl	Knapp	Bellingham Orchard Ltd.	Water Take and Use	Oppose	Amend TANK 7 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
71.35	Carl	Knapp	Bellingham Orchard Ltd.	Water Take and Use	Oppose	Amend TANK 8 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
72.12	Justin	Addis	Armadale Orchard Ltd	Water Take and Use	Oppose	TANK 9: Amend every reference to 'actual and reasonable' to read " actual and reasonable".

122.28	Richard	Penreath	Ngai Tukairangi Trust	Water Take and Use	Oppose	TANK 13: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
122.34	Richard	Penreath	Ngai Tukairangi Trust	Water Take and Use	Oppose	Amend TANK 7 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
122.35	Richard	Penreath	Ngai Tukairangi Trust	Water Take and Use	Oppose	Amend TANK 8 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
129.8	Ceri	Edmonds	Hawke's Bay Regional Council	Water Take and Use	Amend	TANK 7 - Amend condition (b) to show that the reasonable needs for both an individual's domestic needs and an individual's animals existing prior to the notification of the plan can continue to be taken without a specified limit.
129.9	Ceri	Edmonds	Hawke's Bay Regional Council	Water Take and Use	Amend	TANK 8 - Amend condition (b) to show that the reasonable needs for both an individual's domestic needs and an individual's animals existing prior to the notification of the plan can continue to be taken without a specified limit.
129.10	Ceri	Edmonds	Hawke's Bay Regional Council	Water Take and Use	Amend	TANK 9 - Delete conditions (f) and (g) and insert new condition requiring all water permits to be subject to a stream depletion calculation
129.11	Ceri	Edmonds	Hawke's Bay Regional Council	Water Take and Use	Amend	TANK 9 - Amend matter 15 to require a permit review and new conditions to be imposed in respect of contribution to a stream flow maintenance scheme, when applicable
129.12	Ceri	Edmonds	Hawke's Bay Regional Council	Water Take and Use	Amend	TANK 9 - Include non-notification direction for applications where they are subject to a review condition in respect of flow maintenance and habitat enhancement.
129.13	Ceri	Edmonds	Hawke's Bay Regional Council	Water Take and Use	Amend	TANK 10 - Amend condition (c) to include at the end "For all other takes the flows specified in Schedule 31 apply
129.14	Ceri	Edmonds	Hawke's Bay Regional Council	Water Take and Use	Amend	TANK 10 - Amend condition (h) and matter 15 to be consistent with amendments to TANK 9 and policy 39 for the provisions for flow maintenance where this option is applicable and appropriate
129.15	Ceri	Edmonds	Hawke's Bay Regional Council	Water Take and Use	Amend	TANK 11 - Insert at the end of condition (a) "where relevant."
129.16	Ceri	Edmonds	Hawke's Bay Regional Council	Water Take and Use	Amend	TANK 11 - Insert new clause iii into condition (ii). Water takes that are non-consumptive
129.17	Ceri	Edmonds	Hawke's Bay Regional Council	Water Take and Use	Amend	TANK 13 - Delete condition (a).
129.18	Ceri	Edmonds	Hawke's Bay Regional Council	Water Take and Use	Amend	TANK 14 - Insert into activity description "the erection or placement of any dam or weir or other barrier structure'
129.19	Ceri	Edmonds	Hawke's Bay Regional Council	Water Take and Use	Amend	TANK 14 - Insert a new condition (a): The activity does not comply with the conditions of RRMP 67 or RRMP 68
132.50	Marei	Apatu	Te Taiwhenua o Heretaunga	Water Take and Use	Amend	Rule TANK 9 - 13 - Require applications for existing and new consents to take water for irrigation, to be assessed as discretionary activities, tangata whenua parties to be notified, and impose a ten year duration limit.
132.51	Marei	Apatu	Te Taiwhenua o Heretaunga	Water Take and Use	Amend	Rule TANK 7 - Allow for 20 m3 per week allocation to continue for existing and new domestic use (houses) as permitted activities.
132.52	Marei	Apatu	Te Taiwhenua o Heretaunga	Water Take and Use	Amend	Prohibit water takes outside of the allocation volume limits and cumulative rate limits, apart from emergency uses.
132.60	Marei	Apatu	Te Taiwhenua o Heretaunga	Water Take and Use	Amend	Require renewal of existing consents and applications for new consents to take water for irrigation, to be assessed as discretionary activities, for tangata whenua to be notified as affected parties, and impose a ten year duration limit.
132.62	Marei	Apatu	Te Taiwhenua o Heretaunga	Water Take and Use	Amend	Prohibit groundwater takes outside of the allocation volume limits and cumulative rate limits, apart from emergency uses.
132.67	Marei	Apatu	Te Taiwhenua o Heretaunga	Water Take and Use	Amend	Remove all references to and criteria relating to "efficient well [bore]" from applying in TANK catchments
132.120	Marei	Apatu	Te Taiwhenua o Heretaunga	Water Take and Use	Amend	Make concurrent amendments to Rules TANK 7 and TANK 8 so they prescribe the same 60 m3 per week limit (outside of water short areas) as permitted activities, and above this volume for stock water as restricted discretionary, and subject to zone or FMU limits.
132.136	Marei	Apatu	Te Taiwhenua o Heretaunga	Water Take and Use	Amend	Add a new Rule TANK 8A for water takes within water short areas (as prescribed in Schedule VI) and in other TANK zones , water management areas and FMUs to prescribe takes for stock water and for other purposes, of above 60 m3 per week and up to 200 m3 per week, as restricted discretionary activities. Matters for control discretion provided.
132.137	Marei	Apatu	Te Taiwhenua o Heretaunga	Water Take and Use	Amend	Add new Rule 11A (restricted discretionary activity) to restrict fertiliser and nitrogen applications, nitrate-N leaching, intensive grazing, production landuse, landuse change (intensification), irrigation, and discharges of nutrients within sensitive catchments and those catchments, management zones or FM Us where water quality objectives are not being met. Apply a total limit of 80 kg/ha/year for nitrogen applications from all sources. Matters for discretion provided.

132.160	Marei	Apatu	Te Taiwhenua o Heretaunga	Water Take and Use	Amend	Oppose TANK Rules 9, 10, 11, and Schedule 33 until the objectives and policies have been more integrated with the RPS and NPS-FM provisions, and the rules have been amended to: <ul style="list-style-type: none"> •delete all references to "actual and reasonable" use and other provisions relating to this criteria, and make the rules for water abstraction for irrigation purposes discretionary activities. •Delete all "Stream Flow Maintenance Scheme" provisions. •Require consent renewals to occur upon consent expiry or when PC9 becomes operative, whichever occurs first. •Reduce total consent volumes for groundwater takes (Heretaunga Plains Groundwater) so the total is within a 70 Million m3 per year limit. •Require groundwater takes to operate within a cumulative rate of take limit in litres per second. •Require high flow allocation to operate within both volumetric and cumulative rate of take limits. •Include stream depletion rates of 0.5 lps and above, and associated depletion volumes, within surface water take limits (for the affected surface water body). •Prescribe seasonal irrigation restrictions from 1 November to 30 April for each consent to take groundwater or surface water for irrigation. •Amend schedule 33 to reflect the changes above •Restrict takes within Water Management Zones identified in Operative Schedule Via and link this Schedule to TANK rules. •Amend Rule 54 to include PC9 provisions where relevant
135.54	Anna	Wilkes	Ravensdown Limited	Water Take and Use	Support	Retain restricted discretionary activity Rule TANK 9 as notified.
135.55	Anna	Wilkes	Ravensdown Limited	Water Take and Use	Support	Retain discretionary activity Rule TANK 11 as notified.
142.23	Bill	Glazebrook	Big Hill Station Limited	Water Take and Use	Oppose	That Rules TANK 7 and TANK 8 be removed from Plan change 9 and addressed separately. If it is to proceed without further consultation the amend wording of Rule TANK 7 and Rule TANK 8. Requirements for wording provided, relating to surface water take for livestock, subdivision, amount to be permitted, number of points of take.
185.12	Allen	Kittow	Tremaine Farms Ltd	Water Take and Use	Oppose	TANK 9: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
185.13	Allen	Kittow	Tremaine Farms Ltd	Water Take and Use	Oppose	TANK 10: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
185.14	Allen	Kittow	Tremaine Farms Ltd	Water Take and Use	Oppose	TANK 11: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
185.20	Allen	Kittow	Tremaine Farms Ltd	Water Take and Use	Oppose	TANK 13: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
185.28	Allen	Kittow	Tremaine Farms Ltd	Water Take and Use	Oppose	TANK 13: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
185.34	Allen	Kittow	Tremaine Farms Ltd	Water Take and Use	Oppose	Amend TANK 7 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
185.35	Allen	Kittow	Tremaine Farms Ltd	Water Take and Use	Oppose	Amend TANK 8 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
186.12	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Water Take and Use	Oppose	TANK 9: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
186.13	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Water Take and Use	Oppose	TANK 10: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
186.14	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Water Take and Use	Oppose	TANK 11: Amend every reference to 'actual and reasonable' to read " actual and reasonable".
186.20	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Water Take and Use	Oppose	TANK 13: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
186.28	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Water Take and Use	Oppose	TANK 13: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
186.34	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Water Take and Use	Oppose	Amend TANK 7 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
186.35	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Water Take and Use	Oppose	Amend TANK 8 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
195.85	Peter	Matich	Federated Farmers of New Zealand	Water Take and Use	Amend	That Rule TANK 7 be amended as follows: Status – Permitted Activity The take and use of surface water in the TANK water Management Zones including under Section 14(3)(b) of the RMA Conditions/Standards/Terms ... b) The take does not exceed 5 20 cubic metres per day per any one property except: (i) Takes existing as at 2 May 2020 may continue to take up to 20 cubic metres per property per day and to meet the reasonable needs of animals for drinking water; ... And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.

195.86	Peter	Match	Federated Farmers of New Zealand	Water Take and Use	Amend	That Rule TANK 8 be amended as follows: Status – Permitted Activity The take and use of groundwater in the TANK Water Management Zones including under Section 14(3)(b) of the RMA Conditions/Standards/Terms a) Any take first commencing after 2 May 2020 is not from the Poukawa Freshwater Management Unit (quantity). b) There is only one point of take per property and the take does not exceed 5 <u>20</u> cubic metres per day except; (i) takes existing as at 2 May 2020 may continue to take up to 20 cubic metres per property per day and to meet the reasonable needs of animals for drinking water. ... And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.87	Peter	Match	Federated Farmers of New Zealand	Water Take and Use	Amend	That Rule TANK 9 be amended as follows: ... Actual and Reasonable Re-allocation ... d) The quantity taken and used for municipal, community and papakainga water supply <u>has regard to efficiency of use</u> is: (i) the quantity specified on the permit being renewed; or (ii) any lesser quantity applied for. ... General Conditions i) A water meter is installed <u>unless the take is below 5L/s.</u> ... Matters for Control/Discretion ... 6. For applications to take water for municipal, community and papakainga water supply; a. provisions for demand reduction and asset management over time so that water use is at reasonable and justifiable levels including whether an Infrastructure Leakage Index of <u>4-1</u> or better will be achieved. b. Rate and volumes of take limited to the projected demand for the urban area provided in the HPUDS 2017.... And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.88	Peter	Match	Federated Farmers of New Zealand	Water Take and Use	Amend	That Rule TANK 10 be amended as follows: Actual and Reasonable Re-allocation f) The quantity taken and used for municipal, community and papakainga water supply <u>has regard to efficiency of use</u> is: (i) the quantity specified on the permit being renewed; or (ii) any lesser quantity applied for. ... Matters for Control/Discretion 1. The extent to which the need for water has been demonstrated and is actual and reasonable provided that the quantities assessed or calculated may be amended after taking account of: e. <u>whether the existing consent holder has been able to previously conserve water use due to factors such as varying natural abundance of rainfall or through careful management, and the need for allocation is occasioned to be greater than what may be considered as 'actual and reasonable' under the circumstances.</u> ... 5. For applications to take water for municipal, community and papakainga water supply; a. provisions for demand reduction and asset management over time so that water use is at reasonable and justifiable levels including whether an Infrastructure Leakage Index of <u>4-1</u> or better will be achieved. b. Rate and volumes of take limited to the projected demand for the urban area provided in the HPUDS 2017. ... And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.89	Peter	Match	Federated Farmers of New Zealand	Water Take and Use	Support	Retain as notified
195.90	Peter	Match	Federated Farmers of New Zealand	Water Take and Use	Amend	That Rule TANK 12 be amended as follows Status – Prohibited Non-complying Activity The take and use of surface or groundwater. Conditions/Standards/Terms a) The activity does not comply with the conditions of Rule TANK 11 No application may be made for this activity And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.91	Peter	Match	Federated Farmers of New Zealand	Water Take and Use	Amend	That Rule TANK 13 be amended to provide for suitable allocation of surface water at times of high flow as a controlled activity, with a further trip to restricted discretionary activity where controlled activity standards are not complied with And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.

196.13	Julian	Odering	Oderings Nurseries	Water Take and Use	Oppose	TANK 9: Amend every reference to 'actual and reasonable' to read " actual and reasonable ".
196.14	Julian	Odering	Oderings Nurseries	Water Take and Use	Oppose	TANK 10: Amend every reference to 'actual and reasonable' to read " actual and reasonable ".
196.15	Julian	Odering	Oderings Nurseries	Water Take and Use	Oppose	TANK 11: Amend every reference to 'actual and reasonable' to read " actual and reasonable ".
196.21	Julian	Odering	Oderings Nurseries	Water Take and Use	Oppose	TANK 13: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
196.29	Julian	Odering	Oderings Nurseries	Water Take and Use	Oppose	TANK 13: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
196.35	Julian	Odering	Oderings Nurseries	Water Take and Use	Oppose	Amend TANK 7 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
196.36	Julian	Odering	Oderings Nurseries	Water Take and Use	Oppose	Amend TANK 8 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
203.22	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	Water Take and Use	Amend	Amend TANK 8 to provide a permitted activity pathway for temporary construction dewatering activities. This could be achieved by amending clauses b) and c) as follows: b) There is only one point of take per property and the take does not exceed 5 cubic metres per day except; ... (iii) The taking of water for aquifer testing and construction dewatering for up to 10 consecutive days is not restricted c) The rate of take shall not exceed 10 l/s other than for temporary construction dewatering which shall not exceed 40 l/s and aquifer testing for which the rate of take is not restricted.
203.23	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	Water Take and Use	Amend	Amend as follows: a) The activity does not comply with the conditions of Rules <u>TANK 8</u> , TANK 9 or TANK 10. ... (b)(i)(ii)(iii) temporary construction dewatering
203.24	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	Water Take and Use	Oppose	Amend the activity status of TANK 12 from prohibited to non-complying.
210.88	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Water Take and Use	Oppose	TANK 7: Amend to give effect to the NPSFM, in particular by amending condition c to set an appropriate limit that protects ecosystem health and ecological values. Amend to clearly address the potential for cumulative adverse effects of small takes. Include a condition requiring notification of the take, location, volume and rate to be provided to council within 1 month or the take commencing or this plan becoming operative.
210.89	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Water Take and Use	Oppose	TANK 8: Remove "(iii) The taking of water for aquifer testing is not restricted" and replace with a restriction on how much water can be taken for aquifer testing. Amend to give effect to the NPSFM and to clearly address the potential for cumulative adverse effects of small takes. Include a condition requiring notification of the take, location, volume and rate to be provided to council within 1 month or the take commencing or this plan becoming operative.
210.90	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Water Take and Use	Oppose	TANK 9: Delete and replace with a policy on groundwater takes that gives effect to the NPS-FM.
210.91	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Water Take and Use	Oppose	TANK 10: Amend to give effect to the NPS and address issues of clarity.
210.92	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Water Take and Use	Oppose	TANK 11: Amend to give effect to the NPSFM.
210.93	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Water Take and Use	Support	TANK 12: Retain (noting amendments to rule 11 needed).
210.94	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Water Take and Use	Oppose	TANK 13: Amend to give effect to the NPSFM, including by adding ecological considerations in the conditions and a standard for maintaining the natural character / habitat quality of the river using the Natural Character / Habitat Quality Index.
211.12	Brian	McLay		Water Take and Use	Oppose	TANK 9: Amend every reference to 'actual and reasonable' to read " actual and reasonable ".
211.13	Brian	McLay		Water Take and Use	Oppose	TANK 10: Amend every reference to 'actual and reasonable' to read " actual and reasonable ".
211.14	Brian	McLay		Water Take and Use	Oppose	TANK 11: Amend every reference to 'actual and reasonable' to read " actual and reasonable ".
211.20	Brian	McLay		Water Take and Use	Oppose	TANK 13: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
211.28	Brian	McLay		Water Take and Use	Oppose	TANK 13: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
211.34	Brian	McLay		Water Take and Use	Oppose	Amend TANK 7 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.
211.35	Brian	McLay		Water Take and Use	Oppose	Amend TANK 8 to provide a specific exemption to allow up to 20m3 to continue to be taken per day to assist the survival of permanent horticultural crops.

110.22	Edward	Whyte	Whyte & Co	Damming and Storage	Oppose	TANK 15: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
110.29	Edward	Whyte	Whyte & Co	Damming and Storage	Oppose	TANK 14: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
110.30	Edward	Whyte	Whyte & Co	Damming and Storage	Oppose	TANK 15: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
122.21	Richard	Penreath	Ngai Tukairangi Trust	Damming and Storage	Oppose	TANK 14: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
122.22	Richard	Penreath	Ngai Tukairangi Trust	Damming and Storage	Oppose	TANK 15: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
122.29	Richard	Penreath	Ngai Tukairangi Trust	Damming and Storage	Oppose	TANK 14: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
122.30	Richard	Penreath	Ngai Tukairangi Trust	Damming and Storage	Oppose	TANK 15: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
146.4	Rebecca	Davies	New Zealand Defence Force	Damming and Storage	Oppose	Rule TANK 17 - Oppose Section 6.10.2 - Insert a new rule to provide for temporary dams as a permitted activity, subject to standards, as requested below: <u>The construction of a temporary dam and associated take and use of surface water for use of water treatment units.</u> a) The activity must be undertaken by the New Zealand Defence Force; b) The temporary dam must not intersect groundwater; c) The temporary dam must not be built within 500m upstream of a dwelling, formed public road or designated rail infrastructure; and d) The dam must be constructed to enable dismantling at the completion of each use. e) The dam must not be on the mainstem of the following rivers: (i) <u>Ngaruroro River</u> (ii) <u>Taruarau River</u> (iii) <u>Omahaki River</u> (iv) <u>Tutaekuri River:</u> (v) <u>Mangaone River</u> (vi) <u>Mangatutu River</u>
185.21	Allen	Kittow	Tremaine Farms Ltd	Damming and Storage	Oppose	TANK 14: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
185.22	Allen	Kittow	Tremaine Farms Ltd	Damming and Storage	Oppose	TANK 15: No specific decision requested but states that the allocation limit for high flow takes should be revisited.

185.29	Allen	Kittow	Tremaine Farms Ltd	Damming and Storage	Oppose	TANK 14: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
185.30	Allen	Kittow	Tremaine Farms Ltd	Damming and Storage	Oppose	TANK 15: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
186.21	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Damming and Storage	Oppose	TANK 14: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
186.22	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Damming and Storage	Oppose	TANK 15: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
186.29	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Damming and Storage	Oppose	TANK 14: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
186.30	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Damming and Storage	Oppose	TANK 15: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
195.92	Peter	Matich	Federated Farmers of New Zealand	Damming and Storage	Amend	That Rule TANK 14 be amended as follows Status –Discretionary Activity Damming of surface waters and discharge from dams except as prohibited by Rule TANK 17 Conditions/Standards/Terms a) Except as prohibited by Rule TANK 17, the activity either on its own or in combination with other dam or discharge activities in the same water management zone does not cause the flow regime of the river to be altered by more than the amount specified in Schedule 32 And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.93	Peter	Matich	Federated Farmers of New Zealand	Damming and Storage	Amend	That Rule TANK 15 be amended to provide for take and use from a dam or water impoundment as a controlled activity, with a further trip to restricted discretionary activity where controlled activity standards are not complied with And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.94	Peter	Matich	Federated Farmers of New Zealand	Damming and Storage	Amend	That Rule TANK 16 be retained as notified, subject to our relief sought for Rules Tank 13 to Tank 15
195.95	Peter	Matich	Federated Farmers of New Zealand	Damming and Storage	Amend	That Rule TANK 17 be amended as follows Status – Prohibited Non-complying Activity Construction of dams or the damming of water Conditions/Standards/Terms a) The construction of dams or the damming of water on the mainstem of the following rivers (i) Ngaruroro River (ii) Taruarau River (iii) Omahaki River (iv) Tutaekuri River: (v) Mangaone River (vi) Mangatutu River No application may be made for these activities.
196.22	Julian	Odering	Oderings Nurseries	Damming and Storage	Oppose	TANK 14: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
196.23	Julian	Odering	Oderings Nurseries	Damming and Storage	Oppose	TANK 15: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
196.30	Julian	Odering	Oderings Nurseries	Damming and Storage	Oppose	TANK 14: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
196.31	Julian	Odering	Oderings Nurseries	Damming and Storage	Oppose	TANK 15: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
210.95	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Damming and Storage	Oppose	TANK 14: Amend to prohibited status, except where that dam is constructed 'offline'. Address ecological effects of offline dams by adding ecological considerations in the conditions and a standard for maintaining the natural character / habitat quality of the river water is taken from using the Natural Character / Habitat Quality Index. We also suggest an acknowledgement within the plan of the potential impact of dams on riverine ecosystems.
210.96	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Damming and Storage	Oppose	TANK 15: Amend to give effect to the NPSFM and RMA.
210.97	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Damming and Storage	Amend	TANK 16: Strengthen to prohibited status

210.98	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Damming and Storage	Support	TANK 17: Amend the list to include all water bodies in the region.
211.21	Brian	McLay		Damming and Storage	Oppose	TANK 14: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
211.22	Brian	McLay		Damming and Storage	Oppose	TANK 15: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
211.29	Brian	McLay		Damming and Storage	Oppose	TANK 14: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
211.30	Brian	McLay		Damming and Storage	Oppose	TANK 15: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
214.21	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Damming and Storage	Oppose	TANK 14: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
214.22	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Damming and Storage	Oppose	TANK 15: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
214.29	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Damming and Storage	Oppose	TANK 14: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
214.30	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Damming and Storage	Oppose	TANK 15: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
215.21	Peter	Dooney	Dooney Partnership	Damming and Storage	Oppose	TANK 14: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
215.22	Peter	Dooney	Dooney Partnership	Damming and Storage	Oppose	TANK 15: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
215.29	Peter	Dooney	Dooney Partnership	Damming and Storage	Oppose	TANK 14: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
215.30	Peter	Dooney	Dooney Partnership	Damming and Storage	Oppose	TANK 15: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
217.20	Paul	Paynter	Johnny Appleseed Holdings Ltd	Damming and Storage	Oppose	TANK 14: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
217.21	Paul	Paynter	Johnny Appleseed Holdings Ltd	Damming and Storage	Oppose	TANK 15: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
217.28	Paul	Paynter	Johnny Appleseed Holdings Ltd	Damming and Storage	Oppose	TANK 14: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
217.29	Paul	Paynter	Johnny Appleseed Holdings Ltd	Damming and Storage	Oppose	TANK 15: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
218.21	Adrian	Mannering	Irrigation Services	Damming and Storage	Oppose	TANK 14: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
218.22	Adrian	Mannering	Irrigation Services	Damming and Storage	Oppose	TANK 15: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
218.29	Adrian	Mannering	Irrigation Services	Damming and Storage	Oppose	TANK 14: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
218.30	Adrian	Mannering	Irrigation Services	Damming and Storage	Oppose	TANK 15: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
219.21	Michael & Julie	Russell		Damming and Storage	Oppose	TANK 14: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
219.22	Michael & Julie	Russell		Damming and Storage	Oppose	TANK 15: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
219.29	Michael & Julie	Russell		Damming and Storage	Oppose	TANK 14: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
219.30	Michael & Julie	Russell		Damming and Storage	Oppose	TANK 15: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
220.21	Steve	Gillum	Gillum Springfield Trust	Damming and Storage	Oppose	TANK 14: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
220.22	Steve	Gillum	Gillum Springfield Trust	Damming and Storage	Oppose	TANK 15: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
220.29	Steve	Gillum	Gillum Springfield Trust	Damming and Storage	Oppose	TANK 14: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
220.30	Steve	Gillum	Gillum Springfield Trust	Damming and Storage	Oppose	TANK 15: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
221.21	WT	Scott		Damming and Storage	Oppose	TANK 14: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
221.22	WT	Scott		Damming and Storage	Oppose	TANK 15: No specific decision requested but states that the allocation limit for high flow takes should be revisited.
221.29	WT	Scott		Damming and Storage	Oppose	TANK 14: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).

221.30	WT	Scott		Damming and Storage	Oppose	TANK 15: Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
6.10.3 Stormwater						
10.15	David	Renouf		6.10.3 Stormwater	Amend	Amend TANK Rule 19 - Delete TANK 19(a) (vi) i, ii, iii, iv Add to TANK 19(a) (vi) Proposed Plan Change 9 Schedules 26 and 27 Freshwater Quality Objectives as Freshwater Standards to be met at point of discharge by 2025 <u>and that</u> – The discharge shall meet HB Regional Resource Management Plan 5.4 Surface Water Quality Tables 7 and 8 when PC9 becomes operative. Delete TANK 19(b) Add to TANK 19(b) ‘All property’s shall connect to the current or planned reticulated stormwater or wastewater network that is within 200 metres of their property boundary’ Add to TANK 19(e) Soakage is Not to be used for disposal of <u>captured</u> road runoff in the Heretaunga Plains Unconfined Area. Delete TANK 21 (vi) after occur. Add at TANK 21 (vi) after occur – ‘at the point of discharge’
10.16	David	Renouf		6.10.3 Stormwater	Amend	Amend TANK Rule 21 - Delete TANK 21 (vi) i, ii, iii, iv Add to TANK 19(vi) Proposed Plan Change 9 Schedules 26 and 27 Freshwater Quality Objectives as Freshwater Standards to be met at point of discharge by 2025. <u>and that</u> – The discharge shall meet HB Regional Resource Management Plan 5.4 Surface Water Quality Tables 7 and 8 when PC9 becomes operative. Add to TANK 21(b)(vi) ‘and medium risk’ Add (b)(xii) ‘Where a stormwater discharge is within a Source Protection Zone but outside of stormwater or wastewater network and the discharge is not to surface water the discharge shall meet Proposed Plan Change 9 Schedules 26 and 27 Freshwater Quality Objectives as Freshwater Standards at the point of discharge by 20205’ <u>and that</u> – ‘The discharge shall meet HB Regional Resource Management Plan 5.4 Surface Water Quality Tables 7 and 8 after 200m distance (a distance set out in RRMP Pol72) of reasonable mixing when PC9 becomes operative’
10.17	David	Renouf		6.10.3 Stormwater	Amend	Amend TANK Rule 22 - Delete TANK 22 (c)(vi) (i), (ii), (iii), (iv) Add to TANK 22(c) ‘shall meet Proposed Plan Change 9 Schedules 26 and 27 Freshwater Quality Objectives as Freshwater Standards to be met at point of discharge by 2025. <u>and that</u> – ‘The discharge shall meet HB Regional Resource Management Plan 5.4 Surface Water Quality Tables 7 and 8 after 200m distance (a distance set out in RRMP Pol72) of reasonable mixing when PC9 becomes operative’. Delete TANK 22 (e) . Add to TANK 22(e) ‘All properties shall connect to the current or planned reticulated stormwater or wastewater network that is within 200 metres of their property boundary’ Seek that the concerns over the following 3 issues be addressed please •There are stormwater discharges where reticulated stormwater networks are within 200 metres of their property boundary’s •There are stormwater discharges where there are no reticulated stormwater networks within 200 metres of their property boundary’s •The issue of ‘after reasonable mixing’ Delete TANK 22 (c) after occur. Add at TANK 22 (c) after occur – ‘at the point of discharge’
58.33	Peter	Wilson	Hawkes Bay Fish and Game Council	6.10.3 Stormwater	Amend	Amend TANK22 to include a requirement for no greater than 20% MCI/QMCI change between upstream and downstream of the discharge of stormwater.
63.38	Keith	Marshall	Napier City Council	6.10.3 Stormwater	Amend	Amend TANK 19 to clarify the implementation of Condition (b) in relation to what ‘planned reticulation’ is defined as.
63.39	Keith	Marshall	Napier City Council	6.10.3 Stormwater	Amend	Amend Clause 7 of Matters for Control/Discretion in TANK 20 to read: “The actual or potential effects of the activity on the quality of source water for Registered Drinking Water Supplies irrespective of treatment”
63.40	Keith	Marshall	Napier City Council	6.10.3 Stormwater	Amend	Amend TANK 20 to add the following matter of discretion: “Where consent is required because TANK 19(b) cannot be met due to a planned reticulation network not being available, <u>conditions requiring connection to the network when that network becomes available.</u> ”
63.41	Keith	Marshall	Napier City Council	6.10.3 Stormwater	Support	Amend Conditions in TANK 21 to read: “a)(ii) cause or contribute to flooding of any property <u>except where flooding occurs over a watercourse or designated secondary flow path.</u> a)(vi)(v) cause to occur or continue to the destruction or degradation of any habitat, mahinga kai, plant or animal in any water body or coastal water (vi)(vi) cause to occur or continue to the <u>exceedance of water quality targets for discharge of</u> microbiological contaminants <u>including sewerage, blackwater, greywater or animal effluent</u> ” b)(xi) Where the stormwater network (or part thereof) of discharge locations are situated within a Source Protection Zones of a registered drinking water supply, a description of measures to prevent or minimise adverse effects on the quality of the source water irrespective of treatment. ”

63.42	Keith	Marshall	Napier City Council	6.10.3 Stormwater	Amend	Amend TANK 22 conditions to read: a) An application for resource consent must include an Urban Site Specific Stormwater management Plan Schedule 34. ... d)(ii) the exceedance of water quality targets for discharge of microbiological contaminants including sewerage, blackwater, greywater or animal effluent
63.43	Keith	Marshall	Napier City Council	6.10.3 Stormwater	Amend	Amend TANK 22, Clause 1 Matters for Control/Discretion to read: 1. the efficacy of the Urban Site Specific Stormwater Management Plan
63.44	Keith	Marshall	Napier City Council	6.10.3 Stormwater	Amend	Amend TANK 22 Clause 3 of Matter for Control/Discretion to read: 3 The actual or potential effects of the activity on the quality of source water for Registered Drinking Water Supplies irrespective of treatment...
63.45	Keith	Marshall	Napier City Council	6.10.3 Stormwater	Support	Amend TANK 23 to Delete the sole Matter of Control/Discretion referring to Reviews
100.5	Stephanie	Murphy	Hawke's Bay Airport	6.10.3 Stormwater	Not Stated	Many Airport supporting activities exceed this footprint and therefore require resource consent under PC9 under the relevant "Stormwater Activity" rules. The rationale for this change has not be clearly articulated or evaluated in terms of section 32 of the Act.
117.6	Alison	Johnston	Silver Fern Farms Limited	6.10.3 Stormwater	Support	Rule TANK 22 - generally supports the conditions/standards/terms of proposed rule Tank 22 to include an Urban Site Specific Stormwater Management Plan for the discharge of stormwater from any industrial or trade premises.
119.20	Liz	Lambert	Hawke's Bay Drinking Water Governance Joint Committee	6.10.3 Stormwater	Support	Rule TANK 20 - Support
119.21	Liz	Lambert	Hawke's Bay Drinking Water Governance Joint Committee	6.10.3 Stormwater	Support	Rule TANK 20 - Support
119.22	Liz	Lambert	Hawke's Bay Drinking Water Governance Joint Committee	6.10.3 Stormwater	Support	Rule TANK 22 - Support
120.29	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	6.10.3 Stormwater	Amend	Regulate and manage all stormwater discharges and require them to meet water quality objectives and targets in Schedule 26 within the life of the plan.
123.114	Jenny	Nelson-Smith	Department of Conservation	6.10.3 Stormwater	Amend	Rule TANK 19 - Include reference to significant adverse effects on aquatic life
123.115	Jenny	Nelson-Smith	Department of Conservation	6.10.3 Stormwater	Not Stated	Rule TANK 21 - Include a condition/standard to exclude stormwater discharges into inanga spawning habitats
123.116	Jenny	Nelson-Smith	Department of Conservation	6.10.3 Stormwater	Amend	Rule TANK 22 - Include as a matter of discretion reference to the water quality objectives and targets in Schedule 26 and inanga spawning habitats.
127.22	Tania	Eden	Te Taiwhenua o Te Whanganui a Orotu	6.10.3 Stormwater	Not Stated	Regulate and manage all stormwater discharges and require them to meet water quality objectives and targets in Schedule 26 by 2040. Regulate and manage all point source discharges and require them to meet water quality objectives and targets in Schedule 26 by 2040.
129.20	Ceri	Edmonds	Hawke's Bay Regional Council	6.10.3 Stormwater	Amend	TANK 19 - Provide definition for rural buildings
129.21	Ceri	Edmonds	Hawke's Bay Regional Council	6.10.3 Stormwater	Amend	TANK 19 - Provide more guidance for what small scale means, by including a threshold for impervious area or a maximum number of lots in a new subdivisionandnbsp;andnbsp;
129.22	Ceri	Edmonds	Hawke's Bay Regional Council	6.10.3 Stormwater	Amend	TANK 19 - Provide definition for what a planned reticulated stormwater network in clause (b) means and criteria to establish how compliance with the condition can be assessed or delete reference to planned reticulation.
129.23	Ceri	Edmonds	Hawke's Bay Regional Council	6.10.3 Stormwater	Amend	TANK 20 - Delete reference to industrial areas in activity description.

129.24	Ceri	Edmonds	Hawke's Bay Regional Council	6.10.3 Stormwater	Amend	TANK 21 - Amend condition (b) so it states an Integrated Catchment Plan must be prepared and delete following clauses(i) – (xii). Insert a new definition for Integrated Catchment Plan as follows: Integrated Catchment Plan with respect to stormwater management in local authority stormwater networks means a plan that includes: a) Maps showing the spatial extent of the stormwater network b) Identification of the priority streams or catchments where stormwater discharges currently result in receiving water quality below the standards specified in Schedule 26 and the programme of mitigation measures including timeframes and milestones for the enhancement of streams c) A monitoring programme to assess existing stormwater discharge quality and level of impact on receiving water quality standards d) Identification of any industrial or trade sites, that use, store, or produce the discharge of any contaminant of concern (as defined in Table 3.1 of Hawke's Bay Waterway Guidelines Industrial Stormwater Design) and the programme for ensuring Urban Site-Specific Stormwater Management Plans are prepared and implemented so that stormwater quality risks are managed. (Schedule 34) e) Identification of sites within catchments that have a high risk of contaminants entering the stormwater network or land where it might enter surface or groundwater, including areas subject to new urban development and a description of measures to reduce the risks to water quality. f) Identification of areas at risk of flooding, and where levels of service to protect communities from flooding are not being met and a description of how these risks are to be managed, including as a result of climate change or land use change. g) Any measures necessary to ensure discharges do not cause scouring or erosion of land or any water course beyond the point of discharge Maps showing locations of any Source Protection Zone and any additional measures needed to protect source water quality
129.25	Ceri	Edmonds	Hawke's Bay Regional Council	6.10.3 Stormwater	Amend	TANK 21 - Amend Matters 1 so it reads:1. The content and efficacy of the Integrated Catchment Management Plan including, but not limited to: a) Its contribution to achieving water quality objectives b) its implementation programme and milestones, <u>The programme of work and mitigation measures necessary, for preparation of Site-Specific Stormwater Management Plans, aquatic ecosystem improvement, water contamination reduction and flood management including milestones and timeframes.</u> c) The comprehensiveness and reliability of the monitoring regime d) The use of low impact stormwater design methods.
129.26	Ceri	Edmonds	Hawke's Bay Regional Council	6.10.3 Stormwater	Amend	TANK 23 - Delete matter
132.122	Marei	Apatu	Te Taiwhenua o Heretaunga	6.10.3 Stormwater	Amend	Rule TANK 21 - Elevate the activity status for stormwater discharges in the TANK catchments, to restricted discretionary where they are from an urban reticulated stormwater system or discretionary where they discharge to a site, river, or area of cultural significance.
132.123	Marei	Apatu	Te Taiwhenua o Heretaunga	6.10.3 Stormwater	Amend	Add new stormwater Rule 21A- to manage stormwater discharges from tile drainage, Novaflow drainage systems (or similar), and farm drainage systems in the rural areas of the TANK catchments, and stormwater discharges from roadside drains into land or water, as a restricted discretionary activity. <u>Specific wording provided.</u>
135.56	Anna	Wilkes	Ravensdown Limited	6.10.3 Stormwater	Amend	Amend controlled activity Rule TANK 21 as follows: Conditions/Standards/Terms a) The diversion and discharge shall not: (iv) contain hazardous substances or be from a site used for the storage, use or transfer of hazardous substances
135.57	Anna	Wilkes	Ravensdown Limited	6.10.3 Stormwater	Support	Retain restricted discretionary activity Rule TANK 22 as notified.
135.58	Anna	Wilkes	Ravensdown Limited	6.10.3 Stormwater	Amend	Amend discretionary activity Rule TANK 23 as follows: Conditions/Standards/Terms The activity does not comply with Rules TANK 19 to TANK 22 Matters for Control/Discretion The Council may at any time, by written notice to the owner or occupier (following a reasonable period of consultation), review a consent in light of new information that has become available or any change in circumstances that has occurred, and vary any condition of consent as a consequence.
135.59	Anna	Wilkes	Ravensdown Limited	6.10.3 Stormwater	Amend	Retain new Conditions (f) to (i) of Rule 7 as notified, while making the following amendment in Conditions (f)(i) and (i)(i): ... Farm Environment Plan, Catchment Collective Plan or Industry Programme prepared in accordance with Schedule 30.
180.65	Charlotte	Drury	Horticulture New Zealand	6.10.3 Stormwater	Not Stated	Rule TANK 19, 20, 22 & 23 - The term rural building is too broad, and not defined therefore it is very difficult to understand what the impact of these rules will be on horticultural growers, who own many buildings in rural areas. With regards to the wording of Condition b) in TANK 19, unless a reticulated stormwater network is available, then an onsite stormwater discharge must occur – even until a planned network is constructed. Condition b) needs to be amended to reflect this.
195.97	Peter	Matich	Federated Farmers of New Zealand	6.10.3 Stormwater	Support	That Rule TANK 19 be retained as notified
195.98	Peter	Matich	Federated Farmers of New Zealand	6.10.3 Stormwater	Support	That Rule TANK 20 be retained as notified

195.99	Peter	Matich	Federated Farmers of New Zealand	6.10.3 Stormwater	Support	That Rule TANK 21 be retained as notified
195.100	Peter	Matich	Federated Farmers of New Zealand	6.10.3 Stormwater	Support	That Rule TANK 22 be retained as notified
195.101	Peter	Matich	Federated Farmers of New Zealand	6.10.3 Stormwater	Support	That Rule TANK 23 be retained as notified
203.25	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	6.10.3 Stormwater	Amend	<p>Amend TANK 19(c) as follows to refer to the area used for industrial or trade activity:</p> <p>(c) industrial or trade premise with less than 1,000 m2 of impervious areas used for the storage, use or transfer of hazardous substances;</p> <p>or</p> <p>(c) industrial or trade premise with <u>an industrial or trade activity area</u> less than 1,000 m2 of impervious areas;</p> <p>The Auckland Unitary Plan provides a comprehensive definition of ITA area which could be adopted to provide further explanation of how such an area is calculated. That definition is as follows:</p> <p>The area of land or coastal marine area where a particular industrial or trade activity is being undertaken, which may result in the discharge of environmentally hazardous substances associated with that activity onto or into land or water. The calculation of the industrial or trade activity area must be based upon the following areas:</p> <ul style="list-style-type: none"> • all roof areas onto which environmentally hazardous substances generated by the activity are deposited; • all outdoor storage, handling or processing areas of materials and/or products that may contribute to the quality or quantity of environmentally hazardous substance discharges (including occasional or temporary use of areas); • the area at risk from failure of the largest unbanded container used for the activity that may contribute to the quality or quantity of environmentally hazardous substance discharges; and • all areas (including roofs) that contribute runoff to the Industrial or trade activity area. <p>The calculation of the industrial or trade activity area excludes the following areas:</p> <ul style="list-style-type: none"> • all areas that discharge lawfully into an authorised trade waste system; • areas that are not used for or affected by the industrial or trade activity; • all indoor or roofed areas which do not discharge onto or into land or water; and • areas used for the storage of inert materials, provided that if suspended solids are generated by the materials and entrained in stormwater, the stormwater from such storage areas is treated in accordance with the best practicable option or is otherwise lawfully authorised. <p>In the alternative, differentiate the pathway for industrial or trade premises by preparation of a risk matrix for the range of industrial or trade activities, reflecting that MfE Guideline compliant sites are not high risk.</p> <p>Amend standard a(iv) so that it does not exclude all hazardous substances and provides for activities that are appropriately regulated, for instance stormwater discharges from petroleum industry sites managed in accordance with the MfE Guidelines.</p>
203.26	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	6.10.3 Stormwater	Amend	<p>Provide a restricted discretionary activity pathway for MfE Guideline compliant discharges that do not comply with TANK 19. This could be achieved by:</p> <p>Amending TANK 20(c) as follows to refer to the area used for industrial or trade activity and reference compliance with codes of practice and guidelines as a matter of discretion:</p> <p>(c) industrial or trade premise with less than 1,000 m2 of impervious areas <u>used for the storage, use or transfer of hazardous substances;</u></p> <p>or</p> <p>(c) industrial or trade premise with an <u>industrial or trade activity area</u> less than 1,000 m2 of impervious areas;</p> <p>The Auckland Unitary Plan provides a comprehensive definition of ITA area which could be adopted to provide further explanation of how such an area is calculated (see above).</p> <p>In the alternative, differentiate the pathway for industrial or trade premises by preparation of a risk matrix for the range of industrial or trade activities, reflecting that MfE Guideline compliant sites are not high risk and should be considered as permitted (via TANK 19) or restricted discretionary (via TANK 20) activities.</p> <p>Add an additional matter for control/discretion as follows:</p>
203.27	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	6.10.3 Stormwater	Oppose	TANK 21 - Recognise that stormwater network discharges will almost invariably contain hazardous substances and should be considered on that basis.
203.28	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	6.10.3 Stormwater	Support	TANK 22 - Retain as notified, subject to the amendments sought to TANK 20.
203.29	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	6.10.3 Stormwater	Support	TANK 23 - Retain as notified.
207.56	Mark	Clews	Hastings District Council	6.10.3 Stormwater	Amend	Amend TANK 19 to clarify the implementation of Condition (b) in relation to what 'planned reticulation' is defined as.
207.57	Mark	Clews	Hastings District Council	6.10.3 Stormwater	Amend	Amend Clause 7 of Matters for Control/Discretion in TANK 20 to read: "The actual or potential effects of the activity on the quality of source water for Registered Drinking Water Supplies irrespective of treatment"
207.58	Mark	Clews	Hastings District Council	6.10.3 Stormwater	Amend	Amend TANK 20 to add the following matter of discretion: "Where consent is required because TANK 19(b) cannot be met due to a planned reticulation network not being available, conditions requiring connection to the network when that network becomes available."

207.59	Mark	Clews	Hastings District Council	6.10.3 Stormwater	Support	Amend Conditions in TANK 21 to read: "a)(ii) cause or contribute to flooding of any property <u>except where flooding occurs over a watercourse or designated secondary flow path.</u> a)vi)(v) cause to occur or continue to the destruction or degradation of any habitat, mahinga kai, plant or animal in any water body or coastal water (vi)(vi) Cause to occur or continue to the <u>exceedance of water quality targets for discharge of</u> microbiological contaminants <u>including sewerage, blackwater, greywater or animal effluent</u> " b)(xi) Where the stormwater network (or part thereof) of discharge locations are situated within a Source Protection Zones of a registered drinking water supply, a description of measures to prevent or minimise adverse effects on the quality of the source
207.60	Mark	Clews	Hastings District Council	6.10.3 Stormwater	Amend	Amend TANK 22 conditions to read: a) An application for resource consent must include an Urban Site Specific Stormwater management Plan Schedule 34. ... d)(ii) the <u>exceedance of water quality targets for discharge of</u> microbiological contaminants <u>including sewerage, blackwater, greywater or animal effluent</u>
207.61	Mark	Clews	Hastings District Council	6.10.3 Stormwater	Amend	Amend TANK 22, Clause 1 Matters for Control/Discretion to read: 1. the efficacy of the Urban Site Specific Stormwater Management Plan
207.62	Mark	Clews	Hastings District Council	6.10.3 Stormwater	Amend	Amend TANK 22 Clause 3 of Matter for Control/Discretion to read: 3 The actual or potential effects of the activity on the quality of source water for Registered Drinking Water Supplies <u>irrespective of treatment...</u>
207.63	Mark	Clews	Hastings District Council	6.10.3 Stormwater	Support	Amend TANK 23 to Delete the sole Matter of Control/Discretion referring to Reviews
210.100	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	6.10.3 Stormwater	Amend	TANK 19: Amend to include limits and restrictions to address te mana o te wai, and ensure that any adverse effects are no more than minor on ecosystem health, and to refer to schedule 26 objectives/targets
210.101	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	6.10.3 Stormwater	Amend	TANK 20: Amend the rule for consistence with changes sought to Rule 19.
210.102	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	6.10.3 Stormwater	Oppose	TANK 21: Make restricted discretionary. Include current matters of control as matters of discretion and add impacts on native fish spawning areas.
210.103	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	6.10.3 Stormwater	Amend	TANK 22: Amend to include reference to schedule 26 and associated timeframes.
210.104	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	6.10.3 Stormwater	Amend	TANK 23: Amend the rule for consistence with changes sought to Rule 19 to 22.
233.19	Dr Nicholas	Jones	Hawke's Bay District Health Board (HBDHB)	6.10.3 Stormwater	Amend	TANK 19 - include the additional wording: Conditions/Standards/Terms a)The diversion and discharge shall not; <u>contain solid contaminants and debris</u>
233.20	Dr Nicholas	Jones	Hawke's Bay District Health Board (HBDHB)	6.10.3 Stormwater	Amend	TANK 20: include the additional wording: Matters for Control/Discretion <u>12.The management of solid contaminants and debris entering into the Stormwater network, and implementing measures to remove it once instream.</u>
233.21	Dr Nicholas	Jones	Hawke's Bay District Health Board (HBDHB)	6.10.3 Stormwater	Amend	TANK 21: include the additional wording: Conditions/Standards/Terms a)The diversion and discharge shall not; <u>contain solid contaminants and debris</u>
233.22	Dr Nicholas	Jones	Hawke's Bay District Health Board (HBDHB)	6.10.3 Stormwater	Amend	TANK 22: include the additional wording: a)The diversion and discharge shall not; <u>contain solid contaminants and debris</u>
240.13	Te Kaha	Hawaikirangi	Ngāti Pārau Hapū Trust	6.10.3 Stormwater	Not Stated	New stormwater consents hold a maximum duration of 10 years as systems are due for renewal/replacement (Three waters).
Chapter 6.9 Amendments to Regional Resource Management Plan Rules						
10.8	David	Renouf		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 11. Add to Rule 11. That the combined rate of total nitrogen in Rules 11, 13 and 14 shall not exceed 10kg total nitrogen per hectare per month and shall not exceed the combined rate of total nitrogen in Rules 11, 13 and 14 of 100kg total nitrogen per hectare per year.
10.9	David	Renouf		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 13 - Rule 13 h after exceed Add '10kg/ha of total nitrogen in one application per month and shall not exceed 100kg/ha/yr of total nitrogen' Add: That the <u>combined rate of total nitrogen</u> in Rules 11, 13 and 14 shall not exceed 10 kg total nitrogen per hectare per month and shall not exceed the <u>combined rate of total nitrogen</u> in Rules 11, 3 and 14 of 100kg total nitrogen per hectare per year.

10.10	David	Renouf		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 14 - At Rule 14 f. Delete after exceed Ryule 14f. Add '10kg.ha of total nitrogen in one application per month and shall not exceed 100kg/ha/yr of total nitrogen' Rule 14. Add 'a fundamental' checklist 1-6 below of when effluent should be and should not be applied. •No application 48 hours prior to >4 mm rainfall event •Soil temperature must be over 7 degrees C before any application •Measure the moisture level in leaves.Only apply water when the plant can uptake •Soil moisture deficit prior to irrigation must be under 50% water holding capacity before application •Check FDE N ,g/L concentration seasonal differences keep within plant uptake. •Check levels of N already in soil – adjust application rate according. Add: That the <u>combined rate of total nitrogen</u> in Rules 11, 13 and 14 shall not exceed 10 kg total nitrogen per hectare per month and shall not exceed the <u>combined rate of total nitrogen</u> in Rules 11, 13 and 14 of 100 kg total nitrogen per hectare per year
10.11	David	Renouf		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 37 - At k delete after 2008)) After 2008)) Add 'at the point of discharge' Delete O. Add to O. 'The discharge of wastewater shall not exceed – at the outlet – discharge point •BOD ₅ 8mg/L •Total suspended Solids 10mg/L* See reference from RRMP POL 18 •Total Nitrogen 25 mg/L' Add 'Where the discharge of wastewater is likely to enter any water the discharge of wastewater shall not exceed 200 Faecal coliforms per 100mL at the outlet.
14.16	Ryan	Fraser		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Rule 1 - Provide that replacement of existing bores within a Source Protection Zone is a Controlled activity.
14.17	Ryan	Fraser		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Rule 7 - Allow for cultivation required to facilitate machinery movement for permanent crops within the new 5-15m waterbody cultivation exclusion strips.
14.18	Ryan	Fraser		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Rule 62A - Remove the proposed Condition excluding downstream transfers of groundwater takes within the Heretaunga Plains Water Management Unit (restoring Controlled rather than Discretionary status). Introduce a materiality test for nature and scale of drawdown effects on neighbouring bores or connected waterbodies as a result of transfers in the Heretaunga Plains Water Management Unit.
15.15	Andrea and Phil	Cranswick	Meridiem Trust	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 1 - Provide that replacement of existing bores within a Source Protection Zone is a Controlled activity.
15.16	Andrea and Phil	Cranswick	Meridiem Trust	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 7 - Allow for cultivation required to facilitate machinery movement for permanent crops within the new 5-15m waterbody cultivation exclusion strips.
15.17	Andrea and Phil	Cranswick	Meridiem Trust	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 62a - Remove the proposed Condition excluding downstream transfers of groundwater takes within the Heretaunga Plains Water Management Unit (restoring Controlled rather than Discretionary status). Introduce a materiality test for nature and scale of drawdown effects on neighbouring bores or connected waterbodies as a result of transfers in the Heretaunga Plains Water Management Unit.
18.18	Mark	Cairns	MD Cairns & AR Wright Partnership	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 1 - Add a Condition to 6.3.1 Rule 1 reading: "c. The bore is located within a Source Protection Zone but is a replacement for an existing bore that will be decommissioned." or similar wording to achieve the outcome sought in this submission.
20.15	Bruce	Nimon		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 1 - Provide that replacement of existing bores within a Source Protection Zone is a Controlled activity.
20.16	Bruce	Nimon		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 7 - Allow for cultivation required to facilitate machinery movement for permanent crops within the new 5-15m waterbody cultivation exclusion strips.

20.17	Bruce	Nimon		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 62a - Remove the proposed Condition excluding downstream transfers of groundwater takes within the Heretaunga Plains Water Management Unit (restoring Controlled rather than Discretionary status). Introduce a materiality test for nature and scale of drawdown effects on neighbouring bores or connected waterbodies as a <u>result of transfers in the Heretaunga Plains Water Management Unit</u> .
22.3	Peter	Clayton	PB & BG Clayton	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 7 - planting of stream banks, Rule 7 condition 1 Amend the rules to allow flexibility in implementation of achieving minimum standards.
23.38	Kerry	Sixtus	Pattullo's Nurseries Limited	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
23.39	Kerry	Sixtus	Pattullo's Nurseries Limited	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
23.4	Kerry	Sixtus	Pattullo's Nurseries Limited	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
23.41	Kerry	Sixtus	Pattullo's Nurseries Limited	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
25.18	Xan	Harding		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 1 - Add a Condition to 6.3.1 Rule 1 reading: "c. The bore is located within a Source Protection Zone but is a replacement for an existing bore that will be decommissioned." or similar wording to achieve the outcome sought in this submission.
26.18	Robin	Back	Dunvegan Estate	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 1 - Add a Condition to 6.3.1 Rule 1 reading: "c. The bore is located within a Source Protection Zone but is a replacement for an existing bore that will be decommissioned." or similar wording to achieve the outcome sought in this submission.
28.18	Hamish	Clark	Saint Clair Family Estate Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 1 - Add a Condition to 6.3.1 Rule 1 reading: "c. The bore is located within a Source Protection Zone but is a replacement for an existing bore that will be decommissioned." or similar wording to achieve the outcome sought in this submission.
29.46	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Add a further exclusion to the definition of "Soil disturbance" in 6.3.3 Rule 7 " <u>Cultivation required to facilitate machinery movements for permanent crops.</u> " or similar wording to achieve the outcome sought in this submission. Further amend the definition of "Soil disturbance" in 6.3.3 Rule 7 to remove the existing contradiction and to clarify what forms of cultivation are included.
29.63	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend Transfer of Water Permits Rule 62a to read "...f. The transfer does not result in an increase in nitrogen loss <u>exceeding the amounts</u> as specified in Table 2 in Schedule 29"
32.38	Kent	Griffiths		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
32.39	Kent	Griffiths		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
32.4	Kent	Griffiths		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
32.41	Kent	Griffiths		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.

34.18	Jonathan	Hamlet	Craggy Range Vineyards Limited	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 1 - Add a Condition to 6.3.1 Rule 1 reading: "c. The bore is located within a Source Protection Zone but is a replacement for an existing bore that will be decommissioned." or similar wording to achieve the outcome sought in this submission.
35.38	Colin	Campbell		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
35.39	Colin	Campbell		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
35.40	Colin	Campbell		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
35.41	Colin	Campbell		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
37.38	Greg	Evans	Dartmoor Estate Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
37.39	Greg	Evans	Dartmoor Estate Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
37.40	Greg	Evans	Dartmoor Estate Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
37.41	Greg	Evans	Dartmoor Estate Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
38.38	Roger	Brownlie		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
38.39	Roger	Brownlie		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
38.40	Roger	Brownlie		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
38.41	Roger	Brownlie		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
39.18	Bridget	Wilton	MbandSons	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 1 - Add a Condition to 6.3.1 Rule 1 reading: "c. The bore is located within a Source Protection Zone but is a replacement for an existing bore that will be decommissioned." or similar wording to achieve the outcome sought in this submission.
41.18	Jonathan	Milmine	Milmine Holdings Limited	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 1 - Add a Condition to 6.3.1 Rule 1 reading: "c. The bore is located within a Source Protection Zone but is a replacement for an existing bore that will be decommissioned." or similar wording to achieve the outcome sought in this submission.
43.38	CA & GW	Wilson	Meiros Orchard Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.

43.39	CA & GW	Wilson	Meiros Orchard Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
43.40	CA & GW	Wilson	Meiros Orchard Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
43.41	CA & GW	Wilson	Meiros Orchard Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
44.38	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
44.39	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
44.40	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
44.41	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
48.18	Paul	Ham	Alpha Domus	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 1 - Add a Condition to 6.3.1 Rule 1 reading: "c. The bore is located within a Source Protection Zone but is a replacement for an existing bore that will be decommissioned." or similar wording to achieve the outcome sought in this submission.
49.38	John	Parsons		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
49.39	John	Parsons		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
49.40	John	Parsons		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
49.41	John	Parsons		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
50.21	Alastair & Jo	Lawrence	Olrig Limited	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP Rule 67- Strongly oppose the limits set on permitted dams. Consider the parameters to be unnecessarily constraining. If we comply with maintenance of minimum average flows in these areas such that downstream is unaffected, we can see no rationale for constraining storage of winter surpluses in areas which have non-permanent streams for use in the summer dry experienced at Olrig. There is ample opportunity to do so at Olrig in natural storage areas in excess of 20,000 m ³ , without detriment to the environment, and no downstream consequences. We have received separate advice that this is part of existing national legislation. We urge HBRC to review and recommend amendments to this legislation, to ensure their appropriateness for rural environments.
51.9	Ivan	Knauf	Wairua Dairies Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 67 - We suggest a change of wording: Where the volume of water to be stored or retained by the structure to spill levels exceeds 20,000 m ³ .

53.18	Chris	Howell	CD & CM Howell Partnership	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 1 - Add a Condition to 6.3.1 Rule 1 reading: "c. The bore is located within a Source Protection Zone but is a replacement for an existing bore that will be decommissioned." or similar wording to achieve the outcome sought in this submission.
54.38	Mark	Apatu	Apatu Farms Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
54.39	Mark	Apatu	Apatu Farms Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
54.40	Mark	Apatu	Apatu Farms Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
54.41	Mark	Apatu	Apatu Farms Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
58.34	Peter	Wilson	Hawkes Bay Fish and Game Council	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	Opposes Rule 70 in its entirety, and wishes to see such works fall to the default discretionary activity standard.
61.38	Greg	Simpson		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
61.39	Greg	Simpson		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
61.40	Greg	Simpson		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
61.41	Greg	Simpson		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
62.38	Jonty	Moffett		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
62.39	Jonty	Moffett		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
62.40	Jonty	Moffett		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
62.41	Jonty	Moffett		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
63.30	Keith	Marshall	Napier City Council	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend Rule 62a, Condition (j) to read: "The transfer enable efficient delivery of water supply to meet the communities' human health needs."
63.31	Keith	Marshall	Napier City Council	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Add the following advice note to Rule 62a: "For the purpose of (i), the transfer of water from a municipal supply to a point of take servicing industrial uses with a demand of greater than 15m3 per day is not considered to be a change of use."

68.18	Geoffrey	Smith	Vine Nursery New Zealand and Waikahu Vineyard	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 1 - Add a Condition to 6.3.1 Rule 1 reading: "c. The bore is located within a Source Protection Zone but is a replacement for an existing bore that will be decommissioned." or similar wording to achieve the outcome sought in this submission.
69.38	Jos	Dames	Dames Limited	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
69.39	Jos	Dames	Dames Limited	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
69.40	Jos	Dames	Dames Limited	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
69.41	Jos	Dames	Dames Limited	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
71.38	Carl	Knapp	Bellingham Orchard Ltd.	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
71.39	Carl	Knapp	Bellingham Orchard Ltd.	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
71.40	Carl	Knapp	Bellingham Orchard Ltd.	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
71.41	Carl	Knapp	Bellingham Orchard Ltd.	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
72.38	Justin	Addis	Armada Orchard Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
72.39	Justin	Addis	Armada Orchard Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
72.40	Justin	Addis	Armada Orchard Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
72.41	Justin	Addis	Armada Orchard Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
73.38	Bevan	Davidson		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
73.39	Bevan	Davidson		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
73.40	Bevan	Davidson		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.

73.41	Bevan	Davidson		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
75.18	Andria	Monin	Stonecroft Wines Limited	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 1 - Add a Condition to 6.3.1 Rule 1 reading: "c. The bore is located within a Source Protection Zone but is a replacement for an existing bore that will be decommissioned." or similar wording to achieve the outcome sought in this submission.
76.18	Larry	Morgan	Te Mata Estate Winery Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 1 - Add a Condition to 6.3.1 Rule 1 reading: "c. The bore is located within a Source Protection Zone but is a replacement for an existing bore that will be decommissioned." or similar wording to achieve the outcome sought in this submission.
77.38	David & Sheryl	Mackie		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
77.39	David & Sheryl	Mackie		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
77.40	David & Sheryl	Mackie		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
77.41	David & Sheryl	Mackie		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
79.38	Richard	Penreath		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
79.39	Richard	Penreath		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
79.40	Richard	Penreath		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
79.41	Richard	Penreath		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
81.18	Tony	Smith	Babich Wines	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 1 - Add a Condition to 6.3.1 Rule 1 reading: "c. The bore is located within a Source Protection Zone but is a replacement for an existing bore that will be decommissioned." or similar wording to achieve the outcome sought in this submission.
84.18	Grant	Edmonds	Redmetal Vineyards Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 1 - Add a Condition to 6.3.1 Rule 1 reading: "c. The bore is located within a Source Protection Zone but is a replacement for an existing bore that will be decommissioned." or similar wording to achieve the outcome sought in this submission.
85.5	Matthew	Truebridge		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Rule 7 Soil disturbance, condition G & H, Cropping in hill country. Direct drilling is an environmental solution and I purpose to be adopted as a permitted activity for cropping.
86.38	Peter	Scott		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
86.39	Peter	Scott		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.

86.40	Peter	Scott		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
86.41	Peter	Scott		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
87.17	Peter	Scott	Kereru Road Vineyard	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 1 - Add a Condition to 6.3.1 Rule 1 reading: "c. The bore is located within a Source Protection Zone but is a replacement for an existing bore that will be decommissioned." or similar wording to achieve the outcome sought in this submission.
88.17	Jacqui	Cormack	Constellation Brands NZ Limited (CBNZ)	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 1 - Add a Condition to 6.3.1 Rule 1 reading: "c. The bore is located within a Source Protection Zone but is a replacement for an existing bore that will be decommissioned." or similar wording to achieve the outcome sought in this submission.
91.37	Johnny	Milmine	Berry Farms NZ	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
91.38	Johnny	Milmine	Berry Farms NZ	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
91.39	Johnny	Milmine	Berry Farms NZ	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
91.40	Johnny	Milmine	Berry Farms NZ	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
94.18	Deane	Caughey	Indevin Group Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 1 - Add a Condition to 6.3.1 Rule 1 reading: "c. The bore is located within a Source Protection Zone but is a replacement for an existing bore that will be decommissioned." or similar wording to achieve the outcome sought in this submission.
95.38	Johnny	Milmine	Prime Limes	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
95.39	Johnny	Milmine	Prime Limes	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
95.40	Johnny	Milmine	Prime Limes	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
95.41	Johnny	Milmine	Prime Limes	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
96.38	Mike	Davis	Davis Orchards Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
96.39	Mike	Davis	Davis Orchards Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
96.40	Mike	Davis	Davis Orchards Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.

96.41	Mike	Davis	Davis Orchards Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
97.39	Lesley	Wilson	DN & LR Wilson Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
97.40	Lesley	Wilson	DN & LR Wilson Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
97.41	Lesley	Wilson	DN & LR Wilson Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
97.42	Lesley	Wilson	DN & LR Wilson Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
99.28	Jerf	van Beek	Twyford Water	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 32 and 33 - given the low level of knowledge about the quality of drainage water that the proposed changes to the rule are deleted, and their inclusion revisited at the me the plan is reviewed.
99.64	Jerf	van Beek	Twyford Water	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
99.65	Jerf	van Beek	Twyford Water	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
99.66	Jerf	van Beek	Twyford Water	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
99.67	Jerf	van Beek	Twyford Water	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
102.18	Ritchie	Garnham	Booster Wine Group	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 1 - Add a Condition to 6.3.1 Rule 1 reading: "c. The bore is located within a Source Protection Zone but is a replacement for an existing bore that will be decommissioned." or similar wording to achieve the outcome sought in this submission.
104.38	John	Loughlin	Rockit Global Limited	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
104.39	John	Loughlin	Rockit Global Limited	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
104.40	John	Loughlin	Rockit Global Limited	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
104.41	John	Loughlin	Rockit Global Limited	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
105.38	Scott	Lawson		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.

105.39	Scott	Lawson		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
105.40	Scott	Lawson		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
105.41	Scott	Lawson		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
107.18	Christopher	Harrison	Beach House Wines Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 1 - Add a Condition to 6.3.1 Rule 1 reading: "c. The bore is located within a Source Protection Zone but is a replacement for an existing bore that will be decommissioned." or similar wording to achieve the outcome sought in this submission.
110.38	Edward	Whyte	Whyte & Co	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
110.39	Edward	Whyte	Whyte & Co	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
110.40	Edward	Whyte	Whyte & Co	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
110.41	Edward	Whyte	Whyte & Co	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
116.6	Alexander John	Macphee		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP Rule 67 (c) - This rule needs revisiting, with a suggestion that the rule is changed to read "upstream bed to the crest shall be no greater than 4m"
119.12	Liz	Lambert	Hawke's Bay Drinking Water Governance Joint Committee	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Support	Rules relating to installation or decommissioning of bores (Rules 1-4) - Support in part Where the bore is in a Source Protection Zone we seek that the provision of evidence of compliance criteria should be provided as a requirement and not just "on request".
120.31	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Increase setbacks for vegetation clearance and cultivation to 10 metres to avoid sedimentation
122.38	Richard	Penreath	Ngai Tukairangi Trust	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
122.39	Richard	Penreath	Ngai Tukairangi Trust	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
122.40	Richard	Penreath	Ngai Tukairangi Trust	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
122.41	Richard	Penreath	Ngai Tukairangi Trust	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
123.117	Jenny	Nelson-Smith	Department of Conservation	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	RRMP Rule 7 - Increase the setbacks at (h) to a minimum of 10 metres

123.118	Jenny	Nelson-Smith	Department of Conservation	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	RRMP rules 32, 33 and new RRMP rule 33A - Include reference to the water quality objectives and targets in Schedule 26
123.119	Jenny	Nelson-Smith	Department of Conservation	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP Rule 62 - Change to: e) The transfer shall not cause any reduction in the flow or level of a surface water body connected to groundwater Add to the list of adverse effects that a transfer shall not cause: • Seawater intrusion • Adverse effects on groundwater dependent ecosystems • Adverse effects on structures as a result of subsidence groundwater abstraction and uplift / liquefaction from groundwater injection / recharge.
123.120	Jenny	Nelson-Smith	Department of Conservation	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP Rule 67 - Include provisions to maintain and/or improve fish passage as conditions/standards/terms 67h - clarification
123.121	Jenny	Nelson-Smith	Department of Conservation	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP Rule 71 - Include reference to the Ngaruroro, Tutaekuri and Ahuriri catchments.
124.29	Bridget	Margerison	Brownrigg Agriculture Group Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP Rule 7 - Amend new condition (f) to make provision for necessary drain maintenance activities.
124.30	Bridget	Margerison	Brownrigg Agriculture Group Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP Rule 33 - Amend new condition (g) so that it is exactly the same as new RRMP Rule 33A condition (i)
129.28	Ceri	Edmonds	Hawke's Bay Regional Council	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	RRMP 2 - Amend matter (f) to clarify that notification is a consent holder advising a water supply manager (not notification of the consent application).
129.29	Ceri	Edmonds	Hawke's Bay Regional Council	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	RRMP 33 - Delete condition (g)
129.30	Ceri	Edmonds	Hawke's Bay Regional Council	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	RRMP Rule 62a - Delete Condition b. i. "To any person or occupier of the site in respect of which the permit is granted,
129.31	Ceri	Edmonds	Hawke's Bay Regional Council	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	RRMP Rule 62a - Delete Advisory note commencing "Pursuant to s136(3)..."
129.32	Ceri	Edmonds	Hawke's Bay Regional Council	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	RRMP Rule 62a - Condition d.(ii) delete
129.33	Ceri	Edmonds	Hawke's Bay Regional Council	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	RRMP Rule 62a - Amend condition (e) so that it requires that no increased drawdown is caused on neighbouring efficient bores groundwater take.
129.34	Ceri	Edmonds	Hawke's Bay Regional Council	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	RRMP 71 - Delete new bullet point referring to Karamu catchments and replace with "this rule does not apply to rivers in the Karamu catchment"

129.35	Ceri	Edmonds	Hawke's Bay Regional Council	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Insert new permitted activity rule 71A Activities affecting river control and drainage schemes "The introduction or planting of any plant including any tree in or on the bed of a river, lake or artificial watercourse or within 6 metres of the bed of any river within the Heretaunga Plains Flood Control and Drainage Scheme. Conditions: (a) The planting complies with the planting design, including species, setbacks and density requirements specified in the Council's Water Way Planting Guide for the Heretaunga Plains Flood Control and Drainage Scheme (date)
132.119	Marei	Apatu	Te Taiwhenua o Heretaunga	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend Rule 53 so takes for stock water purposes within the water-short areas in the Tutaekuri, Ahuriri, Ngaruroro and Karamu catchments, as specified in Schedule VI, are controlled activities and required to be 60 m3 per week or less. Above this limit require these to be assessed as Restricted Discretionary
132.162	Marei	Apatu	Te Taiwhenua o Heretaunga	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend operative Rule 54 to include water bodies within the areas specified in Schedule Via, restrict surface water allocation to a 60 m3 per week threshold for stock water provision, and add the Mangateretere Stream, the Paritua Stream and the Karewarewa Stream to the water body exclusions in the second column OR draft a similar rule for application in TANK catchments.
132.163	Marei	Apatu	Te Taiwhenua o Heretaunga	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Add new Rule 54A as a restricted discretionary activity for minor takes in those TANK water bodies excluded from Rule 54 and located in TANK catchments. Acknowledge tangata whenua as affected parties and restrict takes so any water abstraction for irrigation is seasonal 23 . Matters for control/discretion provided. Make the new rule and criteria applicable from the date when PC9 becomes operative and call-in all relevant consents (refer to consent expiry dates for Karamu and surface water depleting takes).
132.164	Marei	Apatu	Te Taiwhenua o Heretaunga	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend the permitted activity rule (Rule 53 -Groundwater takes) to limit weekly volumes to 60 m3 per week for applications/takes in the TANK catchments and prescribe limits for stock water takes of up to 60 m3 per week. Consider changing allocation references in PC9 to "abstraction" so that allocation limits become abstraction limits (or take limits as in the NPS-FM 2020). OR draft a similar rule for PC9 with the same criteria above.
165.18	Caleb	Dennis	Aotearoa New Zealand Fine Wine Estates LP	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 1 - Add a Condition to 6.3.1 Rule 1 reading: "c. The bore is located within a Source Protection Zone but is a replacement for an existing bore that will be decommissioned." or similar wording to achieve the outcome sought in this submission.
179.18	Wim	Barendsen	Otawhao Farms Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 1 - Add a Condition to 6.3.1 Rule 1 reading: "c. The bore is located within a Source Protection Zone but is a replacement for an existing bore that will be decommissioned." or similar wording to achieve the outcome sought in this submission.
180.62	Charlotte	Drury	Horticulture New Zealand	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	RRMP 7 - Add exclusions to rule that allow the clearance of indigenous vegetation where it is required for biosecurity purposes, and also allow cultivation within setbacks where it is intermittently required for soil health and operational needs.
180.63	Charlotte	Drury	Horticulture New Zealand	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	RRMP 13 - Amend by adding 'at any one time' to end of (j).
180.64	Charlotte	Drury	Horticulture New Zealand	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 32 & 33 - Amendments to 32 and 22 are deleted.
180.66	Charlotte	Drury	Horticulture New Zealand	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	RRMP 62a - Amend by deleting (d)(i) (related to groundwater takes in HPWMU). Delete (f). (h) is amended to refer only to 'reasonable'
185.38	Allen	Kittow	Tremaine Farms Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
185.39	Allen	Kittow	Tremaine Farms Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.

185.40	Allen	Kittow	Tremaine Farms Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
185.41	Allen	Kittow	Tremaine Farms Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
186.38	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
186.39	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
186.40	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
186.41	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
194.98	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	Rule RRMP 7 - Further clarification of definitions is required, particularly in that there is a contradiction between the existing definition of 'soil disturbance' ¹¹ which excludes 'cultivation and grazing', yet the proposed amendments to RRMP 7 relate to cultivation.
194.99	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	Rule RRMP 62a - Clause (f) should be deleted. RRMP 62a should be amended to allow for transfers of permits to take and use water between land uses and crops irrespective of nitrogen loss. Clause (h) should be deleted.
194.100	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	General comment on Chapter 6 New Regional Rules - Clarification on the applicability of amendments to Chapter 6 and how this would then apply to other catchments.
195.102	Peter	Matich	Federated Farmers of New Zealand	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	That proposed amendments to RRMP Rule 1 - Bore Drilling, be amended as follows: Conditions/Standards/Terms ... b. The <u>proposed new bore</u> is not located within a Source Protection Zone ... <u>Advice note:</u> <u>This rule does not apply to existing lawfully established bores and water supplies that are situated within an area subject to application for small scale drinking water supplies or Source Protection Zones</u> And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.103	Peter	Matich	Federated Farmers of New Zealand	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	That proposed amendments to RRMP Rule 2 - Bore drilling that does not comply with Rule 1, be amended as follows: Matters for Control/Discretion ... f. In the Tutaekuri, Ahuriri, Ngaruroro and Karamu catchments, the actual or potential effects of the <u>proposed new bore</u> and bore drilling on the quality of source water for Registered Drinking Water Supplies and any measures to reduce the risk to the water quality including notification requirements to the Registered Drinking Water supplier, the maintenance of the bore and the well head, including decommissioning the bore where necessary. ... And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.

195.104	Peter	Match	Federated Farmers of New Zealand	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	That the proposed amendment (clause f.) to RRMP Rule 4 - Decommissioning of bores, be deleted as follows: ... Conditions/Standards/Terms ... f. Where the bore is in a Source Protection Zone, information to confirm compliance with conditions (a) to (d) shall be provided to the Council upon request And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.105	Peter	Match	Federated Farmers of New Zealand	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	That proposed amendments to RRMP Rule 5 - Feed lots & feedpads, be amended as follows: ... Conditions/Standards/Terms ... e. The Any new feedpad or feedlot is not located in a Source Protection Zone And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.106	Peter	Match	Federated Farmers of New Zealand	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	That proposed amendments to RRMP Rule 7 - Vegetation clearance and soil disturbance, be amended as follows: ... Conditions/Standards/Terms f. In the Tutaekuri, Ahuriri, Ngaruroro and Karamu catchments, there is no clearance of indigenous vegetation within 10m of any rivers except; ... ii. where the clearance is necessary for construction of crossings or installation of a reticulated or network service, <u>or construction of a fence for stock exclusion</u> iii. where the clearance is necessary to maintain farm access tracks (including waterway crossings), fence-lines, water supply pipelines and stock water dams, rural fire breaks, vegetation clearance separation around farm buildings, pasture maintenance and pest plant management. g) In the Tutaekuri, Ahuriri, Ngaruroro and Karamu catchments there is no cultivation of land over 20 degrees of slope except where it is less than 10% of the paddock. h) In the Tutaekuri, Ahuriri, Ngaruroro and Karamu catchments, there is no cultivation of land that results in exposure of bare soil except for seed drilling within; (i) 53m 5m of any river, modified watercourse, or drain or lake or wetland where the land is flat to gently rolling (0-7 degrees of slope); (ii) 10m 5m of any river, modified watercourse, or drain or lake or wetland where the land is moderately rolling (>7 – 20 degrees of slope); (iii) 15m 10m of any river, modified watercourse, or drain or lake or wetland where the land is over 20 degrees of slope; i) Except conditions h(i) – (ii) do not apply: ... <u>(iii) where cultivation is undertaken by direct seed drilling</u> And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.107	Peter	Match	Federated Farmers of New Zealand	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	That proposed amendment (new Clause h.) to RRMP Rule 12 – Stock feed, be deleted as follows: ... Conditions/Standards/Terms ... h. Where the activity is in a Source Protection Zone, information to confirm compliance with conditions (a) to (g) shall be provided to the Council upon request. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.108	Peter	Match	Federated Farmers of New Zealand	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Support	That proposed amendments to RRMP Rule 13 – Use of compost, biosolids & other soil conditioners, be retained as notified
195.109	Peter	Match	Federated Farmers of New Zealand	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	That proposed amendments to RRMP Rule 14 – Animal effluent, be amended as follows: ... Conditions/Standards/Terms ... h. The activity <u>The discharge of contaminants into air, or onto or into production land, which is associated with any new conversion to a new type of farming, that is arising from the management of liquid animal effluent, including dairy shed effluent, piggery effluent, and poultry farm effluent, including associated sludges (except as provided for by Rules 13 & 15) is not in a Source Protection Zone</u> And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.

195.110	Peter	Match	Federated Farmers of New Zealand	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	That proposed amendments to RRMP Rule 15 – Discharge of animal effluent in sensitive catchments, be amended as follows: ... Or <u>any discharge of animal effluent resulting from any new conversion of farm to a different type of farming</u> in any Source Protection Zone And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.111	Peter	Match	Federated Farmers of New Zealand	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	That proposed amendments to RRMP Rule 31 – Discharge of water, be amended as follows: Conditions/Standards/Terms ... d. The discharge is not a discharge of groundwater into surface water in the Tutaekuri, Ahuriri, Ngaruroro and Karamu Catchments <u>except where discharge of such water into surface water is necessary due to structural failure of water retention vessels, drains, stop-banks, weirs, floodgates or dams deliberately sabotaged or damaged in emergencies such as fires, floods or earthquakes.</u> And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.112	Peter	Match	Federated Farmers of New Zealand	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	That proposed amendments to RRMP Rule 32 – Discharge of drainage water (gravity flow systems), be amended as follows: ... Conditions/Standards/Terms ... f. Any suspended solids in the discharge shall comply with Policy 72, except in the Tutaekuri, Ahuriri, Ngaruroro and Karamu catchments <u>where Clause g) (below) applies.</u> g. After ten years after 2 May 2020 in the Tutaekuri, Ahuriri, Ngaruroro and Karamu catchments, dissolved nutrient and sediment concentrations in the receiving water after reasonable mixing shall not increase, <u>compared to in-stream concentrations immediately upstream and outside the area of reasonable mixing,</u> as a result of the discharge when measuring: i DIN ii DRP iii suspended sediment. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.113	Peter	Match	Federated Farmers of New Zealand	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	That proposed new RRMP Rule 33A – Drainage water), be amended as follows: Conditions/Standards/Terms c) The land area being serviced by the drainage network is less than 10ha <u>(See note below).</u> i) After ten years after 2 May 2020 in the Tutaekuri, Ahuriri, Ngaruroro and Karamu catchments, dissolved nutrient and sediment concentrations in the receiving water after reasonable mixing shall not increase, <u>compared to in-stream concentrations immediately upstream and outside the area of reasonable mixing,</u> as a result of the discharge when measuring: i DIN ii DRP iii suspended sediment j) <u>The above conditions shall not apply in any event where discharge is caused by structural failure of water retention vessels, drains, stop-banks, weirs, floodgates or dams occurs as a result of deliberate sabotage or damage in emergencies such as fires, floods or earthquakes.</u> <u>Note: Where there are multiple land drainage networks per farm property, each drainage network must comply with Condition c) above</u> And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.

195.114	Peter	Match	Federated Farmers of New Zealand	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	That proposed amendments to RRMP Rule 33 – Discharge of drainage water (pumped systems), be amended as follows Conditions/Standards/Terms ... f. Any suspended solids in the discharge shall comply with Policy 72 except in the Tutaekuri, Ahuriri, Ngaruroro and Karamu water quality management units, <u>where Condition g (below applies).</u> g. After ten years after 2 May 2020 in the Tutaekuri, Ahuriri, Ngaruroro and Karamu water quality management units, dissolved nutrient and sediment concentrations in the discharge water are no more than in the receiving water at the point of discharge as measured by shall not increase, compared to in-stream concentrations immediately upstream and outside the <u>area of reasonable mixing</u> , as a result of the discharge when measuring: i DIN ii DRP iii suspended sediment. Matters for Control/Discretion ... h. For activities carried out in the Tutaekuri, Ahuriri, Ngaruroro and Karamu catchments: i. measures or methods required for meeting the receiving water quality standards. ii. Monitoring for water quality iii. <u>Whether such diversion and discharge from a pumped system is replacing an existing discharge of the same or worse water quality characteristics</u> ... And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.115	Peter	Match	Federated Farmers of New Zealand	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	That proposed amendments to RULE 37 – New sewage systems, be amended as follows: Conditions/Standards/Terms ... s. The activity is not located in a Source Protection Zone, <u>unless it is for a sewage system that is replacing an existing system with the same (or worse) sewage treatment and disposal characteristics (in which case such replacement sewage treatment system shall be permitted)</u> And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.116	Peter	Match	Federated Farmers of New Zealand	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Support	That proposed amendments to 6.6.5 – Stormwater - Discharges to Land/Water, be retained as notified.
195.117	Peter	Match	Federated Farmers of New Zealand	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Support	That proposed amendments to 6.7.1 – Take & Use of Water, retained as notified.
195.118	Peter	Match	Federated Farmers of New Zealand	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	That proposed amendments to RRMP Rule 61 – Transfer of permits to take & use surface water from a river, be amended as follows: Conditions/Standards/Terms ... e. The transfer is not in any Tutaekuri, Ahuriri, Ngaruroro and Karamu Catchment <u>except that transfers of unused water allocated in water permits shall be allowed between irrigation users within the same Catchment.</u> And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.119	Peter	Match	Federated Farmers of New Zealand	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	That proposed amendments to RRMP Rule 62 – Transfer of permits to take & use ground-water, be amended as follows: Conditions/Standards/Terms ... e. The transfer is not in any Tutaekuri, Ahuriri, Ngaruroro and Karamu Catchment <u>except that transfers of unused water allocated in water permits shall be allowed between irrigation users within the same Catchment.</u> ... And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.

195.120	Peter	Match	Federated Farmers of New Zealand	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	That proposed new RRMP Rule 62a – Transfer of permits to take and use water, be amended as follows: ... Conditions/Standards/Terms ... b. The transfer is the whole or any part of the holder’s interest in the permit for taking and use of surface or groundwater: i. To any person or occupier of the site in respect of which the permit is granted, or <u>ii. To another person on another site</u> <u>iii. To another site</u> c. The transfer is not between ground and surface water point of take <u>except where groundwater take is affected by circumstances outside the water permit holder’s control such as structural or power failure, and/or damage of pumping or storage equipment that prevents ability to abstract or use groundwater.</u> ... g. All parties to the transfer shall have metering and reporting at any applicable recording and reporting level except for temporary transfers of less than five days <u>one calendar month</u> per annum. h. In fully or over-allocated management units, the transfer shall only be of that part of the permit for which there is actual and reasonable use* <u>except that transfers of unused water allocated in water permits shall be allowed between irrigation users within the same Catchment.</u> i. The purpose for the water use does not change except: i. that water takes for irrigation use may be transferred for irrigation of different crops subject to conditions (e), and (f) <u>and (h).</u> <u>And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.</u>
195.121	Peter	Match	Federated Farmers of New Zealand	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	That proposed new RRMP Rule 62b – Permanent or temporary transfer of water, be amended as follows: Discretionary Activity Permanent or temporary transfer of water in accordance with S136(2)(b)(i) of the RMA <u>that does not comply with Rule 62a.</u> ... And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.122	Peter	Match	Federated Farmers of New Zealand	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Support	That proposed amendments to 6.8.2 – Erection & Placement of Dams & Other Barrier Structures, & Damming of Water, be retained as notified.
195.123	Peter	Match	Federated Farmers of New Zealand	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	That proposed amendments to RRMP Rule 67 – Dams, weirs & other barrier structures in rivers, lakes and artificial water – course, be amended as follows: Permitted Activity The erection or placement of any dam, weir or other barrier structure in, on, under, or over the bed of a river, lake and artificial watercourse, and: <ul style="list-style-type: none"> any associated damming or diversion of water, and any associated discharge of sediment; and any associated disturbance of the river or lake bed. This permitted activity does not apply to the erection of dams on the mainstem of any river <u>managed under Rule 6.10 where it is prohibited by Rule TANK 17</u> ... And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.124	Peter	Match	Federated Farmers of New Zealand	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	That proposed amendments to w RRMP Rule 69 – River & lake bed activities that are not expressly regulated by other rules, be amended as follows: Discretionary Activity Any activity which cannot comply with any of the rules in section 6.8 of this Plan and which is not expressly regulated by other rules in this Plan. This rule does not apply to rivers in the Tutaekuri, Ahuriri, Ngaururo and Karamu catchments (refer Rules TANK 13 – 17 <u>16</u>) And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.125	Peter	Match	Federated Farmers of New Zealand	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Support	That proposed amendments to RRMP Rule 71 – Activities affecting river control & drainage schemes, be retained as notified.

196.39	Julian	Odering	Oderings Nurseries	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
196.40	Julian	Odering	Oderings Nurseries	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
196.41	Julian	Odering	Oderings Nurseries	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
196.42	Julian	Odering	Oderings Nurseries	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
199.18	Peter	Robertson	Brookfields Vineyards/Ohiti Estate	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 1 - Add a Condition to 6.3.1 Rule 1 reading: "c. The bore is located within a Source Protection Zone but is a replacement for an existing bore that will be decommissioned." or similar wording to achieve the outcome sought in this submission.
204.18	Juliet	Gray	Peter Lyons Trust (Lyons Vineyard)	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 1 - Add a Condition to 6.3.1 Rule 1 reading: "c. The bore is located within a Source Protection Zone but is a replacement for an existing bore that will be decommissioned." or similar wording to achieve the outcome sought in this submission.
207.32	Mark	Clews	Hastings District Council	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend Rule 62a, Condition (j) to read: "The transfer enable efficient delivery of water supply to meet the communities' human health needs."
207.33	Mark	Clews	Hastings District Council	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Add the following advice note to Rule 62a: "For the purpose of (i), the transfer of water from a municipal supply to a point of take servicing industrial uses with a demand of greater than 15m3 per day is not considered to be a change of use."
207.46	Mark	Clews	Hastings District Council	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Support	Support subject to amending the rules to fully incorporate the recommendations of the JWG, specifically: <ul style="list-style-type: none"> •Amend activity description of Rule 1 and Rule 2 to include bore use and maintenance •Delete "upon request" for Rule 4f •Add "Measures to prevent or minimise any adverse effects on the quality of the source water used for a Registered Drinking Water Supply, irrespective of any treatment process for the Registered Drinking Water Supply" as a matter of discretion to Rule 7 and Rule 40 •Delete "upon request" for Rule 12h Amend Rules 16, 48, and 49 to exclude activities within SPZs
208.14	Emma	Taylor	Villa Maria Estate Limited	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 1 - Add a Condition to 6.3.1 Rule 1 reading: "c. The bore is located within a Source Protection Zone but is a replacement for an existing bore that will be decommissioned." or similar wording to achieve the outcome sought in this submission.
208.17	Emma	Taylor	Villa Maria Estate Limited	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	Rule 62a - Delete this requirement if Bore is in the same Zone – i.e. not located within Zone 1 if original consent is also not in Zone 1.
210.105	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	RRMP 7: Retain (f) Amend to increase setback distances to minimum of 10m and state that no cultivation should occur in critical source areas (e.g. swales where runoff will easily enter nearby waterways). Include as a matter for control where water quality targets are not being met. Clarify how cultivation can lead to improvements in riparian condition (clause i). Is it referring to cultivation of permanent native plants?
210.106	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	RRMP 32, 33, and 33A: Amend to refer directly to schedule 26 targets
210.107	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend to give effect to NPSFM I.e. Amend as: " for transfers that enable the operation of a flow enhancement scheme (ref Policy 38) "

210.108	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 67: Amend to have a higher activity status threshold. Amend to state that the dam must be solid and have no capacity to kill fish migrating downstream (or words to that effect).
210.109	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 68: Amend to include provision for fish passage.
210.110	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 70: Amend to require consent for river works.
210.111	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	RRMP 71: Amend to provide for ecological enhancement planting in other catchments.
211.38	Brian	McLay		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
211.39	Brian	McLay		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
211.40	Brian	McLay		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
211.41	Brian	McLay		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
213.18	Peter	Scott	The Wine Portfolio	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 1 - Add a Condition to 6.3.1 Rule 1 reading: "c. The bore is located within a Source Protection Zone but is a replacement for an existing bore that will be decommissioned." or similar wording to achieve the outcome sought in this submission.
214.38	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
214.39	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
214.40	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
214.41	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
215.38	Peter	Dooney	Dooney Partnership	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
215.39	Peter	Dooney	Dooney Partnership	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
215.40	Peter	Dooney	Dooney Partnership	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.

215.41	Peter	Dooney	Dooney Partnership	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
217.37	Paul	Paynter	Johnny Appleseed Holdings Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
217.38	Paul	Paynter	Johnny Appleseed Holdings Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
217.39	Paul	Paynter	Johnny Appleseed Holdings Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
217.40	Paul	Paynter	Johnny Appleseed Holdings Ltd	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
218.38	Adrian	Mannering	Irrigation Services	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
218.39	Adrian	Mannering	Irrigation Services	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
218.40	Adrian	Mannering	Irrigation Services	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
218.41	Adrian	Mannering	Irrigation Services	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
219.38	Michael & Julie	Russell		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
219.39	Michael & Julie	Russell		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
219.40	Michael & Julie	Russell		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
219.41	Michael & Julie	Russell		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
220.38	Steve	Gillum	Gillum Springfield Trust	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
220.39	Steve	Gillum	Gillum Springfield Trust	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
220.40	Steve	Gillum	Gillum Springfield Trust	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.

220.41	Steve	Gillum	Gillum Springfield Trust	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
221.38	WT	Scott		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 61: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
221.39	WT	Scott		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	RRMP 62: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
221.40	WT	Scott		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62a: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
221.41	WT	Scott		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Oppose	RRMP 62b: Amend Change 9 so that transfers of all water permits that have been exercised should be enabled.
231.12	Peter	Kay		Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Rule 67 - agree in part. there is not enough information on how stored water may be used. A downstream bank height of 6 meters would be more practical. It would also encourage farmers to fence these dams off and reticulate water for stock to lower areas.
238.14	Emma	Taylor	Gimblett Gravels Winegrowers Association	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Amend	Amend RRMP Rule 1 - Add a Condition to 6.3.1 Rule 1 reading: "c. The bore is located within a Source Protection Zone but is a replacement for an existing bore that will be decommissioned." or similar wording to achieve the outcome sought in this submission.
238.20	Emma	Taylor	Gimblett Gravels Winegrowers Association	Chapter 6.9 Amendments to Regional Resource Management Plan Rules (see below underline/strikeout version of chapter 6)	Not Stated	Rule 62a - Delete this requirement if Bore is in the same Zone – i.e. not located within Zone 1 if original consent is also not in Zone 1.
Consequential Amendments to Chapter 5 of the Regional Resource Management Plan						
132.69	Marei	Apatu	Te Taiwhenua o Heretaunga	Consequential Amendments to Chapter 5 of the Regional Resource Management Plan	Amend	Delete any reference to "productive" in relation to the HPAS and other aquifers in the TANK catchments.
132.148	Marei	Apatu	Te Taiwhenua o Heretaunga	Consequential Amendments to Chapter 5 of the Regional Resource Management Plan	Amend	Transfer content of Explanation and Reasons section (5.5.2 to 5.5.6) from the operative RRMP to PC9 so it applies in TANK catchments.
210.21	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Consequential Amendments to Chapter 5 of the Regional Resource Management Plan	Oppose	We oppose these changes to the RRMP which weaken original rules and seek that the original RRMP provisions apply where they are stronger than proposed TANK provisions.
5.4 Surface Water Quality						
195.151	Peter	Matich	Federated Farmers of New Zealand	5.4 Surface Water Quality	Support	Retain as notified
5.5 Surface Water Quantity						
195.152	Peter	Matich	Federated Farmers of New Zealand	5.5 Surface Water Quantity	Support	Retain as notified
5.6 Groundwater Quality						
132.9	Marei	Apatu	Te Taiwhenua o Heretaunga	5.6 Groundwater Quality	Amend	Reinstate Objectives 42 and 43 as being applicable to the Heretaunga Plains Aquifer System and any other aquifers (groundwater) OR Include an alternative objective with like meaning and intent.
195.153	Peter	Matich	Federated Farmers of New Zealand	5.6 Groundwater Quality	Support	Retain as notified
5.7 Groundwater Quantity						
195.154	Peter	Matich	Federated Farmers of New Zealand	5.7 Groundwater Quantity	Support	Retain as notified
Chapter 9 Glossary of Terms Used						
3.11	Gavin	Yort	Limestone Properties Limited	Chapter 9 Glossary of Terms Used	Support	Retain the provision - Actual and reasonable use
8.24	Rengasamy	Balasubramaniam	Delegat Limited	Chapter 9 Glossary of Terms Used	Support	Support Actual and reasonable use
9.1	Lynette	Blackburn		Chapter 9 Glossary of Terms Used	Amend	The Actual and Reasonable take for groundwater be based on take up to May 2020, not the proposed date of 2017. Or alternatively, that all water take consents are equitably pro-rated on a straight percentage basis.
18.11	Mark	Cairns	MD Cairns & AR Wright Partnership	Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: -the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; -the volume of the expiring consent beingreplaced.", or similar wording to achieve the outcome sought in this submission

23.8	Kerry	Sixtus	Pattullo's Nurseries Limited	Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
23.63	Kerry	Sixtus	Pattullo's Nurseries Limited	Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
24.3	Jim	Watt	Saint Columba's Havelock North Environment Group (SCHNEG)	Chapter 9 Glossary of Terms Used	Support	Include an excellent Glossary of Terms that, even on their own defines the SCOPE of the proposals.
25.11	Xan	Harding		Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: -the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; -the volume of the expiring consent beingreplaced.", or similar wording to achieve the outcome sought in this submission
26.11	Robin	Back	Dunvegan Estate	Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: -the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; -the volume of the expiring consent beingreplaced.", or similar wording to achieve the outcome sought in this submission
28.11	Hamish	Clark	Saint Clair Family Estate Ltd	Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: -the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; -the volume of the expiring consent beingreplaced.", or similar wording to achieve the outcome sought in this submission
29.50	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: - the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; - the volume of the expiring consent being replaced." or similar wording to achieve the outcome sought in this submission.
32.8	Kent	Griffiths		Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
32.63	Kent	Griffiths		Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
34.11	Jonathan	Hamlet	Craggy Range Vineyards Limited	Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: -the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; -the volume of the expiring consent beingreplaced.", or similar wording to achieve the outcome sought in this submission
35.8	Colin	Campbell		Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
35.63	Colin	Campbell		Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
37.8	Greg	Evans	Dartmoor Estate Ltd	Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
37.63	Greg	Evans	Dartmoor Estate Ltd	Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.

38.8	Roger	Brownlie		Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
38.63	Roger	Brownlie		Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
39.11	Bridget	Wilton	MbandSons	Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: -the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; -the volume of the expiring consent beingreplaced.", or similar wording to achieve the outcome sought in this submission
41.11	Jonathan	Milmine	Milmine Holdings Limited	Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: -the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; -the volume of the expiring consent beingreplaced.", or similar wording to achieve the outcome sought in this submission
43.8	CA & GW	Wilson	Meiros Orchard Ltd	Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
43.63	CA & GW	Wilson	Meiros Orchard Ltd	Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
44.8	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
44.63	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
48.11	Paul	Ham	Alpha Domus	Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: -the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; -the volume of the expiring consent beingreplaced.", or similar wording to achieve the outcome sought in this submission
49.8	John	Parsons		Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
49.63	John	Parsons		Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
53.11	Chris	Howell	CD & CM Howell Partnership	Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: -the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; -the volume of the expiring consent beingreplaced.", or similar wording to achieve the outcome sought in this submission
54.8	Mark	Apatu	Apatu Farms Ltd	Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.

54.63	Mark	Apatu	Apatu Farms Ltd	Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
58.3	Peter	Wilson	Hawkes Bay Fish and Game Council	Chapter 9 Glossary of Terms Used	Amend	Create a definition of local authority
59.39	Ronald	McFetridge	WaterForce Limited	Chapter 9 Glossary of Terms Used	Not Stated	Actual and Reasonable - amend definition so that it reads: Actual and Reasonable in relation to applications to take and use water means; a) no more than the quantity specified on the permit due for renewal or any lesser amount applied for; and the least of either; b) for non irrigation takes, the maximum annual amount as measured by accurate water meter data in the ten years preceding 2 May 2020 1 August 2017 for groundwater takes in the Heretaunga Plains Water Management Unit or in the preceding ten years preceding the 2 May 2020 as applicable elsewhere if accurate water meter data is available. (If insufficient or no accurate data is available either clause a) or c) will apply) or c) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise with an equivalent method), and to a 95% reliability of supply where the irrigated area is; (i) no more than in the permit due for renewal, or any lesser amount applied for, and in the case of Heretaunga Plains Water Management Unit, is not more than the amount irrigated in the ten years preceding 2 May 2020 1 August 2017 and (ii) evidence is supplied to demonstrate that the area has, and can continue to be, irrigated and the permit substantially given effect to. (iii) water use records will be used as a guidance tool but not a definitive measure of need.
59.40	Ronald	McFetridge	WaterForce Limited	Chapter 9 Glossary of Terms Used	Not Stated	Add new definition for "Accurate Water Meter Data" as follows: Is water use data that has been assessed against the <i>National Environmental Monitoring Standard (NEMS) for Water Metering: Measurement, Processing and Archiving of Water Meter Data</i> and assigned a Quality Code of QC600.
59.41	Ronald	McFetridge	WaterForce Limited	Chapter 9 Glossary of Terms Used	Not Stated	Add new definition for "Application of Efficiency (for irrigation)" as follows: 80% Application Efficiency means that 80% of applied water is retained within the plant root zone, after an irrigation event.
59.42	Ronald	McFetridge	WaterForce Limited	Chapter 9 Glossary of Terms Used	Not Stated	Add new definition for "Distribution Uniformity" as follows: Distribution uniformity is a measure of how evenly water is applied to the ground. It is calculated using the low quarter distribution uniformity coefficient DUlq
61.8	Greg	Simpson		Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
61.63	Greg	Simpson		Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
62.8	Jonty	Moffett		Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
62.63	Jonty	Moffett		Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.

66.48	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	Chapter 9 Glossary of Terms Used	Amend	Amend the definition of Actual and Reasonable to read: Actual and Reasonable in relation to applications to take and use water means; a) no more than the quantity (rate of take and/or volume) specified on the permit due for renewal or any lesser amount applied for; and the least of either; b) <u>for non irrigation</u> takes the maximum annual amount as measured by accurate water meter data in the ten years preceding 2 May 2020 for groundwater takes in the Heretaunga Plains Water Management Unit or in the preceding ten years preceding the 2 May 2020 as applicable elsewhere if accurate water meter data is available. (If insufficient or no accurate data is available either clause a) or c) will apply) and that season is equivalent to the empirical demand season (90%-ile or 95%-ile) or c) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an application efficiency of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise with an equivalent method), and with a 95% reliability of supply where the irrigated area is; (i) no more than in the permit due for renewal, or any lesser amount applied for, and in the case of Heretaunga Plains Water Management Unit, is not more than the amount irrigated in the ten years preceding 1 August 2017 <u>2 May 2020</u> and (ii) evidence is supplied to demonstrate that the area has, and can continue to be, irrigated and the permit substantially given effect to. <u>(iii) accurate water use records may be used as a guidance tool but not as a definitive measure of need</u>
66.49	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	Chapter 9 Glossary of Terms Used	Amend	Insert the following definition: "Application Efficiency means that 80% of applied water is retained within the crop root zone, after an irrigation event and/or for the irrigation season."
66.50	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	Chapter 9 Glossary of Terms Used	Support	Insert the following definition: "Distribution uniformity is a measure of how evenly water is applied to the ground. It is calculated using the low quarter distribution uniformity coefficient DU _{lq} "
66.51	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	Chapter 9 Glossary of Terms Used	Support	Insert the following definition: Accurate Water Meter Data is water use data that has been assessed against the National Environmental Monitoring Standard (NEMS) for Water Metering: Measurement, Processing and Archiving of Water Meter Data and assigned a Quality Code of QC600.
68.11	Geoffrey	Smith	Vine Nursery New Zealand and Waikahu Vineyard	Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: -the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; -the volume of the expiring consent beingreplaced.", <u>or similar wording to achieve the outcome sought in this submission</u>
69.8	Jos	Dames	Dames Limited	Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
69.63	Jos	Dames	Dames Limited	Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
71.8	Carl	Knapp	Bellingham Orchard Ltd.	Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
71.63	Carl	Knapp	Bellingham Orchard Ltd.	Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
72.8	Justin	Addis	Armada Orchard Ltd	Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
72.63	Justin	Addis	Armada Orchard Ltd	Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.

73.8	Bevan	Davidson		Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
73.63	Bevan	Davidson		Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
75.11	Andria	Monin	Stonecroft Wines Limited	Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: -the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; -the volume of the expiring consent beingreplaced.", or similar wording to achieve the outcome sought in this submission
76.11	Larry	Morgan	Te Mata Estate Winery Ltd	Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: -the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; -the volume of the expiring consent beingreplaced.", or similar wording to achieve the outcome sought in this submission
77.8	David & Sheryl	Mackie		Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
77.63	David & Sheryl	Mackie		Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
79.8	Richard	Penreath		Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
79.63	Richard	Penreath		Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
81.11	Tony	Smith	Babich Wines	Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: -the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; -the volume of the expiring consent beingreplaced.", or similar wording to achieve the outcome sought in this submission
82.1	Trevor	Robinson	Lowe Corporation Limited	Chapter 9 Glossary of Terms Used	Amend	Define Regionally Significant Industry for the purposes of PC9 as meaning "an economic activity based on the use of natural and physical resources in the region and which has social, economic or cultural benefits that are significant at a regional or national scale", or words to similar effect.
82.4	Trevor	Robinson	Lowe Corporation Limited	Chapter 9 Glossary of Terms Used	Amend	Amend point (B) of definition of "actual and reasonable" to read: "The maximum amount of water taken in any 12 month period over the ten years preceding 2 May 2020 as measured by accurate water meter data if accurate water meter data is available (if insufficient or no accurate data is available either clause (a) or (c) will apply); or"
82.5	Trevor	Robinson	Lowe Corporation Limited	Chapter 9 Glossary of Terms Used	Amend	Amend point (c) of the definition of "actual and reasonable" to make the date of notification the reference point, consistently with the amendment sought in submission point 52.4
84.11	Grant	Edmonds	Redmetal Vineyards Ltd	Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: -the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; -the volume of the expiring consent beingreplaced.", or similar wording to achieve the outcome sought in this submission
86.8	Peter	Scott		Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
86.63	Peter	Scott		Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.

87.11	Peter	Scott	Kereru Road Vineyard	Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: -the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; -the volume of the expiring consent beingreplaced.", or similar wording to achieve the outcome sought in this submission
88.11	Jacqui	Cormack	Constellation Brands NZ Limited (CBNZ)	Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: -the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; -the volume of the expiring consent beingreplaced.", or similar wording to achieve the outcome sought in this submission
91.7	Johnny	Milmine	Berry Farms NZ	Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
91.62	Johnny	Milmine	Berry Farms NZ	Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
94.11	Deane	Caughey	Indevin Group Ltd	Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: -the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; -the volume of the expiring consent beingreplaced.", or similar wording to achieve the outcome sought in this submission
95.8	Johnny	Milmine	Prime Limes	Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply
95.63	Johnny	Milmine	Prime Limes	Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
96.8	Mike	Davis	Davis Orchards Ltd	Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply
96.63	Mike	Davis	Davis Orchards Ltd	Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
97.8	Lesley	Wilson	DN & LR Wilson Ltd	Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply
97.65	Lesley	Wilson	DN & LR Wilson Ltd	Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
97.78	Lesley	Wilson	DN & LR Wilson Ltd	Chapter 9 Glossary of Terms Used	Amend	Amend so that the term food and fibre producers to replace Primary Producers.
97.81	Lesley	Wilson	DN & LR Wilson Ltd	Chapter 9 Glossary of Terms Used	Support	Include a glossary of te reo terms.
99.34	Jerf	van Beek	Twyford Water	Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
99.89	Jerf	van Beek	Twyford Water	Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
102.11	Ritchie	Garnham	Booster Wine Group	Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: -the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; -the volume of the expiring consent beingreplaced.", or similar wording to achieve the outcome sought in this submission

103.8	Ian	Quinn	Two Terraces Vineyard	Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: -the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; -the volume of the expiring consent beingreplaced.", <i>or similar wording to achieve the outcome sought in this submission</i>
104.8	John	Loughlin	Rockit Global Limited	Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
104.63	John	Loughlin	Rockit Global Limited	Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
105.8	Scott	Lawson		Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
105.63	Scott	Lawson		Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
107.11	Christopher	Harrison	Beach House Wines Ltd	Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: -the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; -the volume of the expiring consent beingreplaced.", <i>or similar wording to achieve the outcome sought in this submission</i>
110.8	Edward	Whyte	Whyte & Co	Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
110.63	Edward	Whyte	Whyte & Co	Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
119.23	Liz	Lambert	Hawke's Bay Drinking Water Governance Joint Committee	Chapter 9 Glossary of Terms Used	Not Stated	The Taumata Arowai - Water Services Regulator Bill has had its third reading in Parliament and is awaiting Royal Assent for enactment. The definition of drinking water supplier in the legislation includes a person who supplies drinking water to consumers through a drinking water supply. In other words anyone other than a domestic self-supplier will be a registered drinking water supplier and will need to be considered in the application of the source protection rules.
120.143	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Chapter 9 Glossary of Terms Used	Amend	Align Maori terminology with that used in the Regional Policy Statement, and other Regional Planning documents, and reflect appropriate and accurate language as identified and used by tangata whenua. Some specific examples provided.
120.144	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Chapter 9 Glossary of Terms Used	Amend	We see seek that changes are made to the phrasing within PC9, through review and improvement of terms and definitions and added to the glossary. Te reo Maori should be defined by tangata whenua.
122.8	Richard	Penreath	Ngai Tukairangi Trust	Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
122.63	Richard	Penreath	Ngai Tukairangi Trust	Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
123.160	Jenny	Nelson-Smith	Department of Conservation	Chapter 9 Glossary of Terms Used	Oppose	Oppose in part - Change to: a) Least of either the quantity specified on the permit due for renewal or a lesser amount
123.161	Jenny	Nelson-Smith	Department of Conservation	Chapter 9 Glossary of Terms Used	Oppose	Oppose in part - Would like to see stream depletion changed to surface water depletion and stream replaced with surface water body to make it more inclusive of rivers, lakes, springs wetlands as well as streams. This makes it clearer for non-technical people. ... continued in submisison
123.162	Jenny	Nelson-Smith	Department of Conservation	Chapter 9 Glossary of Terms Used	Not Stated	Suggested wording of new and existing terms in PC 9: Groundwater dependent ecosystem (GDE): groundwater dependent ecosystems that occur above and below the ground, including stygofauna, groundwater interconnected surface water features such as springs, streams, rivers, drains, lakes and wetlands.

123.163	Jenny	Nelson-Smith	Department of Conservation	Chapter 9 Glossary of Terms Used	Not Stated	Suggested wording of new and existing terms in PC 9: Maintained: Water quality, quantity and ecosystem health maintained at its current state and not degraded any further as at (specify a date)
123.164	Jenny	Nelson-Smith	Department of Conservation	Chapter 9 Glossary of Terms Used	Not Stated	Suggested wording of new and existing terms in PC 9: Enhanced: Improvement on current state but not restored to its original unaffected state.
123.165	Jenny	Nelson-Smith	Department of Conservation	Chapter 9 Glossary of Terms Used	Not Stated	Suggested wording of new and existing terms in PC 9: Restored: Restored to its original unaffected state or better.
123.166	Jenny	Nelson-Smith	Department of Conservation	Chapter 9 Glossary of Terms Used	Oppose	a) no more than the quantity specified on the permit due for renewal or any lesser amount applied for; and the least of either; Change to: a) Least of either the quantity specified on the permit due for renewal or a lesser amount;
124.2	Bridget	Margerison	Brownrigg Agriculture Group Ltd	Chapter 9 Glossary of Terms Used	Support	Support Actual and reasonable use
126.34	James	Lyver	Maungaharuru-Tangitū Trust	Chapter 9 Glossary of Terms Used	Not Stated	Insert new definition of "aquatic ecosystem" to read: <u>Aquatic ecosystems – means an ecosystem in a body of water and includes all TANK freshwater bodies and TANK estuarine systems.</u>
126.35	James	Lyver	Maungaharuru-Tangitū Trust	Chapter 9 Glossary of Terms Used	Not Stated	Insert new definition of "TANK estuarine systems" to read: TANK estuarine systems – means the following estuarine systems located within the Tutaekuri, Ahuriri, Ngaruroro and Karamu catchments: • <u>Waitangi estuary;</u> • <u>Te Whanganui-a-Orotu (Ahuriri estuary);"</u>
126.36	James	Lyver	Maungaharuru-Tangitū Trust	Chapter 9 Glossary of Terms Used	Not Stated	Insert new definition of "TANK waterbodies" to read: <u>TANK waterbodies – means any surface or ground waterbody that is located within the Tutaekuri, Ahuriri, Ngaruroro and Karamu catchments.</u>
129.40	Ceri	Edmonds	Hawke's Bay Regional Council	Chapter 9 Glossary of Terms Used	Amend	Allocation limit - Delete meaning and replace with new meaning as follows:" Allocation limit for surface water means the maximum quantity that is able to be allocated in water permits in a management unit and abstracted for consumptive water use, expressed in L/s and calculated as the average rate required to abstract the maximum weekly or 28 day volume allocated to each water permit and summed for all water permits in the applicable management unit
129.41	Ceri	Edmonds	Hawke's Bay Regional Council	Chapter 9 Glossary of Terms Used	Amend	Allocation limit - Insert a new sentence at the end: Allocation limits may apply to takes during low flow periods from October to April or apply to takes during high flows
129.42	Ceri	Edmonds	Hawke's Bay Regional Council	Chapter 9 Glossary of Terms Used	Amend	Consumptive Water Use - Insert new meaning:Consumptive water use – means any use of fresh water that alters the flows and or levels in a water body on either a temporary or permanent basis, but excludes any non-consumptive use where: a) the same amount of water is returned to the same water body at or near the location from which it was taken; and b) there is no significant delay between the taking and returning of the water. For the purposes of allocation limits and specified rationing provisions in the rules, the term 'consumptive use' does not apply to water used in hydro-electric power generation or water use or diversions which substantially return the water used to the same water body.
129.43	Ceri	Edmonds	Hawke's Bay Regional Council	Chapter 9 Glossary of Terms Used	Amend	Overseer - Insert meaning: Overseer means a set of models used to model nutrient flows and Green House Gas emissions to the farm boundary and down to 60cm and which is the Overseer model version publicly available on the Overseer.org website
131.5	Dominic	Adams	Ballance Agri-Nutrients Limited	Chapter 9 Glossary of Terms Used	Amend	Farm Environment Plans - amend to state specific qualifications for persons preparing and / or auditing FEPs
132.135	Marei	Apatu	Te Taiwhenua o Heretaunga	Chapter 9 Glossary of Terms Used	Amend	Provide a definition of "water mining" in a glossary specific to PC9 as - " <u>The abstraction of groundwater from an aquifer over a 12-month period, at a rate that exceeds the annual volume and rate of natural recharge</u> ".
132.139	Marei	Apatu	Te Taiwhenua o Heretaunga	Chapter 9 Glossary of Terms Used	Amend	Add definition of hazardous substances to PC9 glossary, that includes the potential for nutrient concentrations in fresh water to have toxicity effects on aquatic life and on human health.
132.168	Marei	Apatu	Te Taiwhenua o Heretaunga	Chapter 9 Glossary of Terms Used	Amend	Add a definition for "cultural flow" to the glossary section(s) in the regional plan - "a flow or water level that is sufficient to maintain the health and well-being of the surface water body or groundwater body, and provide for tikanga Maori uses and values associated with the water body."
135.68	Anna	Wilkes	Ravensdown Limited	Chapter 9 Glossary of Terms Used	Support	Retain the definition of 'Farm Environment Plan' as notified.
143.10	Peter	Hyslop	Strathallan Trust	Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: -the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; -the volume of the expiring consent beingreplaced.", <u>or similar wording to achieve the outcome sought in this submission</u>
165.11	Caleb	Dennis	Aotearoa New Zealand Fine Wine Estates LP	Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: -the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; -the volume of the expiring consent beingreplaced.", <u>or similar wording to achieve the outcome sought in this submission</u>

179.11	Wim	Barendsen	Otawhao Farms Ltd	Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: -the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; -the volume of the expiring consent being replaced.", <u>or similar wording to achieve the outcome sought in this submission</u>
180.74	Charlotte	Drury	Horticulture New Zealand	Chapter 9 Glossary of Terms Used	Oppose	Amend by just referring to 'reasonable' - and in relation to applications to take and use water is the lesser of: <u>a) the quantity specified on the permit due for renewal or any lesser amount applied for; or</u> <u>b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.</u>
180.75	Charlotte	Drury	Horticulture New Zealand	Chapter 9 Glossary of Terms Used	Support	New definition added for 'baseline commercial vegetable growing area' - Insert definition as follows: <u>'Means the maximum total aggregated area of land used for a commercial vegetable growing operation, including the full sequence of crops and pasture used as part of a rotation, in any 12 month consecutive period within the period of 1 May 2015 to 1 May 2020 and under the control (owned or leased) of a single farm'</u>
180.76	Charlotte	Drury	Horticulture New Zealand	Chapter 9 Glossary of Terms Used	Support	New definition added for 'baseline commercial vegetable growing rotation' - Insert definition as follows: ' is a sub-set of horticultural land use, and means a crop rotation where the predominate purpose is growing, for the purpose of commercial gain, vegetable crops for human consumption, on one or more parcels of land held in single or multiple ownership (whether or not held in common ownership) that constitutes a single operating unit but excludes vegetable crops grown under cover, and includes the full sequence of crops and pasture used as part of that rotation.
180.77	Charlotte	Drury	Horticulture New Zealand	Chapter 9 Glossary of Terms Used	Support	New definition added for 'farm' - Insert definition as follows: <u>'a landholding whose activities include agriculture'</u> .
180.78	Charlotte	Drury	Horticulture New Zealand	Chapter 9 Glossary of Terms Used	Oppose	Definition of 'Farming enterprise' - Delete and replace with term 'farm as defined in submission poin 180.77.
180.79	Charlotte	Drury	Horticulture New Zealand	Chapter 9 Glossary of Terms Used	Support	New definition added for 'land holding' - Insert definition as follows: <u>'one or more parcels of land (whether or not they are contiguous) that are managed as a single operation'</u> .
180.80	Charlotte	Drury	Horticulture New Zealand	Chapter 9 Glossary of Terms Used	Support	New definition added for 'nitrogen losses from production land' - Insert definition as follows: <u>'The modelled estimate of average annual nitrogen load, calculated for each farm. For a commercial vegetable growing rotation, the nitrogen loss estimate must include the full sequence of crops and pasture used as part of that rotation'</u> .
180.81	Charlotte	Drury	Horticulture New Zealand	Chapter 9 Glossary of Terms Used	Support	New definition added for 'production land' - Insert definition as follows: <u>'A farm where all or part of the farm is (a) arable land use; or (b) horticultural land use; or (c) pastoral land use; or (d) other agricultural land use prescribed in regulations made under section 217M(1)(b); or (e) any combination of the above'</u> .
180.82	Charlotte	Drury	Horticulture New Zealand	Chapter 9 Glossary of Terms Used	Support	New definition added for 'production land use change' - Insert definition as follows: 'Any change from or to, arable, horticulture, pastoral or other agricultural land use, that is greater than 10ha, compared with the area of the farming activity at May 2020. Land use change does not include a change in the location of crop rotation where the baseline growing area is not exceeded within a Freshwater Quality Management Unit'.
180.83	Charlotte	Drury	Horticulture New Zealand	Chapter 9 Glossary of Terms Used	Amend	Definition of 'TANK Industry Programme or TANK Catchment Collective' - Amend by separating definitions and aligning iwth <u>redrafted Schedule 30.</u>
185.8	Allen	Kittow	Tremaine Farms Ltd	Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and <u>otherwise an equivalent method) and to a 95% reliability of supply.</u>
185.63	Allen	Kittow	Tremaine Farms Ltd	Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
186.8	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
186.63	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
192.19	Rebecca	Blunden	T&G Global Limited and ENZIL	Chapter 9 Glossary of Terms Used	Amend	Actual and Reasonable - Clause (c) of the definition should read: "for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficient of application of no less than 80% as specified by the IRRICALC water demand model or a suitable equivalent approved by Council, and a 95% reliability of supply."
194.113	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Chapter 9 Glossary of Terms Used	Oppose	Actual and reasonable use a) - Amend the definition of 'actual and reasonable' to provide for the efficient allocation and use of water as per OBJ TANK 17. b) - seeks that the definition be revised to take into consideration dryer years i.e. 2019/2020 for the HPWMU. c) - the Glossary and 5.10.7.47 are amended along the lines of 'as specified by a consistent and appropriate water demand model' where IRRICALC can be included as an example.

194.114	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Chapter 9 Glossary of Terms Used	Support	Allocation limit AND Allocation limit for Groundwater - Amend the definitions of 'allocation limit' and 'allocation limit for groundwater' to more clearly set out that water taken and used for frost protection is excluded from allocation limits.
194.115	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Chapter 9 Glossary of Terms Used	Amend	Farm Environment Plan - Consistent use of the defined term 'Farm Environment Plan'. Further define key terms of relevance to Farm Environment Plans in the Glossary.
194.116	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Chapter 9 Glossary of Terms Used	Amend	Add definition of: 'Catchment Collective Programme', 'Industry Programme', 'Change of use' or 'land use change', 'Drain', 'Modified water course', 'Re-allocation', 'Versatile Soils', AND 'Zone 1'
196.8	Julian	Odering	Oderings Nurseries	Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
196.65	Julian	Odering	Oderings Nurseries	Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
199.11	Peter	Robertson	Brookfields Vineyards/Ohiti Estate	Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: -the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; -the volume of the expiring consent beingreplaced.", or similar wording to achieve the outcome sought in this submission
203.32	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	Chapter 9 Glossary of Terms Used	Support	Allocation limit for Groundwater - retain definition as notified
203.33	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	Chapter 9 Glossary of Terms Used	Support	Registered Drinking Water Supply (or Supplies) - Retain definition as notified
203.34	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	Chapter 9 Glossary of Terms Used	Support	Source Protection Zone (SPZ) - Retain definition as notified
203.35	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	Chapter 9 Glossary of Terms Used	Support	Source Protection Extent - Retain definition as notified
204.11	Juliet	Gray	Peter Lyons Trust (Lyons Vineyard)	Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: -the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; -the volume of the expiring consent beingreplaced.", or similar wording to achieve the outcome sought in this submission
207.37	Mark	Clews	Hastings District Council	Chapter 9 Glossary of Terms Used	Amend	Add to glossary: "Registered Drinking Water Supply" means any water supply listed on the Drinking Water Register maintained in accordance with section 69J of the Health Act and any water supply operated by a water supplier as defined in the Taumata Arowai – the Water Services Regulator Act."
208.10	Emma	Taylor	Villa Maria Estate Limited	Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: -the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; -the volume of the expiring consent beingreplaced.", or similar wording to achieve the outcome sought in this submission
210.149	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Chapter 9 Glossary of Terms Used	Oppose	Allocation limit: Amend to clarify
210.150	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Chapter 9 Glossary of Terms Used	Oppose	Allocation limit for Groundwater : amend to clarify
210.151	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Chapter 9 Glossary of Terms Used	Oppose	Allocation limit for high flow takes : amend to clarify
210.152	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Chapter 9 Glossary of Terms Used	Oppose	Applicable stream flow maintenance scheme : Delete
210.153	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Chapter 9 Glossary of Terms Used	Oppose	Farm Environment Plan : Amend to address submission concerns on Schedule 30 above.
210.154	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Chapter 9 Glossary of Terms Used	Oppose	Indigenous vegetation : Delete and replace with: "Indigenous vegetation means vegetation containing plant species that are indigenous or endemic to the area/site"
211.8	Brian	McLay		Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
211.63	Brian	McLay		Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.

213.11	Peter	Scott	The Wine Portfolio	Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: -the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; -the volume of the expiring consent being replaced.", or similar wording to achieve the outcome sought in this submission
214.8	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
214.63	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
215.8	Peter	Dooney	Dooney Partnership	Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
215.63	Peter	Dooney	Dooney Partnership	Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
217.7	Paul	Paynter	Johnny Appleseed Holdings Ltd	Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
217.62	Paul	Paynter	Johnny Appleseed Holdings Ltd	Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
218.8	Adrian	Mannering	Irrigation Services	Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
218.63	Adrian	Mannering	Irrigation Services	Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
219.8	Michael & Julie	Russell		Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
219.63	Michael & Julie	Russell		Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
220.8	Steve	Gillum	Gillum Springfield Trust	Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
220.63	Steve	Gillum	Gillum Springfield Trust	Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.

221.8	WT	Scott		Chapter 9 Glossary of Terms Used	Oppose	Actual and Reasonable - amend to just refer to 'reasonable' and in relation to applications to take and use water is the lesser of: a) the quantity specified on the permit due for renewal or any lesser amount applied for; or b) for irrigation takes, the quantity required to meet the modelled crop water demand for the irrigated area with an efficiency of application of no less than 80% as specified by the IRRICALC water demand model (if it is available for the crop and otherwise an equivalent method) and to a 95% reliability of supply.
221.63	WT	Scott		Chapter 9 Glossary of Terms Used	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
238.10	Emma	Taylor	Gimblett Gravels Winegrowers Association	Chapter 9 Glossary of Terms Used	Amend	Amend the Glossary definition of "Actual and Reasonable to provide that the volume allocated at consent renewals is the lesser of: -the amount calculated by a Hawke's Bay-specific IRRICALC model at 95% security of supply; -the volume of the expiring consent being replaced.", or similar wording to achieve the outcome sought in this submission
SCHEDULES						
97.79	Lesley	Wilson	DN & LR Wilson Ltd	SCHEDULES	Not Stated	No specific relief sought but states that maps are anomalous and ambiguous
120.15	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	SCHEDULES	Amend	Amend Change 9 to include schedules of FM Us and freshwater values and clearly define where they apply
120.16	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	SCHEDULES	Amend	Amend Change 9 to include the Ahuriri and Waitangi Estuaries in separate and distinct FMU's
120.18	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	SCHEDULES	Amend	Amend Change 9 to include a schedule of outstanding waterbodies and wetlands and their significant values for protection
120.175	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	SCHEDULES	Not Stated	Add new schedule to Change 9: Irrigation Season - minimum flow limits and targets. Table provided.
120.180	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	SCHEDULES	Amend	Include overlays of Schedules Va, VI, VIa and VIb in proposed maps
120.181	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	SCHEDULES	Amend	Add new Tangata Whenua Monitoring Schedule. Table headings provided.
132.4	Marei	Apatu	Te Taiwhenua o Heretaunga	SCHEDULES	Amend	Add a Schedule of values with accurate and correct definitions and delineation of where the values apply.
132.5	Marei	Apatu	Te Taiwhenua o Heretaunga	SCHEDULES	Amend	Amend provisions relating to the roles for some groups specified in proposed schedules to be in a non-regulatory section of PC9 and that the duties and functions of HBRC are clearly met within the plan provisions.
132.19	Marei	Apatu	Te Taiwhenua o Heretaunga	SCHEDULES	Amend	Ensure that Schedules 26A to 26E, Schedule 27 relating to the Ngaruroro and Tutaekuri catchments, and Schedules 31A to 31E are included as part of PC9 (but in amended form as requested in our submissions), with each having regulatory functions.
132.20	Marei	Apatu	Te Taiwhenua o Heretaunga	SCHEDULES	Amend	For decision-making processes which rely on or refer to these schedules, ensure they are considered in parallel with other schedules in the operative RRMP that inform management of the same catchment or sub-catchment.
132.21	Marei	Apatu	Te Taiwhenua o Heretaunga	SCHEDULES	Amend	Reference or integrate RRMP Schedules V, VI, VIa and VIb more with Change 9
132.28	Marei	Apatu	Te Taiwhenua o Heretaunga	SCHEDULES	Amend	Provide more detail in PC9 maps and schedules to show the coastal environment boundary, the location of the Tutaekuri-Waimate Stream, and of major tributaries of the major rivers.
132.29	Marei	Apatu	Te Taiwhenua o Heretaunga	SCHEDULES	Amend	Show the spatial extent of the Heretaunga Plains Aquifer System where it extends out into the coastal environment/Hawke Bay.
132.32	Marei	Apatu	Te Taiwhenua o Heretaunga	SCHEDULES	Amend	Amend references in operative Schedules VI, VIa, VIb. Specific changes provided.
132.35	Marei	Apatu	Te Taiwhenua o Heretaunga	SCHEDULES	Amend	Corrections/amendments to operative Schedules Va, VI and VIa, and VIb and their inclusion in, and appropriate consideration for their content and intent, in proposed PC9 Schedules
132.36	Marei	Apatu	Te Taiwhenua o Heretaunga	SCHEDULES	Amend	Include overlays of the mapped areas from the above schedules in the PC9 schedules where relevant.
132.39	Marei	Apatu	Te Taiwhenua o Heretaunga	SCHEDULES	Amend	Delineate the coastal environment boundary on Schedule maps or draft separate maps to be included in PC9 showing the coastal environment boundary where PC9 regulation ends.
132.64	Marei	Apatu	Te Taiwhenua o Heretaunga	SCHEDULES	Amend	Superimpose above water short areas on HPWM Unit Schedule, and include water-short areas from Schedule VI as crosshatching.
132.66	Marei	Apatu	Te Taiwhenua o Heretaunga	SCHEDULES	Amend	Acknowledge aquifer extension into Hawke Bay in proposed schedules
132.88	Marei	Apatu	Te Taiwhenua o Heretaunga	SCHEDULES	Amend	Amend Schedule Va in the RRMP so that water quality rules and policies, and decision making processes for groundwater takes and land use activities in PC9 that apply to the unconfined aquifer and land above it, are referenced in this schedule, and ensure that operative provisions in the RPS and RRMP that are not being amended by PC9 but that also apply to the unconfined part of the Heretaunga Plains Aquifer System, are integrated with provisions in PC9.
132.89	Marei	Apatu	Te Taiwhenua o Heretaunga	SCHEDULES	Amend	Ensure objectives, policies, methods and schedules in proposed PC9 that inform management, or control of the taking of groundwater and the effects of such taking from within the areas outlined in operative Schedule VI, are referenced in, or cognisant of, this schedule and associated rules/policies, and superimpose these water-short areas on the map in proposed Schedule 31-D Karamu Freshwater Management Unit - Quantity
132.92	Marei	Apatu	Te Taiwhenua o Heretaunga	SCHEDULES	Amend	Acknowledge the water-short areas in Schedule VI in PC9 water allocation regimes, policies and methods for the Karamu catchment, and the lower Maraekakaho subcatchment
132.94	Marei	Apatu	Te Taiwhenua o Heretaunga	SCHEDULES	Amend	Amend the rule and policy references in Schedules VI and VIa in the operative RRMP as requested through these submissions so that the correct plan provisions are referenced in these schedules. Add new rules and policies from PC9 that apply a management function to these mapped areas, to these schedules.

132.95	Marei	Apatu	Te Taiwhenua o Heretaunga	SCHEDULES	Amend	Add Tutaekuri headwaters to a new version of Schedule VIb. Provide spatial definition of the Tutaekuri River headwaters as referred to in operative Rule 15 and New Rule 11A and specify where these are in proposed Schedule 26-A - Tutaekuri Surface Water Management Unit.
132.96	Marei	Apatu	Te Taiwhenua o Heretaunga	SCHEDULES	Amend	Include new version of Schedule VIb in proposed PC9, with reference to PC9 objectives, policies and methods that manage nutrients, fertilisers, nitrogen (and nitrogen leaching), animal effluent and intensive grazing activities (including breakfeeding and winter grazing) in sensitive catchments.
132.97	Marei	Apatu	Te Taiwhenua o Heretaunga	SCHEDULES	Amend	Superimpose outlines of "sensitive catchment" areas from operative Schedule VIb, and of the Tutaekuri headwaters (where relevant) onto proposed Schedules 26-C Ngaruroro, 26-D Karamu, 31-A Tutaekuri, 318 - Ahuriri, 31-C Ngaruroro, 31-D Karamu, and 31-E Heretaunga Plains Groundwater MU - Quantity.
132.99	Marei	Apatu	Te Taiwhenua o Heretaunga	SCHEDULES	Amend	Provide a new schedule that shows outstanding water bodies (as specified in Table 3B) and strengthen the outstanding water body provisions in PC9 to promote better protection for their water quality and for their outstanding values and significant values. Acknowledge in provisions for managing water quality in outstanding water bodies, the linkage between groundwater abstraction, and potential decline in groundwater quality.
132.102	Marei	Apatu	Te Taiwhenua o Heretaunga	SCHEDULES	Amend	Add references to proposed policies and rules that affect sensitive catchments, to each of the relevant schedules/maps
132.108	Marei	Apatu	Te Taiwhenua o Heretaunga	SCHEDULES	Amend	In proposed schedules, clearly delineate 12 separate Freshwater Management Units within the Ngaruroro catchment, the Tutaekuri catchment and the Karamu catchment, in line with the Values and Attributes Report commissioned by HBRC and lodged as an Iwi Management Plan.
132.110	Marei	Apatu	Te Taiwhenua o Heretaunga	SCHEDULES	Amend	Amend proposed objectives, policies, and methods to reflect changes to FMU delineation.
132.112	Marei	Apatu	Te Taiwhenua o Heretaunga	SCHEDULES	Amend	Where Overseer or another HBRC approved system is used to assess/calculate nitrogen losses or nutrient leaching amounts, ensure the associated schedules and other plan provisions (including methods) clearly link the land use activities and LUC leaching rates to achievement of groundwater quality and surface water quality objectives, limits and targets.
132.156	Marei	Apatu	Te Taiwhenua o Heretaunga	SCHEDULES	Amend	Include more detailed maps that clearly show the boundary between parts of the TANK catchments that are regulated through PC9 and its rules/schedules/tables, and those parts that are in the coastal landward margin but subject to management provisions in the HBCEP.
132.195	Marei	Apatu	Te Taiwhenua o Heretaunga	SCHEDULES	Amend	Add Table 3A: Irrigation Season minimum flow limits and targets. Table provided.
132.197	Marei	Apatu	Te Taiwhenua o Heretaunga	SCHEDULES	Amend	Add Table 3B: Outstanding Water Bodies within the Tutaekuri, Ahuriri, Ngaruroro and Karamu Catchments
210.4	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	SCHEDULES	Amend	Combine Schedules 26 and 27 so that all of the attributes have a regulatory function (making it an appropriate schedule to refer to in the objectives above), and redesign the schedule so that it is divided by FMU, rather than by attribute.

Schedule 26: Freshwater Quality Objectives

10.12	David	Renouf		Schedule 26: Freshwater Quality Objectives	Amend	Add to Schedule 26: Freshwater Quality Objectives Water quality attributes, to all Freshwater Quality Management Units and Water Quality Targets. •Total Phosphorus mg/L (upland rivers 0.026 mg/L – Lowland rivers 0.033 mg/L) •Total Suspended Solids ,g/L, which measures the water column, this causes harm this is totally different from <u>deposited</u> sediment measurement. Ngaruroro River upstream of Fernhill Bridge 10 mg/L Ngaruroro River downstream of Fernhill Bridge 25 mg/L Tutaekuri River upstream of Redclyffe Bridge 10 mg/L Tutaekuri River downstream of Redclyffe Bridge 25 mg/L Ref: 5.4 Table 8. HRC RRMP
23.66	Kerry	Sixtus	Pattullo's Nurseries Limited	Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
23.71	Kerry	Sixtus	Pattullo's Nurseries Limited	Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.

105.71	Scott	Lawson		Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
110.66	Edward	Whyte	Whyte & Co	Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
110.71	Edward	Whyte	Whyte & Co	Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
120.17	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Amend	Amend Change 9 so that water quality attributes listed in Schedule 27 that relate to estuarine health in the Ahuriri and Waitangi estuaries be listed in Schedule 26, and that objectives are met within the life of the plan.
120.19	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Amend	Include all water quality objectives in Schedule 26 and identify limits and targets to be achieved within the life of the plan where objectives are currently not met.
120.20	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Amend	Set objectives and targets in Schedule 26 for the Ahuriri catchment and estuary
120.21	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Amend	Amend Schedule 26 to ensure it is correct, fit for purpose, and contains all water quality objectives and targets for the TANK area (including those in proposed Schedule 27).
120.43	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Amend	Remove all references to trigger flows in Schedule 26.
120.104	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Amend	Amend Schedule 26 to contain all of the freshwater objectives for all waterbodies in the TANK catchments and include the objectives in Schedule 27
120.105	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Amend	Amend Schedule 26 to clearly identify targets (where objectives are not currently met) and timeframes for achieving targets.
120.145	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Support	Delete the first paragraph following the heading Schedule 26: Freshwater Quality Objectives.
120.146	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Support	Specify within Schedule 26 where the numeric attribute states in the table column 'Water Quality Objective or/Target' are considered targets, based on assessment of the state of current water quality. E.g., " ≤ 1.6 m (target)", i.e. expressly identify which are targets and which are limits.
120.147	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Support	Change timeframes for which targets aim to be achieved to be within the life of PC9.
120.148	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Support	Delete the 'Critical value' and 'Also relevant for' columns from Schedule 26 and identify these freshwater values in a separate Schedule within PC9, defining where they apply. OR Delete only the 'Also relevant for' column and amend the 'Critical value' column to reflect the freshwater values for which the most stringent attribute state is set. Delete all reference to 'statistical GL', 'MCI', 'Algal growth' and 'Toxicity'
120.149	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Support	Amend Schedule 26 to specify a period of record for each attribute which compliance with the attribute state will be measured over.
120.150	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Support	Amend Schedule 26 Freshwater Management Units 'Lowland streams' to 'Lowland tributaries' for consistency of terms, clarify if Schedule 26 FMUs are the same as FMUS as defined in the NPSFM, house the Schedule 26A - 26D planning maps within Change 9, and clarify the boundaries for the Freshwater Quality Management Units.
120.151	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Amend	Include a hard (expressly stated) limit for attributes that specifically reflect the need to assess cumulative effects.
120.152	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Support	Any and all references in the Schedule need to be clarified as to whether they refer to the attributes stated in the NPSFM 2017 or NPSFM2020.
120.153	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Support	Retain all of the listed attributes in Schedule 26 and include Schedule 27 attributes AND amend the temperature attribute to also include the maximum temperature attribute from Schedule 27 in Schedule 26.
120.154	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Support	Include additional river monitoring sites that represent tangata whenua defined attributes (to be developed)
120.155	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Support	Delete reference to flows from the application of the water clarity and turbidity objectives for all management units and simply specify 'median' in all cases, and apply a period of record

120.156	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Support	Delete 'statistical GL' from the critical value column and add as a footnote.
120.157	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Support	Add Clarity objectives for the Ahuriri catchment of an annual median of >1.6 m
120.158	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Support	Retain deposited sediment (%) as notified and add attribute states for the Ahuriri catchment.
120.159	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Support	Amend periphyton biomass attribute states to: Delete >50 - max 1 p.a. Amend the periphyton biomass attribute for the upper Tutaekuri River to make attribute states for periphyton consistent
120.160	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Support	Amend periphyton cover attribute state to (tracked changes provided): Delete 'seasonal max' from the attribute so the value of Uu is provided for year-round Delete reference to Uu from the Application column Delete Recreation as the critical value and amend to replace with Uu (the most stringent value). Resolve inconsistencies in Schedule 26 and appropriately acknowledge Ngati Kahungunu values and attributes.
120.161	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Support	Amend cyanobacteria attribute to: Delete recreation and replace with Uu.
120.162	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Support	Amend macrophytes attribute to 'Submerged nuisance macrophytes' and amend FMU to include all lowland rivers and streams in the TANK catchments, not just the Karamu.
120.163	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Support	Amend MCI attribute to: Remove reference to (index) Include a sb MCI for Ahuriri Retain attribute states as notified.
120.164	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Support	Amend DIN and DRP attributes to: Delete 'algal growth' and amend the critical values for DIN and DRP to ecosystem health. Amend the DRP attribute states for the lower Ngaruroro and Tutaekuri Rivers and tributaries to 0.01 mg/L Include DIN and DRP (or TN and TP) attributes states for the Ahuriri catchment.
120.165	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Support	Amend nitrate and ammonia attributes to: Amend the critical value for nitrate and ammonia from to ecosystem health. Amend the nitrate attribute state for the Karamu catchment to the NPSFM A band. Amend 'Lowland stream' to 'Lowland tributaries' Include A band nitrate and ammonia attributes for the Ahuriri catchment
120.166	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Support	Amend E. coli attributes to: Apply all four attribute states for E. coli from the NPS FM to all catchments. Include an E. coli/Enterococci attribute for Ahuriri to achieve a Microbiological Assessment Category B
120.167	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Support	Amend dissolved oxygen attributes to: Delete reference to the 7-day mean min and 1 day min from the Application column Amend the attribute state for the Kara mu catchment (lowland tributaries) to the B band state from the NPS FM. Include an attribute state for the Ahuriri catchment at the B band from the NPS FM OR include dissolved oxygen attributes from Schedule 27 in Schedule 26 for lowland tributaries (C band) and Ahuriri.
120.168	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Support	Amend temperature attributes to: Include maximum temperature attributes from Schedule 27 in Schedule 26. Add a maximum temperature attribute for Karamū (lowland tributaries) and Ahuriri of: ≤ 23°C (B band). Add a ≤3°C increment compared to reference state for the Ahuriri estuary to Schedule 26.
120.169	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Support	Retain pH attribute states as notified
120.170	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Support	Retain BOD attribute states as notified
120.171	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Support	Retain metals, metalloids and toxins attributes as notified
120.172	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Support	Retain Nitrate nitrogen (groundwater) as notified and ensure objectives which do not allow degradation of the Heretaunga Aquifer are included in PC9.
120.173	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 26: Freshwater Quality Objectives	Oppose	Amend Schedule 26 where objectives apply to: Clarify whether Freshwater Quality Management Units are FMUs as per the NPS FM. Create separate FMU's for both the Ahuriri and Waitangi estuaries and include objectives and targets for all attributes for both FMU's. Clarify which FMU the upper Ngaruroro and Tutaekuri tributaries apply to
122.66	Richard	Penreath	Ngai Tukairangi Trust	Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
122.71	Richard	Penreath	Ngai Tukairangi Trust	Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
123.11	Jenny	Nelson-Smith	Department of Conservation	Schedule 26: Freshwater Quality Objectives	Not Stated	Include all water quality objectives in Schedule 26 and identify targets to be achieved by 2040 where objectives are currently not met.
123.122	Jenny	Nelson-Smith	Department of Conservation	Schedule 26: Freshwater Quality Objectives	Support	Delete the first paragraph following the heading Schedule 26: Freshwater Quality Objectives. Or if retained, amend as "Schedule 26 is a first step with objectives being targets will be attained by 2040"

123.123	Jenny	Nelson-Smith	Department of Conservation	Schedule 26: Freshwater Quality Objectives	Support	Specify within Schedule 26 where the numeric attribute states in the table column 'Water Quality Objective or/Target' are considered targets, based on assessment of the state of current water quality. E.g., " ≤ 1.6 m (target)", i.e. expressly identify which are targets and which are limits.
123.124	Jenny	Nelson-Smith	Department of Conservation	Schedule 26: Freshwater Quality Objectives	Support	Delete the 'Critical value' and 'Also relevant for' columns from Schedule 26 and identify these freshwater values in a separate Schedule within PC9, defining where they apply. OR Delete only the 'Also relevant for' column and amend the 'Critical value' column to reflect the freshwater values for which the most stringent attribute state is set. Delete all reference to 'statistical GL', 'MCI', 'Algal growth' and 'Toxicity'
123.125	Jenny	Nelson-Smith	Department of Conservation	Schedule 26: Freshwater Quality Objectives	Support	Amend Schedule 26 to specify a period of record for each attribute which compliance with the attribute state will be measured over.
123.126	Jenny	Nelson-Smith	Department of Conservation	Schedule 26: Freshwater Quality Objectives	Support	Amend Schedule 26 Freshwater Management Units 'Lowland streams' to 'Lowland tributaries' for consistency of terms, clarify if Schedule 26 FMUs are the same as FMUS as defined in the NPSFM, house the Schedule 26A - 26D planning maps within Change 9, and clarify the boundaries for the Freshwater Quality Management Units.
123.127	Jenny	Nelson-Smith	Department of Conservation	Schedule 26: Freshwater Quality Objectives	Support	Retain all of the listed attributes in Schedule 26 and include Schedule 27 attributes AND amend the temperature attribute to also include the maximum temperature attribute from Schedule 27 in Schedule 26.
123.128	Jenny	Nelson-Smith	Department of Conservation	Schedule 26: Freshwater Quality Objectives	Support	Delete reference to flows from the application of the water clarity and turbidity objectives for all management units and simply specify 'median' in all cases, and apply a period of record
123.129	Jenny	Nelson-Smith	Department of Conservation	Schedule 26: Freshwater Quality Objectives	Support	Delete 'statistical GL' from the critical value column and add as a footnote.
123.130	Jenny	Nelson-Smith	Department of Conservation	Schedule 26: Freshwater Quality Objectives	Support	Add Clarity objectives for the Ahuriri catchment of an annual median of >1.6 m Define the number and time frame for these samples
123.131	Jenny	Nelson-Smith	Department of Conservation	Schedule 26: Freshwater Quality Objectives	Amend	There is no deposited sediment attribute for the Ahuriri catchment. It is not clear whether freshwater values in this catchment will be protected with respect to deposited sediment.
123.132	Jenny	Nelson-Smith	Department of Conservation	Schedule 26: Freshwater Quality Objectives	Amend	Amend periphyton biomass attribute states to: Delete >50 - Amend the periphyton biomass attribute for the upper Tutaekuri River
123.133	Jenny	Nelson-Smith	Department of Conservation	Schedule 26: Freshwater Quality Objectives	Amend	Amend periphyton cover attribute state to (tracked changes provided): Delete 'seasonal max' from the attribute so the value of Uu is provided for year-round Delete reference to Uu from the Application column Delete Recreation as the critical value and amend to replace with Uu (the most stringent value). Resolve inconsistencies in Schedule 26 and appropriately acknowledge Ngati Kahungunu values and attributes
123.134	Jenny	Nelson-Smith	Department of Conservation	Schedule 26: Freshwater Quality Objectives	Amend	Amend cyanobacteria attribute to: Delete recreation and replace with Uu.
123.135	Jenny	Nelson-Smith	Department of Conservation	Schedule 26: Freshwater Quality Objectives	Amend	Amend macrophytes attribute to 'Submerged nuisance macrophytes' and amend FMU to include all lowland rivers and streams in the TANK catchments, not just the Karamu.
123.136	Jenny	Nelson-Smith	Department of Conservation	Schedule 26: Freshwater Quality Objectives	Amend	Amend MCI attribute to: Remove reference to (index) Include a sb MCI for Ahuriri otherwise retain attribute states as notified.
123.137	Jenny	Nelson-Smith	Department of Conservation	Schedule 26: Freshwater Quality Objectives	Support	Amend DIN and DRP attributes to: Delete 'algal growth' and amend the critical values for DIN and DRP to ecosystem health. Amend the DRP attribute states for the lower Ngaruroro and Tutaekuri Rivers and tributaries to 0.01 mg/L Include DIN and DRP (or TN and TP) attributes states for the Ahuriri catchment.
123.138	Jenny	Nelson-Smith	Department of Conservation	Schedule 26: Freshwater Quality Objectives	Amend	Amend nitrate and ammonia attributes to: Amend the critical value for nitrate and ammonia from to ecosystem health. Amend the nitrate attribute state for the Karamu catchment to the NPSFM A band. Amend 'Lowland stream' to 'Lowland tributaries' Include A band nitrate and ammonia attributes for the Ahuriri catchment
123.139	Jenny	Nelson-Smith	Department of Conservation	Schedule 26: Freshwater Quality Objectives	Amend	Amend E. coli attributes to: Apply all four attribute states for E. coli from the NPS FM to all catchments. Include an E. coli/Enterococci attribute for Ahuriri to achieve a Microbiological Assessment Category B
123.140	Jenny	Nelson-Smith	Department of Conservation	Schedule 26: Freshwater Quality Objectives	Amend	Amend dissolved oxygen attributes to: Delete reference to the 7-day mean min and 1 day min from the Application column Amend the attribute state for the Karamu catchment (lowland tributaries) to the B band state from the NPS FM. Include an attribute state for the Ahuriri catchment at the B band from the NPS FM OR include dissolved oxygen attributes from Schedule 27 in Schedule 26 for lowland tributaries (C band) and Ahuriri
123.141	Jenny	Nelson-Smith	Department of Conservation	Schedule 26: Freshwater Quality Objectives	Support	Amend temperature attributes to: Include maximum temperature attributes from Schedule 27 in Schedule 26. Add a maximum temperature attribute for Karamu (lowland tributaries) and Ahuriri of $< 23^{\circ}\text{C}$ (B band). Add a $<3^{\circ}\text{C}$ increment compared to reference state for the Ahuriri estuary to Schedule 26.
123.142	Jenny	Nelson-Smith	Department of Conservation	Schedule 26: Freshwater Quality Objectives	Support	Retain pH attribute states as notified

123.143	Jenny	Nelson-Smith	Department of Conservation	Schedule 26: Freshwater Quality Objectives	Support	Attribute states: Notrate=-nitrogen (groundwater) - Retain with amendments: The TANK Plan provides for a Water User Collective to work collectively by or on behalf of permit holders to meet local water quality, quantity and environmental objectives for surface water bodies, springs and wetlands affected by groundwater abstraction Create a monitoring plan that addresses the number, location and depth of monitoring bores required to adequately assess whether the Nitrate-N target in groundwater is being met. Also sampling and lab analysis should be according to current standards.
123.144	Jenny	Nelson-Smith	Department of Conservation	Schedule 26: Freshwater Quality Objectives	Oppose	Where the objectives apply - Clarify whether Freshwater Quality Management Units are FMUs as per the NPS FM Include objectives and targets for all attributes for the Ahuriri catchment.
126.29	James	Lyver	Maungaharuru-Tangitū Trust	Schedule 26: Freshwater Quality Objectives	Amend	Amend Schedule 26 to: •Clearly identify and map the spatial extent of the FMUs for PC9 and include the resulting maps as part of PC9. •Make subsequent amendments that are necessary to relabel terms such as “surface water management units” [in Table 1 of Schedule 26] and “freshwater quality management units” [in Schedules 26A to 26D]. •Insert the “Limit/Objectives” for each “water quality attribute” in Table 2 of Schedule 27 as the new freshwater objectives for Te Whanganui-a-Orotu (Ahuriri estuary) in Schedule 6. •Insert new freshwater objectives for each “water quality attribute” listed in the table of Schedule 26 for the TANK waterbodies in the Ahuriri catchment. •Subject to approval by the relevant tangata whenua hapu including Ngati Parau, move the “Limit/Objectives” for each “water quality attribute” in Table 2 of Schedule 27 as the new freshwater objectives for Waitangi estuary in Schedule 26.
126.31	James	Lyver	Maungaharuru-Tangitū Trust	Schedule 26: Freshwater Quality Objectives	Amend	Develop new Schedule 26AA that includes short-term numerical attribute targets for FMUs [including the Ahuriri catchment and Te 126.31 Whanganui-a-Orotu] to be achieved by 2030.
127.14	Tania	Eden	Te Taiwhenua o Te Whanganui a Orotu	Schedule 26: Freshwater Quality Objectives	Not Stated	Amend Schedule 26 to ensure it is correct, fit for purpose, and contains all water quality objectives and targets for the TANK area (including those in proposed Schedule 27). Identify targets to be achieved by 2040 where objectives are currently not met
127.15	Tania	Eden	Te Taiwhenua o Te Whanganui a Orotu	Schedule 26: Freshwater Quality Objectives	Not Stated	Set objectives and targets in Schedule 26 for the Ahuriri catchment and estuary
132.70	Marei	Apatu	Te Taiwhenua o Heretaunga	Schedule 26: Freshwater Quality Objectives	Amend	Either include in a table, or within a proposed schedule for water quality, the parameters and limits within operative Table 8 that apply to water bodies in TANK catchments .
132.105	Marei	Apatu	Te Taiwhenua o Heretaunga	Schedule 26: Freshwater Quality Objectives	Amend	Provide new Schedule 26-F that includes detailed maps of all TANK catchments and sub-catchments and indicate which values/uses apply to each sub-catchment, catchment, water body or FMU. Specific waterbodies and values to be included provided.
132.106	Marei	Apatu	Te Taiwhenua o Heretaunga	Schedule 26: Freshwater Quality Objectives	Amend	In Schedule 26-F, indicate where the limits are not currently achieved, and where they are a target. Prescribe measurable attributes and limits, with numerical limits and targets from the NOF A and B bands for water quality where relevant. Where existing water quality is lower than the equivalent B band for water quality, set a target in the B band, to be achieved within a reasonable timeframe.
132.172	Marei	Apatu	Te Taiwhenua o Heretaunga	Schedule 26: Freshwater Quality Objectives	Amend	Provide a new Schedule 26-F that lists all TANK rivers and their tributaries, and specifies the values that apply within each, and part of the schedule that specifies the attributes and attribute states/limits that support those values. Link the Schedule to the water quantity and water quality objectives, limits, targets, and rules. Provide a similar Schedule or part of the above Schedule for lakes and wetlands in the TANK catchments, but outside of the coastal environment.
142.24	Bill	Glazebrook	Big Hill Station Limited	Schedule 26: Freshwater Quality Objectives	Support	Allow for changes to less stringent thresholds if data sets indicate it can be achieved while maintaining critical values.
142.26	Bill	Glazebrook	Big Hill Station Limited	Schedule 26: Freshwater Quality Objectives	Amend	The demarcation describing Upper Ngaruroro River to be where the river is no longer bounded by Crown land on both banks. Agree with setting measurable objectives but reserve comment for the appropriateness of levels proposed at time of hearing of submissions.
180.67	Charlotte	Drury	Horticulture New Zealand	Schedule 26: Freshwater Quality Objectives	Amend	Add the location of the monitoring and information on the existing state.
185.66	Allen	Kittow	Tremaine Farms Ltd	Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
185.71	Allen	Kittow	Tremaine Farms Ltd	Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
186.66	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
186.71	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
191.11	Rangiwhiua	Robin	Mangaroa Marae	Schedule 26: Freshwater Quality Objectives	Oppose	Increase the habitat provision for a range of freshwater species accompanied with gradual water flow.
194.101	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Schedule 26: Freshwater Quality Objectives	Amend	Schedule 26 should be renamed ‘Surface Water Quality Objectives’ to reflect the title of the maps at Schedule 26A-26D which relate to Surface Water Management Units.
194.102	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Schedule 26: Freshwater Quality Objectives	Amend	There needs to be consistent use of the terms across TANK and the Planning Maps.

195.126	Peter	Match	Federated Farmers of New Zealand	Schedule 26: Freshwater Quality Objectives	Amend	That the following amendments be made to Schedule 26: Water Quality Objective/Target Water clarity for Lower Ngaruroro and Lower Tutaekuri Rivers <u>except for Ngaruroro River at Fernhill</u> : = 3.75m Water clarity for Ngaruroro and Tutaekuri tributaries, <u>except for Tutaekuri Waimate Stream at Chesterhope, Mangatutu Stream at Mangatutu Stream Bridge, Mangaone River at Rissington</u> : = 3.75m Water clarity for Ngaruroro River at Fernhill, Tutaekuri Waimate Stream at Chesterhope, Mangatutu Stream at Mangatutu Stream Bridge, Mangaone River at Rissington: Current State or = 1.6m, whichever is the lesser. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.127	Peter	Match	Federated Farmers of New Zealand	Schedule 26: Freshwater Quality Objectives	Amend	That Water quality Objective/Target for deposited sediment be deleted or aligned with National Bands in the NPS FM 2020.
195.128	Peter	Match	Federated Farmers of New Zealand	Schedule 26: Freshwater Quality Objectives	Amend	That Water Quality Objective/Target for Periphyton cover be amended as follows: ... Periphyton cover (seasonal max, %PeriWCC) for Ngaruroro and Tutaekuri Tributaries <u>except for Maraekakaho Stream</u> : = 30 % Periphyton cover (seasonal max, %PeriWCC) for Maraekakaho Stream: > 40% and = 80 % ... And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.129	Peter	Match	Federated Farmers of New Zealand	Schedule 26: Freshwater Quality Objectives	Amend	That Water Quality Objective/Target for DIN be amended as follows: ... DIN (mg/L) for Lower Ngaruroro and Lower Tutaekuri Rivers <u>except for Tutaekuri River U/S Mangaone River and Tutaekuri River at Brookfields Bridge</u> : < 0.15 mg/L DIN (mg/L) for Tutaekuri River U/S Mangaone River and Tutaekuri River at Brookfields Bridge: < 0.25 mg/L ... DIN (mg/L) for Ngaruroro and Tutaekuri Tributaries <u>except Poporangi Stream, Ohiwia Stream, Mangatutu Stream and Mangaone River at Rissington</u> : < 0.3 mg/L DIN (mg/L) for Poporangi Stream, Ohiwia Stream, Mangatutu Stream and Mangaone River at Rissington: < 0.5 mg/L .. DIN (mg/L) for Lowland tributaries < 0.75mg/L And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.130	Peter	Match	Federated Farmers of New Zealand	Schedule 26: Freshwater Quality Objectives	Amend	That Water Quality Objective/Target for DIN be amended as follows: ... DRP (mg/L) for Lower Ngaruroro and Lower Tutaekuri Rivers <u>except Ngaruroro at Chesterhope, Tutaekuri US Mangaone and Tutaekuri at Brookfields Bridge</u> : < 0.015 mg/L DRP (mg/L) for Ngaruroro at Chesterhope, Tutaekuri US Mangaone and Tutaekuri at Brookfields Bridge : < 0.026 mg/L ... DRP (mg/L) for Ngaruroro and Tutaekuri Tributaries <u>except Mangatutu Stream and Mangaone River at Rissington</u> : < 0.015 mg/L DRP (mg/L) for Mangatutu Stream and: < 0.026 mg/L DRP (mg/L) for Mangaone River at Rissington: < 0.034 mg/L DRP (mg/L) for Lowland tributaries: < 0.015 0.030 mg/L And that Schedule 26 be otherwise aligned with the NPS FM 2020. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.131	Peter	Match	Federated Farmers of New Zealand	Schedule 26: Freshwater Quality Objectives	Amend	That Water Quality Objective/Target for E. coli be amended to specify application to rivers and tributaries stream order 4 or greater. And that Schedule 26 be otherwise aligned with the NPS FM 2020. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.

195.132	Peter	Matich	Federated Farmers of New Zealand	Schedule 26: Freshwater Quality Objectives	Amend	That Water Quality Objective/Target for Dissolved oxygen (mg/L or %) from continuous data be retained as notified And that Schedule 26 be otherwise aligned with the NPS FM 2020. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.133	Peter	Matich	Federated Farmers of New Zealand	Schedule 26: Freshwater Quality Objectives	Amend	That Water Quality Objective/Target for Temperature (°C) 5-day CRI from continuous data be retained as notified And that Schedule 26 be otherwise aligned with the NPS FM 2020. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.134	Peter	Matich	Federated Farmers of New Zealand	Schedule 26: Freshwater Quality Objectives	Amend	That Water Quality Objective/Target for pH be retained as notified And that Schedule 26 be otherwise aligned with the NPS FM 2020. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.135	Peter	Matich	Federated Farmers of New Zealand	Schedule 26: Freshwater Quality Objectives	Amend	That Water Quality Objective/Target for BOD (ScBOD ₅) be retained as notified And that Schedule 26 be otherwise aligned with the NPS FM 2020. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.136	Peter	Matich	Federated Farmers of New Zealand	Schedule 26: Freshwater Quality Objectives	Amend	That Water Quality Objective/Target for Heavy metals and metalloids, pesticides and organic contaminants, radioactive contaminants be retained as notified And that Schedule 26 be otherwise aligned with the NPS FM 2020. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.137	Peter	Matich	Federated Farmers of New Zealand	Schedule 26: Freshwater Quality Objectives	Amend	That Water Quality attribute for Guideline value for any aesthetic determinand (Drinking Water Standards for New Zealand DWSNZ) be retained as notified And that Schedule 26 be otherwise aligned with the NPS FM 2020. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.138	Peter	Matich	Federated Farmers of New Zealand	Schedule 26: Freshwater Quality Objectives	Amend	That Water Quality Objective/Target for E. coli be retained as notified. And that Schedule 26 be otherwise aligned with the NPS FM 2020. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
195.139	Peter	Matich	Federated Farmers of New Zealand	Schedule 26: Freshwater Quality Objectives	Amend	That Water Quality Objective/Target for Nitrate- nitrogen (concentration of nitrate- nitrogen (mg N-NO ₃ /l) be retained as notified. And that Schedule 26 be otherwise aligned with the NPS FM 2020. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
196.68	Julian	Odering	Oderings Nurseries	Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
196.73	Julian	Odering	Oderings Nurseries	Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
201.47	Liz	Munroe	Heretaunga Tamatea Settlement Trust	Schedule 26: Freshwater Quality Objectives	Amend	Add "Mauri" as a critical value for each catchment/sub-catchment. Include the Taruarau and other River tributaries in their own right. Include Karamu tributaries iwth the Paritua Stream as separate from the Karawarewa. Amend existing PC9 policies and rules to promote the achievement of the Freshwater Quality Objectives in Schedule 26.
203.30	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	Schedule 26: Freshwater Quality Objectives	Amend	Recognise that standardized stormwater management plans for operations which are part of nationwide networks may appropriately manage risk.
210.112	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 26: Freshwater Quality Objectives	Support	Clarify or remove the introductory wording.
210.113	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 26: Freshwater Quality Objectives	Support	Clarify the wording used to refer to objectives/targets/limits in Schedule 26 and throughout the plan.
210.114	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 26: Freshwater Quality Objectives	Support	Clarify the wording used to refer to FMUs in Schedule 26 and throughout the plan.
210.115	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 26: Freshwater Quality Objectives	Support	Amend wording around timeframes to be consistent with NPSFM.
210.116	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 26: Freshwater Quality Objectives	Support	Include all TANK catchments in Schedule 26 (i.e. bring the Karamu and Ahuriri catchments across from Schedule 27). Apply all attributes in Schedule 26 to the water bodies shifted over from Schedule 27.
210.117	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 26: Freshwater Quality Objectives	Support	It would be much clearer if this schedule was divided by water body or FMU, rather than by the attribute being measured.
210.118	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 26: Freshwater Quality Objectives	Support	Clarify timeframes for measuring attributes against targets (e.g. 'measured over 5 years as the median value' or whatever is most appropriate).
210.119	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 26: Freshwater Quality Objectives	Support	Move values in the 'also relevant for' column to another schedule of values for each water bodies.

210.120	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 26: Freshwater Quality Objectives	Support	Retain all attributes.
210.121	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 26: Freshwater Quality Objectives	Support	Clarify what is meant by 'reference state' for water temperature and introduce a maximum.
210.122	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 26: Freshwater Quality Objectives	Amend	Insert a new attribute for physical habitat, ' <u>Natural Character/Habitat Quality Index</u> ', for all areas. It would be useful to include an associated value or narrative description: " <u>river form (including pool, run, and riffle sequences, and riparian margins) and function (including hydrological regime and fluvial processes) is suitable to support fish and macroinvertebrates through their life phases and protect, and where degraded restore, ecosystem health</u> " or (for consistency with the NPSFM (2020), " <u>Habitat – the physical form, structure, and extent of the water body, its bed, banks and margins; its riparian vegetation; and its connections to the floodplain</u> " Targets/limits for the NCI/HQI relate to a reference condition for the river being assessed (similar to that proposed in PC9 for temperature). Therefore, the associated target should generally be " <u>0.85</u> or <u>0.6</u> ". However, it would be best separated into several thresholds to reflect the type of river/stream being protected. Potential targets be " <u>0.7</u> " for lowland rivers/streams, " <u>0.8</u> " for mid gradient rivers/streams, and " <u>0.9</u> " for steep, hard sedimentary, confined rivers/streams.
210.123	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 26: Freshwater Quality Objectives	Support	Any other consequential amendments to ensure the protection of physical habitat quality is included in the plan. This may be through policies or methods.
210.124	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 26: Freshwater Quality Objectives	Amend	Water clarity and turbidity: Apply to all catchments (i.e. those in Schedule 27).
210.125	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 26: Freshwater Quality Objectives	Amend	Remove flows from the water clarity and turbidity targets/limits for all FMUs.
210.126	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 26: Freshwater Quality Objectives	Amend	15% threshold should apply to the Upper Ngaruroro and Upper Tutaekuri River year-round
210.127	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 26: Freshwater Quality Objectives	Support	MCI: Retain as proposed but remove tautology.
210.128	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 26: Freshwater Quality Objectives	Amend	MCI: Apply to all catchments (i.e. those in Schedule 27)
210.129	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 26: Freshwater Quality Objectives	Amend	MCI: Amend Upper Ngaruroro target to 130
210.130	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 26: Freshwater Quality Objectives	Amend	DIN: Amend to state that critical value is 'ecosystem health' Apply to all catchments (i.e. those in Schedule 27)
210.131	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 26: Freshwater Quality Objectives	Support	Nitrate: Retain as proposed
210.132	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 26: Freshwater Quality Objectives	Amend	Nitrate and Ammonia: Change the critical value for nitrate and ammonia from Toxicity (NOF) to 'ecosystem health' Apply NPSFM A band for nitrate to all catchments (including those currently in schedule 27).
210.133	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 26: Freshwater Quality Objectives	Amend	E.Coli: Retain limits for upper rivers.
210.134	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 26: Freshwater Quality Objectives	Amend	E.coli: Apply limits to all catchments (i.e. those in Schedule 27)
210.135	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 26: Freshwater Quality Objectives	Amend	Matauranga Maori: Develop with iwi as soon as possible.
210.136	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 26: Freshwater Quality Objectives	Support	pH, BOD, Metals... : Retain
211.66	Brian	McLay		Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
211.71	Brian	McLay		Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
214.66	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
214.71	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
215.66	Peter	Dooney	Dooney Partnership	Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
215.71	Peter	Dooney	Dooney Partnership	Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
217.65	Paul	Paynter	Johnny Appleseed Holdings Ltd	Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
217.70	Paul	Paynter	Johnny Appleseed Holdings Ltd	Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
218.66	Adrian	Mannering	Irrigation Services	Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.

218.71	Adrian	Mannering	Irrigation Services	Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
219.66	Michael & Julie	Russell		Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
219.71	Michael & Julie	Russell		Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
220.66	Steve	Gillum	Gillum Springfield Trust	Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
220.71	Steve	Gillum	Gillum Springfield Trust	Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
221.66	WT	Scott		Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
221.71	WT	Scott		Schedule 26: Freshwater Quality Objectives	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
225.3	Mary	Tukiwaho		Schedule 26: Freshwater Quality Objectives	Not Stated	This needs to be re-written with the acknowledgement and support of ALL tangata, whanau me nga hapu katoa o Ngati Kahungunu, these people understand how quality works and at this point in time HBRC and HDC have failed Heretaunga people time after time, year after year with shocking water quality.
240.14	Te Kaha	Hawaikirangi	Ngāti Pārau Hapū Trust	Schedule 26: Freshwater Quality Objectives	Not Stated	Overlay sensitive catchment areas within the Tutaekuri and Ahuriri (Te Whanganui a Orotu) in TANK schedules 26 and 31. Apply cumulative land-use limits/totals for all nitrogen sources - 120 kg/ha/yr maximum; Less for unconfined aquifers and where groundwater concentrations are above 3.8 mg/litre.
240.15	Te Kaha	Hawaikirangi	Ngāti Pārau Hapū Trust	Schedule 26: Freshwater Quality Objectives	Not Stated	Include the headwaters of the Tutaekuri as a sensitive catchment and subject to restrictions of animal effluent application, intensive farming activities, and total N limits of 80 kgs/ha/yr.
TANK Planning Map - Schedule 26B Ahuriri						
126.30	James	Lyver	Maungaharuru-Tangitū Trust	TANK Planning Map - Schedule 26B Ahuriri	Amend	Amend Schedule 26B to: Include Te Whanganui-a-Orotu and the urban catchment as part of Schedule 26B.
Schedule 27: Freshwater Quality Objectives						
50.22	Alastair & Jo	Lawrence	Olig Limited	Schedule 27: Freshwater Quality Objectives	Not Stated	We are 95%, and on our way to 100%, stock proofed around waterways. However we can see how demanding the imposition of the proposed rule would be on other farms. We oppose the exclusion of stock proofing waterways at a 15% slope, we think the exclusion should be set at something more practical circa 7-10%, and a longer time period provided for completion, due to the high cost of fencing.
120.174	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 27: Freshwater Quality Objectives	Oppose	Delete Schedule 27 and include all attributes as freshwater objectives and/or targets in Schedule 26.
123.145	Jenny	Nelson-Smith	Department of Conservation	Schedule 27: Freshwater Quality Objectives	Oppose	Delete Schedule 27 and include all attributes as freshwater objectives and/or targets in Schedule 26
126.32	James	Lyver	Maungaharuru-Tangitū Trust	Schedule 27: Freshwater Quality Objectives	Oppose	Delete Schedule 27
132.104	Marei	Apatu	Te Taiwhenua o Heretaunga	Schedule 27: Freshwater Quality Objectives	Amend	Amend Schedule 27: Freshwater Quality Objectives so that the Schedule does have a regulatory function (e.g., include as objectives and targets in Schedule 26).
135.60	Anna	Wilkes	Ravensdown Limited	Schedule 27: Freshwater Quality Objectives	Oppose	Delete Schedule 27 in its entirety. And, as a consequential amendment, all references to Schedule 27 within PPC9.
142.25	Bill	Glazebrook	Big Hill Station Limited	Schedule 27: Freshwater Quality Objectives	Support	Allow for changes to less stringent thresholds if data sets indicate it can be achieved while maintaining critical values.
142.27	Bill	Glazebrook	Big Hill Station Limited	Schedule 27: Freshwater Quality Objectives	Amend	The demarcation describing Upper Ngaruroro River to, be where the river is no longer bounded by Crown land on both banks. Agree with setting measurable objectives but reserve comment for the appropriateness of levels proposed at time of hearing of submissions.
194.103	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Schedule 27: Freshwater Quality Objectives	Amend	Rename Schedule 27 'Long Term Freshwater Quality Objectives', or words to similar effect.
195.140	Peter	Matich	Federated Farmers of New Zealand	Schedule 27: Freshwater Quality Objectives	Amend	That Schedule 27 be deleted. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
201.48	Liz	Munroe	Heretaunga Tamatea Settlement Trust	Schedule 27: Freshwater Quality Objectives	Amend	Amend so Schedule 27 does have a regulatory function.
210.137	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 27: Freshwater Quality Objectives	Oppose	Move all catchments in Schedule 27 across to Schedule 26. Apply all attributes to all catchments.
225.4	Mary	Tukiwaho		Schedule 27: Freshwater Quality Objectives	Not Stated	This also needs to be re-written and re-designed due to the fact that it is practically the same as Schedule 26. The so - called "Protection Level" is non-existent.
Schedule 28: Priority Catchments						
23.61	Kerry	Sixtus	Pattullo's Nurseries Limited	Schedule 28: Priority Catchments	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
23.67	Kerry	Sixtus	Pattullo's Nurseries Limited	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
23.72	Kerry	Sixtus	Pattullo's Nurseries Limited	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
32.61	Kent	Griffiths		Schedule 28: Priority Catchments	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.

32.67	Kent	Griffiths		Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
32.72	Kent	Griffiths		Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
35.61	Colin	Campbell		Schedule 28: Priority Catchments	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
35.67	Colin	Campbell		Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
35.72	Colin	Campbell		Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
37.61	Greg	Evans	Dartmoor Estate Ltd	Schedule 28: Priority Catchments	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
37.67	Greg	Evans	Dartmoor Estate Ltd	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
37.72	Greg	Evans	Dartmoor Estate Ltd	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
38.61	Roger	Brownlie		Schedule 28: Priority Catchments	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
38.67	Roger	Brownlie		Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
38.72	Roger	Brownlie		Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
43.61	CA & GW	Wilson	Meiros Orchard Ltd	Schedule 28: Priority Catchments	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
43.67	CA & GW	Wilson	Meiros Orchard Ltd	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
43.72	CA & GW	Wilson	Meiros Orchard Ltd	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
44.61	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Schedule 28: Priority Catchments	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
44.67	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
44.72	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
49.61	John	Parsons		Schedule 28: Priority Catchments	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
49.67	John	Parsons		Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
49.72	John	Parsons		Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
54.61	Mark	Apatu	Apatu Farms Ltd	Schedule 28: Priority Catchments	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
54.67	Mark	Apatu	Apatu Farms Ltd	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
54.72	Mark	Apatu	Apatu Farms Ltd	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
61.61	Greg	Simpson		Schedule 28: Priority Catchments	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
61.67	Greg	Simpson		Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
61.72	Greg	Simpson		Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.

97.69	Lesley	Wilson	DN & LR Wilson Ltd	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
97.74	Lesley	Wilson	DN & LR Wilson Ltd	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
99.87	Jerf	van Beek	Twyford Water	Schedule 28: Priority Catchments	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
99.93	Jerf	van Beek	Twyford Water	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
99.98	Jerf	van Beek	Twyford Water	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
100.3	Stephanie	Murphy	Hawke's Bay Airport	Schedule 28: Priority Catchments	Amend	Mapping - The mapped "Ahuriri Catchment" as mapped in PC9 overlaps with areas identified in the Regional Coastal Environment Plan as being part of the Coastal Environment. Due to the jurisdictional boundaries of these two documents and to avoid confusion and potential duplication around their application, the Ahuriri Catchment map may require amendments to ensure this overlap is removed.
104.61	John	Loughlin	Rockit Global Limited	Schedule 28: Priority Catchments	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
104.67	John	Loughlin	Rockit Global Limited	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
104.72	John	Loughlin	Rockit Global Limited	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
105.61	Scott	Lawson		Schedule 28: Priority Catchments	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
105.67	Scott	Lawson		Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
105.72	Scott	Lawson		Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
110.61	Edward	Whyte	Whyte & Co	Schedule 28: Priority Catchments	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
110.67	Edward	Whyte	Whyte & Co	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
110.72	Edward	Whyte	Whyte & Co	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
116.7	Alexander John	Macphee		Schedule 28: Priority Catchments	Not Stated	Schedules 28 and 29 - both schedules refer to the use of the modeling tool known as "Overseer" Overseer was never intended to be used as a regulatory tool. The reliance on modelling is extremely concerning. It appears to be used extensively when there is limited genuine data available, and is often used with other "modeled" inputs and other dubious data. There needs to be more emphasis on the collection of genuine and accurate information.
120.22	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 28: Priority Catchments	Amend	Identify (delineate) priority catchments and define timeframes for improvement in Schedule 28.
120.92	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 28: Priority Catchments	Amend	Amend Schedule 28 to delineate catchments with priority requirements to improve water quality
120.109	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 28: Priority Catchments	Amend	Water quality issues and priority catchments must be listed and delineated in Schedule 28, followed by methods to achieve remaining Schedule 26 targets in all FM Us and waterbodies.
120.118	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 28: Priority Catchments	Amend	Schedule 28 must identify and delineate the catchment with specific water quality issues and specific timeframes
120.127	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 28: Priority Catchments	Amend	All priority sub-catchments for erosion management must be identified in Schedule 28.

122.61	Richard	Penreath	Ngai Tukairangi Trust	Schedule 28: Priority Catchments	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
122.67	Richard	Penreath	Ngai Tukairangi Trust	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
122.72	Richard	Penreath	Ngai Tukairangi Trust	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
123.12	Jenny	Nelson-Smith	Department of Conservation	Schedule 28: Priority Catchments	Not Stated	Regulate (require consent for) productive land used for farming in priority catchments to resolve water quality issues in Schedule 28 and in catchments required to meet water quality targets in Schedule 26 by 2040.
123.146	Jenny	Nelson-Smith	Department of Conservation	Schedule 28: Priority Catchments	Amend	Include the list of priority catchments which currently meet the criteria specified for water quality issues. Should reference 2040 as the timeframe for achieving objectives
127.16	Tania	Eden	Te Taiwhenua o Te Whanganui a Orotu	Schedule 28: Priority Catchments	Not Stated	Identify (delineate) priority catchments and define timeframes for improvement in Schedule 28.
127.17	Tania	Eden	Te Taiwhenua o Te Whanganui a Orotu	Schedule 28: Priority Catchments	Not Stated	Regulate (require consent for) production land in priority catchments to resolve water quality issues in Schedule 28 and in catchments required to meet water quality targets in Schedule 26 by 2040.
129.36	Ceri	Edmonds	Hawke's Bay Regional Council	Schedule 28: Priority Catchments	Amend	Amend last paragraph to state that Source Protection Zones are a high priority area for the preparation of Farm Environment, Catchment Collective or Industry Plans in addition to the mapped high, medium and low priority areas.
135.61	Anna	Wilkes	Ravensdown Limited	Schedule 28: Priority Catchments	Amend	Amend Schedule 28 by replacing the current content of the schedule with a table or list that clearly identifies the priority catchments, including the timeframes that apply within each catchment.
180.68	Charlotte	Drury	Horticulture New Zealand	Schedule 28: Priority Catchments	Amend	Amend by deleting '5. A source Protection Zone'. Amend catchment names to make clear the relationship of these catchments to other catchments identified in the plan. Amend catchment maps to ensure that contaminant loads discharged from upstream are not double counted, and the land that is captured by the risk categories represents the contribution of catchment to loads at the sub-catchment and whole of catchment scales.
185.61	Allen	Kittow	Tremaine Farms Ltd	Schedule 28: Priority Catchments	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
185.67	Allen	Kittow	Tremaine Farms Ltd	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
185.72	Allen	Kittow	Tremaine Farms Ltd	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
186.61	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Schedule 28: Priority Catchments	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
186.67	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
186.72	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
194.104	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Schedule 28: Priority Catchments	Support	PRWM supports Schedule 28 as currently drafted.
195.141	Peter	Matich	Federated Farmers of New Zealand	Schedule 28: Priority Catchments	Amend	That Schedule 28 be amended as follows: ... Catchment maps showing spatial extent and location of the priority areas are available as part of this plan change but are not included as planning maps. This is because the thresholds for priority will remain fixed, however t <u>The status of catchments will change over time as work is completed within the catchment.</u> Farm Environment and Catchment Collective Plans and Industry Programmes are to be completed in the following priority order; High, Medium and Low Priority over the first 3, 6 and 9 years respectively following of the plan (although work can commence at any time and farmers will be encouraged to start with their own programme as soon as possible). Delete the TN yield line from the table. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
196.63	Julian	Odering	Oderings Nurseries	Schedule 28: Priority Catchments	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
196.69	Julian	Odering	Oderings Nurseries	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
196.74	Julian	Odering	Oderings Nurseries	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
207.47	Mark	Clews	Hastings District Council	Schedule 28: Priority Catchments	Amend	Amend the table by adding the words " <u>land within a Source Protection Zone</u> " as a High Priority and " <u>land within a Source Protection Extent</u> " as a Medium Priority.

210.138	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 28: Priority Catchments	Amend	Amend for clarity. Identify what catchments are a priority. Include maps. Include timeframes.
211.61	Brian	McLay		Schedule 28: Priority Catchments	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
211.67	Brian	McLay		Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
211.72	Brian	McLay		Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
214.61	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Schedule 28: Priority Catchments	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
214.67	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
214.72	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
215.61	Peter	Dooney	Dooney Partnership	Schedule 28: Priority Catchments	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
215.67	Peter	Dooney	Dooney Partnership	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
215.72	Peter	Dooney	Dooney Partnership	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
217.60	Paul	Paynter	Johnny Appleseed Holdings Ltd	Schedule 28: Priority Catchments	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
217.66	Paul	Paynter	Johnny Appleseed Holdings Ltd	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
217.71	Paul	Paynter	Johnny Appleseed Holdings Ltd	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
218.61	Adrian	Mannering	Irrigation Services	Schedule 28: Priority Catchments	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
218.67	Adrian	Mannering	Irrigation Services	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
218.72	Adrian	Mannering	Irrigation Services	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
219.61	Michael & Julie	Russell		Schedule 28: Priority Catchments	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
219.67	Michael & Julie	Russell		Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
219.72	Michael & Julie	Russell		Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
220.61	Steve	Gillum	Gillum Springfield Trust	Schedule 28: Priority Catchments	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
220.67	Steve	Gillum	Gillum Springfield Trust	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
220.72	Steve	Gillum	Gillum Springfield Trust	Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
221.61	WT	Scott		Schedule 28: Priority Catchments	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
221.67	WT	Scott		Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
221.72	WT	Scott		Schedule 28: Priority Catchments	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
225.5	Mary	Tukiwaho		Schedule 28: Priority Catchments	Not Stated	Schedule 28, 29 & 30 - These schedules must be re-written to include co-own, co-govern, co-manage alongside tangata whenua, mana whenua, tangata ahi kaa, which would form a co-governance body to oversee the implementation, monitoring and allocation if permits, if any, of ALL catchments within the Kahungunu rohe, including catchments that are presently in the HBRC and HDC database or those that have been formed by other means.

Schedule 29: Land Use Change

8.48	Rengasamy	Balasubramaniam	Delegat Limited	Schedule 29: Land Use Change	Oppose	Either delete Rules TANK 5 and 6 and Schedule 29 or amend them to ensure they are no more onerous than Government's proposed national environmental standards restricting agricultural intensification.
17.5	Richard	Riddell	Olig Limited	Schedule 29: Land Use Change	Oppose	Concerned about nitrogen leaching limits. Oppose provisions which restrict innovation and remove the opportunity for landowners to achieve environmental outcomes while remaining adaptable to change in circumstances. Flexibility and the ability to adapt and innovate is an integral part of the resilience of the sector.
21.5	Robert & Helen	Patullo	Newstead Farm Ltd	Schedule 29: Land Use Change	Oppose	Concerned about nitrogen leaching limits. Oppose provisions which restrict innovation and remove the opportunity for landowners to achieve environmental outcomes while remaining adaptable to change in circumstances. Flexibility and the ability to adapt and innovate is an integral part of the resilience of the sector.
21.9	Robert & Helen	Patullo	Newstead Farm Ltd	Schedule 29: Land Use Change	Oppose	Seek that Table 1 in Schedule 29 is deleted and propose that a 'flat rate per hectare' permitted threshold is applied (e.g. 20kgN/ha/yr) irrespective of land use and land use change. · Any Nitrogen risk threshold should be tailored to the catchment and specific to working towards achieving freshwater values. · This approach will ensure that those land uses which contribute unsustainable amounts bear the cost of reducing the overallocation while those discharging at or below the sustainable level (Nitrogen fixed by legumes through the natural biological process must be exempt from any N limits.
23.68	Kerry	Sixtus	Pattullo's Nurseries Limited	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
23.73	Kerry	Sixtus	Pattullo's Nurseries Limited	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
29.48	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Schedule 29: Land Use Change	Amend	Adjust the Grape kg/ha/yr for all soils to recognise winter sheep grazing rotation. Include details of crop model versions used to derive the crop loss figures in Schedule 29 and include a mechanism to address the effects of model and/or version changes to modelled outputs.
32.68	Kent	Griffiths		Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
32.73	Kent	Griffiths		Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
33.3	Bruce	McGregor		Schedule 29: Land Use Change	Oppose	Oppose Schedule 29 - Schedule 29 is deleted. LUC classification basis adopted. Mitigating actions are considered. De-intensification is recognised.
35.68	Colin	Campbell		Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
35.73	Colin	Campbell		Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
35.77	Colin	Campbell		Schedule 29: Land Use Change	Oppose	Opposes provisions which restrict innovation and remove the opportunity for landowners to achieve environmental outcomes while remaining adaptable to change in circumstances.
35.81	Colin	Campbell		Schedule 29: Land Use Change	Oppose	Seek that Table 1 in Schedule 29 is deleted and propose that a 'flat rate per hectare' permitted threshold is applied (e.g. 20kgN/ha/yr) irrespective of land use and land use change. · Any Nitrogen risk threshold should be tailored to the catchment and specific to working towards achieving freshwater values. · This approach will ensure that those land uses which contribute unsustainable amounts bear the cost of reducing the overallocation while those discharging at or below the sustainable level (
37.68	Greg	Evans	Dartmoor Estate Ltd	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
37.73	Greg	Evans	Dartmoor Estate Ltd	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
38.68	Roger	Brownlie		Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
38.73	Roger	Brownlie		Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
40.5	Jeremy	White	J and S White Contracting Ltd	Schedule 29: Land Use Change	Oppose	Concerned about nitrogen leaching limits. Oppose provisions which restrict innovation and remove the opportunity for landowners to achieve environmental outcomes while remaining adaptable to change in circumstances. Flexibility and the ability to adapt and innovate is an integral part of the resilience of the sector.

40.9	Jeremy	White	J and S White Contracting Ltd	Schedule 29: Land Use Change	Oppose	Seek that Table 1 in Schedule 29 is deleted and propose that a 'flat rate per hectare' permitted threshold is applied (e.g. 20kgN/ha/yr) irrespective of land use and land use change. · Any Nitrogen risk threshold should be tailored to the catchment and specific to working towards achieving freshwater values. · This approach will ensure that those land uses which contribute unsustainable amounts bear the cost of reducing the overallocation while those discharging at or below the sustainable level (
43.68	CA & GW	Wilson	Meiros Orchard Ltd	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
43.73	CA & GW	Wilson	Meiros Orchard Ltd	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
44.68	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
44.73	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
45.7	Sydney	Parks	Westbrook Farm Ltd	Schedule 29: Land Use Change	Oppose	Concerned about nitrogen leaching limits. Oppose provisions which restrict innovation and remove the opportunity for landowners to achieve environmental outcomes while remaining adaptable to change in circumstances. Flexibility and the ability to adapt and innovate is an integral part of the resilience of the sector.
49.68	John	Parsons		Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
49.73	John	Parsons		Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
51.10	Ivan	Knauf	Wairua Dairies Ltd	Schedule 29: Land Use Change	Oppose	Oppose current wording and oppose using rules about land use change as a means of improving water quality. This wording should be changed to read: "Any change to land use activity over 50 ha or 10% of the enterprise or farm area whichever is greater commencing from 2 May 2020 unless that property is a member of a catchment collective or industry group"
51.11	Ivan	Knauf	Wairua Dairies Ltd	Schedule 29: Land Use Change	Oppose	We suggest a change of wording: TANK 5, 6b) and Schedule 29 : Any change to production land use activity commencing after 2 May 2020 of 50 ha or 10% of property or farming enterprise area whichever is greater unless that property is a member of a catchment collective or industry group.....
51.12	Ivan	Knauf	Wairua Dairies Ltd	Schedule 29: Land Use Change	Oppose	Catchment collectives and industry groups have been given the responsibility to monitor and report their members activities including land use change. Individual members should not be required to report separately.
51.13	Ivan	Knauf	Wairua Dairies Ltd	Schedule 29: Land Use Change	Not Stated	Overseer modelling is complex, inaccurate (30% variation+ or -), time consuming and expensive for the landowner to produce and should only be required when major land use changes are planned or intensification on a large scale is planned. Most paddocks on sheep and beef farms exceed 10 ha in size. If a sheep/beef farmer wants to plant 10 ha into e.g. arable he would possibly be required to produce an Overseer model adding significant cost /ha compared with the production returns from that 10 ha of changed land use. This rule will make development of new crops much more difficult, complex, and costly with no environmental benefit. 50 ha is a more manageable area for farmers and council. Nitrogen loss is the key measure in this land use change rule. However, in the catchment, sediment loss is an equally important indicator of water quality yet there are no guidelines for sediment loss related to land use change.
54.68	Mark	Apatu	Apatu Farms Ltd	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
54.73	Mark	Apatu	Apatu Farms Ltd	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
58.37	Peter	Wilson	Hawkes Bay Fish and Game Council	Schedule 29: Land Use Change	Amend	Remove Schedule 29 and replace with appropriate values, and relate to per ha loss rates
61.68	Greg	Simpson		Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
61.73	Greg	Simpson		Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
62.68	Jonty	Moffett		Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
62.73	Jonty	Moffett		Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
69.68	Jos	Dames	Dames Limited	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.

69.73	Jos	Dames	Dames Limited	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
71.68	Carl	Knapp	Bellingham Orchard Ltd.	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
71.73	Carl	Knapp	Bellingham Orchard Ltd.	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
72.68	Justin	Addis	Armada Orchard Ltd	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
72.73	Justin	Addis	Armada Orchard Ltd	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
73.68	Bevan	Davidson		Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
73.73	Bevan	Davidson		Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
77.68	David & Sheryl	Mackie		Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
77.73	David & Sheryl	Mackie		Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
79.68	Richard	Penreath		Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
79.73	Richard	Penreath		Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
85.4	Matthew	Truebridge		Schedule 29: Land Use Change	Oppose	Seek that Table 1 in Schedule 29 is deleted and propose that a 'flat rate per hectare' permitted threshold is applied (e.g. 20kgN/ha/yr) irrespective of land use and land use change. Farm viability and flexibility would be compromised with N losses below 20.
86.68	Peter	Scott		Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
86.73	Peter	Scott		Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
91.67	Johnny	Milmine	Berry Farms NZ	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
91.72	Johnny	Milmine	Berry Farms NZ	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
95.68	Johnny	Milmine	Prime Limes	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
95.73	Johnny	Milmine	Prime Limes	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
96.68	Mike	Davis	Davis Orchards Ltd	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
96.73	Mike	Davis	Davis Orchards Ltd	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
97.70	Lesley	Wilson	DN & LR Wilson Ltd	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
97.75	Lesley	Wilson	DN & LR Wilson Ltd	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
99.94	Jerf	van Beek	Twyford Water	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
99.99	Jerf	van Beek	Twyford Water	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
104.68	John	Loughlin	Rockit Global Limited	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
104.73	John	Loughlin	Rockit Global Limited	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
105.68	Scott	Lawson		Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
105.73	Scott	Lawson		Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
109.8	Stuart	Macintyre	Turamoe Farm	Schedule 29: Land Use Change	Not Stated	Concerned about the approach taken in Schedule 29 which are designed to limit nutrients leaching from productive land use. We oppose provisions which restrict innovation and remove the opportunity for landowners to achieve environmental outcomes while remaining adaptable to change in circumstances. Flexibility and the ability to adapt and innovate is an integral part of the resilience of the sector.
109.16	Stuart	Macintyre	Turamoe Farm	Schedule 29: Land Use Change	Oppose	Seek that the definition and classification of land use types be clearly articulated. Specifically, are land use types defined by table 1 of this section, or by Sustainable Land Use index (4) as defined by "Schedule 2. Sustainable Land Use" from the Regional Resource Management Plan.

110.68	Edward	Whyte	Whyte & Co	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
110.73	Edward	Whyte	Whyte & Co	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
112.5	Ainsley	Harte		Schedule 29: Land Use Change	Oppose	Concerned about nitrogen leaching limits in Schedule 29. Oppose provisions which restrict innovation and remove the opportunity for landowners to achieve environmental outcomes while remaining adaptable to change in circumstances. Flexibility and the ability to adapt and innovate is an integral part of the resilience of the sector.
112.9	Ainsley	Harte		Schedule 29: Land Use Change	Oppose	Seek that Table 1 in Schedule 29 is deleted and propose that a 'flat rate per hectare' permitted threshold is applied (e.g. 20kgN/ha/yr) irrespective of land use and land use change. · Any Nitrogen risk threshold should be tailored to the catchment and specific to working towards achieving freshwater values. · This approach will ensure that those land uses which contribute unsustainable amounts bear the cost of reducing the overallocation while those discharging at or below the sustainable level
114.2	James	Lyons		Schedule 29: Land Use Change	Oppose	Concerned about nitrogen leaching limits. Oppose provisions which restrict innovation and remove the opportunity for landowners to achieve environmental outcomes while remaining adaptable to change in circumstances. Flexibility and the ability to adapt and innovate is an integral part of the resilience of the sector.
114.6	James	Lyons		Schedule 29: Land Use Change	Oppose	Seek that Table 1 in Schedule 29 is deleted and propose that a 'flat rate per hectare' permitted threshold is applied (e.g. 20kgN/ha/yr) irrespective of land use and land use change. · Any Nitrogen risk threshold should be tailored to the catchment and specific to working towards achieving freshwater values. · This approach will ensure that those land uses which contribute unsustainable amounts bear the cost of reducing the overallocation while those discharging at or below the sustainable level (<20kgN/ha) are enabled to continue and are flexible to adapt to change in circumstances.
118.6	Hugo	Beamish		Schedule 29: Land Use Change	Amend	Provide the information necessary to enable determination of allowable land use changes
122.68	Richard	Penreath	Ngai Tukairangi Trust	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
122.73	Richard	Penreath	Ngai Tukairangi Trust	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
129.37	Ceri	Edmonds	Hawke's Bay Regional Council	Schedule 29: Land Use Change	Amend	Either Amend Table 1 to insert a total nitrogen load for onions in the columns headed 'other soils' and 'Farndon/Omarunui/Te Awa' of 33 and 61 respectively Insert at the end of the fourth paragraph the following: For example for unirrigated land the maximum allowable change per property or farm enterprise is calculated as 32 kg/ha/year minus 3 kg/ha/year times 10 ha = 290 kg per year being the difference between the modelled N loss for dairy farming less the modelled loss for scrub or tree cover. More accurate model data or information specific for the property in question can be used where it is available. And insert the following note into Table 2; The threshold may be calculated using the formula described above with site specific or more accurate model data where this is available. Or Replace Tables 1 and 2 with an alternative framework that ranks land use systems according to relative risk of N loss and establishes consent requirement where the predominant land use (over 50% of the farm or enterprise area) changes from a lower N loss category to a higher N loss category as illustrated in Table 1 [see submission for Table 1].
131.8	Dominic	Adams	Ballance Agri-Nutrients Limited	Schedule 29: Land Use Change	Amend	Amend so that assessment of nutrient loss for planned land use changes instead utilises percentage-based figures which could then be compared against a range of farm-specific details for the purposes of more accurately assessing changes in nutrient loss.
131.9	Dominic	Adams	Ballance Agri-Nutrients Limited	Schedule 29: Land Use Change	Amend	In relation to the use of OVERSEER "or an alternative model approved by HBRC" clarification is sought on the approval process for determining an appropriate alternative.
135.62	Anna	Wilkes	Ravensdown Limited	Schedule 29: Land Use Change	Oppose	Delete Schedule 29 in its entirety.
142.28	Bill	Glazebrook	Big Hill Station Limited	Schedule 29: Land Use Change	Amend	Amend Schedule 29: a) Areas of Scrub and tree cover on a Mixed sheep beef farm be assessed equally as Mixed sheep Beef and deer land use type b) TN for beef be 22 and TN of Sheep Beef and Deer be 16.
180.69	Charlotte	Drury	Horticulture New Zealand	Schedule 29: Land Use Change	Amend	Amend by adding definition of 'production land use change' to plan. State single N loss load applicable to all land uses and locations, however if current approach is maintained, update kiwifruit and vegetable rotation numbers and other crops, in accordance with evidence HortNZ will submit at hearing.
185.68	Allen	Kittow	Tremaine Farms Ltd	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.

185.73	Allen	Kittow	Tremaine Farms Ltd	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
186.68	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
186.73	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
194.13	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Schedule 29: Land Use Change	Not Stated	The Section 32 Report ⁷ does not include adequate assessment and evaluation of the impacts of the proposed provisions (particularly the assessment of TANK 5 and 6, and Schedule 29) on land uses such as viticulture, and land use changes. The Section 32 Report does not adequately consider the economic impacts of the proposed provisions including the nitrogen loss thresholds in Schedule 29 for land uses other than dairying.
194.105	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Schedule 29: Land Use Change	Oppose	Schedule 29 should be amended (possibly by way of a new table) to set out/define high and low nitrogen loss land uses in order to provide a differential reference for Policies 5.10.3.17(a)(iii) and (iv), 5.10.3.18(c) and 5.10.3.21(d).
194.106	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Schedule 29: Land Use Change	Amend	Table 2 should refer to TANK Rule 6 and not TANK Rule 5. Amend Table 1 to recognise autumn/winter sheep grazing rotation for all Grape kg/ha/yr soils.
195.142	Peter	Matich	Federated Farmers of New Zealand	Schedule 29: Land Use Change	Amend	That Schedule 29 be amended. See submission for amendments to Table 1.
196.70	Julian	Odering	Oderings Nurseries	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
196.75	Julian	Odering	Oderings Nurseries	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
197.10	Lilly	Lawson	Beef + Lamb New Zealand Ltd	Schedule 29: Land Use Change	Amend	Amend existing and include as required new provisions to give effect to the following intent: <ul style="list-style-type: none"> • B+LNZ seek that Table 1 in Schedule 29 is deleted and propose that a 'flat rate per hectare' permitted threshold is applied (e.g. 20 - 25kgN/ha/yr) irrespective of land use and land use change, or alternatively an approach based on natural capital (appendix 1). • Any Nitrogen risk threshold should be tailored to the catchment and specific to working towards achieving freshwater values. • This approach will ensure that those land uses which contribute unsustainable Continued in submission
210.139	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 29: Land Use Change	Amend	Amend for clarity
211.68	Brian	McLay		Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
211.73	Brian	McLay		Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
214.68	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
214.73	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
215.68	Peter	Dooney	Dooney Partnership	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
215.73	Peter	Dooney	Dooney Partnership	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
217.67	Paul	Paynter	Johnny Appleseed Holdings Ltd	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
217.72	Paul	Paynter	Johnny Appleseed Holdings Ltd	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
218.68	Adrian	Mannering	Irrigation Services	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
218.73	Adrian	Mannering	Irrigation Services	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
219.68	Michael & Julie	Russell		Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
219.73	Michael & Julie	Russell		Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
220.68	Steve	Gillum	Gillum Springfield Trust	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
220.73	Steve	Gillum	Gillum Springfield Trust	Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.
221.68	WT	Scott		Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 to provide a definition of what a change to production land use is to clarify what the provisions actually relate to.
221.73	WT	Scott		Schedule 29: Land Use Change	Oppose	Amend Plan Change 9 so that some land use change is enabled by requiring the management of nutrients to be done at the collective level.

231.3	Peter	Kay		Schedule 29: Land Use Change	Amend	Policy 21 and associated provisions (Rule TANK 1, 2, 5, 6 and Schedule 29) - support with amendments - oppose schedule 29 and seek that it be deleted, seek that catchment community and FEP are retained and seek that land use change restrictions only apply where the change is greater than 20ha or 10% of the property (which ever is greater) over a three year rolling average period.
239.4	Mangaone	Catchment Group	Mangaone Catchment Group Incorporated	Schedule 29: Land Use Change	Amend	Delete references to limitations of 10% of land use change. Any limitations for land use change or connected to actual catchment conditions and potential conditions over the medium term.
241.3	Penny and John	Reynolds		Schedule 29: Land Use Change	Oppose	Oppose land use specific Nitrogen loss restrictions. Oppose the 10 ha limit. We seek that Table 1 in Schedule 29 is deleted and propose a "flat rate per hectare" permitted threshold is applied per property respective of land use and land use change.
Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan						
8.25	Rengasamy	Balasubramaniam	Delegat Limited	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Support	Support Industry Programme of Catchment Collective Programme
14.13	Ryan	Fraser		Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Amend Schedule 30 - Modify Schedule 30 to better align its requirements to work with Industry Programmes, particularly Sustainable Winegrowing NZ.
15.18	Andrea and Phil	Cranswick	Meridien Trust	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Amend Schedule 30 - Modify Schedule 30 to better align its requirements to work with Industry Programmes, particularly Sustainable Winegrowing NZ.
18.19	Mark	Cairns	MD Cairns & AR Wright Partnership	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Schedule 30 should be less prescriptive, more facilitative and more industry risk profile-based in respect of Industry Programmes. The Programme Requirements in Section B of Schedule 30 as they relate to Industry Programmes should be re-cast as a more of a guideline, with an acknowledgement that detailed requirements can vary depending on the Industry's risk and emissions profile as it relates to catchment objectives. Amend all references to Farm Environment Plan in this Plan Change to "freshwater farm plan" and otherwise align the Plan Change requirements to those of the Resource Management Amendment Act 2020 and related S.360 regulations.
20.18	Bruce	Nimon		Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Amend Schedule 30 - Modify Schedule 30 to better align its requirements to work with Industry Programmes, particularly Sustainable Winegrowing NZ.
23.62	Kerry	Sixtus	Pattullo's Nurseries Limited	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
25.19	Xan	Harding		Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Schedule 30 should be less prescriptive, more facilitative and more industry risk profile-based in respect of Industry Programmes. The Programme Requirements in Section B of Schedule 30 as they relate to Industry Programmes should be re-cast as a more of a guideline, with an acknowledgement that detailed requirements can vary depending on the Industry's risk and emissions profile as it relates to catchment objectives. Amend all references to Farm Environment Plan in this Plan Change to "freshwater farm plan" and otherwise align the Plan Change requirements to those of the Resource Management Amendment Act 2020 and related S.360 regulations.
26.19	Robin	Back	Dunvegan Estate	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Schedule 30 should be less prescriptive, more facilitative and more industry risk profile-based in respect of Industry Programmes. The Programme Requirements in Section B of Schedule 30 as they relate to Industry Programmes should be re-cast as a more of a guideline, with an acknowledgement that detailed requirements can vary depending on the Industry's risk and emissions profile as it relates to catchment objectives. Amend all references to Farm Environment Plan in this Plan Change to "freshwater farm plan" and otherwise align the Plan Change requirements to those of the Resource Management Amendment Act 2020 and related S.360 regulations.
28.19	Hamish	Clark	Saint Clair Family Estate Ltd	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Schedule 30 should be less prescriptive, more facilitative and more industry risk profile-based in respect of Industry Programmes. The Programme Requirements in Section B of Schedule 30 as they relate to Industry Programmes should be re-cast as a more of a guideline, with an acknowledgement that detailed requirements can vary depending on the Industry's risk and emissions profile as it relates to catchment objectives. Amend all references to Farm Environment Plan in this Plan Change to "freshwater farm plan" and otherwise align the Plan Change requirements to those of the Resource Management Amendment Act 2020 and related S.360 regulations.
29.49	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Schedule 30 should be less prescriptive, more facilitative and more industry risk profile-based in respect of Industry Programmes. The Programme Requirements in Section B of Schedule 30 as they relate to Industry Programmes should be re-cast as a more of a guideline, with an acknowledgement that detailed requirements can vary depending on the Industry's risk and emissions profile as it relates to catchment objectives. Amend all references to Farm Environment Plan in this Plan Change to "freshwater farm plan" and otherwise align the Plan Change requirements to those of the Resource Management Amendment Act 2020 and related S.360 regulations.
32.62	Kent	Griffiths		Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.

34.19	Jonathan	Hamlet	Craggy Range Vineyards Limited	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Schedule 30 should be less prescriptive, more facilitative and more industry risk profile-based in respect of Industry Programmes. The Programme Requirements in Section B of Schedule 30 as they relate to Industry Programmes should be re-cast as a more of a guideline, with an acknowledgement that detailed requirements can vary depending on the Industry's risk and emissions profile as it relates to catchment objectives. Amend all references to Farm Environment Plan in this Plan Change to "freshwater farm plan" and otherwise align the Plan Change requirements to those of the Resource Management Amendment Act 2020 and related S.360 regulations.
35.62	Colin	Campbell		Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
37.62	Greg	Evans	Dartmoor Estate Ltd	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
38.62	Roger	Brownlie		Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
38.75	Roger	Brownlie		Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Amend Plan Change 9 so that Farm Plans are an add on to the NZ Gap or Global Gap System.
39.19	Bridget	Wilton	MbandSons	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Schedule 30 should be less prescriptive, more facilitative and more industry risk profile-based in respect of Industry Programmes. The Programme Requirements in Section B of Schedule 30 as they relate to Industry Programmes should be re-cast as a more of a guideline, with an acknowledgement that detailed requirements can vary depending on the Industry's risk and emissions profile as it relates to catchment objectives. Amend all references to Farm Environment Plan in this Plan Change to "freshwater farm plan" and otherwise align the Plan Change requirements to those of the Resource Management Amendment Act 2020 and related S.360 regulations.
41.19	Jonathan	Milmine	Milmine Holdings Limited	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Schedule 30 should be less prescriptive, more facilitative and more industry risk profile-based in respect of Industry Programmes. The Programme Requirements in Section B of Schedule 30 as they relate to Industry Programmes should be re-cast as a more of a guideline, with an acknowledgement that detailed requirements can vary depending on the Industry's risk and emissions profile as it relates to catchment objectives. Amend all references to Farm Environment Plan in this Plan Change to "freshwater farm plan" and otherwise align the Plan Change requirements to those of the Resource Management Amendment Act 2020 and related S.360 regulations.
43.62	CA & GW	Wilson	Meiros Orchard Ltd	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
44.62	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
48.19	Paul	Ham	Alpha Domus	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Schedule 30 should be less prescriptive, more facilitative and more industry risk profile-based in respect of Industry Programmes. The Programme Requirements in Section B of Schedule 30 as they relate to Industry Programmes should be re-cast as a more of a guideline, with an acknowledgement that detailed requirements can vary depending on the Industry's risk and emissions profile as it relates to catchment objectives. Amend all references to Farm Environment Plan in this Plan Change to "freshwater farm plan" and otherwise align the Plan Change requirements to those of the Resource Management Amendment Act 2020 and related S.360 regulations.
49.62	John	Parsons		Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
50.1	Alastair & Jo	Lawrence	Olrig Limited	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Support	Support the proposed self-governing framework of catchment collectives. Devolving responsibility to stakeholder groups to operate within defined guidelines is an excellent initiative. Each catchment will have it's own characteristics and can tailor a plan to meet those characteristics (rather than one size fitting all). We are confident that self-governance, including peer pressure, will produce superior outcomes in a more cost effective manner for each farmer.
50.11	Alastair & Jo	Lawrence	Olrig Limited	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Do not support the obligation for each collective catchment FEP or Individual FEP to be approved, annual reporting and subsequently audited (3.1). This adds an unnecessary layer of cost. We believe it should operate in the same manner as Workplace Safety Plans which impose a serious responsibility on farmers to construct and to adopt continuous improvement practices. Plans/records should be able to be demanded by HBRC in the event of breach of Plan rules or the investigation of a potential breach.
51.14	Ivan	Knauf	Wairua Dairies Ltd	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	This wording should be changed to: Schedule 30 Catchment Collective, Industry Group and Farm Environment Plan. The TANK plan provides for a Catchment Collective or Industry Group The current heading confuses the message and lacks consistency with the following text.

53.19	Chris	Howell	CD & CM Howell Partnership	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Schedule 30 should be less prescriptive, more facilitative and more industry risk profile-based in respect of Industry Programmes. The Programme Requirements in Section B of Schedule 30 as they relate to Industry Programmes should be recast as a more of a guideline, with an acknowledgement that detailed requirements can vary depending on the Industry's risk and emissions profile as it relates to catchment objectives. Amend all references to Farm Environment Plan in this Plan Change to "freshwater farm plan" and otherwise align the Plan Change requirements to those of the Resource Management Amendment Act 2020 and related S.360 regulations.
54.62	Mark	Apatu	Apatu Farms Ltd	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
61.62	Greg	Simpson		Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
62.62	Jonty	Moffett		Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
68.19	Geoffrey	Smith	Vine Nursery New Zealand and Waikahu Vineyard	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Schedule 30 should be less prescriptive, more facilitative and more industry risk profile-based in respect of Industry Programmes. The Programme Requirements in Section B of Schedule 30 as they relate to Industry Programmes should be recast as a more of a guideline, with an acknowledgement that detailed requirements can vary depending on the Industry's risk and emissions profile as it relates to catchment objectives. Amend all references to Farm Environment Plan in this Plan Change to "freshwater farm plan" and otherwise align the Plan Change requirements to those of the Resource Management Amendment Act 2020 and related S.360 regulations.
69.62	Jos	Dames	Dames Limited	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
71.62	Carl	Knapp	Bellingham Orchard Ltd.	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
72.62	Justin	Addis	Armada Orchard Ltd	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
73.62	Bevan	Davidson		Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
76.19	Larry	Morgan	Te Mata Estate Winery Ltd	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Schedule 30 should be less prescriptive, more facilitative and more industry risk profile-based in respect of Industry Programmes. The Programme Requirements in Section B of Schedule 30 as they relate to Industry Programmes should be recast as a more of a guideline, with an acknowledgement that detailed requirements can vary depending on the Industry's risk and emissions profile as it relates to catchment objectives. Amend all references to Farm Environment Plan in this Plan Change to "freshwater farm plan" and otherwise align the Plan Change requirements to those of the Resource Management Amendment Act 2020 and related S.360 regulations.
77.62	David & Sheryl	Mackie		Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
79.62	Richard	Penreath		Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
81.19	Tony	Smith	Babich Wines	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Schedule 30 should be less prescriptive, more facilitative and more industry risk profile-based in respect of Industry Programmes. The Programme Requirements in Section B of Schedule 30 as they relate to Industry Programmes should be recast as a more of a guideline, with an acknowledgement that detailed requirements can vary depending on the Industry's risk and emissions profile as it relates to catchment objectives. Amend all references to Farm Environment Plan in this Plan Change to "freshwater farm plan" and otherwise align the Plan Change requirements to those of the Resource Management Amendment Act 2020 and related S.360 regulations.
84.19	Grant	Edmonds	Redmetal Vineyards Ltd	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Schedule 30 should be less prescriptive, more facilitative and more industry risk profile-based in respect of Industry Programmes. The Programme Requirements in Section B of Schedule 30 as they relate to Industry Programmes should be recast as a more of a guideline, with an acknowledgement that detailed requirements can vary depending on the Industry's risk and emissions profile as it relates to catchment objectives. Amend all references to Farm Environment Plan in this Plan Change to "freshwater farm plan" and otherwise align the Plan Change requirements to those of the Resource Management Amendment Act 2020 and related S.360 regulations.
85.8	Matthew	Truebridge		Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Support	Support Schedule 30, Catchment collectives and farm environmental plans.
86.62	Peter	Scott		Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
87.18	Peter	Scott	Kereru Road Vineyard	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Schedule 30 should be less prescriptive, more facilitative and more industry risk profile-based in respect of Industry Programmes. The Programme Requirements in Section B of Schedule 30 as they relate to Industry Programmes should be recast as a more of a guideline, with an acknowledgement that detailed requirements can vary depending on the Industry's risk and emissions profile as it relates to catchment objectives. Amend all references to Farm Environment Plan in this Plan Change to "freshwater farm plan" and otherwise align the Plan Change requirements to those of the Resource Management Amendment Act 2020 and related S.360 regulations.

88.18	Jacqui	Cormack	Constellation Brands NZ Limited (CBNZ)	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Schedule 30 should be less prescriptive, more facilitative and more industry risk profile-based in respect of Industry Programmes. The Programme Requirements in Section B of Schedule 30 as they relate to Industry Programmes should be recast as a more of a guideline, with an acknowledgement that detailed requirements can vary depending on the Industry's risk and emissions profile as it relates to catchment objectives. Amend all references to Farm Environment Plan in this Plan Change to "freshwater farm plan" and otherwise align the Plan Change requirements to those of the Resource Management Amendment Act 2020 and related S.360 regulations.
91.61	Johnny	Milmine	Berry Farms NZ	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
94.19	Deane	Caughey	Indevin Group Ltd	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Schedule 30 should be less prescriptive, more facilitative and more industry risk profile-based in respect of Industry Programmes. The Programme Requirements in Section B of Schedule 30 as they relate to Industry Programmes should be recast as a more of a guideline, with an acknowledgement that detailed requirements can vary depending on the Industry's risk and emissions profile as it relates to catchment objectives. Amend all references to Farm Environment Plan in this Plan Change to "freshwater farm plan" and otherwise align the Plan Change requirements to those of the Resource Management Amendment Act 2020 and related S.360 regulations.
95.62	Johnny	Milmine	Prime Limes	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
96.62	Mike	Davis	Davis Orchards Ltd	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
97.64	Lesley	Wilson	DN & LR Wilson Ltd	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
99.88	Jerf	van Beek	Twynford Water	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
102.19	Ritchie	Garnham	Booster Wine Group	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Schedule 30 should be less prescriptive, more facilitative and more industry risk profile-based in respect of Industry Programmes. The Programme Requirements in Section B of Schedule 30 as they relate to Industry Programmes should be recast as a more of a guideline, with an acknowledgement that detailed requirements can vary depending on the Industry's risk and emissions profile as it relates to catchment objectives. Amend all references to Farm Environment Plan in this Plan Change to "freshwater farm plan" and otherwise align the Plan Change requirements to those of the Resource Management Amendment Act 2020 and related S.360 regulations.
103.13	Ian	Quinn	Two Terraces Vineyard	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Schedule 30 should be less prescriptive, more facilitative and more industry risk profile-based in respect of Industry Programmes. The Programme Requirements in Section B of Schedule 30 as they relate to Industry Programmes should be recast as a more of a guideline, with an acknowledgement that detailed requirements can vary depending on the Industry's risk and emissions profile as it relates to catchment objectives. Amend all references to Farm Environment Plan in this Plan Change to "freshwater farm plan" and otherwise align the Plan Change requirements to those of the Resource Management Amendment Act 2020 and related S.360 regulations.
104.62	John	Loughlin	Rockit Global Limited	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
105.62	Scott	Lawson		Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
106.15	Kane	Koko	Taraia Marae	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Not Stated	We agree with the sentiment of schedule 30 but do not think that the timing of submission and then audit (which may not capture all landowners) will catch infractions early enough Relief sought: We would like auditing to be more rigorous and more detail to be provided on this.
107.19	Christopher	Harrison	Beach House Wines Ltd	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Schedule 30 should be less prescriptive, more facilitative and more industry risk profile-based in respect of Industry Programmes. The Programme Requirements in Section B of Schedule 30 as they relate to Industry Programmes should be recast as a more of a guideline, with an acknowledgement that detailed requirements can vary depending on the Industry's risk and emissions profile as it relates to catchment objectives. Amend all references to Farm Environment Plan in this Plan Change to "freshwater farm plan" and otherwise align the Plan Change requirements to those of the Resource Management Amendment Act 2020 and related S.360 regulations.
109.17	Stuart	Macintyre	Turamoe Farm	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Seek that a Schedule 30a be created which defines Farm Environment Plans for farms under 200 ha in area differently. Our expectation is that this request will reduce the complexity and confusion of how the 1100 farms under 200ha can meet Farm Environment Plans which meet the condition of a 'Permitted' rule.
110.62	Edward	Whyte	Whyte & Co	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
116.8	Alexander John	Macphee		Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Not Stated	The overriding goal was to produce a Land Management Plan that was outcome based. It is imperative that this proposal be accepted and put in place. It is also important that there is room for its format to be modified in the future, as it will not be until it is activated and operating that it can be tested.
120.119	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Schedule 30 is unenforceable

122.62	Richard	Penreath	Ngai Tukairangi Trust	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
123.147	Jenny	Nelson-Smith	Department of Conservation	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	This devolves responsibility to a third party to manage environmental effects in a nonregulatory framework. This is uncertain and inappropriate.
129.38	Ceri	Edmonds	Hawke's Bay Regional Council	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	In section B 2.2a (re-worded slightly) Managing contaminant losses (especially sediment, nutrients and bacteria) to waterways including through the efficient use of nutrients and incorporating industry good management practice (GMP), especially when carrying out land disturbance activities in relation to critical contaminant source areas.
131.3	Dominic	Adams	Ballance Agri-Nutrients Limited	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Amend to include a clear checklist of more definitive and detailed list of requirements to be met for establishing collectives alongside more detailed information on annual performance tracking and reporting requirements.
131.6	Dominic	Adams	Ballance Agri-Nutrients Limited	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Amend Change 9 to include requirements similar to Waikato Regional Plan Change 1 for Certified Farm Environment Planner
135.63	Anna	Wilkes	Ravensdown Limited	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Retain Schedule 30 as notified, but make amendments throughout the schedule to ensure that consistent terminology, as used in PPC9, is being used.
143.17	Peter	Hyslop	Strathallan Trust	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Schedule 30 should be less prescriptive, more facilitative and more industry risk profile-based in respect of Industry Programmes. The Programme Requirements in Section B of Schedule 30 as they relate to Industry Programmes should be re-cast as a more of a guideline, with an acknowledgement that detailed requirements can vary depending on the Industry's risk and emissions profile as it relates to catchment objectives. Amend all references to Farm Environment Plan in this Plan Change to "freshwater farm plan" and otherwise align the Plan Change requirements to those of the Resource Management Amendment Act 2020 and related S.360 regulations.
165.19	Caleb	Dennis	Aotearoa New Zealand Fine Wine Estates LP	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Schedule 30 should be less prescriptive, more facilitative and more industry risk profile-based in respect of Industry Programmes. The Programme Requirements in Section B of Schedule 30 as they relate to Industry Programmes should be re-cast as a more of a guideline, with an acknowledgement that detailed requirements can vary depending on the Industry's risk and emissions profile as it relates to catchment objectives. Amend all references to Farm Environment Plan in this Plan Change to "freshwater farm plan" and otherwise align the Plan Change requirements to those of the Resource Management Amendment Act 2020 and related S.360 regulations.
179.19	Wim	Barendsen	Otawhao Farms Ltd	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Schedule 30 should be less prescriptive, more facilitative and more industry risk profile-based in respect of Industry Programmes. The Programme Requirements in Section B of Schedule 30 as they relate to Industry Programmes should be re-cast as a more of a guideline, with an acknowledgement that detailed requirements can vary depending on the Industry's risk and emissions profile as it relates to catchment objectives. Amend all references to Farm Environment Plan in this Plan Change to "freshwater farm plan" and otherwise align the Plan Change requirements to those of the Resource Management Amendment Act 2020 and related S.360 regulations.
180.70	Charlotte	Drury	Horticulture New Zealand	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Amend by redrafting and splitting out requirements for landowner collectives and industry programmes. Whose responsibility it is for completing farm plans is made explicitly clear.
185.62	Allen	Kittow	Tremaine Farms Ltd	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
186.62	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
192.6	Rebecca	Blunden	T&G Global Limited and ENZIL	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	The provisions relating to Industry Programmes should be amended so that the requirements in the Plan Change align with existing and established industry programmes such as GAP schemes.
194.8	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Not Stated	May impose requirements for farm plans that are inappropriate for viticulture (or impose requirements that are disproportionate to level of nutrient loss associated with that activity, and go beyond the requirements for 'freshwater farm plans' under Part 9A of the RMA.
194.15	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	PC9 is amended to accommodate or streamline the requirements in PC9 to prepare 'Farm Environment Plans and the requirements under Part 9A RMA to prepare 'Freshwater Farm Plans' under Part 9A of the RMA.
194.107	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Schedule 30, Section B, 2.3 should be amended to differentiate between high and low contaminant and nitrogen loss land uses. This could be amended through reference to Schedule 29 (possible consequential amendment to differentiate between high and low nitrogen loss land uses). Further clarification is sought on how the Farm Environment Plans will work in practice and be implemented/required.

195.143	Peter	Matich	Federated Farmers of New Zealand	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	<p>That Schedule 30 be amended as follows:</p> <p>...</p> <p>Industry Programme or Catchment Collective Programme</p> <p>...</p> <p>This programme must identify the key water quality and water quantity management issues identified in this Plan that are relevant to;</p> <ul style="list-style-type: none"> the catchment(s) or sub-catchment(s) where: there is a significant risk of degradation of water quality attributes or where water quality attributes are within the NOF D-Band, or there is overallocation of water. the nature of the land and water use activities carried out within that catchment the scale of the effects on water quality or water quantity from the land and water use activities in that catchment <p>The Programme will describe an environmental management strategy relevant to the freshwater water management objectives where the member properties are located <u>that demonstrates:</u></p> <ul style="list-style-type: none"> how water quality attributes will be prevented from overall degradation (or how water quality attributes will be improved out of the NOF D-Band). how water overallocation will be reduced <p><u>Permitted activity takes and takes under RMA section 14(3)(b) shall not be affected by measures required to address b) above.</u></p>
196.64	Julian	Odering	Oderings Nurseries	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
199.19	Peter	Robertson	Brookfields Vineyards/Ohiti Estate	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	<p>Schedule 30 should be less prescriptive, more facilitative and more industry risk profile-based in respect of Industry Programmes. The Programme Requirements in Section B of Schedule 30 as they relate to Industry Programmes should be recast as a more of a guideline, with an acknowledgement that detailed requirements can vary depending on the Industry's risk and emissions profile as it relates to catchment objectives.</p> <p>Amend all references to Farm Environment Plan in this Plan Change to "freshwater farm plan" and otherwise align the Plan Change requirements to those of the Resource Management Amendment Act 2020 and related S.360 regulations.</p>
204.19	Juliet	Gray	Peter Lyons Trust (Lyons Vineyard)	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	<p>Schedule 30 should be less prescriptive, more facilitative and more industry risk profile-based in respect of Industry Programmes. The Programme Requirements in Section B of Schedule 30 as they relate to Industry Programmes should be recast as a more of a guideline, with an acknowledgement that detailed requirements can vary depending on the Industry's risk and emissions profile as it relates to catchment objectives.</p> <p>Amend all references to Farm Environment Plan in this Plan Change to "freshwater farm plan" and otherwise align the Plan Change requirements to those of the Resource Management Amendment Act 2020 and related S.360 regulations.</p>
207.48	Mark	Clews	Hastings District Council	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	<p>Amend 2.2. to read:</p> <p>f) Measures required to reduce risk of contamination of the source water for any Registered Drinking Water Supply. <u>Landowners are encouraged to engage with the relevant Registered Drinking Water Supplier to understand potential risks of activities on the source water and to identify appropriate risk mitigation measures</u></p>
210.140	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	<p>Remove all reference to stream 'maintenance' schemes.</p> <p>Amend entire management of land uses to be more consistent with NPSFM and NZCPS and give council scope for more control, and compliance, monitoring, and enforcement.</p> <p>Ensure farm plans are tied to enforceable conditions in rules and resource consents which set out measureable outcomes to be achieved by the farm environment plan. Where flexibility is provided for to finalise or amend farm plans ensure this is only for consented activities where an independent certification process can be applied to the conditions of consent.</p>
211.62	Brian	McLay		Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
213.19	Peter	Scott	The Wine Portfolio	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	<p>Schedule 30 should be less prescriptive, more facilitative and more industry risk profile-based in respect of Industry Programmes. The Programme Requirements in Section B of Schedule 30 as they relate to Industry Programmes should be recast as a more of a guideline, with an acknowledgement that detailed requirements can vary depending on the Industry's risk and emissions profile as it relates to catchment objectives.</p> <p>Amend all references to Farm Environment Plan in this Plan Change to "freshwater farm plan" and otherwise align the Plan Change requirements to those of the Resource Management Amendment Act 2020 and related S.360 regulations.</p>
214.62	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.

215.62	Peter	Dooney	Dooney Partnership	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
216.19	Phillipa	McVeagh	New Zealand Apples & Pears	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Not Stated	Supports the use of groups being able to work together, allowing for potential solution identification and implementation, assuming science supports the effectiveness of that solution. Groups however, could take a range of forms, by catchment, product groups, horticultural groups or broader to include pastoral systems as well.
216.20	Phillipa	McVeagh	New Zealand Apples & Pears	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Not Stated	Encourages the use of industry schemes (e.g. GlobalGAP) where possible for growers to provide evidence of good agricultural practice and used by growers to satisfy the farm planning requirements of this proposed plan.
216.21	Phillipa	McVeagh	New Zealand Apples & Pears	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Not Stated	As industry schemes (e.g. GlobalGAP) are annually audited by a third party, and suggest that this would therefore not be required under this plan.
216.22	Phillipa	McVeagh	New Zealand Apples & Pears	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Not Stated	Where appropriate, support the opportunity for stream depletion effects to be managed collectively, but believe it will be extremely difficult for schemes to be developed by consent applicants, and therefore suggest exploring the development of these schemes in a progressive manner by HBRC, in consultation with affected growers.
217.61	Paul	Paynter	Johnny Appleseed Holdings Ltd	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
218.62	Adrian	Mannering	Irrigation Services	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
219.62	Michael & Julie	Russell		Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
220.62	Steve	Gillum	Gillum Springfield Trust	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
221.62	WT	Scott		Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Oppose	Amend Change 9 so that all provisions that relate to industry schemes to better align requirements with existing and established industry programs such as GAP schemes.
231.2	Peter	Kay		Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Support	Support Catchment Community Initiatives / Industry Schemes / Farm Environment Plans and seek that they be retained.
235.1	Graeme	Wedd	Rotoma Station Trust	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Support	Support the catchment collective. We are outcome focused about water quality. Agree with taking ownership of any problems.
239.1	Mangaone	Catchment Group	Mangaone Catchment Group Incorporated	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	Support for catchment collectives within TANK catchments. Significant time may be needed to form a group to the standards required so need to consider compliance timeframes.
239.2	Mangaone	Catchment Group	Mangaone Catchment Group Incorporated	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Amend	A new governance structure supported by HBRC formed by the chairpersons from each catchment group.
240.6	Te Kaha	Hawaikirangi	Ngāti Pārau Hapū Trust	Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Not Stated	Ensuring mana whenua hapu values have been adequately identified, included and taken into effect within farm plans, collectives, and industry programmes.
241.5	Penny and John	Reynolds		Schedule 30: Landowner Collective, Industry Programme and Farm Environment Plan	Not Stated	We support the requirement of FEPs . We oppose this wording and seek to have “ a landowner “ included as a person suitably qualified to prepare such a plan.
Section B: Catchment Collective Requirements						
83.2	Jim	Galloway		Section B: Catchment Collective Requirements	Not Stated	That HBRC to commit funds from the general rate to fund these (Subsections (4)-(5)) functions of Catchment collectives
124.31	Bridget	Margerison	Brownrigg Agriculture Group Ltd	Section B: Catchment Collective Requirements	Oppose	2.2. h) - Amend clause h) to read: <i>in the Karamu and Lake Poukawa Catchments; the identification ...</i>

195.144	Peter	Matich	Federated Farmers of New Zealand	Section B: Catchment Collective Requirements	Amend	Amend Schedule 30 as follows: 2.2 The Plan must address where appropriate; ... b) where water quality does not meet standards in Schedule 26, identifying how there will be reductions in losses that contribute to meeting the specified water quality including, where appropriate, reference to; ... (ii) LUC (Land Use Capability) and soil type; ... (iv) Stock management including <u>increases in</u> rates and densities of different classes of stock; ... g) management of stock, including in relation to river or stream crossings and exclusion from waterways <u>except as provided for</u> in a manner that is consistent with Policy 22 and Rules TANK 1 or 3; ... 3.1 The Catchment Collective plan or Industry Programme will be submitted for approval by the HBRC no later than by the end of the relevant year specified for that catchment in Schedule 28 <u>provided that HBRC has established an operational activity for assessing Catchment Collective Plans in terms of its activities and functions under the Local Government Act 2002</u> . In making decisions to approve the Programme the Council will take into account; ... 3.2 Where approval is not given, it means the requirements of Rule TANK 1 are not able to be met and land use is therefore subject to either Rule TANK 1 (b)2 or Rule TANK 2 <u>except as provided by 3.3 below</u> . <u>3.3 Where HBRC has not yet established an operational activity for processing Catchment Collective Plans (as part of its functions under the Local Government Act 2002) including establishment and support for a catchment collective governance body, the ability of primary producers within the TANK Catchment to farm, shall not be prejudiced by any lack on HBRC's part in establishing such Council activity. Further, any Catchment Collective Plans that have been submitted under this part, while the establishment by HBRC of operational activity for assessing Catchment Collective Plans and a Catchment Collective governance body is still pending, shall be deemed to have interim approval upon submission of a Catchment Collective Plan. Such interim approval shall be subject to adjustment of conditions once HBRC's Catchment Collective Plan assessment programme has been established.</u>
233.23	Dr Nicholas	Jones	Hawke's Bay District Health Board (HBDHB)	Section B: Catchment Collective Requirements	Amend	Section B 2.2 f) changed as follows: "Measures required to reduce risk <u>prevent the contamination</u> of the source water for any Registered Drinking Water Supply"
233.24	Dr Nicholas	Jones	Hawke's Bay District Health Board (HBDHB)	Section B: Catchment Collective Requirements	Amend	Add new bullet point as a matter the Council will take into account in approving plans or programmes: "e) the effectiveness of measures proposed to prevent drinking water source contamination"
Section C: Farm Environment Plans						
83.7	Jim	Galloway		Section C: Farm Environment Plans	Support	Amend Change 9 so that farmers can prepare their own FEPs and not have to use a professionally qualified person
131.4	Dominic	Adams	Ballance Agri-Nutrients Limited	Section C: Farm Environment Plans	Amend	Amend to expand the list of information to be included in an FEP to provide a detailed prescriptive list. Suggestions for <u>additional information requirements provided</u> .
141.2	Danny	Angland	Kereru Station	Section C: Farm Environment Plans	Oppose	Disagree in part.
195.145	Peter	Matich	Federated Farmers of New Zealand	Section C: Farm Environment Plans	Amend	Amend Schedule 30 as follows: Section C: Farm Environment Plans If a property is not subject to a TANK Industry Programme or a TANK Catchment Collective prepared under Section B of this schedule, <u>and the property is within a catchment(s) or sub-catchment(s) where:</u> • <u>there is a significant risk of degradation of water quality attributes or where water quality attributes are within the NOF D-Band, or</u> • <u>there is overallocation of water.</u> a Farm Environment Plan must be prepared in accordance with Section C. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
233.25	Dr Nicholas	Jones	Hawke's Bay District Health Board (HBDHB)	Section C: Farm Environment Plans	Amend	Include an auditing frequency requirement linked to performance. Recommendations about frequency of auditing, including proposed table and provisions, provided.
Schedule 31: Flows, Levels and Allocation Limits						
3.9	Gavin	Yort	Limestone Properties Limited	Schedule 31: Flows, Levels and Allocation Limits	Support	Retain the provision - Schedule 31 Ngaruroro groundwater
8.26	Rengasamy	Balasubramaniam	Delegat Limited	Schedule 31: Flows, Levels and Allocation Limits	Support	Support Schedule 31 Ngaruroro River
8.27	Rengasamy	Balasubramaniam	Delegat Limited	Schedule 31: Flows, Levels and Allocation Limits	Support	Support Schedule 31 Ngaruroro Groundwater

13.14	Alec	Duncan	Fire and Emergency New Zealand	Schedule 31: Flows, Levels and Allocation Limits	Support	Support in part - retain as proposed. Support subject to the inclusion of the amendment sought in submission point 13.13 relating to the exemption of the take and use of water for firefighting purposes from the water take and use provisions Rules TANK 9-11 above, and as provided for within section 14(3)(e) of the Resource Management Act 1991.
14.14	Ryan	Fraser		Schedule 31: Flows, Levels and Allocation Limits	Amend	Amend Schedule 31 - Retain existing low flows and allocation limits for the Ngaruroro and Tutaekuri Rivers.
15.19	Andrea and Phil	Cranswick	Meridiam Trust	Schedule 31: Flows, Levels and Allocation Limits	Amend	Amend Schedule 31 - Retain existing low flows and allocation limits for the Ngaruroro and Tutaekuri Rivers
17.8	Richard	Riddell	Olrig Limited	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Oppose freshwater allocation for the Ngaruroro River surface water and groundwater specified in Schedule 31. These limits are overly restrictive and do not give sufficient flexibility for staged adaptive management of our farming operation. Council should give consideration and be flexible to the merits of each individual surface water and groundwater storage request in <u>Schedule 31 C area</u> .
20.19	Bruce	Nimon		Schedule 31: Flows, Levels and Allocation Limits	Amend	Amend Schedule 31 - Retain existing low flows and allocation limits for the Ngaruroro River.
23.15	Kerry	Sixtus	Pattullo's Nurseries Limited	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
32.15	Kent	Griffiths		Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
35.15	Colin	Campbell		Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
37.15	Greg	Evans	Dartmoor Estate Ltd	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
38.15	Roger	Brownlie		Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
43.15	CA & GW	Wilson	Meiros Orchard Ltd	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
44.15	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
49.15	John	Parsons		Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
50.17	Alastair & Jo	Lawrence	Olrig Limited	Schedule 31: Flows, Levels and Allocation Limits	Not Stated	We can see no scientific justification/analysis to support the 18% reduction in water availability from the Ngaruroro River. Given the potential size of economic consequences here, we believe that the base modelling needs to be reviewed, and transparency provided to allow a full understanding for the reduction. We note minimum flows remain unchanged but as part of a deeper evaluation, we also contend that minimum flow needs to be re-visited.
54.15	Mark	Apatu	Apatu Farms Ltd	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
54.76	Mark	Apatu	Apatu Farms Ltd	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend minimum flow of the Tutaekuri River measured at Puketapu to be 2000l/s
59.34	Ronald	McFetridge	WaterForce Limited	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend Change 9 in relation to Fernhill Note 2) to make a determination now as to suitability of retaining this site or shifting it.
59.35	Ronald	McFetridge	WaterForce Limited	Schedule 31: Flows, Levels and Allocation Limits	Support	No specific decision requested but states support for Trigger Flow 2400
59.36	Ronald	McFetridge	WaterForce Limited	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend Change 9 so that the consented rate of take remains at 1582l/sec
61.15	Greg	Simpson		Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
62.15	Jonty	Moffett		Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
66.43	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Opposes Fernhill Note 2) and states that the Council needs to demonstrate that the existing site is inappropriate for sound <u>technical reasons and that the new site will not adversely affect existing reliability</u> .
66.44	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	Schedule 31: Flows, Levels and Allocation Limits	Support	Supports Trigger Flow 2400 L/s
66.45	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	Schedule 31: Flows, Levels and Allocation Limits	Support	Amend Allocation Flow Limit 1300l/sec to remain at 1582l/sec
69.15	Jos	Dames	Dames Limited	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
71.15	Carl	Knapp	Bellingham Orchard Ltd.	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
72.15	Justin	Addis	Armada Orchard Ltd	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
73.15	Bevan	Davidson		Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".

77.15	David & Sheryl	Mackie		Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
79.15	Richard	Penreath		Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
82.7	Trevor	Robinson	Lowe Corporation Limited	Schedule 31: Flows, Levels and Allocation Limits	Amend	Amend Schedule 31 to state that the allocation limit for the Heretaunga Plains Water Management Unit is as specified in Policy 37, or alternatively reflects actual and reasonable use over the 10 years prior to 2 May 2020, subject to the application of Policy 50.
86.15	Peter	Scott		Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
91.14	Johnny	Milmine	Berry Farms NZ	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to 'actual and reasonable' to read " actual and reasonable".
95.15	Johnny	Milmine	Prime Limes	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
96.15	Mike	Davis	Davis Orchards Ltd	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
97.16	Lesley	Wilson	DN & LR Wilson Ltd	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
99.29	Jerf	van Beek	Twyford Water	Schedule 31: Flows, Levels and Allocation Limits	Not Stated	Opposes the proposed increase to minimum flow on the Tutaekuri River, as this is not based on requirements of aquatic ecosystems, which is what the minimum flows for all other rivers within the TANK catchments are. Submits that a clear exemption from the allocation limits specified also needs to be included for water used for frost protection purposes – in a similar manner as has been done for water use that utilised stored water. Opposes any potential change to the location of the monitoring site for the Ngaruroro River (as denoted by 'Note 2' to the table). Would support an additional site for the reasons outlined in the PC
99.41	Jerf	van Beek	Twyford Water	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
103.19	Ian	Quinn	Two Terraces Vineyard	Schedule 31: Flows, Levels and Allocation Limits	Support	We support maintaining the current minimum flow setting of 2400lps (at Fernhill) on the Ngaruroro River (Schedule 31)
104.15	John	Loughlin	Rockit Global Limited	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
105.15	Scott	Lawson		Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
106.4	Kane	Koko	Taraia Marae	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Before there is any allocation – the stream should flow at all times of the year. After that there needs to be a community and Maori allocation. Relief sought - Community and Maori allocation first. Reduce over-allocation and abstraction from groundwater and surface water that contribute to low flows in, or no water being available in the karewarewa and Paritua streams.
110.15	Edward	Whyte	Whyte & Co	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
116.9	Alexander John	Macphee		Schedule 31: Flows, Levels and Allocation Limits	Not Stated	The minimum flow for the Maraekakaho River has been raised. There has been no consultation on this and no reason given. It should be restored to the original level
118.1	Hugo	Beamish		Schedule 31: Flows, Levels and Allocation Limits	Oppose	Ngaruroro River - No specific relief sought but opposes Note 2 in relation to Fernhill - the current monitoring site has a significant historical record with flow statistics members
120.176	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Schedule 31: Flows, Levels and Allocation Limits	Not Stated	Table of new minimum flow sites provided
122.15	Richard	Penreath	Ngai Tukairangi Trust	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
123.148	Jenny	Nelson-Smith	Department of Conservation	Schedule 31: Flows, Levels and Allocation Limits	Oppose	List of monitoring bores and groundwater level and quality trigger levels which require groundwater takes to reduce the rate of abstraction if water levels drop below limits that would be set in Schedule 31.
123.149	Jenny	Nelson-Smith	Department of Conservation	Schedule 31: Flows, Levels and Allocation Limits	Amend	Use of terms and overall structure - support with amendments. The meaning of the statement in the Table header is unclear where it states: "The allocation limits do not apply to water abstraction that is enabled by the release of water from water taken at times of high flow and stored for later release (Schedule 32)." The meaning of 'flow maintenance trigger' is not clear in Schedule 31. Clarity required to establish if this applies to connected groundwater
123.150	Jenny	Nelson-Smith	Department of Conservation	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Ahuriri - Set minimum flows for Ahuriri catchment and estuary. Set allocation limits for Ahuriri catchment. There are no minimum flows set for ground or surface water in the Ahuriri catchment. This allows water to be taken at any time regardless of flows in the tributaries
123.151	Jenny	Nelson-Smith	Department of Conservation	Schedule 31: Flows, Levels and Allocation Limits	Not Stated	Karamu - Provide minimum flows and allocation limits which protect indigenous fish and aquatic life in Schedule 31.
123.152	Jenny	Nelson-Smith	Department of Conservation	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Ngaruroro - Increase the minimum flows for Ngaruroro at Fernhill to provide greater habitat at minimum flow for torrentfish and other fastflow indigenous fish
123.153	Jenny	Nelson-Smith	Department of Conservation	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Tutaekuri - Reduce the allocation limit to 20% of MALF.

124.18	Bridget	Margerison	Brownrigg Agriculture Group Ltd	Schedule 31: Flows, Levels and Allocation Limits	Support	Support
127.12	Tania	Eden	Te Taiwhenua o Te Whanganui a Orotu	Schedule 31: Flows, Levels and Allocation Limits	Not Stated	Include schedules of FMUs and freshwater values and clearly define where they apply.
129.39	Ceri	Edmonds	Hawke's Bay Regional Council	Schedule 31: Flows, Levels and Allocation Limits	Amend	Schedule 31E Heretaunga Plains - Delete the Zone 1 groundwater areas that are connected to the Ngaruroro River on Schedule 31E and insert onto Schedule 31C Ngaruroro
130.1	Greg	Morice		Schedule 31: Flows, Levels and Allocation Limits	Oppose	No specific decision requested but raises concerns relating to the Tutaekuri River minimum flow and recent orchard development in the Dartmoor Valley
132.18	Marei	Apatu	Te Taiwhenua o Heretaunga	Schedule 31: Flows, Levels and Allocation Limits	Amend	Freshwater management units should be clearly delineated and use consistent language throughout.
132.65	Marei	Apatu	Te Taiwhenua o Heretaunga	Schedule 31: Flows, Levels and Allocation Limits	Amend	Rename Schedule 31-E as Heretaunga Plains Groundwater Freshwater Management Unit. Expand notified cross-hatching in schedule to include stream-depletion areas for amounts of 0.5 fps or above (as Zones 1 and 2)
132.90	Marei	Apatu	Te Taiwhenua o Heretaunga	Schedule 31: Flows, Levels and Allocation Limits	Amend	Delete table in proposed Schedule 31- Flows, levels and allocation limits and replace with content and structure as in Table 3A of this submission.
132.143	Marei	Apatu	Te Taiwhenua o Heretaunga	Schedule 31: Flows, Levels and Allocation Limits	Amend	Ensure that the minimum flow for the Maraekakaho River maintains surface water connection between the minimum flow site at Tait Road and the confluence with the Ngaruroro River.
132.144	Marei	Apatu	Te Taiwhenua o Heretaunga	Schedule 31: Flows, Levels and Allocation Limits	Amend	Gradually increase the minimum flow for the Maraekakaho River to 150 lps by 01 July 2029.
132.145	Marei	Apatu	Te Taiwhenua o Heretaunga	Schedule 31: Flows, Levels and Allocation Limits	Amend	Impose a specific limit on water abstraction from the Maraekakaho River which requires permit holders to cease taking, and implement a minimum flow regime that provides for and protects instream habitat, groundwater dependent ecosystems and fish passage during the fish spawning and migration seasons.
132.146	Marei	Apatu	Te Taiwhenua o Heretaunga	Schedule 31: Flows, Levels and Allocation Limits	Amend	For Minimum Flow limits in PC9, specify and include an updated schedule that enables 90% habitat provision for a range of fish species including trout and torrent fish, for all main rivers and their tributaries. Amend minimum flow schedules and proposed plan provisions to include flow levels and abstraction limits as in Table 3A below.
132.154	Marei	Apatu	Te Taiwhenua o Heretaunga	Schedule 31: Flows, Levels and Allocation Limits	Amend	Provide for a new flow monitoring site at Raukawa Road for the Paritua and a minimum flow here of 120 lps.
135.64	Anna	Wilkes	Ravensdown Limited	Schedule 31: Flows, Levels and Allocation Limits	Support	Retain Schedule 31 as notified.
141.3	Danny	Angland	Kereru Station	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Would like to see the science behind this and should not be set on modelling alone.
180.71	Charlotte	Drury	Horticulture New Zealand	Schedule 31: Flows, Levels and Allocation Limits	Amend	Amend minimum flow for Tutaekuri River to 2,000l/s. Delete Note 2. Add volume with root stock survival volume/allocation that can be abstracted below minimum flow.
185.15	Allen	Kittow	Tremaine Farms Ltd	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read "actual and reasonable".
186.15	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read "actual and reasonable".
194.108	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Further clarification sought on how/if additional figures are to be added to Schedule 31. Clarification on how the interim allocation limit of 90 million cubic meters aligns with allocation limits in Schedule 31.
194.109	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Schedule 31: Flows, Levels and Allocation Limits	Amend	PRWM considers that a similar policy to Policy TT11 in the RRMP could be applicable to PC9, which provides a methodology for determining whether (or the extent to which) a groundwater take should be treated as hydraulically connected to surface water bodies and thus subject to the same minimum flow restrictions.
195.146	Peter	Matich	Federated Farmers of New Zealand	Schedule 31: Flows, Levels and Allocation Limits	Amend	That Schedule 31 be amended as follows: To allow reallocation of unused allocated water amounts in existing water permits between irrigation users who are within the same Catchment Collective, within any FMU. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
196.16	Julian	Odering	Oderings Nurseries	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read "actual and reasonable".
201.49	Liz	Munroe	Heretaunga Tamatea Settlement Trust	Schedule 31: Flows, Levels and Allocation Limits	Amend	Amendments to the schedule including - amend to apply total instantaneous rate of take limits for TANK rivers and their tributaries, apply a total instantaneous rate of take limit in litres per second for water abstracted from the Heretaunga Plains Aquifer System, and apply a total allocation limit for the Heretaunga Plains/aquifer system with season restrictions of 6 months for irrigation consents. Further amendments outlined in submission.
210.141	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend terms and structure for clarity.
210.142	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 31: Flows, Levels and Allocation Limits	Amend	Introduce a process of staged increases (much like that in the Tukituki PC6) in the Ngaruroro minimum flow at Fernhill, with the first target being 3600 l/s, the 70% habitat protection level required for fast-water fish (and the flow that would provide >90% protection for moderate- and slow-water fish, and >70% protection for invertebrates).25 Further increases to 4000 l/s (80% protection) and 4400 l/s (90% protection) should be considered for dates further into the future.
210.143	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 31: Flows, Levels and Allocation Limits	Amend	Include flows for the Ahuriri catchment. Provide flows in the Karamu and Ahuriri catchment that protect ecosystem health and other values.
210.144	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 31: Flows, Levels and Allocation Limits	Amend	Introduce a system to phase out overallocation in the Tutaekuri-Waimate and Maraekakaho.

210.145	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 31: Flows, Levels and Allocation Limits	Amend	Take a consistent (and robust) approach to setting minimum flows.
210.146	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 31: Flows, Levels and Allocation Limits	Amend	Reduce allocation of Tutaekuri River to 20% of MALF.
211.15	Brian	McLay		Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
214.15	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
215.15	Peter	Dooney	Dooney Partnership	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
217.14	Paul	Paynter	Johnny Appleseed Holdings Ltd	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
218.15	Adrian	Mannering	Irrigation Services	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
219.15	Michael & Julie	Russell		Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
220.15	Steve	Gillum	Gillum Springfield Trust	Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
221.15	WT	Scott		Schedule 31: Flows, Levels and Allocation Limits	Oppose	Amend every reference to "actual and reasonable" to read " actual and reasonable".
225.6	Mary	Tukiwaho		Schedule 31: Flows, Levels and Allocation Limits	Not Stated	This schedule needs to be readdressed, rewritten and an independent governing body to oversee the readdressing and rewriting due to the landowners, farmers, growers or government body, unable to see the detrimental effects their drawing water has on the rivers not to mention the re-routing of natural bodies of water that have served this rohe for hundreds of years.
231.4	Peter	Kay		Schedule 31: Flows, Levels and Allocation Limits	Oppose	Seek Schedule 31 be deleted - no practical reason to increase minimum flows.
241.6	Penny and John	Reynolds		Schedule 31: Flows, Levels and Allocation Limits	Oppose	We oppose the change from 1581 l/s to 1300 l/s. The wording is unclear and we seek clarification.

TANK Planning Map - Schedule 31C Ngaruroro

118.7	Hugo	Beamish		TANK Planning Map - Schedule 31C Ngaruroro	Support	Support Trigger 2400
118.8	Hugo	Beamish		TANK Planning Map - Schedule 31C Ngaruroro	Oppose	Oppose Allocation Flow Limit 1300l/sec. The consented river flow rate should remain at 15821/sec.

Schedule 32: High Flow Allocation

8.28	Rengasamy	Balasubramaniam	Delegat Limited	Schedule 32: High Flow Allocation	Support	Support Schedule 32 Ngaruroro River
23.23	Kerry	Sixtus	Pattullo's Nurseries Limited	Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
23.31	Kerry	Sixtus	Pattullo's Nurseries Limited	Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
29.64	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Schedule 32: High Flow Allocation	Amend	Delete unnecessary asterisk in Schedule 32 - High Flow Allocation: "8,000 litres per second±"
32.23	Kent	Griffiths		Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
32.31	Kent	Griffiths		Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
35.23	Colin	Campbell		Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
35.31	Colin	Campbell		Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
37.23	Greg	Evans	Dartmoor Estate Ltd	Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
37.31	Greg	Evans	Dartmoor Estate Ltd	Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
38.23	Roger	Brownlie		Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
38.31	Roger	Brownlie		Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
43.23	CA & GW	Wilson	Meiros Orchard Ltd	Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
43.31	CA & GW	Wilson	Meiros Orchard Ltd	Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
44.23	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
44.31	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
49.23	John	Parsons		Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
49.31	John	Parsons		Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).

50.18	Alastair & Jo	Lawrence	Olrig Limited	Schedule 32: High Flow Allocation	Not Stated	We consider that HBRC need to undertake an economic analysis of this potential opportunity cost and then look to refine these rules in order to create a practical easily understood, easily complied with framework for farmers to capture some portion of winter surplus and their associated economic benefits. We cannot over-emphasise the imperative to develop a practical, workable framework here particularly for the "summer-dry" climate that farmers work within our part of the Hawkes Bay region.
51.15	Ivan	Knauf	Wairua Dairies Ltd	Schedule 32: High Flow Allocation	Oppose	We oppose the current wording and propose a change of wording. "Up to 10%FRE3 can be allocated that includes allocation included in consents existing 2 May 2020 and 20% for Maori Development."
54.23	Mark	Apatu	Apatu Farms Ltd	Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
54.31	Mark	Apatu	Apatu Farms Ltd	Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
58.38	Peter	Wilson	Hawkes Bay Fish and Game Council	Schedule 32: High Flow Allocation	Amend	No specific relief requested but raises concerns with the lack of high flow definition, no mention of flow sharing, and unclear mainstem limits.
58.39	Peter	Wilson	Hawkes Bay Fish and Game Council	Schedule 32: High Flow Allocation	Amend	Amend relevant flow recording sites to be installed in any catchments that have been consented for high flow applications,
59.37	Ronald	McFetridge	WaterForce Limited	Schedule 32: High Flow Allocation	Support	No specific decision requested but states support for Schedule 32
61.23	Greg	Simpson		Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
61.31	Greg	Simpson		Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
62.23	Jonty	Moffett		Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
62.31	Jonty	Moffett		Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
66.46	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	Schedule 32: High Flow Allocation	Support	Supports Schedule 32
69.23	Jos	Dames	Dames Limited	Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
69.31	Jos	Dames	Dames Limited	Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
71.23	Carl	Knapp	Bellingham Orchard Ltd.	Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
71.31	Carl	Knapp	Bellingham Orchard Ltd.	Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
72.23	Justin	Addis	Armada Orchard Ltd	Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
72.31	Justin	Addis	Armada Orchard Ltd	Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
73.23	Bevan	Davidson		Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
73.31	Bevan	Davidson		Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
77.23	David & Sheryl	Mackie		Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
77.31	David & Sheryl	Mackie		Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
79.23	Richard	Penreath		Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
79.31	Richard	Penreath		Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
86.23	Peter	Scott		Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
86.31	Peter	Scott		Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
91.22	Johnny	Milmine	Berry Farms NZ	Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
91.30	Johnny	Milmine	Berry Farms NZ	Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
95.23	Johnny	Milmine	Prime Limes	Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
95.31	Johnny	Milmine	Prime Limes	Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
96.23	Mike	Davis	Davis Orchards Ltd	Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
96.31	Mike	Davis	Davis Orchards Ltd	Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
97.24	Lesley	Wilson	DN & LR Wilson Ltd	Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
97.32	Lesley	Wilson	DN & LR Wilson Ltd	Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).

99.30	Jerf	van Beek	Twyford Water	Schedule 32: High Flow Allocation	Not Stated	Strongly of the view, that the ability for the community to access and use water harvested during high flows . This is critical to the ongoing success of the horticultural sector in Hawke's Bay, and supports the inclusion of provisions that allow for the abstraction of water at times of high flow. Without this high flow harvesting of this water would have the following results. 1) a significant impediment to the survival of existing horticultural operations that have any development plans . 2) Make the establishment of any new horticultural operations almost impossible. Submits that the allocation limit for the Ngaruroro high flow take should be revisited. The TANK collaborative group did not reach a consensus position on the allocation limit and we believe that the ability to make more water available through harvesting should be revisited, particularly in light of our understanding that a significant portion of the 8,000L/s has already been applied for.
99.49	Jerf	van Beek	Twyford Water	Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
99.57	Jerf	van Beek	Twyford Water	Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
104.23	John	Loughlin	Rockit Global Limited	Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
104.31	John	Loughlin	Rockit Global Limited	Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
105.23	Scott	Lawson		Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
105.31	Scott	Lawson		Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
106.6	Kane	Koko	Taraia Marae	Schedule 32: High Flow Allocation	Oppose	Although damming on the main stream of the Ngaruroro is prohibited, people are still looking to use dams on the streams that flow into the Ngaruroro.
106.7	Kane	Koko	Taraia Marae	Schedule 32: High Flow Allocation	Oppose	Minimum flow site at Turamoe there is always flow. We don't think that HBRC data shows the true picture of the 1.5-2km stretch that is completely dried up. There is no monitoring at that site so it does not show up in the data. Relief Sought: Monitoring at the area that is dried up.
108.11	Brian	Eccles	Jet Boating New Zealand	Schedule 32: High Flow Allocation	Support	Support the criteria set out in the schedule for the Ngaruroro or any tributaries of the Ngaruroro. A Maximum of 8,000 litres/ sec above the trigger of 20 m3/sec is acceptable for this river and its tributaries. Significant concern that the Rules TANK 13-17 enable 20% of any flow. This is opposed by JBNZ. While 8,000 litres/sec is acceptable, leaving the rules as 20% is not.
110.23	Edward	Whyte	Whyte & Co	Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
110.31	Edward	Whyte	Whyte & Co	Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
122.23	Richard	Penreath	Ngai Tukairangi Trust	Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
122.31	Richard	Penreath	Ngai Tukairangi Trust	Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
123.154	Jenny	Nelson-Smith	Department of Conservation	Schedule 32: High Flow Allocation	Oppose	Increase the flow at which high flow allocation can occur. Reduce the amount of high flow allocation. Retain all prohibitions on damming
180.72	Charlotte	Drury	Horticulture New Zealand	Schedule 32: High Flow Allocation	Amend	Amend by adding allocation frameworks for the Karamu and possibly Ahuriri Catchments (depending on feasibility), and revisit allocation for Ngaruroro.
185.23	Allen	Kittow	Tremaine Farms Ltd	Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
185.31	Allen	Kittow	Tremaine Farms Ltd	Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
186.23	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
186.31	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
192.18	Rebecca	Blunden	T&G Global Limited and ENZIL	Schedule 32: High Flow Allocation	Amend	The high flow allocation limit should be revisited.
195.147	Peter	Matich	Federated Farmers of New Zealand	Schedule 32: High Flow Allocation	Amend	That Schedule 32 be amended. Amendments in table shown in submission.
196.24	Julian	Odering	Oderings Nurseries	Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
196.32	Julian	Odering	Oderings Nurseries	Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
210.147	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 32: High Flow Allocation	Amend	Increase the flow value at which high flow allocation is allowed. Reduce the amount of high flow allocation to give effect to the NPSFM and protect the functions of rivers at those flows. Retain prohibition on damming and extend them to all run of river schemes, as per comments earlier in our submission.
211.23	Brian	McLay		Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
211.31	Brian	McLay		Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
214.23	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.

214.31	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
215.23	Peter	Dooney	Dooney Partnership	Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
215.31	Peter	Dooney	Dooney Partnership	Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
217.22	Paul	Paynter	Johnny Appleseed Holdings Ltd	Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
217.30	Paul	Paynter	Johnny Appleseed Holdings Ltd	Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
218.23	Adrian	Mannering	Irrigation Services	Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
218.31	Adrian	Mannering	Irrigation Services	Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
219.23	Michael & Julie	Russell		Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
219.31	Michael & Julie	Russell		Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
220.23	Steve	Gillum	Gillum Springfield Trust	Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
220.31	Steve	Gillum	Gillum Springfield Trust	Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
221.23	WT	Scott		Schedule 32: High Flow Allocation	Oppose	No specific decision requested but states that the allocation limit for high flow takes should be revisited.
221.31	WT	Scott		Schedule 32: High Flow Allocation	Oppose	Amend Change 9 so that high flow allocations are specified for the Karamu, and Ahuriri Catchments (if storage is physically feasible within the Ahuriri Catchment).
225.7	Mary	Tukiwaho		Schedule 32: High Flow Allocation	Not Stated	This needs to be rewritten with an independent governing body made up of tangata whenua and should include All waterways not just our main awa.
241.7	Penny and John	Reynolds		Schedule 32: High Flow Allocation	Oppose	We oppose this schedule for the Ngaruroro river. The wording is unclear and we seek clarification but if this means reduced takes at high flow limits we oppose it.
Schedule 33: Water Permit Expiry Dates						
3.10	Gavin	Yort	Limestone Properties Limited	Schedule 33: Water Permit Expiry Dates	Support	Retain the provision - Ngaruroro Catchment
50.19	Alastair & Jo	Lawrence	Olrig Limited	Schedule 33: Water Permit Expiry Dates	Not Stated	We do not think 15 year expiration for permit rights is adequate. In many cases the associated investment requirement will be significant, the underlying business cases will be long-term in nature and often will be for risk management purposes with lower rates of return. We would contend that 30 years is more appropriate. Where large investments have been made, permit whatever duration is applied, renewals should be automatic, unless there has been a material adverse change to overall water supply.
58.40	Peter	Wilson	Hawkes Bay Fish and Game Council	Schedule 33: Water Permit Expiry Dates	Amend	No specific relief requested but state that catchment expiry dates may be inconsistent with consent term limits as applied by policy
59.38	Ronald	McFetridge	WaterForce Limited	Schedule 33: Water Permit Expiry Dates	Support	No specific decision requested but states support for Schedule 33
66.47	Anthony	Davoren	Ngaruroro Irrigation Society Incorporated	Schedule 33: Water Permit Expiry Dates	Support	Supports Schedule 34
106.5	Kane	Koko	Taraia Marae	Schedule 33: Water Permit Expiry Dates	Oppose	The TANK plan change has identified that there is over allocation. We can identify that our stream dries up. Relief sought - Urgency made to look to reduce allocations as soon as TANK becomes operative, not ten years later in 2033 (or whenever).
116.1	Alexander John	Macphee		Schedule 33: Water Permit Expiry Dates	Not Stated	15 years may not provide certainty for irrigation schemes to be financially viable and a longer period would be more acceptable.
124.19	Bridget	Margerison	Brownrigg Agriculture Group Ltd	Schedule 33: Water Permit Expiry Dates	Support	Support
132.161	Marei	Apatu	Te Taiwhenua o Heretaunga	Schedule 33: Water Permit Expiry Dates	Amend	Oppose TANK Rules 9, 10, 11, and Schedule 33 until the objectives and policies have been more integrated with the RPS and NPS-FM provisions, and the rules have been amended to: <ul style="list-style-type: none"> •delete all references to "actual and reasonable" use and other provisions relating to this criteria, and make the rules for water abstraction for irrigation purposes discretionary activities. •Delete all "Stream Flow Maintenance Scheme" provisions. •Require consent renewals to occur upon consent expiry or when PC9 becomes operative, whichever occurs first. •Reduce total consent volumes for groundwater takes (Heretaunga Plains Groundwater) so the total is within a 70 Million m3 per year limit. •Require groundwater takes to operate within a cumulative rate of take limit in litres per second. •Require high flow allocation to operate within both volumetric and cumulative rate of take limits. •Include stream depletion rates of 0.5 lps and above, and associated depletion volumes, within surface water take limits (for the affected surface water body). •Prescribe seasonal irrigation restrictions from 1 November to 30 April for each consent to take groundwater or surface water for irrigation. •Amend schedule 33 to reflect the changes above •Restrict takes within Water Management Zones identified in Operative Schedule Via and link this Schedule to TANK rules. •Amend Rule 54 to include PC9 provisions where relevant

135.65	Anna	Wilkes	Ravensdown Limited	Schedule 33: Water Permit Expiry Dates	Amend	Amend Schedule 33 as follows: <i>Refer to Policy 45 49 and Rules TANK 9 - 11. The Council will consider the following Schedule when determining the duration of any permit, <u>or the inclusion of a review condition reflecting the same timeframe</u>, to take and use water. Where appropriate, the duration of the consent <u>and/or the review condition</u> will be consistent with the next common expiry date for the relevant water management as shown in this Schedule. If an application is made up to three years before the next due date for the relevant zone, the Council may issue the permit for the following expiry date <u>or include a review condition reflecting the same timeframe</u>.</i> <i>For applications in an area for which no expiry date is specified, the duration of the consent will be a matter for Council's discretion.</i>
194.110	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Schedule 33: Water Permit Expiry Dates	Oppose	Schedule 33 should refer to Policy 49, not Policy 45. Clarification and consistency across the RRMP in order to streamline the review/renewal processes across all catchments within the region.
195.148	Peter	Matich	Federated Farmers of New Zealand	Schedule 33: Water Permit Expiry Dates	Amend	That all expiry dates in Schedule 33 be amended to a minimum of 20-year intervals And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
225.8	Mary	Tukiwaho		Schedule 33: Water Permit Expiry Dates	Not Stated	This needs to be readdressed, definitely rewritten and a new management and co-governing body to be implemented.
Schedule 34: Urban Site Specific Stormwater Management Plan						
63.46	Keith	Marshall	Napier City Council	Schedule 34: Urban Site Specific Stormwater Management Plan	Support	Delete the word "Urban" in the heading to Schedule.
63.47	Keith	Marshall	Napier City Council	Schedule 34: Urban Site Specific Stormwater Management Plan	Amend	Amend the Site Management Plan (SMP) reference wherever it appears in the Plan Change to read: "Site Specific Stormwater Management Plan (SSSMP)"
63.48	Keith	Marshall	Napier City Council	Schedule 34: Urban Site Specific Stormwater Management Plan	Amend	Amend the 3rd bullet point in (5) to read: - "Source control: methods of good site management <u>including contingency measures in event of a spill or hazardous event.</u> "
135.66	Anna	Wilkes	Ravensdown Limited	Schedule 34: Urban Site Specific Stormwater Management Plan	Amend	Amend Schedule 34 by amending references to all 'Urban Site Specific Stormwater Management Plan' as follows: Urban Site Specific Stormwater Management Plan
207.64	Mark	Clews	Hastings District Council	Schedule 34: Urban Site Specific Stormwater Management Plan	Support	Delete the word "Urban" in the heading to Schedule.
207.65	Mark	Clews	Hastings District Council	Schedule 34: Urban Site Specific Stormwater Management Plan	Amend	Amend the Site Management Plan (SMP) reference wherever it appears in the Plan Change to read: "Site Specific Stormwater Management Plan (SSSMP)"
207.66	Mark	Clews	Hastings District Council	Schedule 34: Urban Site Specific Stormwater Management Plan	Amend	Amend the 3rd bullet point in (5) to read: - "Source control: methods of good site management <u>including contingency measures in event of a spill or hazardous event.</u> "
225.9	Mary	Tukiwaho		Schedule 34: Urban Site Specific Stormwater Management Plan	Not Stated	This schedule is a joke and needs to be re-address with stronger monitoring, maintenance and penalties to be put in place due to the monitoring system is undermanned for competent and regular maintenance to be of any proven validity. There needs to be a penalty to be put into place as well as the HDC to take full responsibility of the downfalls that have been happening far too long.
Schedule 35: Source Protection for Drinking Water Supplies						
10.13	David	Renouf		Schedule 35: Source Protection for Drinking Water Supplies	Amend	Amend Schedule 35 - That the alignment of the Heretaunga Plains Unconfined Aquifer boundary be updated. That the Hawke's Bay Regional Council updates the Schedule maps and includes the <u>full extent</u> of the Heretaunga Plains Unconfined Aquifer in all 'Hawke's Bay Regional Resource Management Plan' Maps – example Schedule IV, Va, Vlb <u>Delay</u> PC9 if required so that Sky TEM Aquifer Mapping Project data can be included into PC9 so that there is no need for a separate time wasting and costly process at some latter date.
10.14	David	Renouf		Schedule 35: Source Protection for Drinking Water Supplies	Amend	That HBRC and Hastings District Council jointly form up Source Protection Zone 3 for all HDC registered drinking water wells and Source Protection Conjunctive zone, which will comply with the ("Technical Guidelines") Amend Schedule 35 – Add the wording "That 'Registered' drinking water wells that provide small communities with less than 501 people shall have Source Protection Zones." Add to HBRC PC9 – SPZ Map Hastings District Council registered drinking water wells 542, 1658, 16671 at Clive, 473 at Whakatu, 10334 at Omahu
58.41	Peter	Wilson	Hawkes Bay Fish and Game Council	Schedule 35: Source Protection for Drinking Water Supplies	Amend	Amend to include Fish and Game
63.61	Keith	Marshall	Napier City Council	Schedule 35: Source Protection for Drinking Water Supplies	Support	No specific decision requested but state support for the spatial definition of Source Protection Zones around the Napier water supply bores
119.11	Liz	Lambert	Hawke's Bay Drinking Water Governance Joint Committee	Schedule 35: Source Protection for Drinking Water Supplies	Support	Support, noting that the findings from the HBRC SkyTem Study may better inform the methodology options once they are received. See also our commentary on the source protection zone maps

132.100	Marei	Apatu	Te Taiwhenua o Heretaunga	Schedule 35: Source Protection for Drinking Water Supplies	Amend	Provide an updated schedule or map for Drinking Water Source Protection Zones, and append a separate table and map identifying the townships/settlements of Omahu, Bridge Pa, Whakatu, Waipatu, Clive and Haumoana. Include elevated protection provisions in PC9 for domestic water supplies from groundwater in these communities. Extend the boundaries for Zone 3 to include substantially more area of the unconfined aquifer, and conjunctive and recharge zones.
135.67	Anna	Wilkes	Ravensdown Limited	Schedule 35: Source Protection for Drinking Water Supplies	Amend	Retain Schedule 35 as notified, including the reference to the <i>“Registered Drinking Water Supply Protection Zone map layers on the HBRC website”</i> , And , amend this ‘map layer’ reference, and all associated references, by clearly stating that the maps are ‘not planning maps’.
135.69	Anna	Wilkes	Ravensdown Limited	Schedule 35: Source Protection for Drinking Water Supplies	Amend	Amend Map 2 to reflect the extent of the Awototo Water Source Protection Zone required to manage the potential risks to the Napier drinking water supply.
194.111	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Schedule 35: Source Protection for Drinking Water Supplies	Oppose	Clarification on how activities in SPZ’s are to be regulated given that the SPZ area are subject to change. Clarification on how/if PC9 would incorporate a potential change to the National Environmental Standard for Sources of Human Drinking Water. Paragraph 2 of Schedule 35 should be amended to remove reference to ‘the maps showing the spatial extent of these areas are shown below’ as it is understood that these SPZ maps excluded from PC9.
195.149	Peter	Matich	Federated Farmers of New Zealand	Schedule 35: Source Protection for Drinking Water Supplies	Amend	That Schedule 35 be amended so that: Provisions for drinking water source protection be amended to recognise that the risk of contamination of drinking water supplies is not uniform across the entire area of each provisional Water Source Protection Zone, and that factors such as: •the distance/proximity of other land use activities to each drinking water supply abstraction point; and •specific characteristics of various potential contaminant pathways entering the source water may reduce contaminants in source water (such as subsoil nitrification and denitrification processes) that, can reduce the level of risk of contamination of source water. And that the associated maps for provisional source water protection zones be re-drawn accordingly. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
203.31	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	Schedule 35: Source Protection for Drinking Water Supplies	Support	Retain as notified.
207.49	Mark	Clews	Hastings District Council	Schedule 35: Source Protection for Drinking Water Supplies	Amend	Amend paragraph 5 of Schedule 35 by adding the words in bold italics as follows: <i>“The location and spatial extent of a Source Protection Zone around a Registered Drinking Water Supply are to be determined using appropriate technical guidance provided via any relevant National Environmental Standard, National Policy Statement or technical guidance document endorsed by the Ministry for the Environment, or using site specific information listed in Table 2 below and according to the minimum requirements for the relevant population in Table 3.”</i>
207.50	Mark	Clews	Hastings District Council	Schedule 35: Source Protection for Drinking Water Supplies	Amend	Add to Schedule 35 the following or similar: <i>“For avoidance of doubt, the term “Source Protection Zone” or “SPZ” in this Plan includes provisional SPZs and SPZs defined in accordance with this Schedule”</i>
207.51	Mark	Clews	Hastings District Council	Schedule 35: Source Protection for Drinking Water Supplies	Amend	Amend Matters of Consideration in relevant rules to include Source Protection Extents (i.e. to make these considerations explicit for activities which already require a consent, but are located in the source protection area for smaller supplies)
225.1	Mary	Tukiwaho		Schedule 35: Source Protection for Drinking Water Supplies	Not Stated	This schedule is also a joke especially when HDC and HBRC does not take full responsibility of their bad management ?this is putting it nicely? for the despicable way the drinking water supply now has bleach in it to mask the quality of bad water. It needs a better management system to be put in place.
Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme						
8.39	Rengasamy	Balasubramaniam	Delegat Limited	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Oppose Schedule 36 - Amend Policies 39, 40 and 45 and Schedule 36 to enable an individual consent holder to mitigate their stream depletion effects, including though the use of stored water captured at times of high river flow.
23.49	Kerry	Sixtus	Pattullo's Nurseries Limited	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
23.53	Kerry	Sixtus	Pattullo's Nurseries Limited	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
23.56	Kerry	Sixtus	Pattullo's Nurseries Limited	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
32.49	Kent	Griffiths		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.

32.53	Kent	Griffiths		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
32.56	Kent	Griffiths		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
35.49	Colin	Campbell		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
35.53	Colin	Campbell		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
35.56	Colin	Campbell		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
37.49	Greg	Evans	Dartmoor Estate Ltd	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
37.53	Greg	Evans	Dartmoor Estate Ltd	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
37.56	Greg	Evans	Dartmoor Estate Ltd	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
38.49	Roger	Brownlie		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
38.53	Roger	Brownlie		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
38.56	Roger	Brownlie		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
43.49	CA & GW	Wilson	Meiros Orchard Ltd	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
43.53	CA & GW	Wilson	Meiros Orchard Ltd	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
43.56	CA & GW	Wilson	Meiros Orchard Ltd	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
44.49	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
44.53	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
44.56	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
49.49	John	Parsons		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
49.53	John	Parsons		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.

49.56	John	Parsons		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
54.49	Mark	Apatu	Apatu Farms Ltd	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
54.53	Mark	Apatu	Apatu Farms Ltd	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
54.56	Mark	Apatu	Apatu Farms Ltd	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
61.49	Greg	Simpson		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
61.53	Greg	Simpson		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
61.56	Greg	Simpson		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
62.49	Jonty	Moffett		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
62.53	Jonty	Moffett		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
62.56	Jonty	Moffett		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
69.49	Jos	Dames	Dames Limited	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
69.53	Jos	Dames	Dames Limited	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
69.56	Jos	Dames	Dames Limited	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
71.49	Carl	Knapp	Bellingham Orchard Ltd.	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
71.53	Carl	Knapp	Bellingham Orchard Ltd.	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
71.56	Carl	Knapp	Bellingham Orchard Ltd.	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
72.49	Justin	Addis	Armada Orchard Ltd	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
72.53	Justin	Addis	Armada Orchard Ltd	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
72.56	Justin	Addis	Armada Orchard Ltd	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.

73.49	Bevan	Davidson		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
73.53	Bevan	Davidson		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
73.56	Bevan	Davidson		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
77.49	David & Sheryl	Mackie		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
77.53	David & Sheryl	Mackie		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
77.56	David & Sheryl	Mackie		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
79.49	Richard	Penreath		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
79.53	Richard	Penreath		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
79.56	Richard	Penreath		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
86.49	Peter	Scott		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
86.53	Peter	Scott		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
86.56	Peter	Scott		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
91.48	Johnny	Milmine	Berry Farms NZ	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
91.52	Johnny	Milmine	Berry Farms NZ	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
91.55	Johnny	Milmine	Berry Farms NZ	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
95.49	Johnny	Milmine	Prime Limes	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
95.53	Johnny	Milmine	Prime Limes	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
95.56	Johnny	Milmine	Prime Limes	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
96.49	Mike	Davis	Davis Orchards Ltd	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.

96.53	Mike	Davis	Davis Orchards Ltd	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
96.56	Mike	Davis	Davis Orchards Ltd	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
97.50	Lesley	Wilson	DN & LR Wilson Ltd	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
97.54	Lesley	Wilson	DN & LR Wilson Ltd	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
97.58	Lesley	Wilson	DN & LR Wilson Ltd	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
99.31	Jerf	van Beek	Twyford Water	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Not Stated	Supports a collective approach to the management of the stream depletion effects of groundwater takes. Twyford Water acknowledges how successful the augmentation scheme established in our area has been, it does note that it cannot be expected that the same approach to scheme development, nor uptake will occur elsewhere within the TANK catchments, as the context in every case will differ, therefore it is critically important that the drafting of Schedule 36 provides the flexibility and adaptability that will be required to enable successful schemes to be set up.
99.75	Jerf	van Beek	Twyford Water	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
99.79	Jerf	van Beek	Twyford Water	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
99.82	Jerf	van Beek	Twyford Water	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
104.49	John	Loughlin	Rockit Global Limited	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
104.53	John	Loughlin	Rockit Global Limited	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
104.56	John	Loughlin	Rockit Global Limited	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
105.49	Scott	Lawson		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
105.53	Scott	Lawson		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
105.56	Scott	Lawson		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
110.49	Edward	Whyte	Whyte & Co	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
110.53	Edward	Whyte	Whyte & Co	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
110.56	Edward	Whyte	Whyte & Co	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.

122.49	Richard	Penreath	Ngai Tukairangi Trust	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
122.53	Richard	Penreath	Ngai Tukairangi Trust	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
122.56	Richard	Penreath	Ngai Tukairangi Trust	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
123.155	Jenny	Nelson-Smith	Department of Conservation	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Stream flow maintenance and habitat enhancement scheme. It is inappropriate and uncertain to devolve this responsibility to a yet to be established third party. All water permit holder should be subject to cease take at minimum flows to manage the adverse effects of stream depletion and low flows on life-supporting capacity, ecosystem health and other instream freshwater values.
123.156	Jenny	Nelson-Smith	Department of Conservation	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	The comment that a permit may have stream depletion effects on more than one stream is very important. As it appears to contradict the term 'Affected Stream' in the glossary.
180.73	Charlotte	Drury	Horticulture New Zealand	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Amend	Amend schedule by deleting substantial amount of detail
185.49	Allen	Kittow	Tremaine Farms Ltd	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
185.53	Allen	Kittow	Tremaine Farms Ltd	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
185.56	Allen	Kittow	Tremaine Farms Ltd	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
186.49	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
186.53	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
186.56	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
194.112	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Amend	Amend the fourth paragraph to refer to TANK 9, not TANK 8. PRWM considers that a similar policy to Policy TT11 in the RRMP could be applicable to PC9, which provides a methodology for determining whether (or the extent to which) a groundwater take should be treated as hydraulically connected to surface water bodies and thus subject to the same minimum flow restrictions.
195.150	Peter	Matich	Federated Farmers of New Zealand	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Amend	That Schedule 36 be amended as follows: That the Schedule be re-written so that Catchment Collective participation in Heretaunga Plains Stream Flow Maintenance and/or Habitat Enhancement schemes is voluntary for those collectives that choose to participate through application for resource consent under Rule TANK 18. And any consequential amendments needed to give effect to the above relief or to otherwise satisfy our concerns.
196.50	Julian	Odering	Oderings Nurseries	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
196.54	Julian	Odering	Oderings Nurseries	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
196.58	Julian	Odering	Oderings Nurseries	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
201.50	Liz	Munroe	Heretaunga Tamatea Settlement Trust	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Water augmentation would be better approached as a plan change in its own right once all the relevant robust research has been undertaken. Delete all augmentation provisions from PC9 with the exception of Paritua stream.

210.148	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Amend	Delete all references to streamflow enhancement/maintenance/augmentation throughout the plan
211.49	Brian	McLay		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
211.53	Brian	McLay		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
211.56	Brian	McLay		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
214.49	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
214.53	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
214.56	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
215.49	Peter	Dooney	Dooney Partnership	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
215.53	Peter	Dooney	Dooney Partnership	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
215.56	Peter	Dooney	Dooney Partnership	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
217.48	Paul	Paynter	Johnny Appleseed Holdings Ltd	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
217.52	Paul	Paynter	Johnny Appleseed Holdings Ltd	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
217.55	Paul	Paynter	Johnny Appleseed Holdings Ltd	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
218.49	Adrian	Mannering	Irrigation Services	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
218.53	Adrian	Mannering	Irrigation Services	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
218.56	Adrian	Mannering	Irrigation Services	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
219.49	Michael & Julie	Russell		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
219.53	Michael & Julie	Russell		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
219.56	Michael & Julie	Russell		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.

220.49	Steve	Gillum	Gillum Springfield Trust	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
220.53	Steve	Gillum	Gillum Springfield Trust	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
220.56	Steve	Gillum	Gillum Springfield Trust	Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
221.49	WT	Scott		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 so that Schemes can be developed by the regional council in a progressive manner based on when water permits expire, in an equitable manner over a reasonable timeframe that apportions the cost equally and concomitantly across all takes affecting groundwater levels rather than relying on consent applicants to develop schemes.
221.53	WT	Scott		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to ensure that flow maintenance requirements only apply to lowland streams where it is feasible.
221.56	WT	Scott		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Oppose	Amend Change 9 to remove the presumption that the mainstem of the Ngaruroro River will be augmented in whole or in part and reflect the TANK collaborative group's position that augmentation should be investigated.
225.11	Mary	Tukiwaho		Schedule 36: Heretaunga Plains Stream Flow Maintenance And Habitat Enhancement Scheme	Not Stated	This would also need to be readdressed, rewritten in certain areas and to be managed alongside tangata whenua.
Section A: Plan Development						
123.157	Jenny	Nelson-Smith	Department of Conservation	Section A: Plan Development	Oppose	Change to: 1. The development of a flow maintenance and habitat enhancement scheme must consider the views of mana whenua in relation to; a) scheme design elements aimed at improving ecological health of affected water bodies and groundwater dependent ecosystems;
Section B: Plan Requirements						
123.158	Jenny	Nelson-Smith	Department of Conservation	Section B: Plan Requirements	Oppose	To add to point 4: 1. groundwater and surface water abstractions, 2. contaminant sources (to avoid abstracting contaminated groundwater especially where it might discharge directly into surface water. This also ties in with Schedule 6) 3. stock drinking irrigation water races
Section C: Requirements for Water User Collective Plan						
123.159	Jenny	Nelson-Smith	Department of Conservation	Section C: Requirements for Water User Collective Plan	Oppose	Change to: 5. The Plan must include information as relevant about; a) The Stream Depletion Calculator or suitable alternative method where it provides a more reliable/ defensible prediction of effects is used to calculate the total surface water depletion in litres per second for each permit that is subject to this Collective. 5d - Amend - Need to include environmental benefits of any storage scheme both up and down stream plus at the actual site.
General comments - Proposed TANK Plan Change 9						
1.2	Ben	Goodwin		Proposed TANK Plan Change 9	Amend	I think that a provision needs to be made for farms on the boundary of two catchments, such that the rules of the catchment in which the majority of a farming enterprise is in, should apply to the whole farm and the rules of the minor catchment shouldn't apply. This would reduce the confusion and cost if rules differ from catchment to catchment.
3.12	Gavin	Yort	Limestone Properties Limited	Proposed TANK Plan Change 9	Amend	Any consequential amendments required to other parts of PC 9 as a result of submission points 3.1 - 3.11.
4.1	Des	Ratima	Takitimu District Maori Council	Proposed TANK Plan Change 9	Oppose	This submission questions the right of the Hawkes Bay Regional Council or any other authority to manage or utilise water as a commodity as though they had ownership rights.
4.2	Des	Ratima	Takitimu District Maori Council	Proposed TANK Plan Change 9	Oppose	There is already an admission in the plan change document that water is taonga and therefore is subject to Article 2 of the Treaty of Waitangi. The language used throughout the proposed plan change is the language of ownership. The Waitangi Tribunal found that there is no owner.
4.3	Des	Ratima	Takitimu District Maori Council	Proposed TANK Plan Change 9	Oppose	To achieve the role and authority of Maori in resource management recommended by the Waitangi Tribunal and also included in the plan change document, Plan Change 9 does not meet the terms of consultation and frame working the resource management processes and does not provide any clear indication where Maori were provided the role and authority to contribute to a solution of water management.
4.4	Des	Ratima	Takitimu District Maori Council	Proposed TANK Plan Change 9	Oppose	Any plan change affecting the management and allocation of water resources must be consistent with the recommendations of the Waitangi Tribunal findings and recommendations.

4.5	Des	Ratima	Takitimu District Maori Council	Proposed TANK Plan Change 9	Oppose	The inability of local authorities to impose any restrictions regarding water allocation for water bottling emphasises the inequitable relationship between iwi hapu and government in being able to provide governance and management of taonga and an asset.
4.6	Des	Ratima	Takitimu District Maori Council	Proposed TANK Plan Change 9	Oppose	The Plan Change 9 does not proceed.
4.7	Des	Ratima	Takitimu District Maori Council	Proposed TANK Plan Change 9	Oppose	That HBRC/RPC work with Maori to determine the structure and relationship for co governance of water
4.8	Des	Ratima	Takitimu District Maori Council	Proposed TANK Plan Change 9	Oppose	That all future water management and allocation come under the authority of any proposed new structure.
8.29	Rengasamy	Balasubramaniam	Delegat Limited	Proposed TANK Plan Change 9	Amend	Any consequential amendments required to other parts of PC9 as a result of the relief relating to submission points 8.1-8.28.
8.52	Rengasamy	Balasubramaniam	Delegat Limited	Proposed TANK Plan Change 9	Amend	Any consequential amendments to other parts of PC9 as a result of the specified relief sought in submission points 8.30 - 8.51.
10.20	David	Renouf		Proposed TANK Plan Change 9	Amend	Amend RRMP Policy 78A(1)(b) - Add (c) 'Where possible positive artesian be maintained under abstraction conditions'
11.10	Matt	Edwards		Proposed TANK Plan Change 9	Amend	The future of Water Bottling. A contentious topic. This activity is OK if there is plenty of water but if not it should be phased out as it doesn't have to be located locally. There's plenty of good water elsewhere, it will just cost more to make use of alternative sources for this activity.
13.1	Alec	Duncan	Fire and Emergency New Zealand	Proposed TANK Plan Change 9	Amend	Amend the provisions of PC9 by making the changes set out in submission points 13.2 - 13.14, including any further or consequential relief that may be necessary to address the matters raised in this submission.
14.1	Ryan	Fraser		Proposed TANK Plan Change 9	Support	SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that best balances the values and interests of the Hawke's Bay community.
14.15	Ryan	Fraser		Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reached by the TANK Group community representatives.
15.1	Andrea and Phil	Cranswick	Meridiam Trust	Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that best balances the values and interests of the Hawke's Bay community.
15.2	Andrea and Phil	Cranswick	Meridiam Trust	Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reached by the TANK Group community representatives.
15.3	Andrea and Phil	Cranswick	Meridiam Trust	Proposed TANK Plan Change 9	Not Stated	SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
16.7	Bernadette	Hamlin		Proposed TANK Plan Change 9	Oppose	No specific decision requested but states that Change 9 does not give effect to the National Policy Statement for Freshwater Management.
16.8	Bernadette	Hamlin		Proposed TANK Plan Change 9	Oppose	No specific decision requested but states that Change 9 does not promote the sustainable management of freshwater resources.
16.9	Bernadette	Hamlin		Proposed TANK Plan Change 9	Oppose	No specific decision requested but states that Change 9 has shown the disregard Council has in providing for the relationship of Maori with their ancestral waters and other taonga.
16.10	Bernadette	Hamlin		Proposed TANK Plan Change 9	Oppose	Amend Change 9 so that assessment criteria are introduced in relation to provision for the relationship of Maori with their ancestral waters and other taonga.
16.12	Bernadette	Hamlin		Proposed TANK Plan Change 9	Oppose	Amend Change 9 so that marae (local) are able to manage own areas of influence.
17.1	Richard	Riddell	Olrig Limited	Proposed TANK Plan Change 9	Support	Support the purpose of PC9 to give effect to the HBRC Policy Statement as well as the NPS FM.
18.1	Mark	Cairns	MD Cairns & AR Wright Partnership	Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that best balances the values and interests of the Hawke's Bay community.
18.2	Mark	Cairns	MD Cairns & AR Wright Partnership	Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reached by the TANK Group community representatives.
18.3	Mark	Cairns	MD Cairns & AR Wright Partnership	Proposed TANK Plan Change 9	Not Stated	I SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
19.1	John	Palmer		Proposed TANK Plan Change 9	Support	Support the Ngaruroro Irrigation Society's view that there should be no reduction in the rates of take.
20.1	Bruce	Nimon		Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that best balances the values and interests of the Hawke's Bay community.
20.2	Bruce	Nimon		Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reached by the TANK Group community representatives.
20.3	Bruce	Nimon		Proposed TANK Plan Change 9	Not Stated	SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
21.1	Robert & Helen	Patullo	Newstead Farm Ltd	Proposed TANK Plan Change 9	Support	Support the purpose of PC9 to give effect to the HBRC Policy Statement as well as the NPS FM.
23.1	Kerry	Sixtus	Pattullo's Nurseries Limited	Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
23.4	Kerry	Sixtus	Pattullo's Nurseries Limited	Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
23.5	Kerry	Sixtus	Pattullo's Nurseries Limited	Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.

23.6	Kerry	Sixtus	Pattullo's Nurseries Limited	Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
23.7	Kerry	Sixtus	Pattullo's Nurseries Limited	Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
23.75	Kerry	Sixtus	Pattullo's Nurseries Limited	Proposed TANK Plan Change 9	Not Stated	No specific decision requested but states that the current proposals fail to adequately take into account the impacts on the horticultural industries and the subsequent flow on effects of these impacts on the horticultural industries based on the Heretaunga Plains.
24.1	Jim	Watt	Saint Columba's Havelock North Environment Group (SCHNEG)	Proposed TANK Plan Change 9	Support	Provide an over-arching and appreciated account of HBRC's proposals for protecting and improving freshwater QUALITY, healthy ecosystems, and the management of water QUANTITY. But they also provide a level of bureaucratic detail (Rules and Schedules) that is beyond lay comprehension. We take the latter as subordinate to the former and trust in its professional and exacting detail.
24.4	Jim	Watt	Saint Columba's Havelock North Environment Group (SCHNEG)	Proposed TANK Plan Change 9	Support	Establish a solid framework, thanks to an early and a necessarily committed involvement with the COMMUNITY over some 6 years.
24.5	Jim	Watt	Saint Columba's Havelock North Environment Group (SCHNEG)	Proposed TANK Plan Change 9	Support	Culminate in a COMPLEX of policies, rules, and schedules that make up the proposed PlanChange 9 of the Regional Resource Management Plan. - but all difficult to comment on without detailed and professional study.
24.6	Jim	Watt	Saint Columba's Havelock North Environment Group (SCHNEG)	Proposed TANK Plan Change 9	Amend	Implementation We respectfully suggest that HBRC reviews its connections and considers the possible practicality of having a dedicated field staff member in each catchment to act as the ear sand eyes of Council, and who would act as the first link in a communication network. The right person would liase with land owners with knowledge, insight, and good humour, and act as the latter's prime point of contact with Council. We suggest that this Plan Change could be most practically put into effect at this field level first and foremost.
24.7	Jim	Watt	Saint Columba's Havelock North Environment Group (SCHNEG)	Proposed TANK Plan Change 9	Not Stated	The Plan Change makes no reference to <u>head-water areas</u> and management policies which protect these areas in good hydrologic condition. The ash soils of the headwaters of the Ngaruroro and Tutaeuri are fundamental in their ability to sustain low base flows in dry periods. Is there an understanding between DoC and HBRC on headwater responsibility?
24.8	Jim	Watt	Saint Columba's Havelock North Environment Group (SCHNEG)	Proposed TANK Plan Change 9	Not Stated	Likewise, it is not apparent as to what <u>analyses</u> have been made of <u>river flows in true time sequences</u> . The natural TIMING of flows is a dynamic to which water use must be in tune.
25.1	Xan	Harding		Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that <u>best balances the values and interests of the Hawke's Bay community</u> .
25.2	Xan	Harding		Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reached by the TANK Group community representatives.
25.3	Xan	Harding		Proposed TANK Plan Change 9	Not Stated	I SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
25.20	Xan	Harding		Proposed TANK Plan Change 9	Amend	Seeks an integrated and holistic Plan Change that promotes flexibility of land use for Hawke's Bay's versatile soils, recognising the fundamental importance of broad access to affordable irrigation water as a key versatility constraint and a key public good <u>on large tracts of the soils of the Heretaunga Plains</u> .
26.1	Robin	Back	Dunvegan Estate	Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that <u>best balances the values and interests of the Hawke's Bay community</u> .
26.2	Robin	Back	Dunvegan Estate	Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reachedby the TANK Group community representatives.
26.3	Robin	Back	Dunvegan Estate	Proposed TANK Plan Change 9	Not Stated	I SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
28.1	Hamish	Clark	Saint Clair Family Estate Ltd	Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that <u>best balances the values and interests of the Hawke's Bay community</u> .
28.2	Hamish	Clark	Saint Clair Family Estate Ltd	Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reachedby the TANK Group community representatives.
28.3	Hamish	Clark	Saint Clair Family Estate Ltd	Proposed TANK Plan Change 9	Not Stated	I SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
29.1	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Proposed TANK Plan Change 9	Support	HBWG supports the overall intent of PC9, as a collaborative community approach to implementing the National Policy Statement - Freshwater Management 2014, (Amended 2017) (NPS-FM).
29.2	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Proposed TANK Plan Change 9	Oppose	HBWG opposes a number of matters of detail in the notified version of PC9. Summaries of key areas of concern provided.
29.3	Xan	Harding	Hawke's Bay Winegrowers' Association Inc.	Proposed TANK Plan Change 9	Support	HBWG supports PC9 in broad principle, as the product of a 7-year community collaborative process (TANK)
31.1	Bernie	Kelly	Hawke's Bay Canoe Club	Proposed TANK Plan Change 9	Not Stated	There is very little account of any regulation that would protect any of the proven attributes for recreational users of the Upper Ngaruroro River. The plan doesn't even delineate that particular part of the river, rather treating the entire length from source to sea as one river.
31.2	Bernie	Kelly	Hawke's Bay Canoe Club	Proposed TANK Plan Change 9	Not Stated	When talking about Adverse Effects the term other users is too broad. To uphold the outstanding values for the purpose of Whitewater Kayaking, we need to have absolute surety that these values are protected for the benefit of kayaking.

31.5	Bernie	Kelly	Hawke's Bay Canoe Club	Proposed TANK Plan Change 9	Not Stated	View that upholding the validity of a Water Conservation Order over the Ngaruroro River would ultimately give the river higher protection status which has proven to be of National significance of which Whitewater NZ as one of the 5 applicants we the <u>Hawke's Bay Canoe Club support.</u>
32.1	Kent	Griffiths		Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
32.4	Kent	Griffiths		Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
32.5	Kent	Griffiths		Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
32.6	Kent	Griffiths		Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
32.7	Kent	Griffiths		Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
34.1	Jonathan	Hamlet	Craggy Range Vineyards Limited	Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that <u>best balances the values and interests of the Hawke's Bay community.</u>
34.2	Jonathan	Hamlet	Craggy Range Vineyards Limited	Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reached by the TANK Group community representatives.
34.3	Jonathan	Hamlet	Craggy Range Vineyards Limited	Proposed TANK Plan Change 9	Not Stated	I SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
35.1	Colin	Campbell		Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
35.4	Colin	Campbell		Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
35.5	Colin	Campbell		Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
35.6	Colin	Campbell		Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission or Beef and Lamb and Federated Farmers submission, where they align with this submission.
35.7	Colin	Campbell		Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
36.2	Karen	Morrish	Mr Apple New Zealand Ltd	Proposed TANK Plan Change 9	Not Stated	Generally support PC9 and its provisions. However there may be a range of general refinements to its provisions that are required to: (a) achieve sustainable management purpose of the RMA and Part 2 of the Act, including those relating to social and economic well-being and the efficient use of resources (b) give effect to or be more consistent with the relevant objectives, policies and other provisions of the NPS FM 202, RPS and the RRMP (c) better reflect the cost-benefit requirements and considerations under s32 of the Act.
36.3	Karen	Morrish	Mr Apple New Zealand Ltd	Proposed TANK Plan Change 9	Amend	In respect of both the general, and particular submissions, all associated, consequential or other relief relevant to the matters raised is sought.
37.1	Greg	Evans	Dartmoor Estate Ltd	Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
37.4	Greg	Evans	Dartmoor Estate Ltd	Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
37.5	Greg	Evans	Dartmoor Estate Ltd	Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
37.6	Greg	Evans	Dartmoor Estate Ltd	Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
37.7	Greg	Evans	Dartmoor Estate Ltd	Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
38.1	Roger	Brownlie		Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
38.4	Roger	Brownlie		Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
38.5	Roger	Brownlie		Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
38.6	Roger	Brownlie		Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
38.7	Roger	Brownlie		Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
38.76	Roger	Brownlie		Proposed TANK Plan Change 9	Not Stated	No specific decision requested but implies support for a practical approach to the Proposed Plan Change to the Hawke's Bay Regional Resource Management: Plan Change 9 – Tutaekuri, Ahuriri, Ngaruroro and Karamu Catchments that is sustainable for all stakeholder.

39.1	Bridget	Wilton	MbandSons	Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that best balances the values and interests of the Hawke's Bay community.
39.2	Bridget	Wilton	MbandSons	Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reached by the TANK Group community representatives.
39.3	Bridget	Wilton	MbandSons	Proposed TANK Plan Change 9	Not Stated	I SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
40.1	Jeremy	White	J and S White Contracting Ltd	Proposed TANK Plan Change 9	Support	Support the purpose of PC9 to give effect to the HBRC Policy Statement as well as the NPS FM.
41.1	Jonathan	Milmine	Milmine Holdings Limited	Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that best balances the values and interests of the Hawke's Bay community.
41.2	Jonathan	Milmine	Milmine Holdings Limited	Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reached by the TANK Group community representatives.
41.3	Jonathan	Milmine	Milmine Holdings Limited	Proposed TANK Plan Change 9	Not Stated	I SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
42.1	Glenn	Riddell	Glenmore Orchard	Proposed TANK Plan Change 9	Not Stated	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
42.4	Glenn	Riddell	Glenmore Orchard	Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
42.5	Glenn	Riddell	Glenmore Orchard	Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
42.6	Glenn	Riddell	Glenmore Orchard	Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
42.7	Glenn	Riddell	Glenmore Orchard	Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
43.1	CA & GW	Wilson	Meiros Orchard Ltd	Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
43.4	CA & GW	Wilson	Meiros Orchard Ltd	Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
43.5	CA & GW	Wilson	Meiros Orchard Ltd	Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
43.6	CA & GW	Wilson	Meiros Orchard Ltd	Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
43.7	CA & GW	Wilson	Meiros Orchard Ltd	Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
44.1	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
44.4	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
44.5	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
44.6	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
44.7	Brian	Fulford	Omahuri Orchards (2019) Ltd.	Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
45.1	Sydney	Parks	Westbrook Farm Ltd	Proposed TANK Plan Change 9	Support	Agrees with a lot of the future proposed regulations to maintain a healthy environment and waterways for our future generations that may one day also have the enjoyment of farming this land.
45.2	Sydney	Parks	Westbrook Farm Ltd	Proposed TANK Plan Change 9	Not Stated	Wish to continue to provide employment without too many unpractical regulations that may effect the production and profitability of this business.
45.3	Sydney	Parks	Westbrook Farm Ltd	Proposed TANK Plan Change 9	Support	Support the purpose of PC9 to give effect to the HBRC Policy Statement as well as the NPS FM.
46.1	Tom	Belford	Peter Beaven & Tom Belford	Proposed TANK Plan Change 9	Support	Support PC9 as recommended by the Hawke's Bay Regional Council.
47.1	John	Bostock	John Bostock & Eddie Crasborn	Proposed TANK Plan Change 9	Not Stated	Broadly supports the themes of the TANK Objectives but consider the policies and rules do adequately balance social, environmental and economic sustainability.
47.2	John	Bostock	John Bostock & Eddie Crasborn	Proposed TANK Plan Change 9	Not Stated	All policies, rules, restrictions and regulation to achieve the TANK objectives must be based on sound science and evidence. Adverse effects identified through science requiring regulation or restrictions must be more than minor and given the opportunity for mitigation. This is a fundamental principle of the RMA. Concerned the science is far from complete.
47.14	John	Bostock	John Bostock & Eddie Crasborn	Proposed TANK Plan Change 9	Amend	Believe the policy and rule framework identified above are contradictory and unworkable. We believe all the rules which support the problematic policy statements BF has identified need to be amended.
48.1	Paul	Ham	Alpha Domus	Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that best balances the values and interests of the Hawke's Bay community.
48.2	Paul	Ham	Alpha Domus	Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reached by the TANK Group community representatives.

48.3	Paul	Ham	Alpha Domus	Proposed TANK Plan Change 9	Not Stated	I SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
49.1	John	Parsons		Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
49.4	John	Parsons		Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
49.5	John	Parsons		Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
49.6	John	Parsons		Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
49.7	John	Parsons		Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
50.1	Alastair & Jo	Lawrence	Olig Limited	Proposed TANK Plan Change 9	Support	Applaud the collaborative and inclusive nature of the plan development process, including the involvement of tangata whenua whose aspirations and values with regard to water provide valuable guidance and insight, for all of us.
50.3	Alastair & Jo	Lawrence	Olig Limited	Proposed TANK Plan Change 9	Amend	PC9 must have regard for the economic circumstances arising from COVID,, develop economic growth objectives and policies that can facilitate growth in revenues and employment from productive use of water.
50.5	Alastair & Jo	Lawrence	Olig Limited	Proposed TANK Plan Change 9	Not Stated	There is no analysis of the adverse economic impact of imposing the proposed restrictions on the farming sector, and thereby the economic well-being of Hawkes Bay (investment, jobs, spending etc).
50.15	Alastair & Jo	Lawrence	Olig Limited	Proposed TANK Plan Change 9	Not Stated	We do not think that HBRC understands the reality of scale of costs that will be imposed with annual reporting, auditing, visits etc., or consent application process. Very concerned about the insidious creep of these proposed regulations. Why should we incur the cost of independent hydrology reports, Geotech reports, ecology reports, the requirement for independent planners to be employed to prepare applications, if we are operating within TANK guidelines and the parameters. We ask that HBRC investigate the scale of costs that will be imposed on farmers if the Plan changes are to be implemented as proposed, and reconsiders what it can push back to farmers to self-manage.
50.16	Alastair & Jo	Lawrence	Olig Limited	Proposed TANK Plan Change 9	Not Stated	We fully expect HBRC to enforce penalties/remedies on farmers who breach guidelines established by their own FEP's, catchment collective FEPs and Tank Plan parameters. Enforcement action focuses on those that do not comply. But self-management avoids the unnecessary imposition of cost on all farmers who wish to be compliant.
52.1	Laura	Kamau	Ngāti Poporo - Korongatā Marae	Proposed TANK Plan Change 9	Not Stated	Support the submissions made by Te Runanga o Heretaunga, Te Mana Taiao, Te Taiwhenua o Heretaunga, Heretaunga Tamatea Settlement Trust and Ngati Kahungunu Iwi Incorporated in relation to this plan.
52.2	Laura	Kamau	Ngāti Poporo - Korongatā Marae	Proposed TANK Plan Change 9	Not Stated	Submit utilising the 'Maori Indicia of Ownership' as developed by the claimants of WAI 2357 and WAI 2358 and, the Waitangi Tribunal 's National Fresh Water and Geothermal Resources Inquiry Reports Stage 1 and 2.
52.3	Laura	Kamau	Ngāti Poporo - Korongatā Marae	Proposed TANK Plan Change 9	Not Stated	We submit using various hydrogeology reports and research relating to the Ngatarawa and Raukawa Valleys which are our hapu boundaries.
52.4	Laura	Kamau	Ngāti Poporo - Korongatā Marae	Proposed TANK Plan Change 9	Not Stated	We submit as the Mana Whenua and Rangatira of these waters that the plan should include a Tiriti Based Partnership, where Ngati Poporo are key partners in managing our fresh waters whom feed the TANK catchment areas.
53.1	Chris	Howell	CD & CM Howell Partnership	Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that best balances the values and interests of the Hawke's Bay community.
53.2	Chris	Howell	CD & CM Howell Partnership	Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reached by the TANK Group community representatives.
53.3	Chris	Howell	CD & CM Howell Partnership	Proposed TANK Plan Change 9	Not Stated	I SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
54.1	Mark	Apatu	Apatu Farms Ltd	Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
54.4	Mark	Apatu	Apatu Farms Ltd	Proposed TANK Plan Change 9	Not Stated	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
54.5	Mark	Apatu	Apatu Farms Ltd	Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
54.6	Mark	Apatu	Apatu Farms Ltd	Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
54.7	Mark	Apatu	Apatu Farms Ltd	Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
55.1	Delia	Ropiha	Ngati Hinemanu, Ngai Te upokoiri	Proposed TANK Plan Change 9	Not Stated	Support the submission of the whanau and Haapu and organisations of Ngati Hinemanu Ngati Te Upokoiri ona Piringa Haapu authority, TeTaiwhenua O Heretaunga, Ngati Kahungunu Iwi Inc, Ngati Hinemanu Iwi.
55.2	Delia	Ropiha	Ngati Hinemanu, Ngai Te upokoiri	Proposed TANK Plan Change 9	Not Stated	No relief sought but raises issues including Te Mauri.

56.1	Betty Puhinui	Hanara	Ngati Hinemanu, Te Upokoiri, Honomokai, Mahuika	Proposed TANK Plan Change 9	Amend	I Timata mai i nga pae maunga Ko Nga Kaweka te Mataapuna o toku awa Ngaruroro e... See submission for more detail. A full written English explanation will be presented when the submitter is heard.
57.1	Melanie	Nuku		Proposed TANK Plan Change 9	Not Stated	Support the submissions of the whanau hapu, organisations of Ngati Hinemanu iwi me Ngati Kahungunu iwi me ona piringa hapu. Mauri ora.
57.2	Melanie	Nuku		Proposed TANK Plan Change 9	Not Stated	No specific relief sought but raises issues with the plan change including issues around low and shallow rivers, considering Maori in the plan change and destroying waterways.
58.1	Peter	Wilson	Hawkes Bay Fish and Game Council	Proposed TANK Plan Change 9	Support	Supports PC9 provisions except as in table provided.
58.2	Peter	Wilson	Hawkes Bay Fish and Game Council	Proposed TANK Plan Change 9	Amend	Seeks amendments to Plan Change 9 or any such similar, other, further, and /or consequential relief to give effect to this submission
60.1	Junior	Hakiwai	Omahu	Proposed TANK Plan Change 9	Amend	No specific decision requested but raises concerns related to Maori values, mana o te wai, access, stock exclusion and mahinga kai.
60.2	Junior	Hakiwai	Omahu	Proposed TANK Plan Change 9	Amend	Requests information about what is going on with our river who manages and controls Ngaruroro the interest of our ancestral waters its peoples and and taonga tuku iho.
61.1	Greg	Simpson		Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
61.4	Greg	Simpson		Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
61.5	Greg	Simpson		Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
61.6	Greg	Simpson		Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
61.7	Greg	Simpson		Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
62.1	Jonty	Moffett		Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
62.4	Jonty	Moffett		Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
62.5	Jonty	Moffett		Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
62.6	Jonty	Moffett		Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
62.7	Jonty	Moffett		Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
63.49	Keith	Marshall	Napier City Council	Proposed TANK Plan Change 9	Support	Generally supports the overall direction of Change 9 that seeks to ensure the sustainable management of water resources in the TANK catchments
63.50	Keith	Marshall	Napier City Council	Proposed TANK Plan Change 9	Amend	Amend Change 9 to provide further options and opportunities for our business and urban communities to be able to sustainably grow within the limits of the water resources.
63.54	Keith	Marshall	Napier City Council	Proposed TANK Plan Change 9	Amend	Supports the submission by HDC seeking a softening of the approach for new water consent requests by adding in an 'exceptional circumstances' policy
64.1	Owen	Tiopira	Hinemanu, Ngai Tuho	Proposed TANK Plan Change 9	Amend	No specific decision requested but raises concerns relating to water quality, gravel extraction. recreation
64.3	Owen	Tiopira	Hinemanu, Ngai Tuho	Proposed TANK Plan Change 9	Amend	Supports the submissions of the whanau and hapu and organisations of Ngati Hinemanu
65.1	Nadia	Staples	Mahuika, Ngati Here, Hinemanu	Proposed TANK Plan Change 9	Amend	No specific relief requested but raises issues relating to mana o te wai and Maori values
65.3	Nadia	Staples	Mahuika, Ngati Here, Hinemanu	Proposed TANK Plan Change 9	Not Stated	Supports the submissions of all whanau hapu/iwi organisations within Kahungunu regarding awa/waterways
67.10	Helen	Liddle	Focus Maraekakaho	Proposed TANK Plan Change 9	Amend	Suggests solution for commercial or industrial vehicle access to the Ngaruroro River at Maraekakaho
68.1	Geoffrey	Smith	Vine Nursery New Zealand and Waikahu Vineyard	Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that best balances the values and interests of the Hawke's Bay community.
68.2	Geoffrey	Smith	Vine Nursery New Zealand and Waikahu Vineyard	Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reached by the TANK Group community representatives.
68.3	Geoffrey	Smith	Vine Nursery New Zealand and Waikahu Vineyard	Proposed TANK Plan Change 9	Not Stated	I SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
69.1	Jos	Dames	Dames Limited	Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
69.4	Jos	Dames	Dames Limited	Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
69.5	Jos	Dames	Dames Limited	Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
69.6	Jos	Dames	Dames Limited	Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
69.7	Jos	Dames	Dames Limited	Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.

69.74	Jos	Dames	Dames Limited	Proposed TANK Plan Change 9	Not Stated	No specific decision sought but implies a need for certainty.
71.1	Carl	Knapp	Bellingham Orchard Ltd.	Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
71.4	Carl	Knapp	Bellingham Orchard Ltd.	Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
71.5	Carl	Knapp	Bellingham Orchard Ltd.	Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
71.6	Carl	Knapp	Bellingham Orchard Ltd.	Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
71.7	Carl	Knapp	Bellingham Orchard Ltd.	Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
72.1	Justin	Addis	Armada Orchard Ltd	Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
72.4	Justin	Addis	Armada Orchard Ltd	Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
72.5	Justin	Addis	Armada Orchard Ltd	Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
72.6	Justin	Addis	Armada Orchard Ltd	Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
72.7	Justin	Addis	Armada Orchard Ltd	Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
72.76	Justin	Addis	Armada Orchard Ltd	Proposed TANK Plan Change 9	Support	No specific decision sought but states support for protection and sustainable use of the resources we all require.
72.77	Justin	Addis	Armada Orchard Ltd	Proposed TANK Plan Change 9	Not Stated	No specific decision requested but states that pragmatism and reality need to be considered for real world use on a commercial level, not just environmental.
73.1	Bevan	Davidson		Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
73.4	Bevan	Davidson		Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
73.5	Bevan	Davidson		Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
73.6	Bevan	Davidson		Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
73.7	Bevan	Davidson		Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
73.76	Bevan	Davidson		Proposed TANK Plan Change 9	Support	No specific decision sought but states support for protection and sustainable use of the resources we all require.
73.77	Bevan	Davidson		Proposed TANK Plan Change 9	Not Stated	No specific decision requested but states that pragmatism and reality need to be considered for real world use on a commercial level, not just environmental.
75.1	Andria	Monin	Stonecroft Wines Limited	Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that best balances the values and interests of the Hawke's Bay community.
75.2	Andria	Monin	Stonecroft Wines Limited	Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reached by the TANK Group community representatives.
75.3	Andria	Monin	Stonecroft Wines Limited	Proposed TANK Plan Change 9	Not Stated	I SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
76.1	Larry	Morgan	Te Mata Estate Winery Ltd	Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that best balances the values and interests of the Hawke's Bay community.
76.2	Larry	Morgan	Te Mata Estate Winery Ltd	Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reached by the TANK Group community representatives.
76.3	Larry	Morgan	Te Mata Estate Winery Ltd	Proposed TANK Plan Change 9	Not Stated	I SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
77.1	David & Sheryl	Mackie		Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
77.4	David & Sheryl	Mackie		Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
77.5	David & Sheryl	Mackie		Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
77.6	David & Sheryl	Mackie		Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
77.7	David & Sheryl	Mackie		Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
78.1	Ben & Georgia	Humphrey		Proposed TANK Plan Change 9	Not Stated	Support the submission filed by Beef and Lamb NZ.

78.2	Ben & Georgia	Humphrey		Proposed TANK Plan Change 9	Support	Support the Horticulture NZ submission.
79.1	Richard	Penreath		Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
79.4	Richard	Penreath		Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
79.5	Richard	Penreath		Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
79.6	Richard	Penreath		Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
79.7	Richard	Penreath		Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
81.1	Tony	Smith	Babich Wines	Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that best balances the values and interests of the Hawke's Bay community.
81.2	Tony	Smith	Babich Wines	Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reached by the TANK Group community representatives.
81.3	Tony	Smith	Babich Wines	Proposed TANK Plan Change 9	Not Stated	I SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
82.15	Trevor	Robinson	Lowe Corporation Limited	Proposed TANK Plan Change 9	Amend	Seeks such further, more refined, additional, other or alternative relief that might give effect to this submission and/or better serve the overall objectives of the regional plan and the purpose and principles of the Resource Management Act 1991.
83.12	Jim	Galloway		Proposed TANK Plan Change 9	Not Stated	Support Federated Farmers' submission in other matters.
84.1	Grant	Edmonds	Redmetal Vineyards Ltd	Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that best balances the values and interests of the Hawke's Bay community.
84.2	Grant	Edmonds	Redmetal Vineyards Ltd	Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reached by the TANK Group community representatives.
84.3	Grant	Edmonds	Redmetal Vineyards Ltd	Proposed TANK Plan Change 9	Not Stated	I SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
85.1	Matthew	Truebridge		Proposed TANK Plan Change 9	Support	Supports the general purpose of plan change 9.
85.9	Matthew	Truebridge		Proposed TANK Plan Change 9	Support	Support sheep and beef submission.
86.1	Peter	Scott		Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
86.4	Peter	Scott		Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
86.5	Peter	Scott		Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
86.6	Peter	Scott		Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
86.7	Peter	Scott		Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
87.1	Peter	Scott	Kereru Road Vineyard	Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that best balances the values and interests of the Hawke's Bay community.
87.2	Peter	Scott	Kereru Road Vineyard	Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reached by the TANK Group community representatives.
87.3	Peter	Scott	Kereru Road Vineyard	Proposed TANK Plan Change 9	Not Stated	I SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
88.1	Jacqui	Cormack	Constellation Brands NZ Limited (CBNZ)	Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that best balances the values and interests of the Hawke's Bay community.
88.2	Jacqui	Cormack	Constellation Brands NZ Limited (CBNZ)	Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reached by the TANK Group community representatives.
88.3	Jacqui	Cormack	Constellation Brands NZ Limited (CBNZ)	Proposed TANK Plan Change 9	Not Stated	I SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
90.8	Sarah	Millington		Proposed TANK Plan Change 9	Not Stated	That Council receives, digests and learns from the stories, evidence and Matauranga Maori in the submissions from the real kaitiaki of the rohe, including whanau, hapu, marae committees, Maori Trusts, Ngati Kahungunu Iwi Incorporated and Te Taiwhenua o Heretaunga, with utmost seriousness.
91.3	Johnny	Milmine	Berry Farms NZ	Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
91.4	Johnny	Milmine	Berry Farms NZ	Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.

91.5	Johnny	Milmine	Berry Farms NZ	Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
91.6	Johnny	Milmine	Berry Farms NZ	Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
91.79	Johnny	Milmine	Berry Farms NZ	Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the overall framework of Plan Change 9, to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
94.1	Deane	Caughey	Indevin Group Ltd	Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that best balances the values and interests of the Hawke's Bay community.
94.2	Deane	Caughey	Indevin Group Ltd	Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reached by the TANK Group community representatives.
94.3	Deane	Caughey	Indevin Group Ltd	Proposed TANK Plan Change 9	Not Stated	I SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
95.1	Johnny	Milmine	Prime Limes	Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
95.4	Johnny	Milmine	Prime Limes	Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
95.5	Johnny	Milmine	Prime Limes	Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
95.6	Johnny	Milmine	Prime Limes	Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
95.7	Johnny	Milmine	Prime Limes	Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
96.1	Mike	Davis	Davis Orchards Ltd	Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
96.4	Mike	Davis	Davis Orchards Ltd	Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
96.5	Mike	Davis	Davis Orchards Ltd	Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
96.6	Mike	Davis	Davis Orchards Ltd	Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
96.7	Mike	Davis	Davis Orchards Ltd	Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
97.1	Lesley	Wilson	DN & LR Wilson Ltd	Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
97.4	Lesley	Wilson	DN & LR Wilson Ltd	Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
97.5	Lesley	Wilson	DN & LR Wilson Ltd	Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
97.6	Lesley	Wilson	DN & LR Wilson Ltd	Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand and New Zealand Apples and Pears submissions
97.7	Lesley	Wilson	DN & LR Wilson Ltd	Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
97.76	Lesley	Wilson	DN & LR Wilson Ltd	Proposed TANK Plan Change 9	Support	We fundamentally support the intent of the TANK Plan Change 9 but wish to note that the NPSFW states that we need to maintain or improve, not just improve.
97.82	Lesley	Wilson	DN & LR Wilson Ltd	Proposed TANK Plan Change 9	Amend	I see no reference to the economic impact of the Plan Change 9 and the figures in this report need to be worked inputting the changes suggested in Plan Change 9.
97.84	Lesley	Wilson	DN & LR Wilson Ltd	Proposed TANK Plan Change 9	Amend	This Plan Change needs to be flexible so as to be able to accommodate this and all future information pertinent to the management of our water quality and quantity.
98.2	David	France	Caitbridge Trust	Proposed TANK Plan Change 9	Not Stated	Supports the Ngaruroro Irrigation Society Inc submission.
99.2	Jerf	van Beek	Twyford Water	Proposed TANK Plan Change 9	Support	Fundamentally supports the general approach of the TANK Plan Change, and believe that it strikes a reasonable balance between seeking to improve the quality and quantity of the TANK catchments freshwater resources through a range of different regulatory requirements, and ensuring that those who rely on water can continue to use it. The plan allows me for practice changes to be made, and the impact of those monitored and understood, before decisions about further restrictions are made.
99.32	Jerf	van Beek	Twyford Water	Proposed TANK Plan Change 9	Not Stated	Where this submission aligns with Horticulture New Zealand's submission, we support that submission.
99.33	Jerf	van Beek	Twyford Water	Proposed TANK Plan Change 9	Amend	There are likely to be consequential amendments arising from the submission points that may affect the whole plan.

100.1	Stephanie	Murphy	Hawke's Bay Airport	Proposed TANK Plan Change 9	Not Stated	Strategic Infrastructure - PC9 does not appear to afford such strategic infrastructure with an alternative of different consenting pathway. Strategic infrastructure is defined in the Regional Resource Management Plan as including all necessary facilities, services and installations which are of greater than local significance and can include infrastructure that is nationally significance.
100.2	Stephanie	Murphy	Hawke's Bay Airport	Proposed TANK Plan Change 9	Amend	PC9 either needs to be amended to give effect to the NPSFM and NES or the relevant sections of the plan which duplicate controls in these documents removed.
100.6	Stephanie	Murphy	Hawke's Bay Airport	Proposed TANK Plan Change 9	Amend	Any consequential amendments required to other parts of PC9 as a result of the above relief.
102.1	Ritchie	Garnham	Booster Wine Group	Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that best balances the values and interests of the Hawke's Bay community.
102.2	Ritchie	Garnham	Booster Wine Group	Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reached by the TANK Group community representatives.
102.3	Ritchie	Garnham	Booster Wine Group	Proposed TANK Plan Change 9	Not Stated	I SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
103.1	Ian	Quinn	Two Terraces Vineyard	Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that best balances the values and interests of the Hawke's Bay community.
103.2	Ian	Quinn	Two Terraces Vineyard	Proposed TANK Plan Change 9	Not Stated	I SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
103.3	Ian	Quinn	Two Terraces Vineyard	Proposed TANK Plan Change 9	Not Stated	I am concerned that PC9's approach to allocation of water and control of farming emissions unfairly penalises viticultural landowners as very low water users and very low emitters compared to other major primary production systems.
103.14	Ian	Quinn	Two Terraces Vineyard	Proposed TANK Plan Change 9	Not Stated	No specific relief requested, but supports the consensus driven approach of the TANK process, and support HBRC's overall environmental objectives.
103.15	Ian	Quinn	Two Terraces Vineyard	Proposed TANK Plan Change 9	Not Stated	We believe the HBRC needs to approach the development of its strategies and policies in this manner, and to implement as much of that consensus as possible. Disagreements that result in expensive legal processes exclude parties such as ourselves who cannot afford to participate.
103.16	Ian	Quinn	Two Terraces Vineyard	Proposed TANK Plan Change 9	Not Stated	Where it seeks to recover cost, we would like to see HBRC take this into account and implement scalable and equitable approaches.
104.1	John	Loughlin	Rockit Global Limited	Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
104.4	John	Loughlin	Rockit Global Limited	Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
104.5	John	Loughlin	Rockit Global Limited	Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
104.6	John	Loughlin	Rockit Global Limited	Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
104.7	John	Loughlin	Rockit Global Limited	Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
105.1	Scott	Lawson		Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
105.4	Scott	Lawson		Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
105.5	Scott	Lawson		Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
105.6	Scott	Lawson		Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
105.7	Scott	Lawson		Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
106.1	Kane	Koko	Taraia Marae	Proposed TANK Plan Change 9	Not Stated	We support in their entirety the Heretaunga Tamatea Settlement Trust, Te Taiwhenua o Heretaunga and Ngati Kahungunu Iwi submissions
106.2	Kane	Koko	Taraia Marae	Proposed TANK Plan Change 9	Not Stated	The TANK plan change is complex, complicated and full of jargon. It obscures what could be simple in that the catchment has been mismanaged and that private interests have benefited from taking the water (groundwater and surface water). It could be very simple and our submission is in that vein.
107.1	Christopher	Harrison	Beach House Wines Ltd	Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that best balances the values and interests of the Hawke's Bay community.
107.2	Christopher	Harrison	Beach House Wines Ltd	Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reached by the TANK Group community representatives.
107.3	Christopher	Harrison	Beach House Wines Ltd	Proposed TANK Plan Change 9	Not Stated	I SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
109.1	Stuart	Macintyre	Turamoe Farm	Proposed TANK Plan Change 9	Support	Support the overall idea of PC9 to give effect to HBRC Policy Statement as well as the NPS FM.

109.3	Stuart	Macintyre	Turamoe Farm	Proposed TANK Plan Change 9	Not Stated	Concerned that the PC9 proposed changes will have a significant negative impact on farming activities across the Hawkes Bay Region. The cumulative effect of all the potential impacts will include additional ongoing compliance costs. The overall impact of these proposed changes and the poor communication of them is likely to chill investment in the region.
109.4	Stuart	Macintyre	Turamoe Farm	Proposed TANK Plan Change 9	Not Stated	Complexity and uncertainty is not in the best economic environmental interests of the HB, PC9 changes are so complicated and interwoven and a significant number of farms currently operating under permitted rules will now be required to obtain resource consents, increasing uncertainty and decreasing returns e.g. Rule TANK 1 and 2, Rule TANK 5, Schedule 29.
110.1	Edward	Whyte	Whyte & Co	Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
110.4	Edward	Whyte	Whyte & Co	Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
110.5	Edward	Whyte	Whyte & Co	Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
110.6	Edward	Whyte	Whyte & Co	Proposed TANK Plan Change 9	Support	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
110.7	Edward	Whyte	Whyte & Co	Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
111.1	Lisa	Tuhi	Ngati Hinemanu, Ngai Te Upokoiri	Proposed TANK Plan Change 9	Not Stated	Restoration and political redress for Ngati Hinemanu Ngai Te Upokoiri Ngati Honomokai and Ngati Mahuika over our awa ngaruroro and its tributaries and tribal estate
111.5	Lisa	Tuhi	Ngati Hinemanu, Ngai Te Upokoiri	Proposed TANK Plan Change 9	Not Stated	As treaty partners we the hapuu need 50% capability and capacity to decide and define over awa ngaruroro and its tributaries and tribal estate of Ngati Hinemanu Ngai Te Upokoiri Ngati Honomokai and Ngati Mahuika
111.6	Lisa	Tuhi	Ngati Hinemanu, Ngai Te Upokoiri	Proposed TANK Plan Change 9	Not Stated	Promotion and enhancing 'te wai mauri' the kainga tuturu of our kaitiaki Karukaru
111.7	Lisa	Tuhi	Ngati Hinemanu, Ngai Te Upokoiri	Proposed TANK Plan Change 9	Not Stated	Partnerships over future project designs awa ngaruroro and its tributaries and tribal estate shared with our hapuu
111.10	Lisa	Tuhi	Ngati Hinemanu, Ngai Te Upokoiri	Proposed TANK Plan Change 9	Not Stated	To maintain excellence and quality of all natural sources.
111.13	Lisa	Tuhi	Ngati Hinemanu, Ngai Te Upokoiri	Proposed TANK Plan Change 9	Not Stated	Devolve services to the hapuu driven, marae based, crown funded, fully resourced environmental research units to design hapuu born initiatives
111.14	Lisa	Tuhi	Ngati Hinemanu, Ngai Te Upokoiri	Proposed TANK Plan Change 9	Not Stated	Investigation on the unpaid royalties to our hapuu of the extraction of gravel (will present evidence)
111.15	Lisa	Tuhi	Ngati Hinemanu, Ngai Te Upokoiri	Proposed TANK Plan Change 9	Not Stated	Allow for face to face formulation of policy and legislative frameworks
111.16	Lisa	Tuhi	Ngati Hinemanu, Ngai Te Upokoiri	Proposed TANK Plan Change 9	Not Stated	Protect all natural and native flora and fauna on and around our awa ngaruroro and its tributaries
111.18	Lisa	Tuhi	Ngati Hinemanu, Ngai Te Upokoiri	Proposed TANK Plan Change 9	Not Stated	Repatriation of all native species that once flourished in our awa ngaruroro and it's tributaries.
111.19	Lisa	Tuhi	Ngati Hinemanu, Ngai Te Upokoiri	Proposed TANK Plan Change 9	Not Stated	Engagement with hapuu to implement our Post Settlement Treaty strategies
111.20	Lisa	Tuhi	Ngati Hinemanu, Ngai Te Upokoiri	Proposed TANK Plan Change 9	Not Stated	Intention to fully support my fellow hapuu members submissions
111.21	Lisa	Tuhi	Ngati Hinemanu, Ngai Te Upokoiri	Proposed TANK Plan Change 9	Oppose	Oppose the proposed plan change 9.
112.1	Ainsley	Harte		Proposed TANK Plan Change 9	Support	Support the purpose of PC9 to give effect to the HBRC Policy Statement as well as the NPS FM.
113.1	Teree	Brown	Te Tumu Paeroa	Proposed TANK Plan Change 9	Support	Acknowledges the good work of the Hawkes Bay Regional Council on this important kaupapa of protecting and restoring wai. The Maori Trustee supports what it understands to be the general thrust of the changes to further protect unique waterways within the council boundaries.
113.2	Teree	Brown	Te Tumu Paeroa	Proposed TANK Plan Change 9	Support	Supports the principle of Proposed PC9-TANK, which is, enabling an integrated and holistic approach to water body management incorporating the concept of Te Mana o te Wai, that builds on the more fundamental requirements of the National Policy Statement for fresh water management (NPS-FM). Then putting in place a values based approach to identify objectives for water management in the TANK catchments that will assist the Hawkes Bay Regional Council to meet the NPS-FM as set out by the Ministry for the Environment. It is also acknowledged that this (intended) TANK plan change will give effect to the NPS-FM 2017 and give effect to the Council's regional policy statement, including in relation to the protection of the values of the outstanding water bodies.
113.3	Teree	Brown	Te Tumu Paeroa	Proposed TANK Plan Change 9	Not Stated	Strongly encourage more consistent engagement with the Maori Trustee to ensure appropriate consultation with our landowners, who by inheritance are Tangata Whenua and intrinsic members of Hapu and Iwi within the TANK catchment area. strongly encourages the Hawkes Bay Regional Council to understand these values from our landowners perspective and ensure these values and attributes (described by Iwi) are reflected in the criteria and the outcomes sought by Proposed PC9-TANK

113.11	Teree	Brown	Te Tumu Paeroa	Proposed TANK Plan Change 9	Not Stated	Concerned that the Proposed PC9-TANK process has not adequately considered the cost of compliance on Maori land blocks. Whilst the planning document refers to the council providing funding assistance for riparian management and the restoration, reinstatement or creation of natural wetlands and lakes in POL 13 and POL 15 respectively, the Maori Trustee does not believe the extent and nature of this funding has been adequately addressed.
115.6	Patricia D	Nuku		Proposed TANK Plan Change 9	Oppose	Oppose much of Plan Change 9 in its notified form, ask for it to be substantially amended and for it to align better with the provisions in the RRMP that are not being amended, give effect to the NPS FM and the RPS, better recognise and provide for Maori relationships with their taonga, and their values and interests with freshwater resources within Heretaunga and take into account the principles of the Treaty as acknowledged by regional council in Schedule 1 of the Regional Resource Management Plan, in particular the principle of active protection, and For regional council to make some additional, consequential amendments to the regional plan
116.1	Alexander John	Macphee		Proposed TANK Plan Change 9	Support	Generally support PC9 but do wish to make some comments and feel change is required in some areas.
117.1	Alison	Johnston	Silver Fern Farms Limited	Proposed TANK Plan Change 9	Support	Generally supportive of PC9 and the proposition to introduce total water allocation limits for the relevant water management units.
117.4	Alison	Johnston	Silver Fern Farms Limited	Proposed TANK Plan Change 9	Not Stated	Ensure alignment and consistency of PC9 with the policy direction and regulations set out in the NPS-FM and NES-F respectively.
119.2	Liz	Lambert	Hawke's Bay Drinking Water Governance Joint Committee	Proposed TANK Plan Change 9	Not Stated	The Regional Policy Statement includes an objective of <i>no degradation of existing groundwater quality in the Heretaunga Plains and Ruataniwha Plains aquifers</i> (OBJ 21) and that this objective remains unchanged by Plan Change 9. Any amendments to the relevant objectives and policies in Plan Change 9 must not be inconsistent with this overarching objective.
120.1	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Proposed TANK Plan Change 9	Amend	Amend Plan Change 9 to address all of the issues, effects, general and specific relief, and consequential relief identified by our submission and appendices
120.2	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Proposed TANK Plan Change 9	Amend	If all of our primary relief is not granted, then decline or withdraw Plan Change 9
120.11	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Proposed TANK Plan Change 9	Amend	Amend Change 9 to give effect to the NPSFM 2020 in priority to the NPSFM 2017
120.62	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Proposed TANK Plan Change 9	Amend	Amend RRMP Policy 77 (c) to remove the word "efficient" and the footnote reference is warranted.
120.65	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Proposed TANK Plan Change 9	Amend	Review phrasing and sequencing of all provisions to clarify purpose and show a clear line of sight from issue, to objective, to policy, to rule or other method and that Te Mana o Te Wai and the identified cultural values and Treaty principles are explicitly and appropriately given effect to.
120.77	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Proposed TANK Plan Change 9	Amend	Undertake thorough editing and legal vetting of the provisions in order that grammatical, syntax, scope and intent/responsibility issues are reduced and consistent across the plan and to ensure that all consequential amendments are implemented including those from Plan Change 5 which appear to be excluded.
120.82	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Proposed TANK Plan Change 9	Amend	Amend Change 9 to include directive policies and rules that create cultural and ecological bottom lines
120.84	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Proposed TANK Plan Change 9	Amend	Amend Change 9 to include new provisions which relate to re-establishing the relationship of Maori with water within the TANK catchments and enable management of water ways in accordance with Maori values, rangatiratanga and self-determination. More detail regarding content of new objectives, policies and schedules provided.
120.86	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Proposed TANK Plan Change 9	Amend	Amend the RPS to give effect to the NPSFM 2020
120.89	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Proposed TANK Plan Change 9	Amend	There is a need for Council to outline any necessary changes to the Regional Coastal Environment Plan (RCEP) in order to ensure integration and alignment between PC9 and the RCEP ki uta ki tai.
120.90	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Proposed TANK Plan Change 9	Amend	Council should outline and commit to a comprehensive review of the RRMP and RCEP, and consider adjourning Change 9 pending the wider review
120.96	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Proposed TANK Plan Change 9	Amend	Policies in PC9 should address how objective and policy D1 of the NPS FM (2017) will be given effect to by recognising the role of Ngati Kahungunu in resource management and decision making.
120.142	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Proposed TANK Plan Change 9	Amend	There are numerous provisions within the RRMP that are better than the proposed policies., and Ngati Kahungunu wish to retain these. Clarity needs to be provided to ensure the best possible provision prevails.
120.177	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Proposed TANK Plan Change 9	Amend	Amend Schedule VI to: Delete RPS Policy 46 and Rule 49 Add - RPS Policy 24, RPS Policy 3, RRMP Policy 77, and Rule 53
120.178	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Proposed TANK Plan Change 9	Amend	Amend Schedule VIa to: Retain RPS Policy 57 Delete Rule 50 Add RPS Policy 35 and RPS Policy 43
120.179	Ngahiwi	Tomoana	Ngati Kahungunu Iwi Incorporated	Proposed TANK Plan Change 9	Amend	Amend Schedule VIb to: Retain RPS Policy 20 Add Policies 8, 17, 19, and 47 Retain Rule 15.
122.4	Richard	Penreath	Ngai Tukairangi Trust	Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.

122.5	Richard	Penreath	Ngai Tukairangi Trust	Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
122.6	Richard	Penreath	Ngai Tukairangi Trust	Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
122.7	Richard	Penreath	Ngai Tukairangi Trust	Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
122.10	Richard	Penreath	Ngai Tukairangi Trust	Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
123.1	Jenny	Nelson-Smith	Department of Conservation	Proposed TANK Plan Change 9	Oppose	Include clear objectives and policies in PC9 to address and phase out over-allocation of surface and groundwater, safeguard life-supporting capacity and ecosystem health, protect the significant values of outstanding freshwater bodies and wetlands (including lakes) and provide for other instream freshwater values including tangata whenua values.
123.10	Jenny	Nelson-Smith	Department of Conservation	Proposed TANK Plan Change 9	Not Stated	Include a schedule of outstanding waterbodies and wetlands and their significant values for protection.
123.18	Jenny	Nelson-Smith	Department of Conservation	Proposed TANK Plan Change 9	Oppose	HBRC withdraws PC9, gives effect to the NPSFM 2020 and renotifies the plan change in amended form; or HBRC prepares and notifies a variation of PC9 to implement the NPSFM 2020; or Some other action or actions to ensure that the NPSFM 2020 is given effect to as required, and which provides an efficient and fair process for the community (including submitters on PC9). Include objectives and/or policies which consider and recognise Te Mana o te Wai with particular reference to Te Hauora o te Taiao, Te Hauora o te Wai and Te Hauora o te Tangata. ... Continued in submission.
123.167	Jenny	Nelson-Smith	Department of Conservation	Proposed TANK Plan Change 9	Amend	Maps - Maps need some amendments including but not limited to: • Tutaekuri water quality Williford area has no title so what attributes should be accredited to it. Assumingly this is Tutaekuri tributaries but should be made clearer • Ngaruroro water quality, where is the cut off between Ngaruroro tributaries and Ngaruroro lowland tributaries on Southern side. • Ngaruroro water quality, north eastern section is unnamed. Ngaruroro water quantity map "kikowhere" looks to be in the wrong place
124.33	Bridget	Margerison	Brownrigg Agriculture Group Ltd	Proposed TANK Plan Change 9	Not Stated	Any consequential amendments required to other parts of PC9 as a result of the relief sought in this submission.
125.1	Moana Lee	Mackey	Nagti Hinemanu, Ngai Te Upokoiri Me Ona Piringa Haapu	Proposed TANK Plan Change 9	Oppose	As Mana whenua I'm insisting on accountability to the principles of the Treaty as acknowledged by regional council in Schedule 1 of the Regional Resource Management Plan. Particularly, the Principle of Kawanatanga under Article I of the Treaty of Waitangi. What transparent discussions have ever been had with the Regional Council and Mana whenua on our Marae with our hapu to adhere to your recognition of the partnership between Maori and the Crown?
126.37	James	Lyver	Maungaharuru-Tangitū Trust	Proposed TANK Plan Change 9	Amend	Make subsequent amendments to PC9 to read: Ahuriri estuary Te Whanganui-a-Orotu (Ahuriri estuary);"
126.38	James	Lyver	Maungaharuru-Tangitū Trust	Proposed TANK Plan Change 9	Amend	Such further or other consequential or alternative relief as may be necessary to fully give effect to the relief sought in this submission.
127.1	Tania	Eden	Te Taiwhenua o Te Whanganui a Orotu	Proposed TANK Plan Change 9	Oppose	Oppose the TANK Plan Change. We are supporting Ngati Kahungunu, Te Taiwhenua o HERETAUNGA and Iwi, Hapu, Marae whanau in Hawkes Bay to oppose the TANK Plan Change.
127.2	Tania	Eden	Te Taiwhenua o Te Whanganui a Orotu	Proposed TANK Plan Change 9	Oppose	It has been hard to make a submisison online. Our people cannot navigate this site and make submissions trying to navigate through this.
127.3	Tania	Eden	Te Taiwhenua o Te Whanganui a Orotu	Proposed TANK Plan Change 9	Oppose	The Plan Change does not promote sustainable management and is inconsistent with Part 2 of the RMA. The Plan Change is inconsistent with s6, implementation of the principles of Te Tiriti o Waitangi, exercise of kaitiakitanga, s7, councils statutory functions and powers. PC9 results in more than minor and significant and cumulative effects on the environment. These effects include significant adverse cultural effects to Mana Whenua, Tangata Whenua and Iwi.
127.10	Tania	Eden	Te Taiwhenua o Te Whanganui a Orotu	Proposed TANK Plan Change 9	Not Stated	Recognise and provide for mana whenua, tangata whenua and Iwi proprietary and Treaty rights and interests in the TANK catchments
127.13	Tania	Eden	Te Taiwhenua o Te Whanganui a Orotu	Proposed TANK Plan Change 9	Not Stated	Include a schedule of outstanding waterbodies and wetlands and their significant values for protection.
127.24	Tania	Eden	Te Taiwhenua o Te Whanganui a Orotu	Proposed TANK Plan Change 9	Not Stated	We as mana whenua require more input into the Plan Change to ensure planning is undertaken regarding the degradation of the Ahuriri catchment area. We require plans to improve the health of the ecosystem, reduce sedimentation and improve oxygen levels to the Wai and in particular those waterways in Ahuriri.
128.1	Mike	Connor		Proposed TANK Plan Change 9	Not Stated	Concerned that the results from Computer Models are being relied on too heavily for policy decision making and some of the output from these model s have become "fake facts"
129.27	Ceri	Edmonds	Hawke's Bay Regional Council	Proposed TANK Plan Change 9	Amend	Amend the provisions of the proposed TANK Plan Change so that they are consistent with the Resource Management (National Environmental Standards for Freshwater) Regulations 2020 (Freshwater NES),
131.1	Dominic	Adams	Ballance Agri-Nutrients Limited	Proposed TANK Plan Change 9	Support	Supports the intent of Change 9

132.1	Marei	Apatu	Te Taiwhenua o Heretaunga	Proposed TANK Plan Change 9	Amend	Amend so that the priority setting in PC9 rules, schedules and decision-making processes, to reflect the upholding of Te Mana o te Wai, and the health and well-being of water bodies as a first priority ¹ , the health and well-being of people and communities (including Maori communities), as a second priority, with all other considerations coming after these.
132.6	Marei	Apatu	Te Taiwhenua o Heretaunga	Proposed TANK Plan Change 9	Amend	PC9 requires substantial redrafting to incorporate specific provisions as directed by the NPS-FM 2017 and the operative RPS, and to fulfil regional council's roles and responsibilities under RMA sections 30 (1) (c), (ea), (e), (f), (fa), (g) and (ga).
132.12	Marei	Apatu	Te Taiwhenua o Heretaunga	Proposed TANK Plan Change 9	Amend	Amend objectives and policies so they apply to multiple catchments, rather than repeating similar policies for each of the four TANK catchments
132.27	Marei	Apatu	Te Taiwhenua o Heretaunga	Proposed TANK Plan Change 9	Not Stated	No specific relief requested but raises concerns with the Section 32 analysis report
132.34	Marei	Apatu	Te Taiwhenua o Heretaunga	Proposed TANK Plan Change 9	Amend	Ensure operative RPS policies 35 and 43, are given effect to in PC9.
132.38	Marei	Apatu	Te Taiwhenua o Heretaunga	Proposed TANK Plan Change 9	Amend	Re-arrangement of the Issue statements so they precede specific Objectives and Policies that relate to each of the issues.
132.78	Marei	Apatu	Te Taiwhenua o Heretaunga	Proposed TANK Plan Change 9	Oppose	Opposes many of the proposed provisions, particularly where it fails to give effect to the NPS-FM and to the Regional Policy Statement, does not promote sustainable management as prescribed in the Act, or fails to address adverse effects of activities in the TANK catchments in an efficient and comprehensive manner.
132.87	Marei	Apatu	Te Taiwhenua o Heretaunga	Proposed TANK Plan Change 9	Amend	Add Anticipated Environmental Results (AERs) following each group of policies that relate to specific objectives.
132.101	Marei	Apatu	Te Taiwhenua o Heretaunga	Proposed TANK Plan Change 9	Amend	Clearly articulate in PC9 that all the Schedules including the maps and water management zones form part of the proposed plan, and link them to objectives, policies, and methods
132.157	Marei	Apatu	Te Taiwhenua o Heretaunga	Proposed TANK Plan Change 9	Amend	Hold a combined hearing for PC9 and for parts of PC7 (Outstanding Fresh Water Bodies) that are located within the Tutaekuri, Ahuriri, Ngaruroro and Karamu catchments.
132.181	Marei	Apatu	Te Taiwhenua o Heretaunga	Proposed TANK Plan Change 9	Amend	Where the adverse effects of existing activities do not align with or are unlikely to achieve objectives, limits or targets, then in PC9 ensure that their adverse effects are avoided. Where activities operate within limits, then ensure that the plan requires their adverse effects to be remedied or mitigated
132.186	Marei	Apatu	Te Taiwhenua o Heretaunga	Proposed TANK Plan Change 9	Amend	Ensure RPS policy 57 is given effect through water quantity and water quality objectives and policies for TANK catchments.
132.194	Marei	Apatu	Te Taiwhenua o Heretaunga	Proposed TANK Plan Change 9	Amend	Make any other consequential amendments to proposed PC9, to ensure consistency and coherency with the relief sought through Te Taiwhenua o Heretaunga's submissions, and to give effect to the NPS-FM, and the operative RPS.
133.2	Wi	Huata		Proposed TANK Plan Change 9	Not Stated	PC9 is not consistent with the findings of Wai 2358 acknowledging that proprietary interest in or ownership of the water. PC9 does not give effect to NPS-FM that acknowledges that tangata whenua are the expert knowledge holders for the values we hold about the water and that the values will be incorporated into regional freshwater planning processes. PC9 has a long way to go to achieve this.
134.1	Willem	Kupa	Patoka Trust	Proposed TANK Plan Change 9	Not Stated	While agreeing with many of the goals, thrust and themes of PC9, we think the plan should be rewritten in its entirety. PC9 is contradictory and does not allow a pathway for the kupa family to transition into lower environmental impact permanent crops.
134.2	Willem	Kupa	Patoka Trust	Proposed TANK Plan Change 9	Not Stated	The plan is premature when results from the most expenditure and sophisticated scientific work to date including 3D helicopter mapping has not been analysed and published for public scrutiny. The family believe the plan will have the effect of alienation from their ancestral lands and as a result has treaty of Waitangi implications.
134.8	Willem	Kupa	Patoka Trust	Proposed TANK Plan Change 9	Oppose	The family opposes all the rules and policies and believe the plan should be redrafted.
135.1	Anna	Wilkes	Ravensdown Limited	Proposed TANK Plan Change 9	Amend	• One of the areas where Ravensdown's submission points, as outlined in the table contained in Attachment A of this submission, is seeking changes relates to the fact that PPC9 is not consistent with the recently gazetted national instruments for healthy waterways, namely the National Policy Statement for Freshwater Management 2020, the National Environmental Standards for Freshwater and the associated regulations (e.g., the Resource Management (Stock Exclusion) Regulations 2020). Given this goal, amendments to PPC9 provisions are being sought by Ravensdown's submission in order to endeavour to achieve alignment with these national instruments
135.2	Anna	Wilkes	Ravensdown Limited	Proposed TANK Plan Change 9	Support	Ravensdown generally supports PPC9, subject to the amendments requested to address the concerns raised within its submission.
136.1	Te Hira	Henderson		Proposed TANK Plan Change 9	Support	Opposes the provisions in PC9.
137.1	Ngatai	Huata		Proposed TANK Plan Change 9	Oppose	Opposes the provisos in PC9 relating to these following kaupapa putake: water quality, water quantity, water pollution, water discharge.
137.2	Ngatai	Huata		Proposed TANK Plan Change 9	Not Stated	Summary of evidence submitted, and proposed resolutions of that summary seques across from other submissions: Pa Waipatu Marae, Te Manaaki Taiao, Te Runanganui o Heretaunga, Te Taiwhenua o Heretaunga, Ngati Kahungunu Iwi Inc.
138.1	Marei	Apatu		Proposed TANK Plan Change 9	Oppose	Oppose provisions in PC9 relating to these matters: <ul style="list-style-type: none"> •Water quality in the Karamu •Weed in the Karamu •Storm-water discharge in the Karamu •Water quantity ground water use •Water quality source protection zones for small communities (papakainga)

138.7	Marei	Apatu		Proposed TANK Plan Change 9	Amend	Make any consequential changes to PC9 to give effect to the relief sought through my submission.
139.1	Charmaine	Pene		Proposed TANK Plan Change 9	Oppose	In general, this submission opposes the 'Proposed Plan Change 9'
139.2	Charmaine	Pene		Proposed TANK Plan Change 9	Oppose	No specific relief sought but raises concerns regarding lack of consultation with tangata whenua, gravel extraction, speed boating activities on the rivers or lakes, the taking of water from the Ngaruroro River.
139.4	Charmaine	Pene		Proposed TANK Plan Change 9	Oppose	Resource Consent applications for lifestyle Blocks be restricted.
141.11	Danny	Angland	Kereru Station	Proposed TANK Plan Change 9	Support	In regards to all other submissions, we support the proposed plan change as notified, and seek that those provisions be retained as notified. That any consequential amendments be made to give effect to the relief sought in this submission, or as otherwise necessary to address our concerns.
142.1	Bill	Glazebrook	Big Hill Station Limited	Proposed TANK Plan Change 9	Support	Is neutral or supports provisions not referred to in submission
142.2	Bill	Glazebrook	Big Hill Station Limited	Proposed TANK Plan Change 9	Not Stated	Relief sought includes consequential amendments to other parts of the plan change arising out of the specific relief requested.
143.1	Peter	Hyslop	Strathallan Trust	Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that best balances the values and interests of the Hawke's Bay community.
143.2	Peter	Hyslop	Strathallan Trust	Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reached by the TANK Group community representatives.
143.3	Peter	Hyslop	Strathallan Trust	Proposed TANK Plan Change 9	Not Stated	I SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
144.1	Jamie	Wheeler		Proposed TANK Plan Change 9	Not Stated	Fully support Ngati Kahungunu Iwi Incorporated submission and the submissions from the people of Heretaunga marae and their recommendations to make the TANK plan a more sustainable way forward. Their values, recommendations and view of things should be included because they are the kaitiaki of this rohe.
145.1	Peter	Raikes	Awanui Station	Proposed TANK Plan Change 9	Not Stated	The Plan is stacked against the primary producers who underpin our economy and have the real potential to impose a severe hand break on the economic development of the region.
145.2	Peter	Raikes	Awanui Station	Proposed TANK Plan Change 9	Not Stated	PC9 creates serious impediments which fly in the face of Part Two and section 7 of the RMA directions both actual and implied. The imposition of more red tape will affect investors decisions, the local economy, job prospects and the economic wellbeing of the populace.
145.9	Peter	Raikes	Awanui Station	Proposed TANK Plan Change 9	Not Stated	Needs of future generations - several thousands of hectares of flat land on the plain suitable for horticulture that have no (or very little) consented groundwater. These blocks will need to fulfil the needs of future generations, providing for the population and its growth by way of jobs and expansion of the local and national economy.
147.1	Serene	Morrell	Mihiroa Marae	Proposed TANK Plan Change 9	Not Stated	Support in their entirety the Heretaunga Tamatea Settlement Trust, Te Taiwhenua o Heretaunga and Ngati Kahungunu Iwi submissions.
147.2	Serene	Morrell	Mihiroa Marae	Proposed TANK Plan Change 9	Not Stated	No relief sought but raises issues about the mana of the awa, wanting water quality improved, wanting to participate in cultural practices through the gathering and sharing of kai.
147.3	Serene	Morrell	Mihiroa Marae	Proposed TANK Plan Change 9	Not Stated	The plan will have adverse effects on us and we will be unable to practice our cultural practices, the Treaty principle of active participation will be breached, and the ability to sustain our aquatic life in the future for our mokopuna will be compromised.
148.1	Rahina	Huata	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9
148.2	Rahina	Huata	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	No specific relief sought but raises concerns relating to recognition and acknowledgement of the proprietary interests of nga hapu o Ngati Kahungunu ki Heretaunga, Ngati Kahungunu ki Tamatea and Ngati Kahungunu ki Ahuriri, over-allocation, water quantity and water quality.
148.3	Rahina	Huata	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	As Manawhenua, we have been excluded from having a "real" say on the management and governance of these precious taonga. Until there is proper sharing of power, I think you will continue to mismanage these taonga
149.1	Eddie	Huata	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9
149.2	Eddie	Huata	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Until there is equal sharing of power within our country between the Crown and tangatawhenua, your plan will not work for us.
150.1	Nathan	Huata	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9
150.2	Nathan	Huata	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	No specific relief sought but raises concerns relating to cultural values, and water quantity in the Kawarewa and Paritua.
151.1	Riki	Huata	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9
151.2	Riki	Huata	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	No specific relief sought but raises concerns relating to cultural values, and water quantity in the Kawarewa and Paritua.
152.1	Rosemary and Ihaka	Smith / Waerea	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Oppose Change 9
153.1	Huia Te Rina Ripeka	Huata Huata	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9
153.2	Huia Te Rina Ripeka	Huata Huata	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	No specific relief sought but raises concerns relating to stock exclusion, recreational values, cultural values, native fish values, water quality and water quantity.
153.3	Huia Te Rina Ripeka	Huata Huata	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Water is a taonga that should be respected and treated with love.
154.1	Jetson	Craig	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9
154.2	Jetson	Craig	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	No specific relief requested but raises concerns relating to recognition the right of tangatawhenua under the Treaty of Waitangi, stock exclusion, water allocation, water quality and native fish values.
155.1	Lesley	Reid	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9

155.2	Lesley	Reid	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	No specific relief requested but raises concerns relating to water quality, water quantity, recreational and cultural values.
155.3	Lesley	Reid	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Change 9 should be more inclusive and takes into consideration the aspirations of mana whenua, doesn't pay "lip service" to tikanga and reo, and it is also about the equal sharing of power and wealth between Treaty partners.
156.1	Olly	Craig	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9
156.2	Olly	Craig	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	No specific relief requested but raises concerns relating to rights to water under the Treaty of Waitangi.
156.3	Olly	Craig	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	It would be great if there was an equal sharing of power and proper recognition of manawhenua.
157.1	Furness Keriana	Armstrong	Managroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9
157.2	Furness Keriana	Armstrong	Managroa Marae	Proposed TANK Plan Change 9	Oppose	No specific relief requested but raises concerns relating to climate change, natural hazards, and water quantity.
158.1	Camilla	Shultz	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	No specific relief requested but raises concerns relating to the Paritua and Karewarewa Streams cultural values, recreational values, natural hazards, water quality, water quantity and implementation of plans.
158.2	Camilla	Shultz	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9
159.1	Reid	Craig	Managroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9
159.2	Reid	Craig	Managroa Marae	Proposed TANK Plan Change 9	Oppose	No specific relief requested but raises concerns relating to the Karewarewa and Paritua, rights as mana whenua and mahinga kai.
160.1	Ngawai	Waerea	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9
160.2	Ngawai	Waerea	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	No specific relief requested but raises concerns relating to the Karewarewa and Paritua, rights as mana whenua and mahinga kai.
161.1	Harata	Rapaea	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	No specific relief requested but raises concerns relating to water quality, recreational values, cultural values and water quantity.
161.2	Harata	Rapaea	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9
161.3	Harata	Rapaea	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	I would like to see that manawhenua have greater say and control over the management and monitoring of the water.
162.1	Letitia	Waerea	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9
163.1	Sonna	Waerea	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	No specific relief requested but raises concerns relating to cultural values, stock exclusion, and water quantity.
163.2	Sonna	Waerea	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9
163.3	Sonna	Waerea	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9
165.1	Caleb	Dennis	Aotearoa New Zealand Fine Wine Estates LP	Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that best balances the values and interests of the Hawke's Bay community.
165.2	Caleb	Dennis	Aotearoa New Zealand Fine Wine Estates LP	Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reached by the TANK Group community representatives.
165.3	Caleb	Dennis	Aotearoa New Zealand Fine Wine Estates LP	Proposed TANK Plan Change 9	Not Stated	I SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
166.1	Rihimoana	Waerea	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9
166.2	Rihimoana	Waerea	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	No specific relief requested but raises concerns relating to water quality, water quantity, recreational values, cultural values and recognition of manawhenua rights under Te Tiriti O Waitangi.
167.1	Thomas	Waerea	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9
167.2	Thomas	Waerea	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	No specific relief requested but raises concerns relating to allocation of water and the Treaty of Waitangi.
168.1	Harata	Waerea	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9
168.2	Harata	Waerea	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	No specific relief requested but raises concerns relating to rangatiratanga, mismanagement of the water, water quality, water quantity, cultural values.
168.3	Harata	Waerea	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Our hapu wants to be in control of our own water.
169.1	Russell	Morrell	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9 and raises concern relating to Te Tiriti O Waitangi and the rights of manawhenua
170.1	Raewyn	Morrell Turner	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9
170.2	Raewyn	Morrell Turner	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	No specific relief requested but raises concerns relating to cultural values, water quality, water quantity, stock exclusion, pollution, and allocation.
171.1	Henrietta	Dzilic	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9
171.2	Henrietta	Dzilic	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	No specific relief requested but raises concerns relating to recreational values, cultural values, water quantity and water quality.

177.1	Raewyn	Morrell	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9
177.2	Raewyn	Morrell	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	No specific relief requested but raises concerns relating to recreational values, cultural values, water quality, water quantity and allocation.
178.1	Jack	Morrell	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9
178.2	Jack	Morrell	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	No specific relief requested but raises concerns relating to the Paritua and Karewarwa streams, and allocation
179.1	Wim	Barendsen	Otawahao Farms Ltd	Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that best balances the values and interests of the Hawke's Bay community.
179.2	Wim	Barendsen	Otawahao Farms Ltd	Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reached by the TANK Group community representatives.
179.3	Wim	Barendsen	Otawahao Farms Ltd	Proposed TANK Plan Change 9	Not Stated	I SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
180.3	Charlotte	Drury	Horticulture New Zealand	Proposed TANK Plan Change 9	Support	Fundamentally supports the general approach of the TANK Plan Change, and believe that it strikes a reasonable balance between seeking to improve the quality and quantity of the TANK catchments freshwater resources through a range of different regulatory requirements, and ensuring that those who rely on water can continue to use it.
180.5	Charlotte	Drury	Horticulture New Zealand	Proposed TANK Plan Change 9	Not Stated	These costs associated with managing freshwater resources must be borne by all members of the community that use water – which is arguably almost every person that either lives or works within the TANK Catchments. The costs must not be disproportionately apportioned to irrigators who only use approximately 50% of the water abstracted from the system that influences flows in the Ngaruroro River. The rest of the water abstracted is used for municipal and industrial purposes.
180.6	Charlotte	Drury	Horticulture New Zealand	Proposed TANK Plan Change 9	Not Stated	PC9 does not adequately recognise the critical importance of horticulture to the future sustainability of the TANK Catchments, and there are some changes required to the proposed plan to ensure that sufficient water is available (particularly transfer of consented water and new water that can be taken at times of high flow), and some flexibility in terms of land use change is enabled to provide for that.
180.7	Charlotte	Drury	Horticulture New Zealand	Proposed TANK Plan Change 9	Not Stated	The regional and national importance of production and processing of beverages, food and fibre (covered under Obj LW1 of the RPS) has not been sufficiently acknowledged, given the great difficulty any producer of beverages, food and fibre would have in accessing any additional water under the proposed plan, and potentially even maintaining the water that they need to support their existing operations.
180.9	Charlotte	Drury	Horticulture New Zealand	Proposed TANK Plan Change 9	Not Stated	The scale at which every provision applies (e.g. property, farming enterprise, sub-catchment...) needs to be made clear in every provision, and planning maps prepared and included in the plan that clearly show the extent of each and every 'scale' at which provision will apply.
180.10	Charlotte	Drury	Horticulture New Zealand	Proposed TANK Plan Change 9	Not Stated	Need to 'tighten up' terminology used as in some cases different terms are used to refer to what appears to be the same thing – for example, within TANK 5 both 'catchment collective' and 'landowner collective' are used, when it appears that the same entity is in fact being referred to, references to Karamu and Clive rivers, and water quality entities compared with water quantity entities.
180.11	Charlotte	Drury	Horticulture New Zealand	Proposed TANK Plan Change 9	Not Stated	The term 'good management practice' should be used, instead of industry good practice or other variations. This would be consistent with approaches taken in other regions such as Canterbury, and from a HortNZ perspective, is consistent with the terminology used within GAP schemes.
180.13	Charlotte	Drury	Horticulture New Zealand	Proposed TANK Plan Change 9	Not Stated	Likely to be consequential amendments arising from the specific amendments that are being sought that may affect the whole plan.
181.1	Derek	Huata	Takitimu Māori Council	Proposed TANK Plan Change 9	Oppose	No specific relief requested but raises concerns relating to allocation of water, recognition of mana whenua and proprietary rights, economic wellbeing, and the TANK development/consultation process.
181.2	Derek	Huata	Takitimu Māori Council	Proposed TANK Plan Change 9	Not Stated	Supports submissions of Hira Huata, Adele White & Ngaio Teuka, Jenny Mauger, Marei Nepe-Apatu, and Robert McDonald
182.1	Hira	Huata	Mangaroa Maori Committee and Nga Marae o Heretaunga	Proposed TANK Plan Change 9	Oppose	Opposes Change 9 on behalf of Mangaroa Maori Commtee and Nga Marae o Heretaunga
182.2	Hira	Huata	Mangaroa Maori Committee and Nga Marae o Heretaunga	Proposed TANK Plan Change 9	Oppose	No specific relief requested but implies that Change 9 should include, demonstrate, recognise and respect the Atuatanga o Te Haukunui o Heretaunga and Atuatanga o Te Mana Whenua o Heretaunga. Also raises concerns related to the degradation of mauri, water quality, and allocation of Paritua-Karewarewa river.
182.3	Hira	Huata	Mangaroa Maori Committee and Nga Marae o Heretaunga	Proposed TANK Plan Change 9	Oppose	No specific relief requested but implies that Change 9 should acknowledge the kaitiakitanga of Mana Whenua over our waters, giver respect to matauranga Maori, and tikanga of Ngati Kahungunu
182.4	Hira	Huata	Mangaroa Maori Committee and Nga Marae o Heretaunga	Proposed TANK Plan Change 9	Oppose	No specific relief requested but implies Change 9 should acknowledge and be inclusive of the rangatiratanga of the hapu and marae communities in Heretaunga. Also raises concerns relating to the plan making/consultation processes and water allocation.
182.5	Hira	Huata	Mangaroa Maori Committee and Nga Marae o Heretaunga	Proposed TANK Plan Change 9	Oppose	No specific relief requested but states that Change 9 demonstrates a huge lack of Manaakitanga to our Haukunui o Heretaunga and the lack of Manaakitanga to our mana whenua. Also raises concerns relating to economic wellbeing, water quality and water quantity.

183.1	Huia Libya	Huata Huata	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Acknowledges the submissions of Heretaunga Tamatea Settlement Trust, Heretaunga Taiwhenua, and Ngati Kahungunu Iwi Incorporated
183.2	Huia Libya	Huata Huata	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9
183.3	Huia Libya	Huata Huata	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	No specific relief requested but raises concerns relating to water allocation, recreational use, cultural values, water quality, water quantity, and the Treaty of Waitangi.
183.6	Huia Libya	Huata Huata	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	No specific relief requested but implies Change 9 should give effect to the aspirations of Ngati Rahunga I te Rangi and a 2016 iwi management plan. Aspirations include restoring mauri and mana o te wai, bringing back native fish, recreational and cultural practices.
183.7	Huia Libya	Huata Huata	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Amend Change 9 so that power is shared with tangatawhenua
184.1	Cordry	Tawa Huata	Mangaroa Marae Trustees and Mangaroa Marae Committee	Proposed TANK Plan Change 9	Oppose	Opposes Change 9 on behalf of the people he represents.
184.2	Cordry	Tawa Huata	Mangaroa Marae Trustees and Mangaroa Marae Committee	Proposed TANK Plan Change 9	Not Stated	Supports submissions of Heretaunga Tamatea Settlement Trust, the Heretaunga Taiwhenua and Ngati Kahungunu Iwi Incorporated
184.3	Cordry	Tawa Huata	Mangaroa Marae Trustees and Mangaroa Marae Committee	Proposed TANK Plan Change 9	Oppose	Change 9 should embed the NPSFM's fundamental concept of Te Mana o Te Wai and the hierarchy of obligations.
184.4	Cordry	Tawa Huata	Mangaroa Marae Trustees and Mangaroa Marae Committee	Proposed TANK Plan Change 9	Oppose	The plan needs to acknowledge the fiducial rights of nga iwi Maori and nga hapu o Heretaunga towards wai maori.
185.1	Allen	Kittow	Tremaine Farms Ltd	Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
185.4	Allen	Kittow	Tremaine Farms Ltd	Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
185.5	Allen	Kittow	Tremaine Farms Ltd	Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
185.6	Allen	Kittow	Tremaine Farms Ltd	Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
185.7	Allen	Kittow	Tremaine Farms Ltd	Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
185.78	Allen	Kittow	Tremaine Farms Ltd	Proposed TANK Plan Change 9	Not Stated	No specific decision requested but states that participation in higher value horticulture activities will likely be more restricted under the plan in its current format.
186.1	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
186.4	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
186.5	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
186.6	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
186.7	Stewart	Horn	Berrilea Orchards Ltd, Waitohi Trust and SP&GC Horn	Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
187.1	Aberielle	Robin	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9
187.2	Aberielle	Robin	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Amend Change 9 to address, re-engage, reestablish the quality and quantity of the environment in Bridge Pa such as the water, fish growth, freshwater species, native bird life and vegetation to once again flourish, and be restored to its natural glory.
187.3	Aberielle	Robin	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Cultural values and heritage is merely protected and provisions for it are not met in this plan
188.2	Donna	Robin	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9
188.3	Donna	Robin	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	No specific relief requested but raises concerns relating to water quality, water quantity, affects of floods on habitat and erosion, and engagement with tangata whenua
188.4	Donna	Robin	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	No specific relief requested but implies Change 9 should restore and preserve the streams and the wetlands of Bridge Pa for the tangata whenua and asks "How would that type [inter-generational knowledge] of learning relationship be rejuvenated?"
188.5	Donna	Robin	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Change 9 should consider and respectfully value the natural ecosystem for the tangata whenua in Bridge Pa is importantly a big part of our cultural identity of who we are in our whakapapa (family genealogy) and pepeha (family lineage) of where we come from
189.1	Greenie	Cooke	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9
189.2	Greenie	Cooke	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Change 9 should adhere to the principles of the HBRC booklet "Oho Rawa Aka Te Awa" (Reawakening the Awa)
190.2	Randle	Cooke	Mangaroa Marae	Proposed TANK Plan Change 9	Not Stated	No specific decision requested but raises concerns related to water quantity, recreational use, cultural values and ecosystem health
191.1	Rangiwhiua	Robin	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Opposes Change 9
191.6	Rangiwhiua	Robin	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	No specific decision requested but implies that Change 9 should provide provisions to preserve the natural ecosystem and to ensure cultural identity, values and customs continues to exist and are well maintained for the next generation to come.
191.8	Rangiwhiua	Robin	Mangaroa Marae	Proposed TANK Plan Change 9	Oppose	Monitor & manage the streams, freshwater species, habitat and wetlands of Bridge Pa with a reasonable time frame

192.1	Rebecca	Blunden	T&G Global Limited and ENZIL	Proposed TANK Plan Change 9	Support	Generally support the overall framework of Plan Change 9.
193.1	Bruce	Mackay	Heinz Wattie's Limited	Proposed TANK Plan Change 9	Amend	Seeks any consequential amendments arising out of the relief as sought.
193.14	Bruce	Mackay	Heinz Wattie's Limited	Proposed TANK Plan Change 9	Not Stated	Where this submission aligns with submissions made by Winegrowers and Horticulture New Zealand, Heinz Wattie's supports those submissions.
194.1	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Proposed TANK Plan Change 9	Support	Generally supports (with some amendments) the proposed objectives, policies, and rules of PC9 as appropriately recognising and providing for primary production activities (and viticulture in particular).
194.9	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Proposed TANK Plan Change 9	Not Stated	Has drafting flaws such that the intent of the objectives, policies, rules, and schedules is sometimes unclear, including as a result of inconsistent intent and terminology. Much of the evidential basis and explanation sits outside of PC9 in the form of fact sheets, and instead needs to be clearly incorporated within the plan change itself.
194.10	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Proposed TANK Plan Change 9	Not Stated	PC9 would result in a substantial reduction in the water available to PRWM's operations and will result in less water than has been required in recent years. The viability and economic costs and benefits on primary production have not been adequately addressed through the analysis and reporting process.
194.11	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Proposed TANK Plan Change 9	Not Stated	PC9 unduly locks-in existing viticultural land uses, because they have an existing low water usage, and the provisions of PC9 would inappropriately restrict any change in land use and/or crop density, reestablishment, and the ability to attain more water than currently allocated, due to the definition of actual and reasonable.
194.12	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Proposed TANK Plan Change 9	Not Stated	Concerned about economic issues: water allocation restrictions will have economic costs, actual and reasonable use will have economic opportunity costs, transfer of permit provisions raises issues around the capital value of high water use existing land uses, cost in constraining new or expanding irrigation-dependent crops, not allowing the market to determine the highest and best use of water.
194.14	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Proposed TANK Plan Change 9	Not Stated	Seeks generally that PC9 be amended to give effect to the NPS-FM and achieve consistency with the NES-FW, insofar as this is consistent with the relief sought in this submission.
194.17	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Proposed TANK Plan Change 9	Amend	Such other, further, consequential or alternative amendments as may be appropriate to address concerns.
194.54	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Proposed TANK Plan Change 9	Not Stated	New policy/clause for avoiding the death of crops - Insert a new policy/clause that reflects POL TT9(1)(f)(iva) of the RRMP. This should allow 'the taking of water authorised for the sole purpose of avoiding the death of horticultural or viticultural root stock or crops shall be allowed to occur to any extent allowed by conditions of consent...'
194.55	Ezekiel	Hudspith	Pernod Ricard Winemakers New Zealand Limited	Proposed TANK Plan Change 9	Not Stated	New policy/clause for assessing stream depletion effect - Insert a new policy/clause that reflects POL TT11 of the RRMP.
196.1	Julian	Odering	Oderings Nurseries	Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
196.2	Julian	Odering	Oderings Nurseries	Proposed TANK Plan Change 9	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
196.4	Julian	Odering	Oderings Nurseries	Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
196.5	Julian	Odering	Oderings Nurseries	Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
196.6	Julian	Odering	Oderings Nurseries	Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand and New Zealand Apples and Pears submissions
196.7	Julian	Odering	Oderings Nurseries	Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
198.1	Cordelia	Woodhouse	Environmental Defence Society Inc	Proposed TANK Plan Change 9	Not Stated	There are structural difficulties with PC9. There is not a clear pathway with objectives flowing down through policies, rules and other methods. This makes interpreting the plan difficult and is likely to confuse both plan-users and decisionmakers.
198.2	Cordelia	Woodhouse	Environmental Defence Society Inc	Proposed TANK Plan Change 9	Not Stated	PC9 will not give effect to the provisions of the National Policy Statement for Freshwater Management (NPSFM) 2017, or the 2020 amendment which comes into effect in September 2020. It also fails to give effect to sustainable management purpose, matters of national importance and other matters in Part 2 Resource Management Act 1991 (RMA).
199.1	Peter	Robertson	Brookfields Vineyards/Ohiti Estate	Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that best balances the values and interests of the Hawke's Bay community.
199.2	Peter	Robertson	Brookfields Vineyards/Ohiti Estate	Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reached by the TANK Group community representatives.
199.3	Peter	Robertson	Brookfields Vineyards/Ohiti Estate	Proposed TANK Plan Change 9	Not Stated	I SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
200.3	Ray	Knowles	Aspyron Trust	Proposed TANK Plan Change 9	Not Stated	HBRC lack of transparency - information outlined in submission is made available to the public via the HBRC website within the earliest possible timeframe. Such information should be presented in an easy to find & easy to decipher format for the layman by catchment. Consent holders need to be listed by catchment & ranked within that catchment by % of allocatable take from highest to lowest.
201.12	Liz	Munroe	Heretaunga Tamatea Settlement Trust	Proposed TANK Plan Change 9	Not Stated	Aligning with guiding legislation - PC9 has been notified prematurely and in haste, ahead of the NPS FM2020. PC9 does not meet the hierarchy of obligations set out in NPS FM2020 and will need to be amended to ensure freshwater is managed in a way that gives effect to Te Mana o te Wai.

201.13	Liz	Munroe	Heretaunga Tamatea Settlement Trust	Proposed TANK Plan Change 9	Not Stated	Intent of the Plan - many sections are centered on a desire to 'enable' or 'allow for' activities, rather than to avoid or remedy the effects. This is a move away from the prescription of the RMA legislation and potentially ultra vires.
201.14	Liz	Munroe	Heretaunga Tamatea Settlement Trust	Proposed TANK Plan Change 9	Not Stated	Intent of the Plan - Risk in achieving the outcomes promoted by PC9 with non-regulatory methods. PC9 takes a "hands off" approach and does not address with urgency the changes required to meet the governments short term objectives for improved water quality within 5 years, or the longer term outcomes sought by 2040. Regulation is needed to provided legal tools to ensure accountability.
202.1	Donna	Awatere Huata	Māori Climate Commission	Proposed TANK Plan Change 9	Amend	We advise that before we even progress to agreeing suitable settings and frameworks it must be understood and addressed by the HBRC that you cannot do this alone.
202.2	Donna	Awatere Huata	Māori Climate Commission	Proposed TANK Plan Change 9	Amend	Those Tangata Whenua impacted negatively by this Plan Change 9 must at a minimum get a seat at the table and the mechanism for Maori to stand side by side with Councillors and staff and co-design settings and frameworks must be put in place.
202.3	Donna	Awatere Huata	Māori Climate Commission	Proposed TANK Plan Change 9	Not Stated	Supports the alignment of Plan Change 9 with the National Policy Statement on Freshwater Management.
202.4	Donna	Awatere Huata	Māori Climate Commission	Proposed TANK Plan Change 9	Amend	Supports the HBRC altering Plan Change 9 so as to meet the hierarchy of obligations set out in NPSFM 2020 and supports amending PC 9 to ensure freshwater is managed in a way that gives effect to Te Mana o te Wai
202.5	Donna	Awatere Huata	Māori Climate Commission	Proposed TANK Plan Change 9	Not Stated	Supports the recommendations made by the Heretaunga Settlement Trust and urges staff and Councillors to set aside the Pakeha lens that currently provides an advantage to those who have water over those who do not and to those who pollute over those who suffer from that pollution.
202.10	Donna	Awatere Huata	Māori Climate Commission	Proposed TANK Plan Change 9	Amend	Requests that the HBRC commits to the partnership approach outlined in Te Mana o Te Wai and stops trying to maximise protection for HB's water barons and polluting farmers.
203.1	Mark	Laurenson	The Oil Companies (Z Energy Limited, BP Oil Limited, Mobil Oil NZ Limited)	Proposed TANK Plan Change 9	Amend	Achieve the following: <ul style="list-style-type: none"> • The purpose and principles of the Resource Management Act 1991 (RMA) and consistency with the relevant provisions in Sections 6 - 8 RMA; • Give effect to the National Policy Statement for Freshwater Management and the RPS provisions in the operative RRMP; • Assist the Council to carry out its functions under Section 30 RMA; • Meet the requirements of the statutory tests in section 32 of the RMA; and • Avoid, remedy or mitigate any relevant and identified environmental effects; Make any alternative or consequential relief as required to give effect to this submission, including any consequential relief required in any other sections of the RRMP that are not specifically subject of this submission but where consequential changes are required to ensure a consistent approach is taken throughout the document; and Any other relief required to give effect to the issues raised in this submission.
204.1	Juliet	Gray	Peter Lyons Trust (Lyons Vineyard)	Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that best balances the values and interests of the Hawke's Bay community.
204.2	Juliet	Gray	Peter Lyons Trust (Lyons Vineyard)	Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reached by the TANK Group community representatives.
204.3	Juliet	Gray	Peter Lyons Trust (Lyons Vineyard)	Proposed TANK Plan Change 9	Not Stated	I SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
206.1	Waiariki	Davis	Waipatu Marae	Proposed TANK Plan Change 9	Oppose	Opposes the proposed plan change
206.2	Waiariki	Davis	Waipatu Marae	Proposed TANK Plan Change 9	Not Stated	Supports submissions made by Ngati Kahungunu Iwi Incorporated and Te Taiwhenua o Heretaunga
207.80	Mark	Clews	Hastings District Council	Proposed TANK Plan Change 9	Support	HDC supports the HBRC's and the TANK Group's objective to improve water quality and to the manage allocation of water in the Greater Heretaunga Freshwater catchments. But seeks that Change 9 is amended to better enable the community to transition to a new future around water use, while still providing for growth and enhancement in community wellbeing and prosperity to be considered.
208.1	Emma	Taylor	Villa Maria Estate Limited	Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that best balances the values and interests of the Hawke's Bay community.
208.2	Emma	Taylor	Villa Maria Estate Limited	Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reachedby the TANK Group community representatives.
208.3	Emma	Taylor	Villa Maria Estate Limited	Proposed TANK Plan Change 9	Not Stated	I SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
208.4	Emma	Taylor	Villa Maria Estate Limited	Proposed TANK Plan Change 9	Not Stated	I am concerned that PC9's approach to allocation of water and control of farming emissions unfairly penalises viticultural landowners as very low water users and very low emitters compared to other major primary production systems.
209.1	Waiariki	Davis		Proposed TANK Plan Change 9	Oppose	I oppose the provisions in PC9.

210.1	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Proposed TANK Plan Change 9	Not Stated	Forest & Birds relief sought includes all similar and consequential relief to address these submissions.
210.5	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Proposed TANK Plan Change 9	Amend	Move the following policies to a separate methods section of the plan: <ul style="list-style-type: none"> •Priority Management Approach 2, 3, 4, 5 •Protection of Source Water 6, 9 •Riparian Land management 11, 12, 13 •Wetland and lake management 14, 15 •Phormidium management 16 •Adaptive management 17, 18 •Industry programmes 23, 24 •Management and compliance 26 •Timeframes 27 •Consistency and Collaboration 31 •Ahuriri Catchment 32 •Policies Monitoring and review 33, 34, 35 •Flow maintenance 41 Note that inclusion in this list is not representative of whether Forest & Bird supports or opposes the provision. See specific relief later.
210.6	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Proposed TANK Plan Change 9	Amend	Amend policies (and related provisions) to ensure consistency of terminology and referencing throughout the plan.
210.7	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Proposed TANK Plan Change 9	Amend	Align the format and content of the policies (and all sections of the plan) with the National Planning Standards
210.8	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Proposed TANK Plan Change 9	Amend	Amend all policies to give effect to the NPSFM 2017, in part by removing the substantial bias towards non-regulatory mechanisms for achieving the objectives of the plan (particularly those objectives in Schedules 26, 27, and 31).
210.9	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Proposed TANK Plan Change 9	Amend	Remove the phrasing throughout the plan that 'enables,' 'provides for,' and 'allows,' potentially environmentally damaging activities to be undertaken.
210.10	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Proposed TANK Plan Change 9	Amend	Where non-regulatory mechanisms are to remain in PC9, clarify the link between the objectives, policies, and any non-regulatory methods that arise to clearly illustrate how those methods will achieve the outcomes sought in the objectives; and clearly illustrate what regulatory mechanisms are available to the Council where those would be more effective in achieving <u>outcomes than non-regulatory methods</u> .
210.11	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Proposed TANK Plan Change 9	Amend	Clarify the circumstances in which non-regulatory mechanisms would not be suitable for managing an activity, so that decision-makers are <u>clearly guided through decisions on managing such activities</u> .
210.14	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Proposed TANK Plan Change 9	Amend	Clearly identify Freshwater Management Units relevant to PC9
210.18	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Proposed TANK Plan Change 9	Amend	Add the following policies: <ul style="list-style-type: none"> •Insert Policy A4 of the NPSFM until such time as Policies A1 and A2 are both given effect to. •Insert Policy B7 of the NPSFM until such time as Policies B1, B2 and B6 are both given effect to
210.19	Tom	Kay	Royal Forest and Bird Protection Society of New Zealand (Forest & Bird)	Proposed TANK Plan Change 9	Amend	Timeframes need to be clearly stated and associated with outcomes/objectives/targets
211.1	Brian	McLay		Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
211.2	Brian	McLay		Proposed TANK Plan Change 9	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
211.4	Brian	McLay		Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues <u>collectively to improve the effectiveness of the response to water issues</u> .
211.5	Brian	McLay		Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
211.6	Brian	McLay		Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
211.7	Brian	McLay		Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
212.1	Lyn	Pohe	Omahu School	Proposed TANK Plan Change 9	Oppose	Oppose TANK Plan Change.
213.1	Peter	Scott	The Wine Portfolio	Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that <u>best balances the values and interests of the Hawke's Bay community</u> .
213.2	Peter	Scott	The Wine Portfolio	Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reached by the TANK Group community representatives.
213.3	Peter	Scott	The Wine Portfolio	Proposed TANK Plan Change 9	Not Stated	I SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.

213.4	Peter	Scott	The Wine Portfolio	Proposed TANK Plan Change 9	Not Stated	I am concerned that PC9's approach to allocation of water and control of farming emissions unfairly penalises viticultural landowners as very low water users and very low emitters compared to other major primary production systems.
214.1	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
214.2	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Proposed TANK Plan Change 9	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
214.4	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
214.5	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
214.6	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
214.7	Scott	Lawson	Hawkes Bay Vegetable Growers Association	Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
215.1	Peter	Dooney	Dooney Partnership	Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
215.4	Peter	Dooney	Dooney Partnership	Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
215.5	Peter	Dooney	Dooney Partnership	Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
215.6	Peter	Dooney	Dooney Partnership	Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
215.7	Peter	Dooney	Dooney Partnership	Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
Y	Phillipa	McVeagh	New Zealand Apples & Pears	Proposed TANK Plan Change 9	Support	Supports the overall focus of maintain and/or improving water quality and acknowledges that it is important to plan how we address and manage this into the future. Industry supports the general principles of what PC9 has set out to achieve.
216.2	Phillipa	McVeagh	New Zealand Apples & Pears	Proposed TANK Plan Change 9	Not Stated	The value of horticulture, its contribution to export earnings, its role in providing for domestic food supply and security, and the ability to feed people in the future particularly in a changing climate, is not currently reflected in the proposed Plan Change 9.
216.3	Phillipa	McVeagh	New Zealand Apples & Pears	Proposed TANK Plan Change 9	Not Stated	The economic impact to the region through potential adverse effects from the implementation of the plan have not been adequately understood. Economic analysis does not appear to be fairly addressed.
216.4	Phillipa	McVeagh	New Zealand Apples & Pears	Proposed TANK Plan Change 9	Not Stated	The plan lacks detail in certain areas and on how the rules will be implemented. Without clear detail on how the plan will be implemented, industry cannot assess the true impact on the orchards and to the region.
216.5	Phillipa	McVeagh	New Zealand Apples & Pears	Proposed TANK Plan Change 9	Not Stated	Supports only changes in the plan that can confidently show meaningful gain to the environment. Restrictions should only be considered where there is clearly researched and articulated risk vs reward studies that accurately quantify the expected impact of potential restrictions on both growers and the environment.
216.12	Phillipa	McVeagh	New Zealand Apples & Pears	Proposed TANK Plan Change 9	Not Stated	PC9 should have underlying rules directing that if new information or science reveals a rule or implementation of the rule to be having incorrect consequences or reveals a better approach the most informative and recent science must be taken into account and used to correct the plan or the direction of implementation.
216.17	Phillipa	McVeagh	New Zealand Apples & Pears	Proposed TANK Plan Change 9	Not Stated	Encourages the plan to be able to incorporate new solutions and innovations. Where science shows new solutions that are more appropriate or have more relevance to creating desired outcomes – there is an ability to not just create rule exceptions but to replace with these with new solutions.
216.23	Phillipa	McVeagh	New Zealand Apples & Pears	Proposed TANK Plan Change 9	Not Stated	Believe that we need to allow time for changes to be implemented, but also we believe it is critical to work with growers as they require assurance that they can continue to operate, environmentally and economically sustainably, for them to make investments in infrastructure etc.
217.1	Paul	Paynter	Johnny Appleseed Holdings Ltd	Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
217.2	Paul	Paynter	Johnny Appleseed Holdings Ltd	Proposed TANK Plan Change 9	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
217.3	Paul	Paynter	Johnny Appleseed Holdings Ltd	Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
217.4	Paul	Paynter	Johnny Appleseed Holdings Ltd	Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
217.5	Paul	Paynter	Johnny Appleseed Holdings Ltd	Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
217.6	Paul	Paynter	Johnny Appleseed Holdings Ltd	Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
217.75	Paul	Paynter	Johnny Appleseed Holdings Ltd	Proposed TANK Plan Change 9	Amend	Policies need to reflect the dynamic realities of water takes, the relative necessity of minimum water takes and extreme variation in economic impacts caused by water restrictions or bans. Specific ideas provided including using actual water use from 2020, and having multiple levels of water allocation.

218.1	Adrian	Mannering	Irrigation Services	Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
218.2	Adrian	Mannering	Irrigation Services	Proposed TANK Plan Change 9	Amend	Amend Change 9 to ensure that sufficient water is available to provide for the critically important role of horticulture to the future sustainability of the TANK Catchments.
218.4	Adrian	Mannering	Irrigation Services	Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
218.5	Adrian	Mannering	Irrigation Services	Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
218.6	Adrian	Mannering	Irrigation Services	Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
218.7	Adrian	Mannering	Irrigation Services	Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
219.1	Michael & Julie	Russell		Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
219.4	Michael & Julie	Russell		Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
219.5	Michael & Julie	Russell		Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
219.6	Michael & Julie	Russell		Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
219.7	Michael & Julie	Russell		Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
220.1	Steve	Gillum	Gillum Springfield Trust	Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
220.4	Steve	Gillum	Gillum Springfield Trust	Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
220.5	Steve	Gillum	Gillum Springfield Trust	Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
220.6	Steve	Gillum	Gillum Springfield Trust	Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
220.7	Steve	Gillum	Gillum Springfield Trust	Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
221.1	WT	Scott		Proposed TANK Plan Change 9	Support	Support the overall framework of Plan Change 9 to the degree that it reflects a staged approach to improving the management of the TANK Catchments freshwater resources.
221.4	WT	Scott		Proposed TANK Plan Change 9	Support	No specific decision requested but states support for the ability for a group of landowners to be able to manage environmental issues collectively to improve the effectiveness of the response to water issues.
221.5	WT	Scott		Proposed TANK Plan Change 9	Amend	Amend Change 9 so that it better enables collective approaches to water and nutrient management by reducing the level of detail and specificity in the plan.
221.6	WT	Scott		Proposed TANK Plan Change 9	Not Stated	No specific decisions requested but states support for the Horticulture New Zealand submission, where it aligns with this submission.
221.7	WT	Scott		Proposed TANK Plan Change 9	Amend	No specific decision requested but notes that there are likely to be consequential amendments arising from other decision requests that may affect the whole plan.
222.1	Owen Jerry	Hāpuku		Proposed TANK Plan Change 9	Oppose	Opposes provisions relating to water quantity issues, water quality issues and water source protection for communities less than 500 (papakainga)
222.7	Owen Jerry	Hāpuku		Proposed TANK Plan Change 9	Not Stated	Make any consequential changes to Plan Change 9 to give effect to the relief sought through my submission.
223.1	Jenny	Winipere Mauger	Ngā Kaitiaki o te Awa a Ngaruroro	Proposed TANK Plan Change 9	Oppose	Opposes in parts the provisions in Plan Change 9
223.5	Jenny	Winipere Mauger	Ngā Kaitiaki o te Awa a Ngaruroro	Proposed TANK Plan Change 9	Not Stated	We recommend your team engage someone with cultural competency to analyse the majority of submissions made by Maori and our respective organisations, to elucidate the contents.
223.6	Jenny	Winipere Mauger	Ngā Kaitiaki o te Awa a Ngaruroro	Proposed TANK Plan Change 9	Not Stated	We recommend that HBRC and the Environment Court engage a Maori translator and interpreter for the oral submissions.
223.7	Jenny	Winipere Mauger	Ngā Kaitiaki o te Awa a Ngaruroro	Proposed TANK Plan Change 9	Not Stated	HBRC committing to cultural auditing annually until desired outcomes are reached.
223.8	Jenny	Winipere Mauger	Ngā Kaitiaki o te Awa a Ngaruroro	Proposed TANK Plan Change 9	Not Stated	We support the submissions of the whanau, hap u, organisations of Ngati Hinemanu me Ngai Te Upokoiri me nga Piringa Hapu Authority, Te Taiwheuna o Heretaunga, Ngati Kahungunu Iwi Inc and associated whanau / hapu.
224.1	Peter	Holley	Mission Estate Winery	Proposed TANK Plan Change 9	Not Stated	We strongly support the Hawke's Bay Winegrowers submission.
224.2	Peter	Holley	Mission Estate Winery	Proposed TANK Plan Change 9	Support	Supports the Hawke's Bay Wine Growers and the overall intent of PC9.
224.8	Peter	Holley	Mission Estate Winery	Proposed TANK Plan Change 9	Oppose	No specific relief requested but raises economic concerns
224.9	Peter	Holley	Mission Estate Winery	Proposed TANK Plan Change 9	Amend	It is strongly recommended that the HBRC take note of the company's position and seek to achieve a balance that strikes an accord between best practice environmental management whilst simultaneously recognizing the economic imperatives within the region.

225.1	Mary	Tukiwaho		Proposed TANK Plan Change 9	Oppose	Oppose the current TANK plan as it needs be readdressed and re-written due to it been deliberately vague around current management, implementation and monitoring systems as it is being mismanaged by current bodies.
225.2	Mary	Tukiwaho		Proposed TANK Plan Change 9	Oppose	Working alongside tangata whenua who would co-own, co-governance, co-manage with the possibility of a percent of stored water for those in need at all times. This would ensure a partnership between Tangata whenua and Crown as well as external organisations as stated within the Treaty of Waitangi thus ensuring a continual rise in employment with the alternative or the expectation of training in areas needed to enable this partnership to work.
225.12	Mary	Tukiwaho		Proposed TANK Plan Change 9	Not Stated	Support ALL the submissions submitted by whanau, tangata whenua o Ngati Kahungunu, hapu, Te Taiwhenua o Heretaunga and Ngati Kahungunu Iwi Inc.
226.1	Jane	Morrell		Proposed TANK Plan Change 9	Oppose	Oppose HBRC's Water Plan.
226.2	Jane	Morrell		Proposed TANK Plan Change 9	Not Stated	No relief stated but raises issues around Karewarewa drying up from farmers and vineyards taking the water from the aquifer, making man made dams, polluting the quality of drinking water, leeches in the ponds/dams, no flounders in Ngaruroro and gating and padlocking the area to the river.
227.1	Peter	MacGregor	Owhaoko C Trust	Proposed TANK Plan Change 9	Oppose	Oppose the current approach you are and or have developed to advance TANK it is form and the changes you wish to seek.
227.2	Peter	MacGregor	Owhaoko C Trust	Proposed TANK Plan Change 9	Not Stated	We have never been engaged directly in the TANK process and in the second instance the matter of the proposed WCO is not settled and as such what the TANK proposes excises Maori – Mana whenua and allows the Crown to continue on unabated and unchallenged on advice internal to its function and “committees” and some cloaked as tangata whenua.
228.1	Tania	Huata Kupa		Proposed TANK Plan Change 9	Not Stated	I tautoko the previous korero from our chairman Peter MacGregor and the submission from the writer Marei Apatu of Te Taiwhenua o Heretaunga on behalf of Te Manaaki Taiao and Te Runanganui
229.5	Angie	Denby	Ahuriri Estuary Protection Society INC	Proposed TANK Plan Change 9	Amend	For issues (stormwater quality, Te Mana o Te Wai, climate change, water quality, invasive species) we need measurable outcomes and strong enforceable standards.
229.6	Angie	Denby	Ahuriri Estuary Protection Society INC	Proposed TANK Plan Change 9	Amend	Any implementation strategies should be a part of the regulatory plan and council should be accountable for them. They should not sit outside the plan change in documents with no legal force.
229.7	Angie	Denby	Ahuriri Estuary Protection Society INC	Proposed TANK Plan Change 9	Amend	Council needs to have scope to take appropriate action when outcomes are not achieved.
230.1	Christine	Kidwell		Proposed TANK Plan Change 9	Not Stated	No specific relief stated but raises issues including food sources have been depleted, rivers have been raped and mutilated by machines as a commodity for supply and demand, Marae now depend on our fish quota from another source, wastewater pollution from increased housing developments has had major impacts on rivers, and the scarcity and polluted wai issue is urgent and now is the time to act.
232.1	Levi	Walford	Matahiwi Marae	Proposed TANK Plan Change 9	Oppose	Oppose provisions in Change 9 relating to water quality, water quantity, and impact of land use.
234.2	Stephen	Randell	Hope Monitoring Omahu	Proposed TANK Plan Change 9	Not Stated	The use of matauranga Maori integrated with Western science is a key element. Recognise Maori intergenerational learning.
234.3	Stephen	Randell	Hope Monitoring Omahu	Proposed TANK Plan Change 9	Not Stated	Collaboration with whanau, hapu, iwi, kaitiaki marae, communities with industry and standard setting bodies.
234.4	Stephen	Randell	Hope Monitoring Omahu	Proposed TANK Plan Change 9	Not Stated	Respect mana and traditions handed down by our Tipuna. All tikanga and kawa for all Tena Koto Katoa.
235.2	Graeme	Wedd	Rotoma Station Trust	Proposed TANK Plan Change 9	Not Stated	No interest in plan change 6 solving problems. Any cropping is done for sustainability and welfare of the land not to pollute the waterways.
235.3	Graeme	Wedd	Rotoma Station Trust	Proposed TANK Plan Change 9	Not Stated	Cannot exist under plan change 7. We have 10,000 stock units needing average of 20 lts per day. We have 3 families in houses on the property.
236.1	Kenneth	Mark		Proposed TANK Plan Change 9	Oppose	No specific relief requested but raises concerns relating to the timing of consultation.
236.4	Kenneth	Mark		Proposed TANK Plan Change 9	Oppose	Opposes any reference throughout the TANK plan to "2 May 2020" as the commencement date for compliance.
237.1	Kev	England	Whitewater NZ Incorporated	Proposed TANK Plan Change 9	Not Stated	Strongly feel that WWNZ should have been invited to contribute to every stage of the planning process. WWNZ are a large stakeholder group.
237.2	Kev	England	Whitewater NZ Incorporated	Proposed TANK Plan Change 9	Not Stated	PC9 fails to give effect to the RPS, NPSFM20, Part 2 of the RMA and the s32 assessment is deficient.
237.3	Kev	England	Whitewater NZ Incorporated	Proposed TANK Plan Change 9	Oppose	Suggest the plan change is scrapped and re-developed with proper attention to Te Mana O Te Wai, legal processes and to the interests of all stakeholders.
237.4	Kev	England	Whitewater NZ Incorporated	Proposed TANK Plan Change 9	Amend	Re-draft a more concise set of objectives and policies, and include rules that will ensure that the objectives and policies are achieved.
238.1	Emma	Taylor	Gimblett Gravels Winegrowers Association	Proposed TANK Plan Change 9	Support	I SUPPORT the overall framework of PC9, to the degree that it reflects agreements reached by the TANK Group community representatives, developed over more than 6 years of intensive dialogue and providing an integrated catchment solution that best balances the values and interests of the Hawke's Bay community.
238.2	Emma	Taylor	Gimblett Gravels Winegrowers Association	Proposed TANK Plan Change 9	Oppose	I OPPOSE elements of PC9 that do not reflect those agreements reached by the TANK Group community representatives.
238.3	Emma	Taylor	Gimblett Gravels Winegrowers Association	Proposed TANK Plan Change 9	Not Stated	I SUPPORT THE AMENDMENTS proposed by Hawke's Bay Winegrowers' Association Inc. in their submission dated 14 August 2020.
240.1	Te Kaha	Hawaikirangi	Ngāti Pārau Hapū Trust	Proposed TANK Plan Change 9	Not Stated	Raise our concern with the level of consideration afforded to the Nga Hapu o Tutaekuri, Awa Management and Enhancement Plan and the level of engagement from the Council. Namely, in regards to taking into account this hapu planning document which has been lodged with the council, to the extent that its content has a bearing on the plan.

240.2	Te Kaha	Hawaikirangi	Ngāti Pārau Hapū Trust	Proposed TANK Plan Change 9	Not Stated	Raise our concern with the level of engagement mana whenua representatives held in the TANK stakeholder process. Namely, that mana whenua representatives were grouped as stakeholders, not as treaty partners.
240.3	Te Kaha	Hawaikirangi	Ngāti Pārau Hapū Trust	Proposed TANK Plan Change 9	Not Stated	We have a concern with the clarity of the processes to engage a regulatory approach if an individual within the industry programmes or collectives fails to meet specified limits or management measures.
240.4	Te Kaha	Hawaikirangi	Ngāti Pārau Hapū Trust	Proposed TANK Plan Change 9	Not Stated	There is no mechanism to enable matauranga Maori assessment and monitoring with regards to resource consents.
240.10	Te Kaha	Hawaikirangi	Ngāti Pārau Hapū Trust	Proposed TANK Plan Change 9	Not Stated	Appropriate FMU size/spatial extent for surface water management zones for hapu based environmental/cultural monitoring, accounting and reporting.
240.18	Te Kaha	Hawaikirangi	Ngāti Pārau Hapū Trust	Proposed TANK Plan Change 9	Not Stated	Amend and/or add to the plan the connection of cultural values with specific rules.
240.23	Te Kaha	Hawaikirangi	Ngāti Pārau Hapū Trust	Proposed TANK Plan Change 9	Not Stated	Unsustainable extraction of gravel, not reaching the Waitangi estuary and coastal area.
241.1	Penny and John	Reynolds		Proposed TANK Plan Change 9	Not Stated	Support the proposals in the Ngaruroro Irrigation Society and endorse submissions by Horticulture NZ and Beef + Lamb NZ.
241.2	Penny and John	Reynolds		Proposed TANK Plan Change 9	Not Stated	Broadly supports themes of the TANK Objectives but consider policies, rules and regulations do not adequately balance social, environmental and economic sustainability and they must be based on sound science and evidence.
241.16	Penny and John	Reynolds		Proposed TANK Plan Change 9	Not Stated	The social and economic consequences for the local community have therefore also not been considered. The value of HB's agriculture and its role in providing for domestic food supply and security, export value and the ability to feed people in the future are not reflected in the proposed TANK plan change 9.
