Yes

**\* 1. The specific parts of the application that my submission relates to are:**

All parts of the application to alter the designation to the Omarunui Landfill ( D123) to provide for the construction and operation of area B for waste disposal (RMA20190573)

**\* 2. My submission is: (include whether you support, oppose or are neutral to specific parts of the notice of requirement or wish to have them amended; and the reasons for your views.**

That permission should not be granted to alter the original consent. Area B should not be developed for waste disposal. The Tonkin & Taylor report states that the Upokohino stream is of low ecological value and has low sensitivity as a receiving environment in its current condition. This ignores potential downstream effects. Many statements included in the report show the potential for further degradation of the stream. In higher flows, the stream fills Lake Rotokare which is significant to Maori for gathering of kai as well as being an important recreational gamebird hunting location. We believe that further degradation of this lake is unacceptable.

Part 5.2.1.4 of the T&T report states the aquifer is unconfined. In 10.6.2.2 it talks of unforeseen circumstances which could cause contamination of ground water. Your own modelling leachate shows there is a potential risk to groundwater. We believe this risk is unacceptable.
